METHODOLOGY

Introduction

Statistics South Africa (Stats SA) conducted its first Volunteer Activities Survey (VAS) in the second quarter of 2010 (Q2:2010). This is a household-based sample survey that collects data on the volunteer activities of individuals aged 15 years and older who live in South Africa. This information is gathered from respondents who are members of households living in dwellings that have been selected to take part in the Quarterly Labour Force Survey (QLFS). VAS covers activities willingly performed for little or no payment to provide assistance or promote a cause in the four weeks preceding the survey interview. These activities can be performed either through an organisation or directly for someone outside one's own household. They take many forms, from picking up groceries for a disabled neighbour to participating in community policing.

The QLFS sample covers the non-institutional population except for workers' hostels. However, persons living in private dwelling units within institutions are also enumerated. For example, within a school compound, one would enumerate the schoolmaster's house and teachers' accommodation because these are private dwellings. Students living in a dormitory on the school compound would, however, be excluded.

Survey requirements and design

The Labour Force Survey frame has been developed as a general-purpose household survey frame that can be used by all other household surveys irrespective of the sample size requirement of the survey. The sample size for the QLFS is roughly 30 000 dwellings.

The sample is based on information collected during the 2001 Population Census conducted by Stats SA. In preparation for Census 2001, the country was divided into 80 787 enumeration areas (EAs). Some of these EAs are small in terms of the number of households that were enumerated in them at the time of Census 2001. Stats SA's household-based surveys use a Master Sample of Primary Sampling units (PSUs) which comprises EAs that are drawn from across the country. For the purposes of the Master Sample, the EAs that contained fewer than 25 households were excluded from the sampling frame, and those that contained between 25 and 99 households were combined with other EAs of the same geographic type to form Primary Sampling Units (PSUs). The number of EAs per PSU ranges between one and four. On the other hand, very large EAs represent two or more PSUs.

The sample is designed to be representative at provincial level and within provinces at the metro/non-metro level. Within the metros, the sample is further distributed by geography type. The four geography types are: urban formal, urban informal, farms, and tribal. This implies that, for example, within a metropolitan area the sample is designed to be representative at the different geography types that may exist within that metro.

The current sample size is 3 080 PSUs. It is equally divided into four subgroups or panels called rotation groups. The rotation groups are designed in such a way that each of these groups has the same distribution pattern as that which is observed in the whole sample. They are numbered from one to four and these numbers also correspond to the quarters of the year in which the sample will be rotated for the particular group.

The sample for the redesigned Labour Force Survey is based on a stratified two-stage design with probability proportional to size (PPS) sampling of primary sampling units (PSUs) in the first stage, and sampling of dwelling units (DUs) with systematic sampling in the second stage.

Sample rotation

The sampled PSUs have been assigned to four rotation groups, and dwellings selected from the PSUs assigned to rotation group '1' are rotated in the first quarter. Similarly, the dwellings selected from the PSUs assigned to rotation group '2' are rotated in the second quarter, and so on. Thus, each sampled dwelling will remain in the sample for four consecutive quarters. It should be noted that the sampling unit is the dwelling, and the unit of observation is the household. Therefore, if a household moves out of a dwelling after being in the sample for, say two quarters, and a new household moves in, then the new household will be enumerated for the next two quarters. If no household moves into the sampled dwelling, the dwelling will be classified as vacant (unoccupied).

At the end of each quarter, a quarter of the sampled dwellings rotates out of the sample and are replaced by new dwellings from the same PSU or the next PSU on the list. A total of 3 080 PSUs were selected for the redesigned LFS, and 770 have been assigned to each of the four rotation groups.

Weighting

The sampling weights for the data collected from the sampled households are constructed so that the responses could be properly expanded to represent the entire civilian population of South Africa. The weights are the result of calculations involving several factors, including original selection probabilities, adjustment for non-response, and benchmarking to known population estimates from the Demographic division of Stats SA.

The base weight is defined as the product of the provincial Inverse Sampling Rate (ISR) and the three adjustment factors, namely adjustment factor for informal PSUs, adjustment factor for subsampling of growth PSUs, and an adjustment factor to account for small EAs excluded from the sampling frame (i.e. EAs with fewer than 25 households).

Non-response adjustment

In general, imputation is used for item non-response (i.e. blanks within the questionnaire), and edit failure (i.e. invalid or inconsistent responses). The eligible households in the sampled dwellings can be divided into two response categories: respondents and non-respondents, and weight adjustment is applied to account for the non-respondent households (e.g. refusal, no contact, etc.). The sampled dwellings with no eligible households, e.g. foreigners only, or no households, (i.e. vacant dwellings), do not contribute to the survey.

The non-response adjusted weight is the product of the base weight with the non-response adjustment factor given above. If the PSU level non-response rate is too high, the non-response adjustment is applied at the VARUNIT level, where two VARUNITs have been created by grouping PSUs within strata. PSU level non-response adjustment is applied only if the corresponding adjustment factor is less than 1,5.

Final survey weights

The final survey weights are constructed using regression estimation to calibrate to the known population counts at the national level population estimates (which are supplied by the Demography division) cross-classified by 5-year age groups, gender and race, and provincial population estimates by broad age groups are used for calibration weighting. The 5-year age groups are: 0–4, 5–9, 10–14,... 55–59, 60–64, and 65 and over. The provincial level age groups are: 0–14, 15–34, 35–64, and 65 years and over. The final weights are constructed in such a manner that all persons within a household would have the same weight.

Estimation

The final survey weights are used to obtain the estimates for various domains of interest, e.g. number of persons employed in agriculture in the province of Western Cape, number of females employed in manufacturing, etc. The estimates of ratios are obtained as ratios of the estimated totals. Thus, survey estimates for any estimation domain can be computed using the set of final weights for the respondents in the domain of interest.

Reliability of the survey estimates

Because estimates are based on sample data, they differ from figures that would have been obtained from complete enumeration of the population using the same instrument. Results are subject to both sampling and non-sampling errors. Non-sampling errors include biases from inaccurate reporting, processing, and tabulation, etc. as well as errors from non-response and incomplete reporting. These types of errors cannot be measured readily. However, to the extent possible, non-sampling errors can be minimised through the procedures used for data collection, editing, quality control, and non-response adjustment. The variances of the survey estimates are used to measure sampling errors. The variance estimation methodology is discussed in the next section.

Variance estimation

The most commonly used methods for estimating variances of survey estimates from complex surveys, such as the QLFS, are the Taylor Series Linearization, Jackknife Replication, Balanced Repeated Replication (BRR), and Bootstrap methods (Wolter, 2007)¹. We implemented the replication method for the QLFS mainly because of simplicity². The QLFS sampled 3 080 PSUs by selecting an even number of four or more PSUs from within strata. The Jackknife method would be applicable for the sample design with more than two PSUs per stratum, but this would result in 3 080 replicates, which would be computationally very intensive. The Fay's BRR method on the other hand is applicable when two primary sampling units (PSUs) are sampled from each stratum. Therefore we decided to use Fay's BRR method by collapsing PSUs into two groups of PSUs within each stratum.

Other measures of precision

In practice, the sampling variance itself is hardly ever reported. Instead, users find it more useful to rely on one of the derivatives of the sampling variance, such as the standard error, the coefficient of variation, the margin of error, or the confidence interval. These are all related expressions, and it is quite easy to go from one to the other using simple mathematical operations.

Standard error

The standard error of an estimator is the square root of its sampling variance. This measure is easier to interpret since it provides an indication of sampling error using the same scale as the estimate, whereas the variance is based on squared differences. If $\hat{\theta}$ is the estimate of a given population parameter θ (e.g. true employment but unknown) and $v(\hat{\theta})$ is the corresponding estimate of its variance, then the standard error of the estimate is defined as

$$se(\hat{\theta}) = \sqrt{v(\hat{\theta})}.$$

Coefficient of variation

It is more useful in many situations to assess the size of the standard error relative to the magnitude of the characteristic being measured. The coefficient of variation^(cv) provides such a measure. It is the ratio of the standard error of the survey estimate to the value of the estimate itself expressed as a percentage. It is very useful in comparing the precision of several different survey estimates, where their sizes or scale differ from one another.

Confidence intervals

The 95% confidence interval is such that there is a 95% probability (chance of 19 out of 20) of the unknown population parameter θ being within the interval. The 95% confidence interval is given by $\hat{\theta} \pm 1.96 \times se(\hat{\theta})$. The lower limit of the interval is $\hat{\theta} - 1.96 \times se(\hat{\theta})$, and the upper limit of the interval is $\hat{\theta} + 1.96 \times se(\hat{\theta})$. The width $1.96 \times se(\hat{\theta})$ is known as half-width of the 95% confidence interval. The smaller the half-width of the confidence interval, the more precise is the survey estimate.

Design effects

Most surveys are based on complex designs involving stratification and clustering due to multi-stage designs. Moreover, the weighting involves non-linear adjustments (e.g. non-response and weight calibration adjustments, etc.). It is crucial that these features of the complex survey design be accounted for in the variance estimation (Choudhry and Valliant, 2003). The design effect compares the variance of the estimate from the sample design that was actually implemented to the variance of the estimate that would have been obtained from a simple random sample (SRS) design. Design effect is another way to evaluate the efficiency of a sample design and the procedure used to develop the survey estimates. Design effect is defined as the ratio of the variance of an estimate for a complex sample design and the variance of the estimate under the SRS design with the same

¹ Wolter KM, 2007. *Introduction to Variance Estimation, 2nd Edition*. New York: Springer-Verlag

² Note that variance estimation methodology was not implemented for the LFS

sample size. Kish (1965)³ introduced the concept of design effect to deal with complex sample designs involving stratification and clustering. Stratification generally leads to a gain in efficiency over simple random sampling, but clustering leads to deterioration in the efficiency of the sample design due to positive intra-cluster correlation among units in the cluster (PSUs in the case of QLFS). To determine the total effect of any complex design on the sampling variance in comparison to the alternative simple random sample design, the design effect (*deff*) is defined as:

$$Deff = \frac{\text{sampling variance of a complex sample design}}{\text{sampling variance of simple random sample design}}$$

A design effect can be derived for any sampling design and estimator, provided we can compute a sampling variance. It is important to note that the design effect is associated with both the design and the estimator. Therefore, for a given survey, the design effect can vary substantially from one variable to another.

Effective sample size

Another concept that is often used is effective sample size defined as the actual sample size that was selected for the complex design divided by the corresponding design effect. The effective sample size can be interpreted as the sample size that would be needed for an SRS design to obtain the same variance as that obtained with the complex design (i.e. the design that was actually implemented).

Table (i): Response rate by province

Province	Apr – Jun 2010
	Percentages (%)
Western Cape	89,5
Eastern Cape	93,1
Northern Cape	88,1
Free State	90,4
KwaZulu-Natal	94,2
North West	94,9
Gauteng	89,3
Mpumalanga	92,9
Limpopo	93,1
South Africa	91,3

CONTENTS OF CD

The CD contains a flat, ASCII, fixed-field file, with one line of given length per record. This format was chosen so as to make the data usable with as many statistical programmes as possible, and thus accessible to as wide a range of people as possible.

Users can also access, explore and download the micro data in various formats, i.e. SAS, SPSS, Stata, etc. as well as the metadata from StatsOnline at www.statssa.gov.za. Click on 'Interactive data' then 'Explore micro data'.

Other important information can be found in the:

- Questionnaire
- Additional code lists (occupation and industry)
- Relevant statistical release
- Record layouts

³ Kish L, 1965. Survey Sampling. John Wiley & Sons.

Stats SA website: www.statssa.gov.za

The data file

The data file contains the following information for each variable:

Description of variables

Descriptive name: This is a short description of the variable with the variable name in brackets.

Position of the variable: The position of a variable within a record is recorded in the format (@xxx y). '@xxx' indicates that the variable starts at position (i.e. column) xxx, and 'y' indicates the length of the field.

Final code list: The range of valid values for variables. For continuous variables it only reflects the upper and lower limits.

Not applicable: The code for 'missing' values is given for each variable (□ = Not applicable).

Note to users: Additional information for further clarity on questions.

DATA FILE

Unique number (UQNO) (@1 18.)

Unique household identifier allocated to each household.

Valid range: 101000170000011001–986009490000013101

Person number (PERSONNO) (@19 2.)

Person (respondent) number

Valid range: 01–03

This section covers particulars of each person in the household.

Gender (Q13GENDER) (@21 1.)

1.3	Is a male or a female?	
	1 = MALE	<input type="checkbox"/> 1
	2 = FEMALE	<input type="checkbox"/> 2

Note to users

This question was asked for all household members, to determine their gender. Enumerators were instructed not to assume the gender of household members by just looking at people’s names or physical appearances. In this instance, they had to ask the respondent the gender of each member of the household without any assumptions.

Universe

Every person who had stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

Final code list

- 1 = Male
- 2 = Female

Population group (Q15POPULATION)

(@22 1.)

1.5	<p>What population group does..... belong to?</p> <p>1 = AFRICAN/BLACK 2 = COLOURED 3 = INDIAN/ASIAN 4 = WHITE 5 = OTHER, <i>specify, in the box at the bottom</i></p>	<div style="display: flex; flex-direction: column; align-items: center;"> <div style="display: flex; align-items: center; margin-bottom: 5px;"><input style="width: 20px; height: 20px; border: 1px solid black;" type="checkbox"/> 1</div> <div style="display: flex; align-items: center; margin-bottom: 5px;"><input style="width: 20px; height: 20px; border: 1px solid black;" type="checkbox"/> 2</div> <div style="display: flex; align-items: center; margin-bottom: 5px;"><input style="width: 20px; height: 20px; border: 1px solid black;" type="checkbox"/> 3</div> <div style="display: flex; align-items: center; margin-bottom: 5px;"><input style="width: 20px; height: 20px; border: 1px solid black;" type="checkbox"/> 4</div> <div style="display: flex; align-items: center; margin-bottom: 5px;"><input style="width: 20px; height: 20px; border: 1px solid black;" type="checkbox"/> 5</div> <div style="border: 1px solid black; width: 100%; height: 30px; margin-top: 10px;"></div> </div>
------------	---	--

Note to users

This question was asked to determine the population group of persons from the selected dwelling units. The respondent had to answer for each member and the enumerator was not to make any assumptions. The enumerator was also instructed not to come to any conclusions, which may be influenced by his observation or using people's names during the interview. This question may seem very sensitive to some respondents especially in this post apartheid era, but it is important to find out the composition of the South African population.

Universe

Every person who had stayed in the households in selected dwelling units for at least four nights a week in the four weeks prior to the interview.

Final code list

- 1 = African/Black
- 2 = Coloured
- 3 = Indian/Asian
- 4 = White

Age (Q14VerifiedAGE)

(@23 3.)

1.4	<p>What is.....'s date of birth and age in completed years?</p> <p style="text-align: right;">Age (less than 1 year = 000)</p>	<p>Day of birth: Example of day 0 1</p> <p>Month of birth: Example of month 0 3</p> <p>Year of birth: Example of year 1 9 8 3</p>	<div style="display: flex; flex-direction: column; align-items: center;"> <div style="display: flex; align-items: center; margin-bottom: 10px;"><input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/></div> <div style="display: flex; align-items: center; margin-bottom: 10px;"><input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/></div> <div style="display: flex; align-items: center; margin-bottom: 10px;"><input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/></div> <div style="display: flex; align-items: center;"><input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/></div> </div>
------------	--	--	--

Derived variable

This is a derived variable indicating the age of the household member. Age of the household member was derived from question 1.4 of the questionnaire.

This question was asked for each member of the household. The instruction was to write the age in completed years to the nearest whole numbers and not in words. Thus, if a person was two years and six months, the instruction was to write the two completed years. For children aged less than a year, the instruction was to write 000.

Universe

Every person who had stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

Final code list

Valid range: 15–103

Province (Province)

(@26 1.)

South African provinces as at December 2005 released by the Municipal Demarcation Board in January 2006.

Final code list

- 1 = Western Cape
- 2 = Eastern Cape
- 3 = Northern Cape
- 4 = Free State
- 5 = KwaZulu-Natal
- 6 = North West
- 7 = Gauteng
- 8 = Mpumalanga
- 9 = Limpopo

Marital status (Q16MARITALSTATUS)

(@27 1.)

1.6	What is’s present marital status? 1 = Married 2 = Living together like husband and wife 3 = Widow/Widower 4 = Divorced or Separated 5 = Never married
------------	---

Note to users

This question is about the marital status of the members of the household. There are different kinds of marriages in South Africa, even if a couple is living together as husband and wife they are regarded to be married. Both modern and traditional marriages are considered in this question.

Universe

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

Final code list

- 1 = Married
- 2 = Living together like husband and wife
- 3 = Widow/Widower
- 4 = Divorce or Separated
- 5 = Never married

Education Status (Education_Status)

(@28 1.)

Derived variable: Derived from Question 1.7 from the QLFS: What is the highest level of education that has successfully completed?

Final code list:

- 1 = No schooling
- 2 = Less than primary completed
- 3 = Primary completed
- 4 = Secondary not completed
- 5 = Secondary completed
- 6 = Tertiary
- 7 = Other

Monthly Earnings for employees (Q54a_Monthly)

(@29 11.4)

Note to users

This is a derived variable based on Q5.2 and Q5.4.a where earnings are converted to monthly.

Universe

All members of the households in selected dwelling units aged 15 years and older, who were economically active and were employees in the calendar week prior to the interview.

Final code list

Valid range: 0 – 79166.67
□□□□□ = Not applicable

Question 5.7.a

Monthly earnings for Employers and Self Employed (Q57a_Monthly)

(@40 11.4)

Note to users

This is a derived variable based on Q5.6 and Q5.7.a where earnings are converted to monthly.

Universe

All members of the households in selected dwelling units aged 15 years and older, who were economically active and were employers or own-account workers in the calendar week prior to the interview.

Final code list

Valid range: 0 – 86666.67

□□□□□□□□ = Not applicable

Question 4.5

Main work (Q45WRK4WHOM)

(@51 1.)

4.5	<p>In the job/business, that you had during the last week were you.....</p> <p>1 = Working for someone else for pay? (Including paid domestic workers, gardeners or security guards)</p> <p><i>Payment in cash or in kind (e.g. food, accommodation). Option 1 includes all employees: Full-time, part-time, casual work and piecework.</i></p> <p style="text-align: right;">→ Go to Q 4.6</p>	<input type="checkbox"/> 1
	<p>2 = An employer (employing one or more employees)?</p> <p style="text-align: right;">→ Go to Q 4.13</p>	<input type="checkbox"/> 2
	<p>3 = Own-account worker (not employing any employees)?</p> <p style="text-align: right;">→ Go to Q 4.13</p>	<input type="checkbox"/> 3
	<p>4 = Helping without pay in a household business?</p> <p style="text-align: right;">→ Go to Q 4.13</p>	<input type="checkbox"/> 4

Note to users

This question establishes whether people were employers, wage earners, self-employed, etc. in the main economic activities they were involved in. Only one category had to be chosen. If option '1' was chosen, the instruction was to go to Question 4.6; otherwise skip to Question 4.13.

Universe

All members of the households in selected dwelling units aged 15 years and older, who were economically active in the seven days prior to the interview and who worked for someone else for pay or employed one or more employees, or did not employ any employees, or helped without pay in a household business.

Final code list

- 1 = Working for someone else for pay
- 2 = An employer (employing one or more employees)
- 3 = Own account worker (not employing any employees)
- 4 = Helping without pay in a household business
- = Not applicable

1.0	In the last four weeks, did you do any of the following activities without pay for someone outside your own household?	Yes	No
	01 = COMMUNITY POLICING (E.G. COMBATING CRIME)	01	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	02 = CONTRIBUTING TO RELIGIOUS ACTIVITIES (E.G. USHERING)	02	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	03 = FUNDRAISING (NOT FOR PERSONAL GAIN)	03	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	04 = RAISING AWARENESS OF ISSUES IN THE COMMUNITY (E.G. AIDS, VIOLENCE AGAINST WOMEN)	04	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	05 = ORGANISING, SUPERVISING OR COORDINATING ACTIVITIES OR EVENTS	05	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	06 = SITTING AS A MEMBER OF A COMMITTEE OR BOARD	06	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	07 = PROVIDING HEALTH CARE OR SUPPORT	07	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	08 = COUNSELLING	08	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	09 = COACHING OR REFEREEING OR OFFICIATING ON SPORTING EVENTS	09	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	10 = ENGAGING IN ACTIVITIES AIMED AT CONSERVATION OR PROTECTION OF ENVIRONMENT OR WILDLIFE	10	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	11 = OFFICE OR ADMINISTRATIVE WORK	11	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	12 = TEACHING OR MENTORING	12	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	13 = MAINTAINING, REPAIRING OR BUILDING OF FACILITIES OR GROUNDS	13	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	14 = COLLECTING, SERVING OR DELIVERING FOOD OR OTHER GOODS	14	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	15 = HELPING SOMEONE WITH THE RUNNING OF A BUSINESS OR FARM	15	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	16 = HELPING SOMEONE WITH HOUSEWORK, SUCH AS CLEANING OR COOKING	16	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	17 = HELPING SOMEONE WITH SHOPPING OR DRIVING SOMEONE TO APPOINTMENTS OR STORE	17	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	18 = VISITING OR HELPING THE SICK OR ELDERLY	18	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	19 = BABYSITTING	19	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	20 = OTHER, SPECIFY	20	<input type="checkbox"/> 1 <input type="checkbox"/> 2
	<div style="border: 1px solid black; height: 20px; width: 50%; margin: 0 auto;"></div>		
<i>If No to all of Q 1.0 Go to 4.0, otherwise continue to Q 1.1</i>			

Note to users

This question is aimed at capturing all volunteer activities performed by household member. Mark all appropriate boxes.

1. Check Q1.0 to establish the number of volunteer activities that the respondent was involved in. If there are more than three activities, please note that details are required for a minimum of three activities in the questions that follow. Ask the respondent to provide information for three activities in which he/she spent the most time, starting with the activity in which the most time was spent, then the activity with the next longest time, etc.

Please note that questions are asked about the first activity, then the second and the third. This is to make sure that the respondent focuses on the activity at hand and not mix information across activities.

2. If an individual has done only one activity, then complete questions on Main activity 1 only.

3. If the answer to Q1.0 is 'No' to All, then → Go to Q4.0 → End of interview

Universe

All members of the households in selected dwelling units aged 15 years and older.

Community policing(Q1_01POLICING)

(@52 1.)

Did you do community policing during the last four weeks?

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

1 = Yes

2 = No

Religious activities (Q1_02RELIGIOUS)

(@53 1.)

Did you contribute to religious activities during the last four weeks?

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

1 = Yes

2 = No

Fundraising (Q1_03FUNDRAISING)

(@54 1.)

Did you raise funds (not for personal gain) during the last four weeks?

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

1 = Yes

2 = No

Community issues (Q1_04COMMISSUES)

(@55 1.)

Did you raise awareness on community issues during the last four weeks?

Universe

All members of the households in selected dwelling units aged 15 years and older.

(@77 1.)

1.2b	Was this activity linked to the FIFA World Cup?	
	1 = YES	<input type="checkbox"/> 1
	2 = NO	<input type="checkbox"/> 2

Note to users

This question is aimed at determining whether the activity done was linked to the FIFA World Cup.

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

- 1 = YES
- 2 = NO
- = Not applicable

Mandatory work (Q13MANDATORY)

(@78 1.)

1.3	Some people are obliged by others to perform these activities: Was this activity mandatory, done under court order or required by employer?	
	1 = YES	<input type="checkbox"/> 1
	2 = NO	<input type="checkbox"/> 2
	<i>(Examples: required to complete a degree, serving a sentence, etc.)</i>	

Note to users

This question is aimed at determining if individuals performed volunteer activities because they were mandated to perform such activities. If they are (1=Yes), then they cannot be regarded as involved in volunteer activities though more information is required for such activities.

Examples of activities that would not be considered volunteer activity include election of national service, mandatory military service and community service mandated by court order, doctors who perform hospital duty as part of the requirements for their degrees.

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

1 = YES

2 = NO

□□ = Not applicable

Hours worked (Q14HOURS)

(@79 3.)

1.4	How many hours did you spend on this activity in the last four weeks?		
	HOURS	<input type="text"/> <input type="text"/> <input type="text"/>	→ Go to Q1.7
	DON'T KNOW	<input type="text"/>	→ Go to Q1.5

Note to users

Hours volunteered represents the duration in hours of each volunteer activity that the respondent identifies as having been performed during the reference period. (NB: Reference period=last 4 weeks prior to the interview)

It is important for interviewers to ask for the total hours volunteered in each activity. These total hours will be important in determining the full-time equivalent (FTE) number of workers and in calculating the economic value of volunteer work.

Record the number of hours spent on the activity in whole numbers. E.g. If the person spent 4.4 hours on an activity, round it down to 4 hours; If the person spent 4.5 hours, round it up to 5 hours. Record the hours from the right, e.g.

0	0	5
---	---	---

After recording the hours note the **skip instruction to Q1.7**

Final code list

Valid range: 0- 403

□□ = Not applicable

Don't know (Q14DKNOW)

(@82 1.)

If Don't Know, mark the appropriate box and then **Go to Q1.5**

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

Valid range: 1

Compensation (Q19COMPENSATION)

(@90 1.)

1.9	<p>What did you receive or do you expect to receive for your help?</p> <p>1 = OUT OF POCKET EXPENSES</p> <p>2 = FOOD</p> <p>3 = TRANSPORT</p> <p>4 = CLOTHES</p> <p>5 = SHELTER</p> <p>6 = EXPERIENCE/SKILLS</p> <p>7 = OTHER, SPECIFY</p> <div style="border: 1px solid black; height: 20px; width: 100%; margin-top: 5px;"></div>	<input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/> 7
------------	--	--

Note to users

Only ask this question if the answer in **Q1.8** is “Yes”

This question aims to provide information on issues of compensation, i.e. the specific detail of what was received or is expected to be received for help provided. Out of pocket expenses include money for transport, food, clothes, etc. Wait for the respondent to give you a response and mark the appropriate box.

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

- 1 = OUT OF POCKET EXPENSES
- 2 = FOOD
- 3 = TRANSPORT
- 4 = CLOTHES
- 5 = SHELTER
- 6 = EXPERIENCE/SKILLS
- 7 = OTHER, SPECIFY
- = Not applicable

Approximate value (Q110AAPPVALUE)

(@91 5.)

1.10	<p>a). What is the approximate value of what you received or expect to receive for your help? (Record value in Rands)</p> <div style="text-align: center; border: 1px solid black; width: 100px; height: 20px; margin: 10px auto;"></div> <p style="text-align: center;">or</p> <p>(b). COMPENSATION HAS NO MONETARY VALUE</p> <div style="text-align: right; margin-top: 5px;"> <input type="checkbox"/> </div>
-------------	---

Note to users

If a respondent received anything for providing help then this question aims to collect information on the approximate value of how much was received.

Record value in Rands

If the respondent is expecting payment to be made in future for the help provided in the last four weeks, then the approximated amount of what is expected to be received needs to be recorded.

Final code list

- Valid range: 0 – 10000
- = Not applicable

No monetary value (Q110BNOVALUE)

(@96 1.)

If what was received has no monetary value then select

- (b). Compensation has no monetary value**
- E.g. Skills or experience

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

Valid range: 1

☐☐ = Not applicable

Through organisation (Q111TROUGHORG)

(@97 1.)

1.11	<p>Did you do this activity for or through an organisation or group, or did you do it on your own?</p> <p>1 = THROUGH AN ORGANISATION</p> <p>2 = AS AN INDIVIDUAL → <i>If last activity then Go to Q4.0, otherwise Go to Main Activity 2</i></p> <p>3 = BOTH (THROUGH AN ORGANISATION AND AS AN INDIVIDUAL)</p>	<input type="checkbox"/> 01 <input type="checkbox"/> 02 <input type="checkbox"/> 03
-------------	--	---

Note to users

To determine whether or not the volunteer activity is formal or informal, the interviewer asks, **Did you do this activity for or through an organisation or group, or did you do it on your own?** If the respondent answers **“As an individual”** then the activity is considered to be performed as an individual. Wait for the respondent to give you a response and mark the appropriate box.

Note instruction in option 2

If last activity then Go to Q4.0, otherwise Go to Main Activity 2

If the respondent has only done one activity and option 2 is selected, then **Go to Q4.0 (End of interview)**, otherwise **Go to Main Activity 2**.

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

- 1 = THROUGH AN ORGANISATION
 - 2 = AS AN INDIVIDUAL → *If last activity then Go to Q4.0, otherwise Go to Main Activity 2*
 - 3 = Both (Through an Organisation and As An Individual)
- ☐☐ = Not applicable

Industry of the organisation (Q113ACTINDUSTRY)

(@98 3.)

Q1.12 and Q1.13 are used to determine the main industry in which the organisation is. The industry was coded to three digits on the basis of the Standard Industrial Classification of all Economic Activities (SIC)

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

- Valid range: 020–990
- ☐☐ = Not applicable

Type of the organisation (Q114TYPEORG)

(@101 2.)

1.14	What type of organisation is this?	
	01=Charity/Non-profit Organisation/NGO/CBO	<input type="checkbox"/> 01

Through organisation (Q211TROUGHORG)

(@132 1.)

2.11	<p>Did you do this activity for or through an organisation or group, or did you do it on your own?</p> <p>1 = THROUGH AN ORGANISATION</p> <p>2 = AS AN INDIVIDUAL → <i>If last activity then Go to Q4.0, otherwise Go to Main Activity 3</i></p> <p>3 = BOTH (THROUGH AN ORGANISATION AND AS AN INDIVIDUAL)</p>	<p><input type="checkbox"/> 01</p> <p><input type="checkbox"/> 02</p> <p><input type="checkbox"/> 03</p>
-------------	--	--

Note to users

To determine whether or not the volunteer activity is formal or informal, the interviewer asks, **Did you do this activity for or through an organisation or group, or did you do it on your own?** If the respondent answers **“As an individual”** then the activity is considered to be informal. If the respondent answers **“Through an organisation”**, then the activity is considered to be formal. Wait for the respondent to give you a response and mark the appropriate box.

Note instruction in option 2

If last activity then Go to Q4.0, otherwise Go to Main Activity 3

If the respondent has only done two activities and option 2 is selected then **Go to Q4.0 (End of interview)**, otherwise **Go to Main activity 3.**

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

- 1 = THROUGH AN ORGANISATION
- 2 = AS AN INDIVIDUAL
- 3 = BOTH (Through an Organisation and As An Individual)
- = *Not applicable*

Industry of the organisation (Q213ACT2IDUSTRY)

(@133 3.)

Q2.12 and Q2.13 are used to determine the main industry in which the organisation is. The industry was coded to three digits on the basis of the Standard Industrial Classification of all Economic Activities (SIC)

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

- Valid range: 111–964
- = *Not applicable*

Type of the organisation (Q214TYPEORG)

(@136 2.)

2.14	What type of organisation is this?	
	01=Charity/Non-Profit Organisation/NGO/CBO	<input type="checkbox"/> 01
	02 = Religious	<input type="checkbox"/> 02
	03 = Political	<input type="checkbox"/> 03
	04 = Union	<input type="checkbox"/> 04
	05 = Private business	<input type="checkbox"/> 05
	06 = Private school	<input type="checkbox"/> 06
	07 = Government school	<input type="checkbox"/> 07
	08 = Private hospital/clinic	<input type="checkbox"/> 08
	09 = Government hospital/clinic	<input type="checkbox"/> 09
	10 = Other government entity	<input type="checkbox"/> 10

Note to users

This question will enable the completion of the satellite account on Non Profit Institutions and to integrate volunteer activity into sectoral productivity measures. To determine the type of institutional setting the activity was performed in, this question is asked. Here the interviewer asks the respondent “What type of organisation the activity was performed in, with reference to Question 2.12 and Question 2.13.

NGO = Non-governmental Organisation
 CBO = Community-based Organisation

Read out the options to the respondent and mark the appropriate one.

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

Start activity (Q215STARTACTIVITY)

(@138 6.)

2.15	<p>When did you start doing activities without pay to assist this organisation?</p> <p style="text-align: center;">M M Y Y Y Y</p> <p style="text-align: center;"> <input type="text"/> <input type="text"/> <input type="text"/> <input type="text"/> <input type="text"/> <input type="text"/> </p>
<p><i>If more than 1 activity Go to Main Activity 2 otherwise Go to 4.0</i></p>	

Note to users

This question is important to assess when the respondent started volunteer activity without pay for that organisation.

Record the month and the year

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

Valid range: 010010–122009

□□ = Not applicable

Occupation (Q31ACT3OCCUPATION)

(@144 4.)

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

Valid range: 1210–9190

□□ = Not applicable

Do activity 4 whom (Q32ADOACT4)

(@148 1.)

3.2a	<p>Did you do this activity for ...</p> <p>1 = A member of your household or immediate family? → Go to Q4.0</p> <p>2 = Other relatives?</p> <p>3 = Friend(s)?</p> <p>4 = Other ?</p>	<p><input type="checkbox"/> 1</p> <p><input type="checkbox"/> 2</p> <p><input type="checkbox"/> 3</p> <p><input type="checkbox"/> 4</p>
-------------	---	---

Note to users

Work done with little or no pay for members of one’s household or immediate family would not be considered volunteer work, whereas such work done for persons not living in one’s household would be included.

If the respondent has only done one activity and the activity was done for a household member or immediate family member then **Go to Q4.0 (End of interview)**. **Otherwise continue to Q3.2b**

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

- 2 = Other relatives
- 3 = Friend(s)
- 4 = Other
- = *Not applicable*

Fifa activity(Q32BFIFA)

(@149 1.)

3.2b	Was this activity linked to the FIFA World Cup?	<input type="checkbox"/> 1
	1 = YES	<input type="checkbox"/> 2
	2 = NO	

Note to users

This question is aimed at determining whether the activity done was linked to the FIFA World Cup.

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

- 1 = YES
- 2 = NO
- = *Not applicable*

Mandatory work (Q33MANDATORY)

(@150 1.)

3.3	Some people are obliged by others to perform these activities. Was this activity mandatory, done under court order or required by employer?	<input type="checkbox"/> 1
	1 = YES	<input type="checkbox"/> 2
	2 = No	
	<i>(Examples: required to complete a degree, serving a sentence, etc.)</i>	

Note to users

This question is aimed at determining if individuals performed volunteer activities because they were mandated to perform such activities. If they are (1=Yes), then they cannot be regarded as involved in volunteer activities

though more information is required for such activities.

Examples of activities that would not be considered volunteer activity include election of national service, mandatory military service and community service mandated by court order, doctors who perform hospital duty as part of the requirements for their degrees.

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

2 = No

□□ = *Not applicable*

Hours worked (Q34HOURS)

(@151 3.)

3.4	How many hours did you spend on this activity in the last four weeks?		
	HOURS	<input type="text"/> <input type="text"/> <input type="text"/>	→ Go to Q3.7
	DON'T KNOW	<input type="text"/>	→ Go to Q3.5

Note to users

Hours volunteered represents the duration in hours of each volunteer activity that the respondent identifies as having been performed during the reference period. (NB: Reference period=4 weeks)

It is important for interviewers to ask for the total hours volunteered in each activity. These totals hours will be important in determining the full-time equivalent (FTE) number of workers and in calculating the economic value of volunteer work.

Record the number of hours spent on the activity in whole numbers. E.g. If the person spent 4.4 hours on an activity, round it down to 4 hours; If the person spent 4.5 hours round it up to 5 hours. Record the hours from the right, e.g.

0	0	5
---	---	---

After recording the hours note the **skip instruction to Q3.7**

Final code list

Valid range: 1– 120

□□ = *Not applicable*

Don't know (Q34DKNOW)

(@154 1.)

If Don't Know, mark the appropriate box and then **Go to Q3.5**

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

Valid range: 1

□□ = *Not applicable*

Hours worked (Q35FREQUENCY)

(@155 1.)

3.5	<p>Could you perhaps recall how many times you did this activity in the last four weeks? <i>(Record response)</i></p> <div style="text-align: center; margin-top: 20px;"> <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> </div>
------------	---

Note to users

Ask this question only if the respondent has difficulty in providing the number of hours and follow up with Q3.6.

The aim of this question is to help respondent recall the number of hours volunteered for each activity. Record the number of times the activity was performed in the last four weeks

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

Valid range: 1–6

□□ = *Not applicable*

Average hours worked (Q36AVEHOURS)

(@156 1.)

3.6	<p>And how many hours did you spend on this activity the last time you did it (or on average each time you did it)?</p> <div style="text-align: center; margin-top: 20px;"> <p>HOURS</p> <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> <input style="width: 20px; height: 20px; border: 1px solid black;" type="text"/> </div>
------------	---

Note to users

Once the respondent has recalled the number of times they performed the activity, ask them the number of hours they spent on that activity, the last time they did it or the average time they spent on the activity. Record the number of hours in whole numbers.

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

Valid range: 2– 4

□□ = *Not applicable*

Location (Q37LOCATION)

(@157 1.)

3.7	Was this activity done within South Africa or in another country?	
	1 = WITHIN SOUTH AFRICA	<input type="checkbox"/> 1
	2 = IN ANOTHER COUNTRY	<input type="checkbox"/> 2
	3 = BOTH (WITHIN SOUTH AFRICA AND IN ANOTHER COUNTRY)	<input type="checkbox"/> 3

Note to users

This question seeks to find out where the activity was performed, whether the volunteer activity was performed within South Africa or in another country. Wait for the respondent to give you a response and mark the appropriate box. If the activity was performed both inside and outside SA, select option 3.

Universe

All members of the households in selected dwelling units aged 15 years and older.

Final code list

1 = WITHIN SOUTH AFRICA
 = *Not applicable*

Expecting compensation (Q38EXPECTCOMP)

(@158 1.)

- 08 Plant and machine operators
- 09 Elementary occupation
- 11 Other

Volunteer industry 1 (Volindus1)

(@198 2.)

Derived variable:

Derived from Q113ACT1IDUSTRY: What is the main activity of this organisation?

Final code list:

- 01 = 100 – 199
- 03 = 300 – 399
- 05 = 500 – 599
- 06 = 600 - 699
- 07 = 700 – 799
- 08 = 800 – 899 and Q113ACT1IDUSTRY ne 888
- 09 = 900 – 998
- 11 = 020 – 090 or 888 or 999

- 01 Agriculture
- 03 Manufacturing
- 05 Construction
- 06 Trade
- 07 Transport
- 08 Finance
- 09 Services
- 11 Other

Volunteer industry 2 (Volindus2)

(@200 2.)

Derived variable:

Derived from Q213ACT2IDUSTRY: What is the main activity of this organisation?

Final code list:

- 01 = 100 – 199
- 03 = 300 – 399
- 05 = 500 – 599
- 06 = 600 - 699
- 08 = 800 – 899 and Q213ACT2IDUSTRY ne 888
- 09 = 900 – 998
- 11 =020 – 090 or 888 or 999

- 01 Agriculture
- 03 Manufacturing
- 05 Construction
- 06 Trade
- 08 Finance
- 09 Services
- 11 Other

Volunteer industry 3 (Volindus3)

(@202 2.)

Derived variable:

Derived from Q313ACT3IDUSTRY: What is the main activity of this organisation?

Final code list:

- 03 = 300 – 399
- 05 = 500 – 599
- 07 = 700 – 799
- 08 = 800 – 899 and Q313ACT3IDUSTRY ne 888
- 09 = 900 – 998
- 11 =020 – 090 or 888 or 999

- 03 Manufacturing
- 05 Construction
- 07 Transport
- 08 Finance
- 09 Services
- 11 Other

Value (Value1)

(@204 14.8)

Derived variable:

Derived from a logical series of questions:

- Hours worked (*Q14HOURS*) (Question 1.4)
- Frequency of hours worked (*Q15FREQUENCY*) (Question 1.5)
- Average hours worked (*Q16AVEHOURS*) (Question 1.6)
- Monthly Earnings for employees (*Q54a_Monthly*) (Question 5.4.a)
- Monthly Earnings for employers and own account workers (*Q57a_Monthly*) (Question 5.7.a)
- Salary category (*Q58SALARYCATEGORY*) (Question 5.8)

Final code list:

Valid range: 0 – 14244.186046

= Not applicable

Value (Value2) (@218 14.8)

Derived variable:

Derived from a logical series of questions:

- Hours worked (*Q24HOURS*) (Question 2.4)
- Frequency of hours worked (*Q25FREQUENCY*) (Question 2.5)
- Average hours worked (*Q26AVEHOURS*) (Question 2.6)
- Monthly Earnings for employees (*Q54a_Monthly*) (Question 5.4.a)
- Monthly Earnings for employers and own account workers (*Q54a_Monthly*) (Question 5.7.a)
- Salary category (*Q58SALARYCATEGORY*) (Question 5.8)

Final code list:

Valid range: 0 – 17441.860464

= Not applicable

Value (Value3) (@232 14.8)

Derived variable:

Derived from a logical series of questions:

- Hours worked (*Q34HOURS*) (Question 3.4)
- Frequency of hours worked (*Q35FREQUENCY*) (Question 3.5)
- Average hours worked (*Q36AVEHOURS*) (Question 3.6)
- Monthly Earnings for employees (*Q54a_Monthly*) (Question 5.4.a)
- Monthly Earnings for employers and own account workers (*Q57a_Monthly*) (Question 5.7.a)
- Salary category (*Q58SALARYCATEGORY*) (Question 5.8)

Final code list:

Valid range: 11.30490956 – 3111.6279072

= Not applicable

Weights (*Vas_wgt*) (@246 14.7.)
