Overview

ABSTRACT
At the end of 2015, Herat Province was among the highest IDP hosting provinces in Afghanistan, accounting for approximately 10% of the country's IDP population. In order to obtain reliable information on the socio-economic conditions of IDPs and returnees in Herat Province, a comprehensive sample survey was carried out among 11,264 households in the 5 most populated IDP/returnee settlements (Shagofan, Jebraiel, Maslakh, Now Abad and Kahdistan) in 2017.

KIND OF DATA
Sample survey data [ssd]

UNITS OF ANALYSIS
Household and individual

Scope

NOTES
The scope of this socio-economic assessment includes:

- Identification of the household

- Demographic composition of the household

- Information about the wider community

- Access to services (electricity, water, health, education)

- Child education

- Economic activity of the main respondent

- Consumption expenditure

- Skills

- Priority needs

TOPICS

Topic	Vocabulary	URI
Livelihood & Social cohesion		
Housing, Land and Property		
Basic Needs		

KEYWORDS
Refugees, Asylum seekers, Forced displacement, Conflict

Coverage

GEOGRAPHIC COVERAGE
IDP/returnee settlements Shagofan, Jebrael, Maslakh, Now Abad and Kahdistan (all located in Afghanistan's Herat Province).

UNIVERSE
All IDPs and returnees living in the five most populated IDP/returnee settlements of Afghanistan's Herat Province, namely Shagofan, Jebrael, Maslakh, Now Abad and Kahdistan.

UNHCR PPG: 3AFGA, 4AFGA

Sampling

Sampling Procedure

The survey's objective was to deliver representative data of all IDPs and returnees living in the five most populated IDP/returnee settlements of Afghanistan's Herat Province, namely Shagofan, Jebrael, Maslakh, Now Abad and Kahdistan. The total population of IDPs/returnees in these settlements at the time of the survey was estimated at around 38,700 households.

For this survey a stratified, single-stage (i.e. non-clustered) sample design was applied. The five settlements were considered sampling strata. Within each of these strata, a sample of households was drawn systematically (based on alphabetic sort order) from the "list of inhabitants".

The total sample size was 11,264 IDP/returnee households.

NB: The original data collection also included a small number of households from the neighbouring host community; however, these observations were dropped from the public-release version of the dataset.

Deviations from Sample Design

None

Response Rate

Information unavailable

Weighting

No weights were applied during the initial data analysis. However, given that selection probabilities differed across sampling strata, the public-release version of the data contains sampling weights calculated ex-post, which data users may wish to apply during further analysis.

Questionnaires

Overview

All questionnaires are provided in the "external resources" section.

Data Collection

Data Collection Dates

Start	End	Cycle		6
2017	2017	N/A		

Data Collection Mode

Face-to-face [f2f]

Data Collection Notes

Data was collected on paper through face-to-face interviews by 150 enumerators and 15 supervisors. Data entry was carried out at a centralized location.

Questionnaires

All questionnaires are provided in the "external resources" section.

Data Processing

Data Editing

The dataset presented here has undergone light checking, cleaning and restructuring (data may still contain errors) as well as anonymization (includes removal of direct identifiers and sensitive variables, and grouping values of select variables). Moreover, households interviewed from host communities were removed.
