## COVID-19 Households Survey 2020-2021 (HFPS 2020-2021)

| Overview   |  |
|--|--|
| Type   | Socio-Economic/Monitoring Survey [hh/sems]   |
| Identification   | PHL_2020-2021_HFPS_v01_M   |
| Version  | Production Date: 2022-05-02<br>Version 1 - anonymized datasets of household survey rounds 1-3 cleared for public distribution.   |
| Series   | The World Bank has provided support to countries to help mitigate the spread and impact of COVID-19. A key area of support is data collection to inform evidence-based policies to help mitigate the effects of this disease. In the Philippines, 3 rounds of phone surveys have been implemented to monitor the socio-economic impacts of the pandemic. Succeeding rounds are planned to further document these impacts as well as recovery. These will be included in future version updates of this series. |
| <b>Abstract</b><br>The Philippines COVID-19 Households Survey represents an important part of the World Bank's real time monitoring of COVID-19 impacts along with firm and community surveys. It aims to assess the impact of the pandemic on households' food security and welfare, their coping strategies, education, socio-emotional state, and public policy responses. A survey firm carried out phone surveys (based on a sample frame that the firm has maintained) and self-administered web surveys facilitated by Telecommunication Firms' (Telcos) text blasts and social media advertisement campaigns distributing the web link to the survey questions. The survey instrument and procedures have been designed in accordance with the best practices laid out by the World Bank's COVID-19 methodology and measurement task force. The average length of the survey was 30-40 minutes and were rolled out during key periods at the course of the pandemic. |  |
| Kind of Data   | Sample survey data [ssd]   |
| Unit of Analysis   | Household, individuals   |

### Scope & Coverage

#### Scope

The Philippines COVID-19 Households Survey 2020-2021 covered the following themes:

Household: interview information, housing characteristics, government action, awareness and behavior on COVID-19, access (transportation, food, health services, education, finances), income sources, coping mechanisms and safety nets

Individual: interview information, demographics (respondent and household head), employment (respondent and household head)

## Sampling

### Sampling Procedure

The mixed method combining both phone and web-based surveys was employed to ensure coverage of individuals from different socio-economic backgrounds. In the self-administered online survey (CAWI), respondents received notifications through text blast and social media ads. The text blast was coordinated by the National Economic Development Authority through the National Telecommunications Commission. In the other hand, the phone survey (CATI) specifically targeted to lower income households from an existing list of the partner survey firm with a target sample of 3,000 respondents.

### Deviations from Sample Design

In rounds 2 and 3, the survey was limited to phone interviews (CATI) from the panel of 5,049 respondents in round 1. Target number of respondents was 3,000.

The team decided to simplify the methodology in the succeeding rounds due to resource constraints.

### Response Rate

Following were the final sample for each round:

Round 1 - 9,448

Round 2 - 1,805

Round 3 - 2,122

### Weighting

The sample was weighted using the Survey of Wellbeing via Instant and Frequent Tracking (SWIFT) tool to place each household in the income distribution to match the 2018 Family Income and Expenditure.

Full documentation of the weighting procedure is included in the external resources.

## Data Collection

|                              |  |

| <b>Data Collection Dates</b> | Round 1: start 2020-08-01<br>Round 1: end 2020-08-14<br>Round 2: start 2020-12-10<br>Round 2: end 2021-01-17<br>Round 3: start 2021-05-07<br>Round 3: end 2021-06-11 |
| <b>Time Period(s)</b>        | Round 1: start 2020-08-01<br>Round 1: end 2020-08-14<br>Round 2: start 2020-12-10<br>Round 2: end 2021-01-17<br>Round 3: start 2021-05-07<br>Round 3: end 2021-06-11 |
| <b>Data Collection Mode</b>  | Computer Assisted Telephone Interview [cati]   |

### Data Collection Notes

1. First round is a combination of CATI and web-based (CAWI) survey
2. Succeeding rounds were all done in CATI.

### Questionnaires

The questionnaire had core modules that were collected in each round and additional modules on focus topics. Following are the topics covered:

- 1) Demographics and housing characteristics (round 1)
- 2) Knowledge of COVID-19: awareness and behavior (round 1)
- 3) Government action (rounds 1, 2)
- 4) Access to transportation (rounds 1, 2)
- 5) Access to food (rounds 1, 2)

- |  |
|--|
| 6) Access to health services (rounds 1, 2)       |
| 7) Access to education (rounds 1)                |
| 8) Access to finances (rounds 1)                 |
| 9) Employment and income sources (rounds 1)      |
| 10) Coping mechanisms and safety nets (rounds 1) |

## Data Processing & Appraisal

### Data Editing

Initial data cleaning was done by the survey firm in close coordination with the World Bank team. Consistency checks and formatting was done further by the World Bank team during the analysis of the data.

## Accessibility

# Variables Description

**Dataset contains 824 variable(s)**

## File : phl\_hfs\_r1\_household\_survey\_data

### # interview\_\_id: Unique 32-character long identifier of the interview

**Information** [Type= discrete] [Format=character] [Missing=\*]

**Statistics [NW/ W]** [Valid=9448 /-] [Invalid=0 /-]

### # interview\_\_status: Status of the interview

**Information** [Type= discrete] [Format=numeric] [Range= -1-130] [Missing=\*]

**Statistics [NW/ W]** [Valid=9448 /-] [Invalid=0 /-]

| Value | Label                  | Cases | Percentage |
|-------|------------------------|-------|------------|
| -1    | Deleted                | 0     |            |
| 0     | Restored               | 0     |            |
| 20    | Created                | 0     |            |
| 40    | SupervisorAssigned     | 0     |            |
| 60    | InterviewerAssigned    | 1948  | 20.6%      |
| 65    | RejectedBySupervisor   | 0     |            |
| 80    | ReadyForInterview      | 0     |            |
| 85    | SentToCapi             | 0     |            |
| 95    | Restarted              | 0     |            |
| 100   | Completed              | 7500  | 79.4%      |
| 120   | ApprovedBySupervisor   | 0     |            |
| 125   | RejectedByHeadquarters | 0     |            |
| 130   | ApprovedByHeadquarters | 0     |            |

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

### # int\_type: Interview Type

**Information** [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=\*]

**Statistics [NW/ W]** [Valid=9448 /-] [Invalid=0 /-]

| Value | Label | Cases | Percentage |
|-------|-------|-------|------------|
| 1     | CATI  | 2520  | 26.7%      |
| 2     | CAWI  | 6928  | 73.3%      |

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

### # I9: Privacy note - Willing to participate in the survey

**Information** [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=\*]

**Statistics [NW/ W]** [Valid=9448 /-] [Invalid=0 /-]

| Value | Label              | Cases | Percentage |
|-------|--------------------|-------|------------|
| 1     | I agree            | 9448  | 100.0%     |
| 2     | No, I do not agree | 0     |            |

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

### # I10a: CATI: Participation in similar surveys

**Information** [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=\*]

**Statistics [NW/ W]** [Valid=2520 /-] [Invalid=6928 /-]

| Value   | Label | Cases | Percentage |
