Overview

ABSTRACT

UNHCR in Tanzania hosts refugees in Kigoma region in Kasulu and Kibondo districts located in the North Western part of Tanzania bordering Burundi to the north and is found 78kms south west from the shores of Lake Tanganyika in the neighboring Kigoma town. Currently there are three refugee camps namely Nyarugusu (comprising of Old and New Camps) located in Kasulu, Nduta in Kibondo district and Mtendeli in Kakonko district.

The oldest refugee camp is Nyarugusu which has been hosting refugees from the Democratic Republic of Congo and Burundi since 1996. Refugees from Burundi were repatriated voluntarily in 2012 leading to closure of some of the existing camps. The remainder population in need of protection were relocated to Nyarugusu camp where the total population then was about 65,000 as of early April 2015 majority being Congolese refugees and other minority nationalities such as Rwandese, Sudanese, Ugandans, and Kenyans.

The refugee situation changed in 2015 following the political instability after the general elections in Burundi leading exodus of some Burundians to Tanzania and other neighbouring countries. As from late April 2015 higher numbers of refugees from Burundi started arriving in Tanzania mainly through a tiny border village along Lake Tanganyika and other entry points in Kigoma region. After the influx, the total population increased causing congestion in Nyarugusu camp calling for the re-opening two camps; Nduta camp on the 7th October 2015 and Mtendeli camp on 14th January 2016.

Nyarugusu currently hosts Congolese refugees (Old Camp) and 39.4% of the Burundi refugees (New Camp) who arrived at the onset of the emergency. Nduta hosts an estimated population of 123,673 refugees who were relocated from Nyarugusu and Mtendeli hosts 52,004 who were relocated from Nyarugusu and is still receiving the new arrivals. According to UNHCR ProGres data August 2017, the total number of refugees in Kigoma Region is estimated to be 310,735.

A total 4 surveys were conducted from 21st Aug to 18th Sept 2017 covering Nyarugusu Old Camp, Nyarugusu New Camp, Nduta and Mtendeli. UNHCR coordinated the survey in collaboration with WFP, UNICEF, WVI, Tanzania Red-cross Society (TRCS), MSF as well as Ministry of interior and Health of the United Republic of Tanzania. Funding was shared between UNHCR, WFP and UNICEF. UNHCR and WFP were in charge of logistics and daily operations.

KIND OF DATA
Sample survey data [ssd]

UNITS OF ANALYSIS
Individuals & Households

Scope

NOTES

Children 6-59 months:

prevalence of acute malnutrition, stunting, prevalence of anemia, measles vaccination and vitamin a coverage, diarrhea,

Infants 0 - 6 months:

infant and young child feeding practices (IYCF)

Non-pregnant women of reproductive age (15-49 years):

anemia

Households:

food security, wash, mosquito net coverage, mortality rates

TOPICS

Topic	Vocabulary	URI
Food security		
Water Sanitation Hygiene		

Coverage

GEOGRAPHIC COVERAGE

All refugee camps in Kigoma Region (Nyarugusu, Nduta and Mtendeli), Tanzania

UNIVERSE

The survey covered all de jure household members (usual residents), all women aged 15-49 years resident in the household, and all children aged 0-4 years (under age 5) resident in the household.

DDI DOCUMENT VERSION

Version 1 (May 2021). This version is identical to UNHCR DDI ID: DDI_UNHCR_TZA_2017_SENS_Kigoma-v1.1, except the following edits were made:

- Minor spelling, grammatical, and formatting corrections
- Specified the archive where study is originally stored
- Minor alterations to study title to fit World Bank formatting practices, change reflected in citation
- Description of external documents altered to reflect the document titles

DDI DOCUMENT ID

DDI_TZA_2017_SENS_v01_M

Sampling

Sampling Procedure

Cross-sectional multi-stage cluster surveys, probability proportional to size, systematic random sampling

Weighting

Not info provided

Questionnaires

Overview

The SENS modules include standardized questionnaires, analysis guidance, reporting format and standard analysis procedures.

4 questionnaires were included in this version:

1. Household demographics
2. Household mosquito nets, food security and WASH
3. Individuals, children under 5
4. Individuals, women between 15-49

Data Collection

Data Collection Dates

Start	End	Cycle
2017-08-21	2017-09-18	N/A

Data Collection Mode

Computer Assisted Personal Interview [capi]

Questionnaires

The SENS modules include standardized questionnaires, analysis guidance, reporting format and standard analysis procedures.

4 questionnaires were included in this version:

1. Household demographics
2. Household mosquito nets, food security and WASH
3. Individuals, children under 5
4. Individuals, women between 15-49
