#### ABSTRACT

Tanzania is prone to refugee influxes, often of long duration. Despite facing its own economic challenges, for decades Tanzania has welcomed thousands of refugees fleeing conflicts in neighboring countries of Great Lakes Region. The country's geographic proximity to the strife-torn Congo Basin is responsible in part for the ease of access of displaced populations. As well, Tanzania was an early signatory in the region to international agreements on the rights and welfare of refugee and asylum seekers.

As of December, 2018, Tanzania hosts some 284,300 camp-based refugees, 77% of who are children and women, in Nduta, Nyarugusu and Mtendeli Refugee Camps in Kigoma region in Northwest Tanzania. About 74% are from Burundi, and the remaining 26% are primarily from Democratic Republic of Congo.

Following a Tripartite Commission meeting in August 2017, the governments of Tanzania, Burundi, and UNHCR agreed to assist refugees who wish to voluntarily repatriate from Tanzania to Burundi. A subsequent meeting in March 2018 reaffirmed the commitment of both governments and UNHCR to uphold the principle of voluntariness, and noted that while some refugees may opt to return, others will continue to be in need of international protection. The March 2018 Tripartite meeting also produced a work plan entailing the repatriation of approximately 2,000 refugees per week from 5 April to 31 December 2018. As from January to 30th September 2018, a total of 52,260 refugees were assisted to voluntarily repatriate to Burundi from Tanzania in 88 convoys; bringing the total repatriated from September 2017 to 57,865 of which 57.2% are children.

This is the 5th SENS survey among the refugees in Nyarugusu since the first survey in September 2012, second in September 2014. Assessments in 2016, 2017 and 2018 covered all the three camps of Nyarugusu (old & New Camp), Nduta and Mtendeli. The current survey was conducted as from 16th September to October 13th, 2018, with a total of 4 assessments.
