Overview

ABSTRACT

The Integrated Living Conditions Survey (ILCS) was first conducted in Armenia in 1996 followed by another round in 1998/99. Thereafter, it has been conducted every year since 2001. The survey is carried out during the year with monthly shift (rotation) of households and communities. Findings of the survey are primarily used to estimate consumption-based poverty rates in the

country, as well as to provide valuable information on households' living conditions by means of other indicators.

KIND OF DATA
Sample survey data [ssd]

UNITS OF ANALYSIS
- Households;

- Individuals.

Scope

NOTES

The scope of the Integrated Living Conditions Survey includes:

- Housing Conditions;
- Education;
- Agriculture;

Sampling

Sampling Procedure

Sample design

Sampling frame: Population census

The sampling frame is updated: every year

Procedure used to update the sampling frame: No update till new Census

Lowest level of geographic disaggregation for which reliable estimates of the unemployment rate can be produced and their frequency: Settlement (annual)

The sample is stratified: Yes

Variables used for stratification: geographic region, urbanisation, population size of locality

Number of sampling stages: 2

Ultimate sampling units: households

Number of ultimate sampling units per sample area: 8

Sample size: 656 ultimate sampling units per month

Sample fraction: 1% of the total population

Comments: Before the beginning of the observation year the sample frame is constructed; every month the enumeration areas and households are rotated. Every interviewer visits 8 households per month.

Questionnaires

Overview

The Questionnaire is filled in by the interviewer in the course of at least five visits to households per month. During face-to-face interviews with the household head or another knowledgeable adult member, the interviewer collects information on the composition and housing conditions of the household, the employment status, educational level and health condition of the members, availability and use of land, livestock, and agricultural machinery, monetary and commodity flows between households, and other information.

The 2018 survey questionnaire had the following sections: (A) List of Household Members, (B) Migration, (C) Housing Conditions, (D) Employment, (E) Education, (F) Agriculture, (G) Food Production, (H) Monetary and Commodity Flows between Households, (I) Health (General) and Healthcare, (J) Debts, (K) Subjective Estimation of the Living Standard, (L) Provision of Services, (M) Social Assistance, (N) Activities of Private Households as Employers and Undifferentiated Production Activities of Private Households, (O) Monthly Consumption of Energy Carriers in Households, and (P) Global Food Insecurity Experience Scale.

The Diary is completed directly by the household during one month. Every day the household would record all its expenditures on food, non-food products and services, also giving a detailed description of such purchases; e.g. for food products the name, quantity, cost, and place of purchase of the product is recorded. Besides, the household records its consumption of food products received and used from its own land and livestock, as well as from other sources (e.g. gifts, humanitarian aid). Non-food products and services purchased or received for free are also recorded in the diary. Then, the household records its income received during the month. At the end of the month, information on rarely used food products, durable goods and ceremonies is recorded, as well. The records in the diary are verified by the interviewer in the course of 5 mandatory visits to the household during the survey month.

The Survey Diary has the following sections: Section X: (X.1) food purchased during the day, (X.2) food consumed at home during the day, (X.3) Food consumed outside, (X.4) non-food products purchased and services received, (Table X.5) All other non-food products and services received free of charge ; Section Y - (Table Y.1) Diary of Household Income and Revenues; and Section Z - (Table Z.1) Salary, (Table Z.2) Food which is usually consumed daily in little quantity, (Table Z.3) List of real estate, durable goods and ritual services, (Table Z.4) Days absent.

The interviewer's manual provides detailed instructions for completing the questionnaire and the diary.

The Questionnaire, the Diary and the Interviewer's Manual are revised and adjusted, as appropriate, prior to the launch of the survey. Starting from 2012, data are codified under the "Classification of Individual Consumption by Purpose" (COICOP) classifier.
