Other Household Survey [hh/oth]

SERIES INFORMATION
The Nigeria National Longitudinal Phone Survey (NLPS) is a high-frequency phone survey of households, which was initially designed to follow the same households over time making it a powerful tool for studying and understanding the socio-economic impact of the COVID-19 pandemic in Nigeria.

From April 2020 to April 2021, the NBS has successfully implemented the Nigeria COVID-19 NLPS Phase 1 (https://microdata.worldbank.org/index.php/catalog/3712) with technical support from a World Bank team from the Development Data Group (DECDG) and the Poverty and Equity Global Practice. In Phase 1, the NBS conducted 12 rounds of monthly phone interviews with over 1,700 households that were selected from the General Household Survey-Panel (GHS-Panel) 2018/19. The extensive information collected in the GHS-Panel just over a year prior to the pandemic provided a rich set of background information on the Nigeria NLPS households which can be leveraged to assess the differential impacts of the health crisis in the country.

ABSTRACT
The objective of the Nigeria NLPS Phase 2 is to monitor in real-time how the Nigerian households are coping with national and global crises and their effects on the welfare and livelihoods of the households. The households in the Phase 2 are drawn from the sample of households interviewed in GHS-Panel 2018/19 including those interviewed during the Phase 1. This survey has become a flexible tool that contributes to filling critical gaps in information that could be used by the Nigerian government and stakeholders to help design policies to mitigate the negative impacts of the COVID-19 pandemic, the oil prices crises, inflation and global value chain crises, among others. The Nigeria NLPS Phase 2 is designed to accommodate the evolving nature of the crises, including revision of the questionnaire on a bi-monthly basis.

Sample survey data [ssd]

UNIT OF ANALYSIS
- Households
- Individuals

Version

VERSION DESCRIPTION
Version 09: Edited, anonymized dataset for public distribution

VERSION DATE
2024-10-09

VERSION NOTES

This version includes datasets from Baseline (Round 1), Round 2, Round 3, Round 4, Round 5, Round 6, Round 7, Round 8, Round 9, Round 10, Round 11 and Round 12 surveys.

Scope

NOTES

The Nigeria National Longitudinal Phone Survey 2021-2024 covered the following topics:
- Household Roster (Rounds 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12)
- Access to Health Services (Rounds 1, 3, 4, 5, 6, 8)
- Access to Essential Goods (Round 10)
- Employment (respondent) (Rounds 1, 2, 3, 4, 5, 6, 8, 11)
- Employment (selected household members) (Round 3)
- Casual Labor (Round 11)
- Non-Farm Enterprise (Round 1, 6, 11)
- COVID Vaccination (Rounds 1, 3, 5)
- Migration (Round 2)
- Household Migrants Roster (Round 2)
- Job History (Round 3)
- Credit (Round 4)
- Economic Sentiments (Rounds 4, 5, 6, 7)
- Petrol (Rounds 4, 7, 8, 9, 12)
- Farmer Screening (Round 5)
- Food Security (Rounds 6, 9, 10)
- Coping/Shocks (Round 6, 10)
- Food Prices (Rounds 7, 8)
- Transportation Prices (Rounds 7, 8)
- Fertilizer (Rounds 9, 12)
- Farmer Annual Profile (Round 7)
- Digital Farming (Round 11)
- Subjective Welfare (Rounds 8, 9, 10, 12)
- Expectations on Climate Extremes and Past Experience (Round 8)
- Agriculture (Rounds 9, 12)
- Agricultural Labor (Round 9)
- Aggregated Food Consumption (Rounds 9, 12)

Sampling

SAMPLING PROCEDURE

BASELINE (ROUND 1): Wave 4 of the GHS-Panel conducted in 2018/19 served as the frame for the Nigeria NLPS surveys. The GHS-Panel sample includes 4,976 households that were interviewed in the post-harvest visit of the fourth wave in January/February 2019. This sample of households is representative nationally as well as across the 6 geopolitical Zones that divide up the country. In every visit of the GHS-Panel, phone numbers are collected from interviewed households for up to 4 household members and 2 reference persons who are in close contact with the household in order to assist in locating and interviewing households who may have moved in subsequent waves of the survey. This comprehensive set of phone numbers as well as the already well-established relationship between NBS and the GHS-Panel households made this an ideal frame from which to conduct the NLPS in Nigeria.

Among the 4,976 households interviewed in the post-harvest visit of the GHS-Panel in 2019, 4,934 (99.2%) provided at least one phone number. Around 90 percent of these households (4,440) provided a phone number for at least one household member while the remaining 10 percent only provided a phone number for a reference person. For the second phase of the NLPS, all 4,440 GHS-Panel households with household member contact details were included in the sample to be contacted. This included the sample of households from the first phase of the NLPS who had household member contact details (2,701 of 3,000). Based on the response rate in the first phase of the NLPS of 65 percent, this was expected to yield an interviewed sample of nearly 2,900 households that is both nationally representative as well as representative of urban and rural areas of the country.

ROUND 2: Interviewers attempted to contact and interview all 2,922 households that were successfully interviewed in the baseline (round 1) of the NLPS Phase 2. The second round of the NLPS Phase 2 also included individual-level data collection on the migration history of household members. For the migration module, information on adult (15 years or older) members of the household was targeted, including respondents that fall into this age range. However, information was not captured for all adult members. In order to limit the burden for respondents and interviewers in cases where the number of adult members is large, a maximum of 6 household members were selected (in addition to the main respondent) to capture information on migration. Therefore, for households with less than 6 adult members, all eligible members were included. However, 93 percent of interviewed households had 6 or less adult members and only 7 percent had more than six. For the 7 percent with more than 6 adult members, 6 members were randomly selected from among the pool of eligible members. The selection was stratified by sex with an equal split of 3 male and 3 females was targeted, depending on the pool of eligible males and females. However, the application of selection as relatively rare.

ROUND 3: Interviewers attempted to contact and interview all 2,811 households that were successfully interviewed in the baseline (round 1) of the NLPS Phase 2, excluding 41 households that refused in Round 2. The third round of the NLPS Phase 2 also included individual-level data collection on employment and job history of household members. For the employment and job history modules, information on adult (15 years or older) members of the household was targeted, including respondents that fall into this age range. However, information was not captured for all adult members. In order to limit the burden for respondents and interviewers in cases where the number of adult members is large, a maximum of 4 household members were selected (in addition to the main respondent) to capture information on employment and job history. Therefore, for households with less than 4 adult members, all eligible members were included.

However, 90 percent of interviewed households had 4 or less adult members and only 10 percent had more than four. For the 10 percent with more than 4 adult members, 4 members were randomly selected from among the pool of eligible members. The selection was stratified by sex with an equal split of 2 male and 2 females was targeted, depending on the pool of eligible males and females. The selection of eligible household members in Round 3 was conditional to the selection conducted in Round 2 for the migration module. In that round, up to 6 household members were selected (15 years or older) to answer the migration module. However, the application of selection as relatively rare.

ROUND 4: Interviewers attempted to contact and interview all 2,852 households that were successfully interviewed in the baseline (round 1) of the NLPS Phase 2, excluding 70 households that refused in previous rounds of the survey.

ROUND 5: Interviewers attempted to contact and interview 2,824 households consisting of households that were successfully interviewed in the baseline (round 1) of the NLPS Phase 2 excluding 98 households that refused in previous rounds of the survey.

ROUND 6: Interviewers attempted to contact and interview 2,799 households consisting of households that were successfully interviewed in the baseline (round 1) of the NLPS Phase 2 excluding 123 households that refused in previous rounds of the survey.

ROUND 7: Interviewers attempted to contact and interview 2,784 households consisting of households that were successfully interviewed in the baseline (round 1) of the NLPS Phase 2 excluding 138 households that refused in previous rounds of the survey.

ROUND 8: Interviewers attempted to contact and interview 2,771 households consisting of households that were successfully interviewed in the baseline (round 1) of the NLPS Phase 2 excluding 151 households that refused in previous rounds of the survey.

ROUND 9: Interviewers attempted to contact and interview 2,753 households consisting of households that were successfully interviewed in the baseline (round 1) of the NLPS Phase 2 excluding 169 households that refused in previous rounds of the survey.

ROUND 10: Interviewers attempted to contact and interview 2,743 households consisting of households that were successfully interviewed in the baseline (round 1) of the NLPS Phase 2 excluding 179 households that refused in previous rounds of the survey.

ROUND 11: Interviewers attempted to contact and interview 2,732 households consisting of households that were successfully interviewed in the baseline (round 1) of the NLPS Phase 2 excluding 190 households that refused in previous rounds of the survey.

ROUND 12: Interviewers attempted to contact and interview 2,724 households consisting of households that were successfully interviewed in the baseline (round 1) of the NLPS Phase 2 excluding 198 households that refused in previous rounds of the survey.

RESPONSE RATE

BASELINE (ROUND 1): All 4,440 households were contacted in the first round of this second phase of the NLPS. 71 percent of sampled households were successfully contacted. Of those contacted, 93 percent or 2,922 households were fully interviewed. These 2,922 households constitute the final successful sample and will be contacted in subsequent rounds of the survey. Among those household that were contacted, only 121 refused to be interviewed (about 4% of successfully contacted households). Among the sample of households who were not successfully contacted, the predominant reason for noncontact was that the phone was switched off at every attempt (18% of all households). Wrong numbers and non-existent numbers were also present but less common affecting only 4.8 and 2.5 percent of sampled households while for 2.6 percent of households the phone was ringing (and thus an active line and phone) but no one was answering.

ROUND 2: 2,797 households (95.7% of the 2,922 attempted) were contacted and 2,750 (94.1%) were successfully interviewed in the second round. Of those contacted, 36 households refused outright to be interviewed and 10 were partially interviewed. For the individual-level data collection, of 7,653 adult members of the household in round 2 (excluding the main respondent), information was collected on 7,058 or about 92.2 percent of eligible individuals. In addition, 2,750 main respondents were interviewed bringing the final sample of adult members with migration information to 9,808. Although interviewers made attempts to collect migration information directly from each individual selected, it proved exceedingly difficult to do so. As a result, only 34.6% of individual responses were obtained from the actual individual in question with the remaining 65.4% being collected via proxy (typically provided by the main respondent).

ROUND 3: 2,694 households (93.5% of the 2,881 attempted) were contacted and 2,647 (91.9%) were successfully interviewed in the third round. Of those contacted, 21 households refused outright to be interviewed and 22 were partially interviewed. Of the 2,647 successfully interviewed households, 2,575 were households that have been successfully interviewed in all three rounds of the phase 2 survey so far. The third round of the NLPS Phase 2 also included individual-level data collection on employment and job history of household members. For the individual-level data collection, of 7,887 adult members of the household in round 3 (excluding the main respondent), information was collected on 5,942 or about 75.3 percent of eligible individuals. In addition, 2,665 main respondents were interviewed bringing the final sample of adult members with employment information to 8,597.

ROUND 4: 2,646 households (92.8% of the 2,852 attempted) were contacted and 2,605 (91.3%) were successfully interviewed in the fourth round. Of those contacted, 25 households refused outright to be interviewed and 8 were partially interviewed. Of the 2,605 successfully interviewed households, 2,431 were households that have been successfully interviewed in all four rounds of the phase 2 survey so far.

ROUND 5: 2,610 households (92.4% of the 2,824 attempted) were contacted and 2,574 (91.1%) were successfully interviewed in the fifth round. Of those contacted, 25 households refused outright to be interviewed and 5 were partially interviewed. Of the 2,574 successfully interviewed households, 2,319 were households that have been successfully interviewed in all five rounds of the phase 2 survey so far. These are the households that form a complete panel across the five rounds.

ROUND 6: 2,495 households (89.1% of the 2,799 attempted) were contacted and 2,461 (87.9%) were successfully interviewed in the sixth round. Of those contacted, 13 households refused outright to be interviewed and 20 were partially interviewed. Of the 2,461 successfully interviewed households, 2,174 were households that have been successfully interviewed in all six rounds of the phase 2 survey so far. These are the households that form a complete panel across the six rounds.

ROUND 7: 2,482 households (89.2% of the 2,784 attempted) were contacted and 2,351 (84.4%) were successfully interviewed in the seventh round. Of those contacted, 15 households refused outright to be interviewed and 18 were partially interviewed. Of the 2,351 successfully interviewed households, 1,957 were households that have been successfully interviewed in all seven rounds of the phase 2 survey so far. These are the households that form a complete panel across the seven rounds.

The seventh round of the NLPS Phase 2 included a farmer annual profile module which was fielded to agricultural households. The agricultural households (engaged in either crop or livestock farming) were identified using the data collected during the fifth round (Section 13 Farmer Screening). Among 2,784 households that interviewers attempted to contact, 1,897 households were agricultural households. Of these households, 91 could not be interviewed because the selected famer was not available to respond to the interview.

Within the selected agricultural households, one household member was pre-selected to be the respondent (“selected farmer”) and interviewers attempted to contact the selected farmer for an interview. Farmers were selected in order to maintain an approximate balance of male and female respondents. The Farmer Screening implemented in the fifth round identified the male and female member of the household who is most knowledgeable about the household’s farming activities.

Out of the total sample of 2,784 households, 1,897 of them were selected to respond to the farmer annual profile module. For the selection of target respondents, two cases needed to be considered:
a) The household only had one person who was the most knowledgeable about the household’s farming activities (886 households). For those cases, we automatically selected the most knowledgeable person as the selected farmer (620 males and 266 females)
b) The household had two people (one male and one female member) classified as the most knowledgeable about the household’s farming activities (1,011 households). For those households, we randomly selected respondents to fulfill the quota to reach an approximate balance of male and female respondents (328 males and 683 females)

ROUND 8: 2,433 households (87.8% of the 2,771 attempted) were contacted and 2,402 (86.7%) were successfully interviewed in the eighth round. Of those contacted, 18 households refused outright to be interviewed and 8 were partially interviewed. Of the 2,402 successfully interviewed households, 1,852 were households that have been successfully interviewed in all eight rounds of the phase 2 survey so far. These are the households that form a complete panel across the eight rounds.

ROUND 9: 2,451 households (89.0% of the 2,753 attempted) were contacted and 2,429 (89.0%) were successfully interviewed in the ninth round. Of those contacted, 10 households refused outright to be interviewed and 7 were partially interviewed. Of the 2,429 successfully interviewed households, 1,791 were households that have been successfully interviewed in all nine rounds of the phase 2 survey so far. These are the households that form a complete panel across the nine rounds.

ROUND 10: 2,594 households (94.6% of the 2,743 attempted) were contacted and 2,573 (93.8%) were successfully interviewed in the tenth round. Of those contacted, 10 households refused outright to be interviewed and 10 were partially interviewed. Of the 2,573 successfully interviewed households, 1,755 were households that have been successfully interviewed in all ten rounds of the phase 2 survey so far. These are the households that form a complete panel across the ten rounds.

ROUND 11: 2,515 households (92.1% of the 2,732 attempted) were contacted and 2,484 (90.9%) were successfully interviewed in the eleventh round. Of those contacted, 8 households refused outright to be interviewed and 10 were partially interviewed. Of the 2,484 successfully interviewed households, 1,677 were households that have been successfully interviewed in all eleven rounds of the phase 2 survey so far. These are the households that form a complete panel across the eleven rounds.

ROUND 12: 2,475 households (90.9% of the 2,724 attempted) were contacted and 2,454 (90.1%) were successfully interviewed in the twelfth round. Of those contacted, 8 households refused outright to be interviewed and 12 were partially interviewed. Of the 2,454 successfully interviewed households, 1,632 were households that have been successfully interviewed in all twelve rounds of the phase 2 survey so far. These are the households that form a complete panel across the twelve rounds.

WEIGHTING

BASELINE (ROUND 1): In order to produce national estimates from the successfully interviewed sample, weights must be applied to the information provided by sampled households. Weights for the GHS-Panel serve as the basis for the Nigeria NLPS surveys, but the weights must be adjusted to reflect the selection and interviewing process. The weights for the Nigeria NLPS were calculated in several stages.

1. Begin with the GHS-Panel full sample household weights.
2. Apply an adjustment factor for the selection into the frame (GHS-Panel households that have contact details for a household member). A ratio adjustment was applied at the Zone-level (the strata for the GHS-Panel) to preserve the sum of household weights within each Zone between the full GHS-Panel sample and the NLPS frame.
3. Apply an adjustment for selection into the NLPS sample. The adjustment is a simple expansion factor that is the inverse of the selection probability from the frame for each sampled unit.
4. Apply an adjustment factor for non-contact of sampled households. This was again performed with a ratio adjustment at the Zone-level.
5. Apply an adjustment factor for non-response of contacted households through a ratio adjustment at the Zone-level.
6. Calibrate the weights (following adjustments 2-5) according to the properties of the full weighted GHS-Panel sample. This calibration step adjusts the weights such that the estimates obtained from the final NLPS sample will match the weighted means of the full GHS-Panel sample for specified characteristics. The calibration was performed using only information obtained from the GHS-Panel interview and thus will only reflect changes in the sample composition and not changes over time. The calibration applied here aims to correct for selection bias that is introduced at any point between identification of the frame and the final successfully interviewed sample. Selection bias is of particular concern in phone surveys since some segment of the population does not have access to a phone and there are more difficult barriers to successfully reach and interview households over the phone. The calibration was applied using the ReGenesees package in R. The characteristics included in the calibration were numerous, reflecting different dimensions of household socioeconomic status that were correlated with nonresponse. Characteristics include consumption expenditure, household size sex of household head, marital status of the household head, age of the household head, education of the household head, working status of the household head, asset ownership, access to electricity, improved water source, improved sanitation facilities, access to financial services, land ownership, agricultural activities, as well as demographic breakdown according to sex and 8 age groups (0-6, 7-14, 15-24, 25-34, 35-44, 45-54, 55-64, and 65 years and older). The weights were also applied to the total number of households in the population given by the GHS-Panel weights.
7. Trim the weights. Outlier weights were trimmed at the 1st and 99th percentiles using the ReGenesees package in R which adjusts the weights to given bounds while minimizing the deviation from the estimates obtained from the calibration in step 6.

In subsequent rounds of the survey, steps 4, 5, and 6 will be applied to the final baseline weights.

The baseline (round 1) weights are located in the household-level data file (p2r1_sect_a_2_5_6_9a_12.dta) under the variable name wt_p2round1.

ROUND 2: In Round 2, several different weights are provided: one at the household-level and three at the individual-level. The household weights are the same as was provided in previous round. For the household weights, the baseline (round 1 of phase 2) weights were adjusted for noncontact and nonresponse as well as calibrated following the same procedures outlined in Round 1 (steps 4, 5 and 6). The round 2 household weights can be found in the household-level data file (p2r2_sect_a_2_2a_2b_6_12) in the variable named wt_p2round2.

Given the focus on individual migration information in round 2 and the selection steps outlined above for the sample of adult members, an additional three individual-level weights were calculated and provided in the round 2 data. The individual weights for the migration module were calculated according to:

$w_{ish} = w_h \times (n_{hs}/N_{hs})^{(-1)}$

Where w_ih is the sampling weight for individual i who is sex s (male or female) in household h, w_h is the final household level weight (i.e., wt_p2round2), N_hs is the total number of eligible adult household members (15 years or older) of sex s in household h and n_hs is the equivalent number of selected eligible individuals in the household. The individual weights were then calibrated to correspond to the sex and age distribution of the total adult population according to the post-harvest visit of the GHS-Panel. The age groups considered in the calibration were 15-24, 25-34, 35-44, 45-54, 55-64, and 65 years or older, all further disaggregated by sex (male/female).

The basic individual weight described above is the cross section individual weight that considers all individuals that migration information was collected on. This weight is called wt_migr_p2r2 and can be found in the individual-level data file (p2r2_sect_2_2a). However, an additional two weights are provided for the panel of individuals interviewed in the GHS-Panel wave 4 and round 2 of the NLPS Phase II (i.e., excluding individuals added in any round of the NLPS). The first weight (wt_migr_p2r2_pp_panel) contains the weight for individuals interviewed in the post-planting visit of the GHS-Panel wave 4 and the second (wt_migr_p2r2_ph_panel) contains the weight for individuals interviewed in the post-harvest visit of the GHS-Panel wave 4.

ROUND 3: In Round 3, several different weights are provided: two at the household-level and three at the individual-level. The two household weights provided are cross section and panel weights. The cross section weights are applicable to the entire round 3 sample while the panel weights are only applicable to round 3 sample households that have been successfully interviewed in all three rounds of phase 2 of the survey so far. For both of the household weights, the baseline (round 1 of phase 2) weights were adjusted for noncontact and nonresponse as well as calibrated following the same procedures outlined in section 2.2 (steps 4, 5 and 6). The round 3 household weights can be found in the household-level data file (p2r3_sect_a_2_5_6_6c_9a_12.dta) with the cross section weights in the variable named wt_p2round3 and the panel weights in the variable named wt_p2round3_panel.

Given the focus on individual employment and job history information in round 3 and the selection steps outlined above for the sample of adult members, an additional three individual-level weights were calculated and provided in the round 3 data. The individual weights for the employment and job history modules were calculated according to:

w_ish=w_h x (n_hs/N_hs)^(-1)

Where w_ih is the sampling weight for individual i who is sex s (male or female) in household h, w_h is the final household level weight (i.e., wt_p2round3), N_hs is the total number of eligible adult household members (15 years or older) of sex s in household h and n_hs is the equivalent number of selected eligible individuals in the household. The individual weights were then calibrated to correspond to the sex and age distribution of the total adult population according to the post-harvest visit of the GHS-Panel (The age groups considered in the calibration were 15-24, 25-34, 35-44, 45-54, 55-64, and 65 years or older, all further disaggregated by sex (male/female).

The basic individual weight described above is the cross section individual weight that considers all individuals that migration information was collected on. This weight is called wt_emp_p2r3 and can be found in the individual-level data file (p2r3_sect_2_6b_6c.dta). However, an additional two weights are provided for the panel of individuals interviewed in the GHS-Panel wave 4 and round 2 of the NLPS Phase II (i.e., excluding individuals added in any round of the NLPS). The first weight (wt_emp_p2rr_pp_panel) contains the weight for individuals interviewed in the post-planting visit of the GHS-Panel wave 4 and the second (wt_emp_p2r3_ph_panel) contains the weight for individuals interviewed in the post-harvest visit of the GHS-Panel wave 4.

ROUND 4: In Round 4, two different household weights are provided: cross section and panel weights. The cross section weights are applicable to the entire round 4 sample while the panel weights are only applicable to round 4 sample households that have been successfully interviewed in all four rounds of phase 2 of the survey so far. For both of the household weights, the baseline (round 1 of phase 2) weights were adjusted for noncontact and nonresponse as well as calibrated following the same procedures outlined in section 2.2 (steps 4, 5 and 6). The round 4 household weights can be found in the household-level data file (p2r4_sect_a_2_5_5g_6_11a_11b_12.dta) with the cross section weights in the variable named wt_p2round4 and the panel weights in the variable named wt_p2round4_panel.

ROUND 5: In Round 5, two different household weights are provided: cross section and panel weights. The cross section weights are applicable to the entire round 5 sample while the panel weights are only applicable to round 5 sample households that have been successfully interviewed in all five rounds of phase 2 of the survey so far. For both of the household weights, the baseline (round 1 of phase 2) weights were adjusted for noncontact and nonresponse as well as calibrated following the same procedures outlined in section 2.2 (steps 4, 5 and 6). The round 5 household weights can be found in the household-level data file (p2r5_sect_a_2_5_6_9a_11b_13_12.dta) with the cross section weights in the variable named wt_p2round5 and the panel weights in the variable named wt_p2round5_panel.

ROUND 6: In Round 6, two different household weights are provided: cross section and panel weights. The cross section

weights are applicable to the entire round 6 sample while the panel weights are only applicable to round 6 sample households that have been successfully interviewed in all six rounds of phase 2 of the survey so far. For both of the household weights, the baseline (round 1 of phase 2) weights were adjusted for noncontact and nonresponse as well as calibrated following the same procedures outlined in section 2.2 (steps 4, 5 and 6). The round 6 household weights can be found in the household-level data file (p2r6_sect_a_2_5_6_8_11b_12.dta) with the cross section weights in the variable named wt_p2round6 and the panel weights in the variable named wt_p2round6_panel.

ROUND 7: In Round 7, three different household weights are provided. Two household weights are the same as the ones that have been provided in previous rounds, that is cross section and panel weights. The cross section weights are applicable to the entire round 7 sample while the panel weights are only applicable to round 7 sample households that have been successfully interviewed in all seven rounds of phase 2 of the survey so far. For both of these household weights, the baseline (round 1 of phase 2) weights were adjusted for noncontact and nonresponse as well as calibrated following the same procedures outlined in BASELINE (steps 4, 5 and 6).

Given the additional module (farmer annual profile) that was fielded only for agricultural households identified during round 5, an additional weight for agricultural households was estimated. A similar process to the weight adjustments was adopted with some additional considerations to improve representativeness of the results for crop and livestock farming households. The round 5 of phase 2 weights were first adjusted for noncontact and nonresponse (steps 4 and 5 in section 2.2) following the same ratio adjustment to preserve the sum of weights for eligible households at zone-level as well as across three different types of agricultural households based on their reported agricultural activities in round 5 of phase 2: (1) those only engaged in crop farming, (2) those only engaged in livestock raising, and (3) those engaged in both crop farming and livestock raising. Following these adjustments, the weights were then calibrated (step 6 in section 2.2.) according to the profile of characteristics from GHS-Panel Wave 4 for crop and livestock farming households. This calibration step will further help to counteract any bias and help to ensure the estimates for this subsample are broadly representative of crop and livestock farming households in Nigeria.

The round 7 household weights can be found in the household-level data file (p2r7_sect_a_2_5g_11b_13a_12.dta) with the cross-section weights in the variable named wt_p2round7, the panel weights in the variable named wt_p2round7_panel and the agricultural households weights in the variable named wt_p2round7_farmer.

ROUND 8: In Round 8, two different household weights are provided: cross section and panel weights. The cross section weights are applicable to the entire round 8 sample while the panel weights are only applicable to round 8 sample households that have been successfully interviewed in all eight rounds of phase 2 of the survey so far. For both of the household weights, the baseline (round 1 of phase 2) weights were adjusted for noncontact and nonresponse as well as calibrated following the same procedures outlined in section 2.2 (steps 4, 5 and 6). The round 8 household weights can be found in the household-level data file (p2r8_sect_a_2_5_5g_6_11c_14_12.dta) with the cross section weights in the variable named wt_p2round8 and the panel weights in the variable named wt_p2round8_panel.

ROUND 9: In Round 9, two different household weights are provided: cross section and panel weights. The cross section weights are applicable to the entire round 9 sample while the panel weights are only applicable to round 9 sample households that have been successfully interviewed in all nine rounds of phase 2 of the survey so far. For both of the household weights, the baseline (round 1 of phase 2) weights were adjusted for noncontact and nonresponse as well as calibrated following the same procedures outlined in section 2.2 (steps 4, 5 and 6). The round 9 household weights can be found in the household-level data file (p2r9_sect_a_2_5g_5j_6_6e_8_8a_11c_11c2_12.dta) with the cross section weights in the variable named wt_p2round9 and the panel weights in the variable named wt_p2round9_panel.

ROUND 10: In Round 10, two different household weights are provided: cross section and panel weights. The cross section weights are applicable to the entire round 10 sample while the panel weights are only applicable to round 10 sample households that have been successfully interviewed in all ten rounds of phase 2 of the survey so far. For both of the household weights, the baseline (round 1 of phase 2) weights were adjusted for noncontact and nonresponse as well as calibrated following the same procedures outlined in section 2.2 (steps 4, 5 and 6). The round 10 household weights can be found in the household-level data file (p2r10_sect_a_2_8_11c_12.dta) with the cross section weights in the variable named wt_p2round10 and the panel weights in the variable named wt_p2round10_panel.

ROUND 11: In Round 11, two different household weights are provided: cross section and panel weights. The cross section weights are applicable to the entire round 11 sample while the panel weights are only applicable to round 11 sample households that have been successfully interviewed in all eleven rounds of phase 2 of the survey so far. For both of the household weights, the baseline (round 1 of phase 2) weights were adjusted for noncontact and nonresponse as well as calibrated following the same procedures outlined in section 2.2 (steps 4, 5 and 6). The round 10 household weights can be found in the household-level data file (p2r11_sect_a_6_6d_13b_12.dta) with the cross section weights in the variable named wt_p2round11 and the panel weights in the variable named wt_p2round11_panel.

ROUND 12: In Round 12, two different household weights are provided: cross section and panel weights. The cross-section weights are applicable to the entire round 12 sample while the panel weights are only applicable to round 12 sample households that have been successfully interviewed in all twelve rounds of phase 2 of the survey so far. For both of the household weights, the baseline (round 1 of phase 2) weights were adjusted for noncontact and nonresponse as well as calibrated following the same procedures outlined in section 2.2 (steps 4, 5 and 6). The round 12 household weights can be found in the household-level data file (p2r12_sect_a_2_5g_5j_6_8a_11c_11c2_12.dta) with the cross-section weights in the variable named wt_p2round12 and the panel weights in the variable named wt_p2round12_panel.

DATA COLLECTION MODE

Computer Assisted Telephone Interview [cati]

DATA COLLECTION NOTES

ORGANIZATION OF FIELDWORK: Data were collected by trained NBS interviewers who individually made phone calls either from a dedicated call center established in NBS headquarters or from their respective homes. Interviewers were allowed to make calls from home due to capacity constraints in the call center as well as social distancing measures undertaken in the office. While interviewers would occasionally meet in the office, most correspondence with the interviewers was made through WhatsApp, phone and emails.

GIFTS TO HOUSEHOLD: As a show of appreciation for the households’ participation, all households that gave consent to be interviewed, were transferred 1000 Naira credit to their phones (even if their interviews are only partially completed). The transfers are made to successfully interviewed households in every round. Since some of the sampled households do not have personal phone numbers, they were interviewed via a reference person’s phone. These reference persons were also credited 1000 Naira credit to their phones when the households are successfully interviewed via their phones.

PRE-LOADED INFORMATION: Basic information on every household was pre-loaded in the CATI assignments for each interviewer. The information was pre-loaded to (1) assist interviewers in calling and identifying the household and (2) ensure that each pre-loaded person is properly addressed and easily matched to the most recent interviews. Basic household information (location, household head name, phone number, etc.) was pre-loaded. The list of individuals from the previous interview and their basic characteristics were uploaded. This helped maintain the panel of individuals and ensured the status of each individual in the subsequent round of the survey.

RESPONDENTS: Each round of the Nigeria NLPS Phase 2 has ONE RESPONDENT per household. The respondent was the household head or a knowledgeable adult household member. The respondent must be a member of the household. Interviewers were instructed to make every effort to reach the same respondent in subsequent rounds of the survey, in order to maintain the consistency of the information collected. However, in cases where the previous respondent was not available, interviewers would identify another knowledgeable adult household member to interview.

DATA MONITORING AND EVALUATION: As an additional aid to ensuring good quality data, extensive monitoring was performed throughout the fieldwork for each round of the survey. Two monitoring exercises were implemented during data collection. First, Survey Solutions’ audio recording functionality was activated for 25 percent of the sample. These interview recordings were audited by 3 trained monitors, though not all recorded interviewers were able to be reviewed due to personnel constraints. On a daily basis, the monitors will listen to these recordings and fill in a structured questionnaire with their observations on interviewer performance. The feedback from these audio audits are then filtered to the respective interviewers.

The second quality check implemented were call backs to contacted households. The call backs were conducted by trained interviewers who are not part of the main data collection interviewers. Each day, up to 36 households that were contacted by the interviewing team are called by these call back interviewers. The call back interviewers conduct a short interview with the household to confirm that the interviewer did indeed conduct the interview, that certain key elements were clearly stated to the respondent, that the interviewer conducted themselves in a professional manner, and other details on the interview process. Further, the call back team asked several time-invariant questions of the respondent to further confirm the interview was fully conducted and the interviewer captured the information correctly. Feedback from call backs were routed to the respective interviewers to improve on identified areas. Further, the call back interviewers also called households that were not successfully contacted by the main interviewer. In some cases, the call back interviewer was able to reach the household. In such cases, the case was sent back to the interviewer to conduct the interview.

As a result of these quality checks, some of the interviewers were dropped from participating in the survey. There were also regular check-ins to address questions and issues the interviewers might have.

Questionnaires

QUESTIONNAIRES

BASELINE (ROUND 1): One questionnaire, the Household Questionnaire, was administered to all households in the sample. The Household Questionnaire provides information on demographics; access to health services; employment and non-farm enterprise; and COVID-19 vaccine.

ROUND 2: One questionnaire, the Household Questionnaire, was administered to all households in the sample. The Household Questionnaire provides information on demographics; migration; employment; and household migrants.

ROUND 3: One questionnaire, the Household Questionnaire, was administered to all households in the sample. The Household Questionnaire provides information on demographics; access to health services; employment; job history; and COVID-19 vaccine.

ROUND 4: One questionnaire, the Household Questionnaire, was administered to all households in the sample. The Household Questionnaire provides information on demographics; access to health services; petrol; employment; credit; and economic sentiments. While the Household Questionnaire was administered to all the sample households, economic sentiments questions were asked to only half of the sample households (randomly selected).

ROUND 5: One questionnaire, the Household Questionnaire, was administered to all households in the sample. The Household Questionnaire provides information on demographics; access to health services; employment; COVID-19 vaccine; economic sentiments; and farmer screening. While the Household Questionnaire was administered to all the sample households, economic sentiments questions were administered to only half of the sample households (those that were not selected to answer these questions in Round 4).

ROUND 6: One questionnaire, the Household Questionnaire, was administered to all households in the sample. The Household Questionnaire provides information on demographics; access to health services; employment and non-farm enterprise; food security; coping/shocks; and economic sentiments. While the Household Questionnaire was administered to all the sample households, economic sentiments questions were administered to only half of the sample households (those that were not selected to answer these questions in Round 5).

ROUND 7: One questionnaire, the Household Questionnaire, was administered to all households in the sample. The Household Questionnaire provides information on demographics; petrol; food prices; transportation prices; farmer annual profile; and economic sentiments. While the Household Questionnaire was administered to all the sample households, economic sentiments questions were administered to only half of the sample households (those that were not selected to answer these questions in Round 6). Alternatively, prices questions were administered to only half of the sample households that were not selected to answer economic sentiments questions. Farmer annual profile questions were administered to agricultural households, that were identified using the farmer screening data collected in the fifth round.

ROUND 8: One questionnaire, the Household Questionnaire, was administered to all households in the sample. The Household Questionnaire provides information on demographics; access to health services; petrol; food prices; transportation prices; employment; subjective welfare and expectations on climate extremes and past experience. While the Household Questionnaire was administered to all the sample households, subjective welfare questions were administered to only half of the sample households. Alternatively, prices questions were administered to only half of the sample households that were not selected to answer subjective welfare questions.

ROUND 9: One questionnaire, the Household Questionnaire, was administered to all households in the sample. The Household Questionnaire provides information on demographics; petrol; fertilizer; agriculture; agricultural labor; food security; aggregated food consumption and subjective welfare. While the Household Questionnaire was administered to all the sample households, selected subjective welfare questions (Q1-Q6 specifically) were administered to only half of the sample households (those that were not selected to answer these questions in Round 8). Aggregated food consumption questions were also administered to these households. Alternatively, food security, petrol and fertilizer questions were administered to only half of the sample households that were not selected to answer aggregated food consumption and selected subjective welfare (Q1-Q6) questions.

ROUND 10: One questionnaire, the Household Questionnaire, was administered to all households in the sample. The Household Questionnaire provides information on demographics; access to essential goods; food security; coping strategies and subjective welfare. While the Household Questionnaire was administered to all the sample households, the subjective welfare questions were administered to only half of the sample households (those that were not selected to answer these questions in Round 9). Alternatively, food security questions were administered to only half of the sample households that were not selected to answer the subjective welfare questions.

ROUND 11: One questionnaire, the Household Questionnaire, was administered to all households in the sample. The Household Questionnaire provides information on demographics; employment and non-farm enterprise; casual labor; and digital farming.

ROUND 12: The Household Questionnaire provides information on demographics; agriculture; aggregated food consumption; petrol subsidy, awareness and support; fertilizer; and subjective welfare. While the Household Questionnaire was administered to all the sample households, selected subjective welfare questions (Q1-Q6 specifically) were administered to only half of the sample households (those that were not selected to answer these questions in Round 10). Alternatively, aggregated food consumption questions were administered to only half of the sample households that were not selected to answer selected subjective welfare (Q1-Q6) questions.

Data Dictionary

Data file	Cases	Variables
p2r1_sect_a_2_5_6_9a_12.dta Data collected through National Longitudinal Phone Survey Phase 2 Baseline (Round 1) Questionnaire, Section A (Household Identification), Section 2 (Household Roster Update), Section 5 (Access to Health Services), Section 6 (Employment and Non-Farm Enterprise), Section 9a (COVID-19 Vaccine) and Section 12 (Interview Results) - Household identifiers and enumerator identifiers - Changes to roster of members of the household since the last interview - Household's health insurance, access to health services - Status in employment, why currently not working, job search, actual job; family business/non-farm enterprise, sector of family business, challenges faced by the business due to the coronavirus, changes made in the way business is conducted due to the coronavirus - Source of information, vaccination status, reason for getting vaccinated, reason for not getting vaccinated, vaccine hesitancy, opinion against vaccine mandates - Result of interview including observation notes by enumerator regarding the interview, respondent and language of interview	4440	195
p2r1_sect_1.dta Data collected through National Longitudinal Phone Survey Phase 2 Baseline (Round 1) Questionnaire, Section 1 (Interviewer Information, questions 1-11) - Roster of call attempts, result and respondent of call attempt, interview consent, date and time of call back	21995	17
p2r1_sect_1b.dta Data collected through National Longitudinal Phone Survey Phase 2 Baseline (Round 1) Questionnaire, Section 1b (Phone Number Roster) - Roster of phone numbers, the information of the person that the listed phone number belongs to	13620	11
p2r1_sect_2.dta Data collected through National Longitudinal Phone Survey Phase 2 Baseline (Round 1) Questionnaire, Section 2 (Household Roster Update) - Roster of members of the household, relationship to the household head, gender, age, marital status, reason for joining the household if new, reason for leaving the household if left, current school attendance, and reason for not attending school	20142	25
p2r1_sect_5.dta Data collected through National Longitudinal Phone Survey Phase 2 Baseline (Round 1) Questionnaire, Section 5 (Access to Health Services) - Reason for not being able to access the services, place where the services were received, out-of-pocket expenses, satisfaction with the services received	12897	22
p2r2_sect_a_2_2a_2b_6_12.dta Data collected through National Longitudinal Phone Survey Phase 2 Baseline (Round 2) Questionnaire, Section A (Household Identification), Section 2 (Household Roster Update), Section 2a (Migration) (respondent), Section 2b (Household Migrants Roster), Section 6 (Employment), and Section 12 (Interview Results) - Household identifiers and enumerator identifiers - Changes to roster of members of the household since the last interview - Place of birth, number of years lived in the current state, place the member was living before moving to the current state, reason for moving to the current state, seasonal migration in the last 12 months - Whether any persons moved away from the household in the past 10 years - Status in employment, why currently not working, job search, actual job; family business/non-farm enterprise, sector of family business, challenges faced by the business due to the coronavirus, changes made in the way business is conducted due to the coronavirus - Result of interview including observation notes by enumerator regarding the interview, respondent and language of interview	2922	124
p2r2_sect_1.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 2 Questionnaire, Section 1 (Interviewer Information, questions 1-11) - Roster of call attempts, result and respondent of call attempt, interview consent, date and time of call back	9569	17

p2r2_sect_1b.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 2 Questionnaire, Section 1b (Phone Number Roster) - Roster of phone numbers, the information of the person that the listed phone number belongs to	9835	11
p2r2_sect_2_2a.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 2 Questionnaire, Section 2 (Household Roster Update) and Section 2a (Migration) (selected household members including respondents) - Roster of members of the household, relationship to the household head, gender, age, marital status, reason for joining the household if new, reason for leaving the household if left - Place of birth, number of years lived in the current state, place the member was living before moving to the current state, reason for moving to the current state, seasonal migration in the last 12 months	18258	75
p2r2_sect_2a.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 2 Questionnaire, Section 2a (Migration) (Q13-Q15) (respondent) - Types of migration experienced since 2000	11040	12
p2r2_sect_2a_1.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 2 Questionnaire, Section 2a (Migration) (Q13-Q15) (selected household members including respondents) - Types of migration experienced since 2000	39288	14
p2r2_sect_2b.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 2 Questionnaire, Section 2b (Household Migrants Roster) - Roster of previous members of the household (persons moved away from the household in the last 10 years), relationship to the household head, gender, age, current place of living, reason for leaving the household, education level and work when the person left the household, whether the person sent money to the household in the last 12 months	719	24
p2r3_sect_a_2_5_6_6c_9a_12.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 3 Questionnaire, Section A (Household Identification), Section 2 (Household Roster Update), Section 5 (Access to Health Services), Section 6 (Employment (respondent)), Section 6c (Job History (respondent)) Section 9a (COVID-19 Vaccine) and Section 12 (Interview Results) - Household identifiers and enumerator identifiers - Changes to roster of members of the household since the last interview - Household's health insurance, access to health services - Status in employment, why currently not working, job search, actual job - Age at first job, status in employment, industry and place of work of first job, reason for changing first job - Vaccine status, when received the first shot, number of shots received, place of vaccination, reason for getting vaccinated, reason for not getting vaccinated, vaccine hesitancy - Result of interview including observation notes by enumerator regarding the interview, respondent and language of interview	2881	110
p2r3_sect_1.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 3 Questionnaire, Section 1 (Interviewer Information, questions 1-11) - Roster of call attempts, result and respondent of call attempt, interview consent, date and time of call back	9680	21
p2r3_sect_1b.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 3 Questionnaire, Section 1b (Phone Number Roster) - Roster of phone numbers, the information of the person that the listed phone number belongs to	9749	11

p2r3_sect_2_6b_6c.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 3 Questionnaire, Section 2 (Household Roster Update), Section 6b (Employment (selected household members including respondents)), Section 6c (Job History (selected household members including respondents)) - Roster of members of the household, relationship to the household head, gender, age, marital status, reason for joining the household if new, reason for leaving the household if left, vaccination status - Status in employment, why currently not working, job search, actual job - Age at first job, status in employment, industry and place of work of first job, reason for changing first job	17627	52
p2r3_sect_5.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 3 Questionnaire, Section 5 (Access to Health Services) - Reason for not being able to access the services, place where the services were received, out-of-pocket expenses, satisfaction with the services received	10449	22
p2r4_sect_a_2_5_5g_6_11a_11b_12.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 4 Questionnaire, Section A (Household Identification), Section 2 (Household Roster Update), Section 5f (Access to Health Services), Section 5g (Petrol), Section 6 (Employment (respondent)), Section 11a (Credit), Section 11b (Economic Sentiments) and Section 12 (Interview Results) - Household identifiers and enumerator identifiers - Changes to roster of members of the household since the last interview - Access to health services - Household has ever bought petrol, last time household purchased petrol, difficulties encountered when purchasing petrol - Status in employment, why currently not working, job search, actual job - Attempted to borrow money or applied for a loan, whether household needed a loan, from whom household borrowed or attempted to borrow money, purpose of the loan, reason why application to the loan was refused, whether household missed or stopped a payment, reason why household did not have enough money to repay the loan, reason why household did not attempt to borrow/apply for a loan - How household feels about past and future household economic situation, past and future country economic situation, past and future consumer prices, major household purchases, extreme weather shocks to household’s financial status in the future - Result of interview including observation notes by enumerator regarding the interview, respondent and language of interview	2852	134
p2r4_sect_1.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 4 Questionnaire, Section 1 (Interviewer Information, questions 1-11) - Roster of call attempts, result and respondent of call attempt, interview consent, date and time of call back	10201	21
p2r4_sect_1b.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 4 Questionnaire, Section 1b (Phone Number Roster) - Roster of phone numbers, the information of the person that the listed phone number belongs to	9808	11
p2r4_sect_2.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 4 Questionnaire, Section 2 (Household Roster Update) - Roster of members of the household, relationship to the household head, gender, age, marital status, reason for joining the household if new, reason for leaving the household if left	17527	20
p2r4_sect_5.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 4 Questionnaire, Section 5f (Access to Health Services) - Reason for not being able to access the services, place where the services were received, out-of-pocket expenses, satisfaction with the services received	10944	30

p2r5_sect_a_2_5_6_9a_11b_13_12.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 5 Questionnaire, Section A (Household Identification), Section 2 (Household Roster Update), Section 5f (Access to Health Services), Section 6 (Employment (respondent)), Section 9a (COVID-19 Vaccine), Section 11b (Economic Sentiments), Section 13 (Farmer Screening) and Section 12 (Interview Results) - Household identifiers and enumerator identifiers - Changes to roster of members of the household since the last interview - Access to health services - Status in employment, why currently not working, job search, actual job - Vaccine status, received any proof of vaccination, reason for not receiving proof, planning to get vaccinated, reason for getting vaccinated, preference for vaccine manufacture, reason for not getting vaccinated, vaccine hesitancy - How household feels about past and future household economic situation, past and future country economic situation, past and future consumer prices, major household purchases, extreme weather shocks to household's financial status in the future - How much household income come from household's crop and livestock products, how much household consumption come from household's crop and livestock products, most knowledgeable male and female members on household's agricultural activities - Result of interview including observation notes by enumerator regarding the interview, respondent and language of interview	2824	142
p2r5_sect_1.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 5 Questionnaire, Section 1 (Interviewer Information, questions 1-11) - Roster of call attempts, result and respondent of call attempt, interview consent, date and time of call back	9508	21
p2r5_sect_1b.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 5 Questionnaire, Section 1b (Phone Number Roster) - Roster of phone numbers, the information of the person that the listed phone number belongs to	9965	11
p2r5_sect_2.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 5 Questionnaire, Section 2 (Household Roster Update) - Roster of members of the household, relationship to the household head, gender, age, marital status, reason for joining the household if new, reason for leaving the household if left, COVID-19 vaccine status	17242	22
p2r5_sect_5.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 5 Questionnaire, Section 5f (Access to Health Services) - Reason for not being able to access the services, place where the services were received, out-of-pocket expenses, satisfaction with the services received	10544	32
p2r6_sect_a_2_5_6_8_11b_12.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 6 Questionnaire, Section A (Household Identification), Section 2 (Household Roster Update), Section 5f (Access to Health Services), Section 6 (Employment (respondent) and Non-Farm Enterprise), Section 8 (Food Security), Section 11b (Economic Sentiments) and Section 12 (Interview Results) - Household identifiers and enumerator identifiers - Access to health services - Status in employment, why currently not working, job search, actual job - Family business/non-farm enterprise, sector of family business, challenges faced by the business in the last 6 months - Household's food security status during the last 30 days - How household feels about past and future household economic situation, past and future country economic situation, past and future consumer prices, major household purchases, extreme weather shocks to household's financial status in the future - Result of interview including observation notes by enumerator regarding the interview, respondent and language of interview	2799	91
p2r6_sect_1.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 6 Questionnaire, Section 1 (Interviewer Information, questions 1-11) - Roster of call attempts, result and respondent of call attempt, interview consent, date and time of call back	9041	21

p2r6_sect_1b.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 6 Questionnaire, Section 1b (Phone Number Roster) - Roster of phone numbers, the information of the person that the listed phone number belongs to	9956	11
p2r6_sect_2.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 6 Questionnaire, Section 2 (Household Roster Update) - Roster of members of the household, relationship to the household head, gender, age, marital status, reason for joining the household if new, reason for leaving the household if left	16817	20
p2r6_sect_5.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 6 Questionnaire, Section 5f (Access to Health Services) - Reason for not being able to access the services, place where the services were received, out-of-pocket expenses, satisfaction with the services received	9768	44
p2r6_sect_10.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 6 Questionnaire, Section 10 (Coping/Shocks) - Shocks that affected household since March 2022 and their coping strategies	32071	13
p2r7_sect_a_2_5g_11b_13a_12.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 7 Questionnaire, Section A (Household Identification), Section 2 (Household Roster Update), Section 5g (Petrol), Section 11b (Economic Sentiments), Section 13 (Farmer Annual Profile) and Section 12 (Interview Results) - Household identifiers and enumerator identifiers - Household has ever bought petrol, last time household purchased petrol, difficulties encountered when purchasing petrol, number of litres purchased, total amount paid, change in the price of petrol - How household feels about past and future household economic situation, past and future country economic situation, past and future consumer prices, major household purchases, extreme weather shocks to household's financial status in the future - Highest level of education completed by the selected farmer, sources of income, main source of income, number of adults that earned income in the last 12 months, ownership status of land cultivated by the household, agricultural investment, crop and livestock product disposition, use of phone on farming or livestock activities, use of phone by the selected farmer - Result of interview including observation notes by enumerator regarding the interview, respondent and language of interview	2784	170
p2r7_sect_1.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 7 Questionnaire, Section 1 (Interviewer Information, questions 1-11) - Roster of call attempts, result and respondent of call attempt, interview consent, date and time of call back	9932	23
p2r7_sect_1b.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 7 Questionnaire, Section 1b (Phone Number Roster) - Roster of phone numbers, the information of the person that the listed phone number belongs to	10076	11
p2r7_sect_2.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 7 Questionnaire, Section 2 (Household Roster Update) - Roster of members of the household, relationship to the household head, gender, age, marital status, reason for joining the household if new, reason for leaving the household if left	16153	21
p2r7_sect_5h.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 7 Questionnaire, Section 5h (Food Prices) - Prices of the selected food items, change in the prices of the food items	6828	14
p2r7_sect_5i.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 7 Questionnaire, Section 5i (Transportation Prices) - Mode of transportation used to the selected destinations, amount paid to reach the selected destinations, change in the transportation prices	2274	12

p2r8_sect_a_2_5_5g_6_11c_14_12.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 8 Questionnaire, Section A (Household Identification), Section 2 (Household Roster Update), Section 5f (Access to Health Services), Section 5g (Petrol), Section 6 (Employment (respondent)), Section 11c (Subjective Welfare), Section 14 (Expectations on Climate Extremes and Past Experience) and Section 12 (Interview Results) - Household identifiers and enumerator identifiers - Access to health services - Household has ever bought petrol, last time household purchased petrol, difficulties encountered when purchasing petrol, number of litres purchased, total amount paid, change in the price of petrol - Status in employment, why currently not working, job search, actual job, transportation prices to the place of work - How the household feels about household's food consumption, housing, clothing, standard of health care received over the past one month; How the household feel about the current household income; Overall happiness - Willingness to take risks; Expectations on the occurrence of various climate/weather events during the 2023/2024 agricultural season, expected results of various climate/weather events, coping strategies against various climate/weather events; Occurrence of various climate/weather events in the past 5 years, results of various climate/weather events in the past 5 years - Result of interview including observation notes by enumerator regarding the interview, respondent and language of interview	2771	76
p2r8_sect_1.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 8 Questionnaire, Section 1 (Interviewer Information, questions 1-11) - Roster of call attempts, result and respondent of call attempt, interview consent, date and time of call back	9462	21
p2r8_sect_1b.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 8 Questionnaire, Section 1b (Phone Number Roster) - Roster of phone numbers, the information of the person that the listed phone number belongs to	10008	11
p2r8_sect_2.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 8 Questionnaire, Section 2 (Household Roster Update), - Roster of members of the household, relationship to the household head, gender, age, marital status, reason for joining the household if new, reason for leaving the household if left	16374	20
p2r8_sect_5.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 8 Questionnaire, Section 5f (Access to Health Services) - Reason for not being able to access the services, place where the services were received, out-of-pocket expenses, satisfaction with the services received	8280	44
p2r8_sect_5h.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 8 Questionnaire, Section 5h (Food Prices) - Prices of the selected food items, change in the prices of the food items	7464	12
p2r8_sect_5i.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 8 Questionnaire, Section 5i (Transportation Prices) - Mode of transportation used to the selected destinations, amount paid to reach the selected destinations, change in the transportation prices	2488	12
p2r8_sect_14.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 8 Questionnaire, Section 14 (Expectations on Climate Extremes and Past Experience). - Expectation of the extreme climate events to occur during the 2023/2024 agricultural season and reason for having the expectation; Expected results of the extreme climate events; Actions taken or planned to be taken to prevent the extreme climate events; Last time the households experienced the extreme climate events; Results of the extreme climate events	5096	49

p2r9_sect_a_2_5g_5j_6_6e_8_8a_11c_11c2_12.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 9 Questionnaire, Section A (Household Identification), Section 2 (Household Roster Update), Section 5g (Petrol), Section 5j (Fertilizer), Section 6 (Agriculture), Section 6e (Agricultural Labor), Section 8 (Food Security), Section 8a (Aggregated Food Consumption), Section 11c (Subjective Welfare) and Section 12 (Interview Results) - Household identifiers and enumerator identifiers - Household has ever bought petrol, last time household purchased petrol, difficulties encountered when purchasing petrol, number of litres purchased, total amount paid, change in the price of petrol - Household has ever bought fertilizer, last time household purchased fertilizer, type of fertilizer purchased, quantity purchased, total amount paid, change in the price of fertilizer - Crop cultivation activities in the 2023/2024 agricultural season, reason for not growing crops, type of crops planted, area planted, expectation on harvest, expectation on revenues from sales of harvest, use of inorganic fertilizers - Any household members worked on crop cultivation activities during the 2023/2024 agricultural season, when the household started crop cultivation activities during the 2023/2024 agricultural season - Household's food security status during the last 30 days - Number of days over the last 7 days on which food items were consumed by most members of the household - How the household feels about household's food consumption, housing, clothing, standard of health care received over the past one month; How the household feel about the current household income; Overall happiness; Degree to which the respondent agrees with various statement related to their life - Result of interview including observation notes by enumerator regarding the interview, respondent and language of interview	2753	146
p2r9_sect_1.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 9 Questionnaire, Section 1 (Interviewer Information, questions 1-11) - Roster of call attempts, result and respondent of call attempt, interview consent, date and time of call back	9828	21
p2r9_sect_1b.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 9 Questionnaire, Section 1b (Phone Number Roster) - Roster of phone numbers, the information of the person that the listed phone number belongs to	10023	11
p2r9_sect_2_6e.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 9 Questionnaire, Section 2 (Household Roster Update) and Section 6e (Agricultural Labor) - Roster of members of the household, relationship to the household head, gender, age, marital status, reason for joining the household if new, reason for leaving the household if left - Typical number of days per week worked on crop cultivation activities, typical number of hours per day worked on crop cultivation activities	16827	24
p2r10_sect_a_2_8_11c_12.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 10 Questionnaire, Section A (Household Identification), Section 2 (Household Roster Update), Section 8 (Food Security), Section 11c (Subjective Welfare) and Section 12 (Interview Results) - Household identifiers and enumerator identifiers - Household's food security status during the last 30 days - How the household feels about household's food consumption, housing, clothing, standard of health care received over the past one month; How the household feel about the current household income; Overall happiness - Result of interview including observation notes by enumerator regarding the interview, respondent and language of interview	2743	51
p2r10_sect_1.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 10 Questionnaire, Section 1 (Interviewer Information, questions 1-11) - Roster of call attempts, result and respondent of call attempt, interview consent, date and time of call back	10401	21
p2r10_sect_1b.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 10 Questionnaire, Section 1b (Phone Number Roster) - Roster of phone numbers, the information of the person that the listed phone number belongs to	13899	11

p2r10_sect_2.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 10 Questionnaire, Section 2 (Household Roster Update), - Roster of members of the household, relationship to the household head, gender, age, marital status, reason for joining the household if new, reason for leaving the household if left	16301	20
p2r10_sect_5.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 10 Questionnaire, Section 5 (Access to Essential Goods) - Household's access to medicine, soap, fertilizer, staple food (rice, beans, cassava, yam and sorghum) in the last 7 days, reason for not being able to buy the item at all or the desired amount	23238	28
p2r10_sect_10.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 10 Questionnaire, Section 10 (Coping Strategies) - Shocks that affected household since October 2022 and their coping strategies	46494	13
p2r11_sect_a_6_6d_13b_12.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 11 Questionnaire, Section A (Household Identification), Section 2 (Household Roster Update), Section 6 (Employment (respondent) and Non-Farm Enterprise), Section 6d (Casual Labor), Section 13b (Digital Farming) and Section 12 (Interview Results) - Household identifiers and enumerator identifiers - Status in employment, why currently not working, job search, actual job; family business/non-farm enterprise, sector of family business, challenges faced by the business - Worked in casual labor activity, typical number of days per month worked on casual labor activities, typical number of hours per day worked on casual labor activities - Farmer's experiences working with organizations/ groups/agents that provide information using a digital device; farmer's experiences working with a digital market provider (organizations/ groups/agents that helped them with sales of their products using a digital device); farmer's experiences working with a digital credit provider (organizations/ groups/agents that provided credit/loans using a digital device) - Result of interview including observation notes by enumerator regarding the interview, respondent and language of interview	2732	456
p2r11_sect_1.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 11 Questionnaire, Section 1 (Interviewer Information, questions 1-11) - Roster of call attempts, result and respondent of call attempt, interview consent, date and time of call back	11330	22
p2r11_sect_1b.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 11 Questionnaire, Section 1b (Phone Number Roster) - Roster of phone numbers, the information of the person that the listed phone number belongs to	13799	11
p2r11_sect_2.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 11 Questionnaire, Section 2 (Household Roster Update) - Roster of members of the household, relationship to the household head, gender, age, marital status, reason for joining the household if new, reason for leaving the household if left	16252	21

p2r12_sect_a_2_5g_5j_6_8a_11c_11c2_12.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 12 Questionnaire, Section A (Household Identification), Section 2 (Household Roster Update), Section 5g (Petrol Subsidy, Awareness and Support), Section 5j (Fertilizer), Section 6 (Agriculture), Section 8a (Aggregated Food Consumption), Section 11c (Subjective Welfare) and Section 12 (Interview Results) - Household identifiers and enumerator identifiers - Household has ever bought fertilizer, last time household purchased fertilizer, type of fertilizer purchased, quantity purchased, total amount paid, change in the price of fertilizer - Awareness of fuel subsidies, opinion on fuel subsidy removal - Crop cultivation activities in the 2024/2025 agricultural season, reason for not growing crops, type of crops planted, area planted, expectation on harvest, expectation on revenues from sales of harvest, use of inorganic fertilizers - Number of days over the last 7 days on which food items were consumed by most members of the household - How the household feels about household's food consumption, housing, clothing, standard of health care received over the past one month; How the household feel about the current household income; Overall happiness - Result of interview including observation notes by enumerator regarding the interview, respondent and language of interview	2724	121
p2r12_sect_1.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 12 Questionnaire, Section 1 (Interviewer Information, questions 1-11) - Roster of call attempts, result and respondent of call attempt, interview consent, date and time of call back	11729	21
p2r12_sect_1b.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 12 Questionnaire, Section 1b (Phone Number Roster) - Roster of phone numbers, the information of the person that the listed phone number belongs to	13792	11
p2r12_sect_2.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 12 Questionnaire, Section 2 (Household Roster Update), - Roster of members of the household, relationship to the household head, gender, age, marital status, reason for joining the household if new, reason for leaving the household if left	15844	20
p2r12_sect_5g.dta Data collected through National Longitudinal Phone Survey Phase 2 Round 12 Questionnaire, Section 5g (Petrol Subsidy, Awareness and Support) - Whether household has been affected by increase in price of petrol and shortage/scarcity of petrol, coping strategy	4914	12

Data file: p2r1_sect_a_2_5_6_9a_12.dta

Data collected through National Longitudinal Phone Survey Phase 2 Baseline (Round 1) Questionnaire, Section A (Household Identification), Section 2 (Household Roster Update), Section 5 (Access to Health Services), Section 6 (Employment and Non-Farm Enterprise), Section 9a (COVID-19 Vaccine) and Section 12 (Interview Results)
- Household identifiers and enumerator identifiers
- Changes to roster of members of the household since the last interview
- Household's health insurance, access to health services
- Status in employment, why currently not working, job search, actual job; family business/non-farm enterprise, sector of family business, challenges faced by the business due to the coronavirus, changes made in the way business is conducted due to the coronavirus
- Source of information, vaccination status, reason for getting vaccinated, reason for not getting vaccinated, vaccine hesitancy, opinion against vaccine mandates
- Result of interview including observation notes by enumerator regarding the interview, respondent and language of interview
