Identification

Survey title	Enterprise Survey Follow-up on COVID-19 2020
Survey subtitle	Round 1
Abbreviation or Acronym	ES-COVID19-R1 2020
Study ID	LVA_2020_ES-COVID19-R1_v01_M
Study type	Enterprise Survey [en/oth]

Overview

Abstract	As part of the efforts of the World Bank Group to understand the impact of COVID-19 on the private sector, the Enterprise Analysis unit is conducting follow-up surveys on recently completed Enterprise Surveys (ES) in several countries. These short surveys follow the baseline ES and are designed to provide quick information on the impact and adjustments that COVID-19 has brought about in the private sector.
Kind of Data	Sample survey data [ssd]
Unit of Analysis	Enterprise

Scope

Study notes	The survey covers the following topics: - Sales - Production - Labor - Finance - Policies - Expectations - Information on permanently closed establishments

Coverage

Country	Latvia, LVA
Geographic Coverage	National
Universe	The universe of inference is all registered establishments with five or more employees that are engaged in one of the following activities defined using ISIC Rev. 3.1: manufacturing (groupd D), construction (group F), services sector (groups G and H), transport, storage, and communcations sector (group I) and information technology (division 72 of group K).

Producers and Sponsors

Authoring entity/ Primary investigators	World Bank Group
Producers	World Bank Group

Sampling

Sample frame name	Sample frame source: Completed interviews in the Latvia 2019 ES.
Sampling Procedure	The follow-up surveys re-contact all establishments sampled in the standard ES using stratified random sampling. Total sample target: 359
Response Rate	68.0%

Weighting	The dataset contains thee weight variables. The baseline weights are denoted wmedian_ES and are used to compute the indicators that project to the baseline universe (e.g. exit rates). To account for non-response in the follow-up, these sampling weights are adjusted by cell of stratification (combination of size, sector, and location). The resulting variable wmedian_COVID - recommended to be used for analysis and used to compute all other indicators - assumes that businesses that could not be re-contacted (unobtainable) have exited the market. The variable wweak_COVID assumes that unobtainable businesses continue to exist. Establishments that have closed permanently are interviewed using a short questionnaire which is also available in the dataset.

Data Collection

Dates of Data Collection (YYYY/MM/DD)	2020-10-09, 2020-11-30, Round 1
Mode of data collection	Computer Assisted Telephone Interview [cati]
Data Collectors	CIVITTA

Survey Instrument

Questionnaires	The questionnaire contains the following modules: - Control information and introduction - Sales - Production - Labor - Finance - Policies - Expectations - Information on permanently closed establishments - Interview protocol

Data Access

Access Authority	Enterprise Analysis Unit, The World Bank, https://www.enterprisesurveys.org/en/covid-19, enterprisesurveys@worldbank.org
Citation requirement	The use of this dataset must be acknowledged using a citation which would include: - the identification of the Primary Investigator (including country name) - the full title of the survey and its acronym (when available), and the year(s) of implementation - the survey reference number - the source and date of download (for datasets disseminated online) Example: The World Bank. Latvia Enterprise Survey Follow-up on COVID-19, Round 1 (ES-COVID19-R1) 2020, Ref. LVA_2020_ES-COVID19-R1_v01_M. Dataset downloaded from [URL] on [date].

Disclaimer and Copyright

Disclaimer	The user of the data acknowledges that the original collector of the data, the authorized distributor of the data, and the relevant funding agency bear no responsibility for use of the data or for interpretations or inferences based upon such uses.
