Q12NIGHTS: Stayed at least four nights

| | |
|---------------------------|---|
| Information | [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*] |
| Statistics [NW/ W] | [Valid=53940 / 58699734.73] [Invalid=0 / 0] |
| Universe | Every person who had stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview. |
| Notes | This question was asked for each person found in the selected dwelling. Those who were not household members (those who had not spent at least four nights per week during the last four weeks) were excluded from the data (2 = No). The instruction in this question was to end the interview for those who had answered 'No' to this question. It is by means of this question that household members are identified within the selected dwelling. |

| Statistics [NW/ W] | [Valid=53940 / 58699734.73] [Invalid=0 / 0] |
| Universe | Every person who had stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview. |
| Notes | This question was asked for all household members, to determine their gender. Enumerators were instructed not to assume the gender of household members by just looking at people's names or physical appearances. In this instance, they had to ask the respondent the gender of each member of the household without any assumptions. |

| Universe | Every person who had stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview. |
| Notes | This question was asked to determine the population group of persons from the selected dwelling units. The respondent had to answer for each member and the enumerator was not to make any assumptions. The enumerator was also instructed not to come to any conclusions, which may be influenced by his observation or using people's names during the interview. This question may seem very sensitive to some respondents especially in this post-apartheid era, but it is important to find out the composition of the South African population. |

| Universe | All members of the households in selected dwelling units aged 15 years and older who in the last week did any work for a wage, salary, commission or any payment in kind. |
| Notes | This question is applicable to all household members aged 15 years and older, regarding their involvement in economic activities in the seven days prior to the interview. This is part of the questionnaire where there would be a differentiation between the economically active population and those who are not economically active. The instruction to enumerators was that they should consider those activities that lasted for at least an hour within the last seven days. In order to be certain that the categories had been answered, there should either be a 'Yes' or 'No' answer to all of them. Most importantly, if there was a 'Yes' to any part of this question, there should be a skip to Section 4. If all the categories were 'No', there should be a continuation to the next question. |

| Universe | All household members aged 15 years and older, who had been employed previously, but were currently unemployed or economically inactive. |
| Notes | This question was applicable to household members who had been employed previously, but were currently unemployed or economically inactive. It is important that the service or main goods produced at the respondent's previous work are in English as the industry codes are in this language only. Although a person may have had certain roles and responsibilities within the company she/he was working for, the enumerator was instructed to record the main goods or services produced by the company. Questions 3.16.a and 3.16.b were write-in questions. The responses were used to determine the type of industry. The industry was coded to three digits on the basis of the Standard Industrial Classification of all Economic Activities (SIC) |

| Universe | | All members of the households in selected dwelling units aged 15 years and older, who were economically active in the last seven days prior to the interview. | | | |
| Notes | | The question seeks to find out if people had taken an initiative to look for or prepare for any extra work. If 'Yes', then the enumerator had to read this out: The questions that follow refer to your main job/business. That is the one where you usually work the most hours per week, even if you were absent from it in the last week. | | | |

| Statistics [NW/ W] | | [Valid=12023 / 15139797.903] [Invalid=41917 / 43559936.828] | | | |
| Universe | | All members of the households in selected dwelling units aged 15 years and older, who were economically active and were working for someone for pay in the seven days prior to the interview. | | | |
| Notes | | This question is applicable to household members who had been performing certain economic activities in the seven days prior to the interview. It is important that the main tasks should be in English as the occupational codes are in that language only. The instruction to the enumerator was to ask the respondent the main tasks or duties done or usually done in his/her job given in Question 4.2.a. Questions 4.2.a and 4.2.b were write-in questions. The responses from both questions were used to determine the occupation code. The occupation was coded to four digits on the basis of the South African Standard Classification of Occupations (SASCO) | | | |

| Universe | All members of the households in selected dwelling units aged 15 years and older, who were economically active in the seven days prior to the interview. | | | |
| Notes | This question is applicable to household members who had been performing certain economic activities in the seven days prior to the interview. It is important that the service or main goods are in English as the industry codes are in this language only. Although a person may have had certain roles and responsibilities within the company she/he was working with, the enumerator was instructed to record the main goods or services produced by the company. Questions 4.3.a and 4.3.b were write-in questions. The responses to these two questions were used to determine the type of industry. The industry was coded to three digits on the basis of the Industrial Classification of all Economic Activities (SIC) | | | |

| Statistics [NW/ W] | | [Valid=37884 / 43260343.318] [Invalid=16056 / 15439391.412] | | |
| Universe | | All members of the households in selected dwelling units aged 15 years and older who in the last week did any work on their own or the household's plot, farm, food garden, cattle post or kraal or helped in growing farm produce or in looking after animals for the household's own consumption. | | |
| Notes | | This question was applicable to all household members aged 15 years and older, regarding their involvement in economic activities in the last seven days prior to the interview. This is part of the questionnaire where there would be a differentiation between the economically active population and those who are not economically active. The instruction to enumerators was that they should consider those activities that lasted for at least an hour within the seven days. In order to be certain that the categories had been answered, there should either be a 'Yes' or 'No' answer to all of them. If 'Yes' to any of these questions, the number of hours spent on the activity had to be indicated as well. | | |

| Universe | All members of the households in selected dwelling units aged 15 years and older who in the last week did any construction or major repair work on their own home, plot, cattle post or business or that of the household. | | | | |
| Notes | This question was applicable to all household members aged 15 years and older, regarding their involvement in economic activities in the last seven days prior to the interview. This is part of the questionnaire where there would be a differentiation between the economically active population and those who are not economically active. The instruction to enumerators was that they should consider those activities that lasted for at least an hour within the seven days. In order to be certain that the categories had been answered, there should either be a 'Yes' or 'No' answer to all of them. If 'Yes' to any of these questions, the number of hours spent on the activity had to be indicated as well. | | | | |

| Universe | | Every person who had stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview. | | |
| Notes | | This is a derived variable indicating the age of the household member. Age of the household member was derived from question 1.4 of the questionnaire. This question was asked for each member of the household. The instruction was to write the age in completed years to the nearest whole numbers and not in words. Thus, if a person was two years and six months, the instruction was to write the two completed years. For children aged less than a year, the instruction was to write 000. | | |
