Overview

ABSTRACT

This sampling survey was designed to rapidly measure the protection and socio-economic impact of COVID-19 on the refugee population in Mbera camp the region of Hodh Echargui in Mauritania.

The result shows that the socio-economic situation of all households across all vulnerability categories has degraded due to the impacts of the COVID-19 pandemic. The top four fears of refugees are related to food shortages, price increases, disruption of basic service facilities and travel restrictions.
