Cambodia	KHM

STUDY TYPE

Socio-Economic/Monitoring Survey [hh/sems]

SERIES INFORMATION

The World Bank is providing support to the Royal Government of Cambodia to help mitigate the spread and impact of the 2019 coronavirus disease (COVID-19) pandemic. One area of support is data collection. Data will provide evidence that will inform the government response. This effort is part of a broader World Bank initiative, aiming at conducting national longitudinal or cross-sectional high-frequency survey data that can be used to help assess the economic and social implications of the COVID-19 pandemic on households and individuals across the World. The Cambodia COVID-19 High-Frequency Phone Survey (HFPS) draws its sample from the nationally representative Cambodia Socio-Economic Survey which was implemented from July 2019 to June 2020 by the National Institute of Statistics (NIS).

ABSTRACT

To monitor the socioeconomic impacts of the coronavirus disease 2019 (COVID-19) pandemic and inform policy responses and interventions, the COVID-19 High-Frequency Phone Survey (HFPS) of households was designed as part of a World Bank global initiative. For Cambodia, a total of 5 survey rounds are planned, with households being called back every 1 to 2 months. This allows for the impact of the pandemic to be tracked as it unfolds and provides data to the government and development partners in near real-time, supporting an evidence-based response to the crisis. Two additional rounds are conducted in 2022. Due to the higher attrition rate of LSMS+, the World Bank team decided to use the same sample of households that had been interviewed for the 2019/2020 Cambodia Socio-Economic Survey (CSES) implemented from July 2019 to June 2020 by the National Institute of Statistics (NIS). The CSES is representative at national and urban/rural level.

The extensive information collected in CSES 2019/20 provides a rich set of background information on which the COVID-19 High-Frequency Phone Survey of households can be leveraged to assess the differential impacts of the pandemic in the country. Data collection of the Cambodia COVID-19 HFPS based on CSES sample started in February 2022. The HFPS interviewed 1698 households from the 2019/20 CSES with a phone number. Sampling weights were adjusted to make sure that the surveyed sample remains representative at national and urban/rural.

The questionnaire covers a series of topics, such as access to food, food insecurity, impact of the Covid-19 on income sources and coping mechanisms, access to social assistance, and impact of Covid-19 on economic activity. The questionnaire is designed to be administered between 20 to 25 minutes. The survey is implemented using Computer Assisted Telephone Interviewing.

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

- Households
- Individuals

Version

VERSION DESCRIPTION

Version 04: Edited, anonymized dataset for internal use only

VERSION DATE

2022-12-12

VERSION NOTES

This version includes Round 6 and 7 data.

Scope

NOTES

The Cambodia COVID-19 High Frequency Phone Survey of Households covered the following topics:

- Household Roster (Round 1, 2, 3, 4, 5, 6, 7)
- Knowledge Regarding the Spread of COVID-19 (Round 1, 3)
- Behavior and Social Distancing (Round 1)
- Migration (Round 2)
- Access to Basic Services (Round 1, 2, 3, 4, 5, 6, 7)
- Employment (Round 1, 2, 3, 4, 5, 6, 7)
- Income Loss (Round 1, 2, 3, 4, 5, 6, 7)
- Coping/Shocks (Round 1, 4, 6, 7)
- Food Security (Round 1, 2, 3, 4, 5, 6, 7)
- Aid and Support/ Social Safety Nets (Round 1, 2, 3, 4, 5, 6, 7)

Coverage

GEOGRAPHIC COVERAGE

National coverage - rural and urban.

UNIVERSE

The survey covered all de jure households (with a phone number) excluding prisons, hospitals, military barracks, and school dormitories.

Sampling

SAMPLING PROCEDURE

The HFPS drew its sample from the Cambodia Socio-Economic Survey implemented from July 2019 to June 2020 by the National Institute of Statistics (NIS). The phone survey was successfully completed for 1706 households in February and

1698 households in April 2023.

WEIGHTING

Given the non-response rate, original CSES sample weights must be adjusted to obtain unbiased estimates from the sample.

To construct the adjusted sampling weights, we follow the steps outlined in Himelein, K. (2014):

1. Begin with base weights from the 2019/20 CSES for each household
2. Derive attrition-adjusted weights for all households by running a logistic response propensity model based on characteristics of the household head (i.e. education, labor force status, demographic characteristics), characteristics of the household (size, consumption, assets ownership), and characteristics of the dwelling (house ownership, overcrowding).
3. Trim weights by replacing the top one percent of observations with the 99th percentile cut-off point; and
4. Post-stratify weights to known population totals to correct for the imbalances across the five regions (Phnom Penh, Plain, Tonle Sap, Coastal, Plateau and Mountain). In doing so, we ensure that the distribution in the survey matches the distribution in the 2019 population and housing census.

Additional technical details and explanations on each of the steps briefly outlined above can be found in Himelein, K. (2014).

DATA COLLECTION MODE

Computer Assisted Telephone Interview [cati]

DATA COLLECTION NOTES

The Cambodia COVID-19 High Frequency Phone Survey of Households (HFPS) was conducted using Computer Assisted Telephone Interview (CATI) techniques. The household questionnaire was implemented using the CATI software, Survey Solution.

Enumerators used their own mobile phone devices. Enumerators were given data bundles, allowing for internet connectivity and daily synchronization with the server. Data was sent to the server daily.

Field Supervisors reviewed the survey with enumerators on a daily basis via one-on-one calls and were always available to address any concerns that arose while performing an interview. At the same time, a Research Analyst was in charge of checking the uploaded data daily to identify errors and notify supervisors so as to avoid further errors during ongoing survey implementation and future surveys.

A dashboard was established and updated daily. The dashboard has information on individual enumerator performance, such as the number of calls logged, duration of calls, percentage of calls responded to and percentage of non-consents. Non-consent reason rates and attempts per household were monitored as well. The dashboard was also used to track overall survey completion and preview the results of key questions.

Field Supervisors made callback checks to a random subsample of households that completed a survey in Round 1. Field Supervisors called these households and administered a short survey, including (i) identifying the same respondent; (ii) determining the respondent's position within the household; (iii) confirming that a member of the data collection team had completed the interview; and (iv) a few questions from the original survey.

questionnaires

QUESTIONNAIRES

The Cambodia COVID-19 High Frequency Phone Survey of households questionnaire consists of the following sections:

Round 1

- Interview Information
- Household Roster
- Knowledge Regarding the Spread of COVID-19
- Behaviour and Social Distancing
- Access to Basic Services
- Employment
- Income Loss
- Coping/Shocks
- Food Security
- Aid and Support/ Social Safety Nets

Round 2

- Interview Information
- Household Roster
- Migration
- Access to Basic Services
- Employment
- Income Loss
- Food Security
- Aid and Support/ Social Safety Nets

Round 3

- Interview Information
- Household Roster
- Knowledge Regarding the Spread of COVID-19
- Access to Basic Services
- Employment
- Income Loss
- Food Security
- Aid and Support/ Social Safety Nets
- Payment method

Round 4

- Interview Information
- Household Roster
- Access to Basic Services
- Employment
- Income Loss
- Coping/Shocks
- Food Security
- Aid and Support/ Social Safety Nets
- Payment method

Round 5

- Interview Information
- Household Roster
- Access to Basic Services
- Employment
- Income Loss
- Food Security

- Aid and Support/ Social Safety Nets

Round 6

- Interview Information
- Household Roster
- Social Economic Status
- Access to Basic Services
- Employment
- Income Loss
- Food Security
- Coping/Shocks
- Aid and Support/ Social Safety Nets
- Relief Transfer
- Education
- SWIFT

Round 7

- Interview Information
- Household Roster
- Social Economic Status
- Disability
- Access to Basic Services
- Employment
- Income Loss
- Food Security
- Coping/Shocks
- Aid and Support/ Social Safety Nets
- Relief Transfer
- Education
- SWIFT

data_processing

DATA EDITING

At the end of data collection, the raw dataset was cleaned by the Research team. This included formatting, and correcting results based on monitoring issues, enumerator feedback and survey changes.

Only households that consented to being interviewed were kept in the dataset, and all personal information and internal survey variables were dropped from the clean dataset.

Access policy

CONTACTS

CONFIDENTIALITY

Before being granted access to the dataset, all users have to formally agree: 1. To make no copies of any files or portions of filesto which s/he is granted access except those authorized by the data depositor. 2. Not to use any technique in an attempt to learnthe identity of any person, establishment, or sampling unit not identified on public use data files. 3. To hold in strictestconfidence the identification of any establishment or individual that may be inadvertently revealed in any documents ordiscussion, or analysis. Such inadvertent identification revealed in her/his analysis will be immediately brought to the attention ofthe data depositor.

ACCESS CONDITIONS

Before being granted access to the dataset, all users have to formally agree:

1. To make no copies of any files or portions of filesto which s/he is granted access except those authorized by the data depositor.
2. Not to use any technique in an attempt to learnthe identity of any person, establishment, or sampling unit not identified on public use data files.
3. To hold in strictest confidence the identification of any establishment or individual that may be inadvertently revealed in any documents ordiscussion, or analysis. Such inadvertent identification revealed in her/his analysis will be immediately brought to the attention ofthe data depositor.

CITATION REQUIREMENTS

Use of the dataset must be acknowledged using a citation which would include:

- the Identification of the Primary Investigator
- the title of the survey (including country, acronym and year of implementation)
- the survey reference number
- the source and date of download

INTERVIEWER INSTRUCTIONS

TRY NUMBERS FROM TOP TO BOTTOM. RECORD A NEW ATTEMPT EVERY TIME YOU CALL A NUMBER (EVEN IF IT IS THE SAME)

Try with the first number first. Try calling the numbers in order. Only call the next number once you have worked out that you cannot reach the household using the previous numbers.

INTERVIEWER INSTRUCTIONS

- Try numbers from top to bottom. Record a new attempt every time you call a number (even if it so the same)
- Try with the first number first. Try calling the numbers in order. Only call the next number once you have wored out that you cannot reach the household using the previous numbers.

INTERVIEWER INSTRUCTIONS

- TRY NUMBERS FROM TOP TO BOTTOM. RECORD A NEW ATTEMPT EVERY TIME YOU CALL A NUMBER (EVEN IF IT IS THE SAME)

- Try with the first number first. Try calling the numbers in order. Only call the next number once you have worked out that you cannot reach the household using the previous numbers.

3		4	0.5%

INTERVIEWER INSTRUCTIONS

- TRY NUMBERS FROM TOP TO BOTTOM. RECORD A NEW ATTEMPT EVERY TIME YOU CALL A NUMBER (EVEN IF IT IS THE SAME)

- Try with the first number first. Try calling the numbers in order. Only call the next number once you have worked out that you cannot reach the household using the previous numbers.
