Overview

ABSTRACT

Tropical Cyclone Idai made a landfall on 14th March, 2019 which immensely affected Mozambique, Malawi and Zimbabwe. The Eastern Provinces of Zimbabwe which experienced torrential rainfall caused extensive destruction of properties and infrastructures as well as loss of lives. High winds combined with heavy rainfall affected about 90,000 people from districts of Chimanimani, Chipinge, Nyanga, Buhera, Mutare Rural, Masvingo, Makoni, Gutu and Bikita which caused riverine and flash flooding as well as landslides which caused significant loss of life, injury and displacement. Significant damages were recorded such as impassable roads, bridge, water network systems, houses, power and communication network among others causing displacement, lack of basic needs and loss of civil documentation. Many people were displaced and temporarily sheltered in schools, churches, hotels among others. According to the government reports at least 299 deaths and 186 injuries were recorded, and 329 people were missing as of 3 April. Women and children were among the vulnerable groups at risk that needed relief and recovery support.

UNHCR joined the UN system response that activated its internal level 3 emergency so as to support the delivery of its commitments under the IASC Approach while leading the Protection Cluster. In Zimbabwe, the rapid inter-agency assessment was conducted in Chipinge and Chimanimani, the most affected districts of Manicaland province indicated that 270,000 people estimated were affected. Multiple assessments were conducted by humanitarian partners covering all the affected areas and identifying the needs.

In Tongogara Refugee Camp about 1060 shelters and 618 latrines were partially or totally damaged affecting 5,300 refugees and asylum seekers. Thus the urgent need to respond to WASH, Public Health, Shelter, and Protection among other needs of the people affected by Cyclone Idai in Zimbabwe.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

KAP survey focusing on water, hygiene and sanitation practices and issues with the following unit of analysis: household

Scope

NOTES

The scope of the survey includes:

- Household: household main characteristics, water and sanitation hygiene and practices

TOPICS

Topic	Vocabulary	URI
-------	------------	-----

Water Sanitation Hygiene		
Health		

KEYWORDS

WASH, KAP, Water Hygiene

Coverage

GEOGRAPHIC COVERAGE

DDI DOCUMENT VERSION

Version 01 (May 2021). This version is identical to UNHCR DDI ID: DDI-UNHCR-ZWE-2019-KAP-v1.0, except the following edits were made:

- The title of the study from "KAP WASH Survey in Tongorara Refugee Camp - 2019" to "Knowledge, Attitudes and Practices Survey 2019, Water, Sanitation and Hygiene in Tongorara Refugee Camp"

- DDI ID, study ID and version description

- Specified the archive where the study is originally stored

DDI DOCUMENT ID

DDI_ZWE_2019_KAP-WASH_v01_M

Sampling

Sampling Procedure

A two stage sampling methodology was used in this survey.

For the first stage, the area of interest, Tongogara, was divided into clusters in a way that each household on the site has the same chance of being selected. This result is obtained using the probability proportional to size method.

For the second step, the households in each cluster to be surveyed are selected by the team leaders using a systematic draw according to the size of each zone.

Weighting

Sample weights for the household data were computed as the inverse of the probability of selection of the household, computed at the sampling domain level (camp)
