HAITI

I. Objectives

This survey was designed to assist the World Bank Group (WBG) in gaining a better understanding of how stakeholders in Haiti perceive the WBG. The survey explored:

- *Overall Context*
- *Overall Attitudes toward the World Bank Group*
- *World Bank Group's Work and Engagement on the Ground*
- *World Bank Group's Support in Development Areas*
- *World Bank Group's Knowledge Work and Activities*
- *The Future Role of the World Bank Group in Haiti*
- *Communication and Information Sharing*
- *Background Information*

II. Methodology

From May to July 2021, 930 stakeholders of the WBG in Haiti were invited to provide their opinions on the WBG's work in the country by participating in a Country Opinion Survey. Participants were drawn from the Office of the President, Prime Minister/Minister; office of a parliamentarian; ministries/ministerial departments/implementation agencies; Project Management Units (PMUs) overseeing implementation of WBG projects; consultants/contractors working on WBG-supported projects/programs; local governments; independent government institutions; the judicial system; state-owned enterprises; bilateral and multilateral agencies; private sector organizations; the financial sector/private banks; private foundations; NGOs and community based organizations; trade unions; faith-based groups; youth groups; academia/research institutes/think tanks; the media; and other organizations.

A total of 180 stakeholders participated in the survey (19% response rate). Respondents completed the questionnaire with a representative from the local fielding agency, or they completed it online.

Every country that engages in the Country Opinion Survey (COS) must include specific indicator questions that will be aggregated for the World Bank Group's annual Corporate Scorecard. These questions are identified throughout the survey report.

The results in this year's Country Survey were compared to those in the Country Survey conducted in FY'18 (response rate was 28%, N=134). Data were weighted to reach the same stakeholder composition in two years, which allows for year comparisons. Stakeholder groups which were not present in both fiscal years were not included in the comparison. Respondents who belonged to the "other" stakeholder category were not included either. As a result, mean ratings, percentages of respondents, and the total number of respondents in both years are slightly different from those of the original data reported in the FY'18 COS report and the non-weighted data presented in appendices A, B, C and E. For the weighted stakeholder breakdown and year comparison results, please refer to Appendix D (page 87).

Note that the body of the report presents data on selected questions of the survey questionnaire. Please refer to Appendix A for data on all survey questions. Appendices B, C, D, and E present data on selected questions. Additional data breakdowns are available upon request.
