#### VERSION DESCRIPTION

Version 6.4. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

In v6.4, the research team continued to carry out improvements to geography, providing harmonized geographic units for the second administrative level for roughly half the countries. More information about IPUMS geography variables is available [here](https://international.ipums.org/international/geography_variables.shtml). Also, approximately 100 integrated variables were renamed. Affected variables with their current and previous names are listed [here](https://international.ipums.org/international/resources/misc_docs/renamed_variables_sept2015.pdf). Geography variable also underwent wholesale renaming.

In this update, IPUMS added 19 new samples for Armenia, Austria, Costa Rica, Ethiopia, France, Ghana, Mozambique, Paraguay, Portugal, Puerto Rico, South Africa, and Spain. Ethiopia, Mozambique, and Paraguay were newly added countries to IPUMS. Samples for other countries extend pre-existing series for those countries.

### Overview

#### ABSTRACT

IPUMS-International is an effort to inventory, preserve, harmonize, and disseminate census microdata from around the world. The project has collected the world's largest archive of publicly available census samples. The data are coded and documented consistently across countries and over time to facilitate comparative research. IPUMS-International makes these data available to qualified researchers free of charge through a web dissemination system.

The IPUMS project is a collaboration of the Minnesota Population Center, National Statistical Offices, and international data archives. Major funding is provided by the U.S. National Science Foundation and the Demographic and Behavioral Sciences Branch of the National Institute of Child Health and Human Development. Additional support is provided by the University of Minnesota Office of the Vice President for Research, the Minnesota Population Center, and Sun Microsystems.

#### KIND OF DATA

Census/enumeration data [cen]

#### UNITS OF ANALYSIS

Dwelling

#### UNITS IDENTIFIED:

- Dwellings: No (dwellings in original sample are interpreted as households in IPUMS)
- Vacant units: Yes
- Households: Yes
- Individuals: Yes

- Group quarters: Yes

#### UNIT DESCRIPTIONS:

- Households: Structurally independent living quarters, consisting of one or more rooms with a private entrance, serving up to three families.

- Group quarters: Group living together under relations of administrative subordination; group of six or more persons not related by kinship; or a dwelling with more than 3 families.

### DDI DOCUMENT VERSION

- v6.4 April 2016

Documentation of census data and harmonized variables as found in IPUMS-International. The International Household Survey Network (IHSN) contracted IPUMS International for generating DDI and Dublin Core-compliant metadata related to population and housing census datasets from developing countries. The objective was to provide countries with detailed metadata in a format compatible with the DDI standard used by most of these countries, with a view to guarantee the preservation of the data and metadata, and the publishing of metadata.

The intellectual rights (including copyright) for the data and metadata in IPUMS are retained by the countries under a Memorandum of Understanding with the contributing countries. IPUMS-International has distribution rights to the metadata and data. The XML documents generated by this process are viewed as a distribution of the metadata.

Fields edited by the World Bank are: DDI ID and study ID to match World Bank study naming convention, as well as DDI Document Version and Version Description to reflect changes included in version 6.4.

Previous version documented in the World Bank Microdata Library:

## Sampling

### Sampling Procedure

---

MICRODATA SOURCE: Instituto Brasileiro de Geografia e Estatística

SAMPLE UNIT: Household (called "dwelling" in original sample)

SAMPLE FRACTION: 5%

SAMPLE SIZE (person records): 5,870,467

### Response Rate

---

COVERAGE: No official estimates, UNDERCOUNT: No official estimates

# Questionnaires

## Overview

---

Long and short enumeration forms. The short form contains general information about the characteristics of the dwelling and each of persons in the dwelling. The long form contains general and more specific information about the characteristics of the dwelling, families, and each of the people in the dwellings and was applied to a 25% sample of the population.

## Record type (RECTYPE)

File: BRA1980-H-H

### Overview

Type: Discrete  
Format: character  
Width: 1

Valid cases: 0  
Invalid: 0

### Description

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

## Year (YEAR)

File: BRA1980-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 4  
Decimals: 0  
Range: 1960-2011

Valid cases: 0  
Invalid: 0

### Description

YEAR gives the year in which the census was taken.

## IPUMS sample identifier (SAMPLE)

File: BRA1980-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 9  
Decimals: 0  
Range: 32197001-894201001

Valid cases: 0  
Invalid: 0

### Description

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g, 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

## Household serial number (SERIAL)

File: BRA1980-H-H

### Overview

Type: Continuous  
 Format: numeric  
 Width: 10  
 Decimals: 0

Valid cases: 0  
 Invalid: 0

### Description

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002  
 Colombia 1993, 2005  
 Costa Rica 1984, 2000  
 Cuba 2002  
 Dominican Republic 1981, 2002, 2010  
 Ecuador 1990, 2001  
 Germany 1971  
 Hungary 1980, 1990, 2001  
 Jamaica 1982, 1991, 2001  
 Malaysia 1970, 1991, 2000  
 Mexico 1995, 1990, 2000, 2005  
 Nigeria 2006  
 Panama 2000  
 Peru 1993, 2007  
 Portugal 1981, 1991, 2001  
 Spain 1991  
 Uruguay 2011  
 Venezuela 1990, 2001  
 Vietnam 1989

In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

## Number of person records in the household (PERSONS)

File: BRA1980-H-H

### Overview

Type: Continuous  
 Format: numeric  
 Width: 3  
 Decimals: 0

Valid cases: 0  
 Invalid: 0

### Description

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

## Subsample number (SUBSAMP)

File: BRA1980-H-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0  
 Invalid: 0

**Description**

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

## Group quarters (collective dwelling) status (GQ)

File: BRA1980-H-H

**Overview**

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0  
Invalid: 0

**Description**

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

## Number of unrelated persons (UNREL)

File: BRA1980-H-H

**Overview**

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-9

Valid cases: 0  
Invalid: 0

**Description**

UNREL indicates the number of persons in the household who are unrelated to the head.

## Urban-rural status (URBAN)

File: BRA1980-H-H

**Overview**

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 1-9

Valid cases: 0  
Invalid: 0

**Description**

URBAN indicates whether the household was located in a place designated as urban or as rural.

## Continent and region of country (REGIONW)

File: BRA1980-H-H

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 11-54

Valid cases: 0

#### Description

REGIONW identifies the continent and region of each country.

## Brazil, Region (REGNBR)

### File: BRA1980-H-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 1-5

Valid cases: 0  
 Invalid: 0

#### Description

REGNBR indicates the region in Brazil in which the household was enumerated. REGNBR is harmonized by name and does not account for boundary changes over time.

The full set of geography variables for Brazil can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

## Brazil, Mesoregion (MESOBR)

### File: BRA1980-H-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 4  
 Decimals: 0  
 Range: 1101-5301

Valid cases: 0  
 Invalid: 0

#### Description

MESOBR indicates the "Mesorregião Geográfica" (mesoregion) in Brazil where the household was enumerated for the 1980 - 2010 samples. MESOBR is harmonized by name and does not account for boundary changes over time.

The full set of geography variables for Brazil can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

## Brazil, Municipality (MUNIBR)

### File: BRA1980-H-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 7  
 Decimals: 0  
 Range: 1199901-5300108

Valid cases: 0  
 Invalid: 0

#### Description

MUNIBR indicates the municipality in Brazil where the household was enumerated for the 1980-2010 samples. MUNIBR is harmonized by name and does not account for boundary changes over time.

The full set of geography variables for Brazil can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

## Water supply (WATSUP)

File: BRA1980-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0  
Invalid: 0

### Description

WATSUP describes the physical means by which the housing unit receives its water. The primary distinction is whether or not the household had piped (running) water.

## Sewage (SEWAGE)

File: BRA1980-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0

### Description

FLOOR indicates the dwelling's predominant flooring material.

## Wall or building material (WALL)

File: BRA1980-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 3  
Decimals: 0  
Range: 0-999

Valid cases: 0  
Invalid: 0

### Description

This variable indicates the primary material used in the construction of the dwelling, particularly the dwelling's exterior walls.

## Roof material (ROOF)

File: BRA1980-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0  
Invalid: 0

### Description

This variable indicates the dwelling's predominant roofing material.

## Household classification (HHTYPE)

File: BRA1980-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0  
Invalid: 0

### Description

HHTYPE is a constructed variable that describes the composition of households.

HHTYPE is constructed from information in RELATE (relationship to head), from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father), and from information on group quarters status, GQ.

## Number of families in household (NFAMS)

File: BRA1980-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-9

Valid cases: 0  
Invalid: 0

### Description

NFAMS is a constructed variable that indicates the number of families within each household. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and her servant contains two families; a household consisting of a large, multiple-generation extended family with no lodgers or servants would count as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

## Head's location in household (HEADLOC)

File: BRA1980-H-H

### Overview

Type: Continuous  
Format: numeric  
Width: 3  
Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

HEADLOC gives the person number of the head of household in samples in which persons are organized into households.

## 1st subnational geographic level, world [consistent boundaries over time] (GEOLEV1)

File: BRA1980-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 6  
Decimals: 0  
Range: 32002-894010

Valid cases: 0  
Invalid: 0

### Description

GEOLEV1 indicates the major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. First administrative units in GEOLEV1 have been spatiotemporally harmonized to provide spatially consistent boundaries across samples in each country.

## State (BR1980A\_0001)

**Description**

This variable identifies the dwelling class, i.e. whether the dwelling is private or collective and permanent or improvised.

**Universe**

All households

**Literal question**

1. Class [of dwelling]

Private:

[ ] 1 permanent

[ ] 3X improvised

Collective:

[ ] 5X permanent

[ ] 7X improvised

**Interviewer instructions**

IV - Characteristics of the dwelling

### Question 1 - Class

Mark boxes 1 or 3X for private households and boxes 5X or 7X for collective dwellings, according to the criteria set down in Chapter II - Basic Concepts - of this manual.

The remaining questions referring to the characteristics of the households will only be filled out for Permanent Private Households.

**Description**

This variable identifies whether the dwelling type is a house or apartment.

**Universe**

Permanent private dwellings

**Literal question**

(The following questions are only for permanent private households)

## 2. Type

☐ 1 house

☐ 3 apartment

### Interviewer instructions

Question 2 - Type

Mark:

House - for a private household located in a building with direct access to a thoroughfare, regardless of the material used in its construction, its condition, or the number of floors. Buildings with two or three floors which contain only one household will be considered houses; or

Apartment - for a private household with common areas for more than one household (entrance hall, stairways, corridors, entrance gate and other areas) in buildings of one or more floors, with various units, including rooms in a tenement (cabeça-de-porco), inner-city slum dwellings, etc. Dwellings located in buildings of two or three floors which have at least one household per floor will also be considered apartments. Buildings in which one of the floors is occupied by a non-residential unit are included in these cases.

## 3. Walls

☐ 2 masonry

☐ 4 wood

☐ 6 uncoated lathe and plaster

☐ 7 scraps of material

☐ 8 straw

☐ 0 other

### Interviewer instructions

## Question 3 - Walls

Mark one of the boxes, according to the material predominantly used in the construction:

Masonry - for bricks, adobe, stone, concrete slabs or precast concrete (covered or not with plaster), unfinished concrete and lined lathe and plaster. Walls of metal and glass structures and those lined with marble, stone, etc. are included in this case.

[p. 33]

Wood - when any type of finished wood is used, even if not in good condition, except for processed wood from boxes or crates, plywood boards, etc.

Unfinished lath and plaster - when the walls are made of mud or lime and sand with wooden pillars and stakes, indoor partitions, stucco, wattle and dubb, etc.;

Scrap material - when material from crates or boxes, plywood boards or empty containers, etc. is used. Wall material already used as such in the past is not considered scrap material.

Straw - when the walls are made of sape grass, leaves, or shells of vegetables, plants, etc.; or

Other - when material that does not fit into any of the above categories has been used.

## 4. Floors

☐ 1 wood

☐ 3 ceramic tile

☐ 4 cement

☐ 6 scraps of material

☐ 7 brick

☐ 0 other

**Interviewer instructions**

Question 4 - Floor

According to the material predominantly used on the floor of the dwelling, record:

Wood - for wooden flooring blocks, boards, finished wood, marble, plastic, carpeting, etc.;

Tile - for tiles, mosaics, ceramics, etc.;

Cement - when cement or cement blocks have been used;

Scrap material - when material from crates or boxes, plywood boards, etc. has been used. Material intended for floors but already used in the past is not considered scrap material.

Bricks - when mud or adobe bricks are used;

Dirt floor - when the floor consists of earth; or

Other - when material that does not fit into any of the above categories has been used.

- ☐ 7 scraps of material
- ☐ 0 other

**Interviewer instructions**

Question 5 - Roof

Mark one of the boxes according to the material predominantly used in the roof of the dwelling:

Concrete slab - when a concrete slab that is pre-fabricated or fabricated on site is used, and in dwellings in buildings with floors separated by concrete slabs;

Clay tiles - when built of any type of baked clay roof tiles;

Cement-asbestos tiles - when cement-asbestos, asbestos-wood or aluminum-wood are used;

Zinc - when zinc or tin plate roof is used;

Wood - when finished wood is used as roofing;

Straw - when built of sape grass, leaves or shells from plants;

[p. 34]

Scrap material - when material from crates or boxes, plywood boards, etc. has been used. Material intended for roofs but already used in the past is not considered scrap material.

Other - when material that does not fit into any of the above categories has been used.

## 6. Water supply

With interior plumbing:

☐ 1 general system

☐ 3 well or spring

☐ 5 other form

With exterior plumbing:

☐ 6 general system

☐ 7 well or spring

☐ 0 other form

### Interviewer instructions

Question 6 - Water supply

Mark:

With indoor plumbing:

General system - when the dwelling is served with water piped from a general supply system, with indoor plumbing to one or more rooms;

Well or spring - when the dwelling is served with piped water connected to a well or spring, with indoor plumbing to one or more rooms;

Other form - when the dwelling has indoor plumbing but the reservoir (or tank) is supplied from rain water or by truck, etc.;

Without indoor plumbing:

General system - when the dwelling is served with water taken from a general system piped to the premises without there being indoor plumbing in the dwelling;

Well or spring - when the dwelling is served with water from its own well or spring without indoor plumbing; or

Other form - when the water used in the dwelling is obtained from a public font, well, spout, etc. located off the premises without there being indoor plumbing.

If there are different types of water supply, record the most important in the order described above.

**Interviewer instructions**

## Question 7 - Sewage disposal - Drainage

Record, even if the sewage disposal is common to more than one household:

General system - when the toilet is connected to a general sewage system;

Septic tank - when the toilet is connected to a septic tank, even if the septic tank is common to more than one household;

Rudimentary cesspool - when the sewage disposal (whether or not there is a toilet), is connected to rustic sewage lines (black cesspool, well, hole, etc.), even if this cesspool is common to more than one household;

Other - when the sewage disposal (whether or not there is a toilet) is connected to drainage that is neither a sewer system, septic tank nor cesspool, such as a river, lake, etc.; or

Does not have - when there is no sewage disposal for use by the residents.

## 9. Condition of ownership

Owned:

☐ 1 already paid

☐ 3 haven't finished paying

☐ 5 - rented

Ceded by:

☐ 6 employer

☐ 7 private

☐ 0 other

**Interviewer instructions**

Question 9 - Condition of Ownership

Mark:

Owned and paid for - when the owner or co-owner lives in a dwelling owned by him or her, fully paid for, regardless of whether the land is also owned by him or her;

Owned but not fully paid for - when the owner or co-owner lives in a dwelling owned by him or her but has not yet paid the total price of the property, regardless of whether the land is also owned by him or her;

Rented - when the dwelling is rented, even if the rent is paid by a non-resident, except when paid by the employer of any resident in the household. The dwelling will also be recorded as rented when the employer of any one of the residents pays, as part of the wage, a part in monetary form to subsidize the rent;

Ceded by employer - when the dwelling is ceded by the employer (private or public) of any one of the residents, even if an occupation or maintenance fee is charged. Included in this case are dwellings whose rent is paid directly by the employer of one of the residents;

Ceded by a private party - when the dwelling is ceded free of charge by a private party (a relative, non-relative or institution), but not the employer of any of the residents; or

Other - when the dwelling is occupied in a way different from those described above, such as when the tenant pays a single rent for the dwelling and for the non-residential part (workshop, commercial establishment, etc.) or when the family lives at a leased farming establishment. In this case mark the box Does not pay, in Question 10.

## 10. Monthly rent (in Cr\$=cruzeiros)

☐ 9 don't pay rent

**Interviewer instructions**

## Question 10 - Rent or Monthly Installments

Record:

- the amount of the rent, occupation fee or monthly installment that the family paid in the month of August, 1980, for occupying the property (not including condo fees, light, gas, water, taxes, etc., even if they are part of the rent); or Does not pay - mark this box when no rent, occupation fee or monthly installment is paid. Included in this case are dwellings already paid for, and ceded dwellings where only condo fees, water, light, etc. are paid, and those where the rent includes the non-residential part as well as the dwelling.

[p. 36]

Entries should be made beyond the vertical line, disregarding the fractions of Cruzeiro.  
(e.g., record 2 445 and not 2 445.50).

Note - For families with rent or installments in arrears, record the amount of the rent or installment, which should have been paid in August.

## 11. Duration of residence

1 months \_\_  
3 years \_\_

**Interviewer instructions**

Question 11 - Time of Residence

This question is asked in order to ascertain how long the person has lived in the household. Count the time which has passed between the date of the move to the household and the date of reference for the Census, in full years or months. The information should refer to the person who has lived in the household for the longest time. Record with two digits, as the case may be:

1 \_\_ - the number of months, when the resident who has lived in the household for the longest time has been there less than 1 year; when he or she has lived there for less than 1 month, record 00 (two zeros). When the person has lived there for over 1 year, there will be no entry in this field; or  
3 \_\_ - the number of years, when the resident who has lived in the household for the longest time has been there one year or longer - when he or she has lived there for less than 1 year, no entry will be made in this field.

- ☐ 5 oil or kerosene
- ☐ 6 alcohol
- ☐ 7 electricity
- ☐ 8 don't have

**Interviewer instructions**

Question 15 - Fuel used for cooking

Mark:

Bottled gas - when the stove is fueled by liquefied gas (GLP), better known as bottled gas, even when piped in from a central source common to more than one household;

Piped gas - when the stove is fueled by piped gas coming from the street;

Firewood - when the stove is fueled by wood, sawdust, straw or cereal shells;

Coal or charcoal - when it is fueled by coal or charcoal;

Oil or kerosene - when fueled by oil or kerosene;

Alcohol - when fueled by alcohol;

Electricity - when fueled by electric energy; or

Does not have - when the household has neither a permanent nor improvised stove, nor a brazier.

If the household has more than one stove and a different type of fuel is used for each one, mark only the fuel of the stove that is used most.

## Household weight (HHWT)

File: BRA1980-H-H

**Overview**

Type: Continuous  
 Format: numeric  
 Width: 8  
 Decimals: 2

Valid cases: 0  
 Invalid: 0

**Description**

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

## Brazil, State 1960 - 2010 [Level 1; consistent boundaries, GIS] (GEO1\_BR) File: BRA1980-H-H

Type: Discrete  
Format: numeric  
Width: 6  
Decimals: 0  
Range: 76011-76053

Valid cases: 0  
Invalid: 0

### Description

GEO1\_BR identifies the household's state within Brazil in all sample years. States are the first level administrative units of the country. GEO1\_BR is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO1\_BR can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Brazil can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

At the present moment, IPUMS International is only releasing integrated geography for the first level of geography for Brazil. Year specific geography and maps along with variables that are spatially harmonized at the second level of geography and account for political boundary changes across census years will become available in the near future.

### Description

GEO2\_BRX identifies the household's municipality within Brazil from 1980 to 2010. Municipalities are the second level administrative units of the country, after states. GEO2\_BRX is harmonized by name and does not account for boundary changes over time.

The full set of geography variables for Brazil can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

At the present moment, IPUMS International is only releasing integrated geography for the first level of geography for Brazil. Year specific geography and maps along with variables that are spatially harmonized at the second level of geography and account for political boundary changes across census years will become available in the near future.

## Number of married couples in household (NCOUPLES)

File: BRA1980-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-9

Valid cases: 0  
Invalid: 0

### Description

NCOUPLES is a constructed variable indicating the number of married/in-union couples within a household.

NCOUPLES is constructed using the IPUMS-International pointer variable SPLOC (spouse's location in the household).

## Number of mothers in household (NMOTHERS)

File: BRA1980-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-9

Valid cases: 0  
Invalid: 0

### Description

NMOTHERS is a constructed variable indicating the number of mothers -- of persons of any age -- within a household.

NMOTHERS is constructed using the IPUMS-International pointer variable MOMLOC (mother's location in the household).

## Number of fathers in household (NFATHERS)

File: BRA1980-H-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

#### Description

NFATHERS is a constructed variable indicating the number of fathers -- of persons of any age -- within a household.

NFATHERS is constructed using the IPUMS-International pointer variable POPLOC (father's location in the household).

## Country (COUNTRY)

File: BRA1980-H-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 3  
 Decimals: 0  
 Range: 32-894

Valid cases: 0  
 Invalid: 0

#### Description

COUNTRY gives the country from which the sample was drawn. The codes assigned to each country are those used by the UN Statistics Division and the ISO (International Organization for Standardization).

## Electricity (ELECTRIC)

File: BRA1980-H-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

#### Description

ELECTRIC indicates whether the household had access to electricity.

## Number of bedrooms (BEDROOMS)

File: BRA1980-H-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0  
 Invalid: 0

#### Description

BEDROOMS indicates the number of rooms available to members of the household for sleeping.

## Ownership of dwelling [general version] (OWNERSHIP)

File: BRA1980-H-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

#### Description

OWNERSHIP indicates whether a member of the household owned the housing unit. Households that acquired their unit with a mortgage or other lending arrangement were understood to "own" their unit even if they had not yet completed repayment. For those that did not own their housing unit, several options were possible: renting (from various types of owners), subletting, usufruct, and de facto occupation.

## Ownership of dwelling [detailed version] (OWNERSHIPD)

File: BRA1980-H-H

#### Overview

Type: Discrete  
 Format: numeric

## Cooking fuel (FUELCOOK)

File: BRA1980-H-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0  
 Invalid: 0

#### Description

FUELCOOK indicates the predominant type of fuel or energy used for cooking.

## Strata identifier (STRATA)

File: BRA1980-H-H

#### Overview

Type: Continuous  
 Format: numeric  
 Width: 12  
 Decimals: 0

Valid cases: 0  
 Invalid: 0

#### Description

This variable is the strata identifier for the sample. The STRATA variable provides information about the sample design that can be used to improve estimation.

## Person number (PERNUM)

File: BRA1980-P-H

### Overview

Type: Continuous  
Format: numeric  
Width: 3  
Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

## Mother's location in household (MOMLOC)

File: BRA1980-P-H

### Overview

Type: Continuous  
Format: numeric  
Width: 3  
Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships.

## Father's location in household (POPLOC)

File: BRA1980-P-H

### Overview

Type: Continuous  
Format: numeric  
Width: 3  
Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

POPLOC is a constructed variable that indicates whether or not the person's father lived in the same household and, if so, gives the person number of the father (see PERNUM). POPLOC makes it easy for researchers to link the characteristics of children and their (probable) fathers.

The method by which probable child-father links are identified is described in PARRULE.

The general design of POPLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly.

Note: POPLOC identifies social relationships (such as stepfather and adopted father) as well as biological relationships. The variable STEPPOP is designed to identify some of these social relationships.

## Spouse's location in household (SPLOC)

File: BRA1980-P-H

### Overview

Type: Continuous  
Format: numeric  
Width: 3  
Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

SPLOC is a constructed variable that indicates whether or not the person's spouse lived in the same household and, if so, gives the person number (PERNUM) of the spouse. SPLOC makes it easy for researchers to link the characteristics of (probable) spouses.

The method by which probable spouse-spouse links are identified is described in SPRULE.

The general design of SPLOC and other constructed variables is modeled on the methods developed for IPUMS-USA "Family Interrelationships", but the details vary significantly.

## Rule for linking parent (PARRULE)

File: BRA1980-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-52

Valid cases: 0  
Invalid: 0

### Description

PARRULE describes the criteria by which the IPUMS-International variables MOMLOC and POPLOC linked the person to a probable mother and/or father.

IPUMS-International establishes child-parent links according to five basic rules, and PARRULE gives the number of the rule that applied to the link in question. A link to any parent automatically generates a second link to that parent's spouse or partner, so only one rule is needed to describe both MOMLOC and POPLOC.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

## Rule for linking spouse (SPRULE)

File: BRA1980-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-6

Valid cases: 0  
Invalid: 0

### Description

SPRULE explains the criteria by which the IPUMS-International variable SPLOC linked the person to his/her probable spouse.

IPUMS-International establishes spouse-spouse links according to five basic rules, and SPRULE gives the number of the rule that applied to the link in question. A sixth rule identifies sample-specific linking procedures only imposed in selected instances.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

## Probable stepmother (STEMMOM)

File: BRA1980-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-6

Valid cases: 0  
Invalid: 0

### Description

STEMMOM indicates whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEMMOM explain why it is probable that the person's mother was a step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household.

The codes for STEMMOM are as follows:

- 0 = Biological mother or no mother of this person present in household.
- 1 = Mother has no children borne or surviving.
- 2 = Child reports mother is deceased.
- 3 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner, stepchild/child-in-law).
- 4 = Mother reports no children in the home.
- 5 = Age difference between mother and child was less than 12 or greater than 54 years.
- 6 = Child exceeds known fertility of mother.

See PARRULE for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEMMOM will always under-represent their actual number in the population.

## Probable stepfather (STEPPOP)

File: BRA1980-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-3

Valid cases: 0  
Invalid: 0

### Description

STEPPOP indicates whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPOP explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household.

The codes for STEPPOP are as follows:

- 0 = Biological father or no father of this person present in household.
- 1 = Child reports father is deceased.
- 2 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner; stepchild/child-in-law).
- 3 = Age difference between father and child was less than 12 or greater than 54 years.

See PARRULE for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPOP will always under-represent their actual number in the population.

## Man with more than one wife linked (POLYMAL)

File: BRA1980-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-1

Valid cases: 0  
Invalid: 0

### Description

POLYMAL indicates if a man had more than one wife linked to him in the constructed IPUMS variable SPLOC -- Spouse's Location in Household.

The point of POLYMAL is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

## Woman is second or higher order wife (POLY2ND)

File: BRA1980-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-1

Valid cases: 0  
Invalid: 0

### Description

POLY2ND indicates if a woman was the second or higher order wife linked to a husband in the constructed IPUMS variable SPLOC -- Spouse's Location in Household. The variable does not suggest the actual marital order of wives, only their relative positions in the person order of the household as it was enumerated.

The point of POLY2ND is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

## Family unit membership (FAMUNIT)

File: BRA1980-P-H

### Overview

Type: Continuous  
Format: numeric  
Width: 2  
Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

FAMUNIT is a constructed variable indicating to which family within the household a person belongs.

All persons related to the household head receive a 1 (see RELATE). Each secondary family or secondary individual receives a higher code. For purposes of FAMUNIT, secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

## Number of own family members in household (FAMSIZE)

File: BRA1980-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 1-99

Valid cases: 0  
 Invalid: 0

#### Description

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

## Number of own children in household (NCHILD)

### File: BRA1980-P-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

#### Description

NCHILD provides a count of the person's own children living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

## Number of own children under age 5 in household (NCHLT5)

### File: BRA1980-P-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

#### Description

NCHLT5 provides a count of the person's own children under age five living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

## Age of eldest own child in household (ELDCH)

### File: BRA1980-P-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0  
 Invalid: 0

#### Description

ELDCH gives the age of the person's oldest own child living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

ELDCH is top-coded at age 50 or older.

## Age of youngest own child in household (YNGCH)

File: BRA1980-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0  
Invalid: 0

### Description

YNGCH gives the age of the person's youngest own child living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

YNGCH is top-coded at age 50 or older.

## Relationship to household head [general version] (RELATE)

File: BRA1980-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 1-9

Valid cases: 0  
Invalid: 0

### Description

RELATE describes the relationship of the individual to the head of household (sometimes called the householder or reference person).

## Relationship to household head [detailed version] (RELATED)

File: BRA1980-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 4  
Decimals: 0  
Range: 1000-9999

Valid cases: 0  
Invalid: 0

### Description

RELATE describes the relationship of the individual to the head of household (sometimes called the householder or reference person).

## Age (AGE)

File: BRA1980-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 3  
 Decimals: 0  
 Range: 0-999

Valid cases: 0  
 Invalid: 0

#### Description

AGE gives age in years as of the person's last birthday prior to or on the day of enumeration.

## Age, grouped into intervals (AGE2)

File: BRA1980-P-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 1-98

Valid cases: 0  
 Invalid: 0

#### Description

AGE2 gives computed years of age grouped into intervals.

## Sex (SEX)

File: BRA1980-P-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 1-9

Valid cases: 0  
 Invalid: 0

#### Description

SEX reports the sex (gender) of the respondent.

## Marital status [general version] (MARST)

File: BRA1980-P-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

#### Description

[program universe for et,mz samples.

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

## Marital status [detailed version] (MARSTD)

File: BRA1980-P-H

**Overview**

Type: Discrete

## Consensual union (CONSENS)

File: BRA1980-P-H

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 1-9

Valid cases: 0  
 Invalid: 0

**Description**

CONSENS indicates whether the respondent was in a consensual union -- a de facto marriage.

## Relationship to head of subfamily (SUBFREL)

File: BRA1980-P-H

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 4  
 Decimals: 0  
 Range: 1000-9999

Valid cases: 0  
 Invalid: 0

**Description**

SUBFREL describes the relationship of the individual to the head of the subfamily (in most cases, conjugal unit). It is distinct from RELATE, which identifies a person's relationship to the head of the household. There can be multiple subfamilies within households. The particular subfamily to which a person belongs is recorded in SUBFNUM.

Persons living alone without other family are identified as "heads" of family.

## Subfamily membership number (SUBFNUM)

File: BRA1980-P-H

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 3  
 Decimals: 0  
 Range: 0-13

Valid cases: 0  
 Invalid: 0

**Description**

SUBFNUM gives the number of the subfamily to which the person belongs within the household (1 = first subfamily, 2 = second subfamily, etc.). SUBFNUM records the identification of subfamilies in the original dataset, which generally correspond to conjugal units and their offspring.

## Children ever born (CHBORN)

File: BRA1980-P-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 0-99	

### Description

CHBORN reports the number of children ever born to each woman of whom the question was asked. In most samples, women were to report all live births by all fathers, whether or not the child was still living.

## Children surviving (CHSURV)

File: BRA1980-P-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 0-99	

### Description

CHSURV reports the number of children born to a woman who were still living at the time of the census.

## Mortality status of mother (MORTMOT)

File: BRA1980-P-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 1-9	

### Description

MORTMOT indicates whether the person's biological mother was still living at the time of the census.

## State of birth, Brazil (BPLBR)

File: BRA1980-P-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 11-99	

### Description

BPLBR indicates the person's state of birth within Brazil.

## Race or color (RACE)

File: BRA1980-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 10-99

Valid cases: 0  
Invalid: 0

### Description

Race identifies the racial group with which a person identified himself or herself, or to which an enumerator assigned them. Determinations of race are based largely on appearance or ancestral place of origin.

## School attendance (SCHOOL)

File: BRA1980-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-9

Valid cases: 0  
Invalid: 0

### Description

SCHOOL indicates whether or not the person attended school at the time of the census or within some specified period of time prior to the census.

## Literacy (LIT)

File: BRA1980-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-9

Valid cases: 0  
Invalid: 0

### Description

LIT indicates whether or not the respondent could read and write in any language. A person is typically considered literate if he or she can both read and write. All other persons are illiterate, including those who can either read or write but cannot do both.

## Educational attainment, Brazil (EDUCBR)

File: BRA1980-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 4  
Decimals: 0  
Range: 0-9000

Valid cases: 0  
Invalid: 0

### Description

EDUCBR usually indicates the person's educational attainment in terms of the amount of schooling completed -- both the level (for example, primary, secondary, or higher education) and typically the number of years or grades completed at that level. For some classifications, the variable indicates the level or grade that the person is currently attending; all such classifications are explicitly indicated in the code labels for EDUCBR.

## Activity status (employment status) [general version] (EMPSTAT)

File: BRA1980-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-9

Valid cases: 0  
Invalid: 0

### Description

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

## Activity status (employment status) [detailed version] (EMPSTATD)

File: BRA1980-P-H

## Occupation, ISCO general (OCCISCO)

File: BRA1980-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 1-99

Valid cases: 0  
Invalid: 0

### Description

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is typically the one in which the person had spent the most time or earned the most money.

## Occupation, unrecoded (OCC)

File: BRA1980-P-H

### Overview

Type: Continuous  
 Format: numeric  
 Width: 4  
 Decimals: 0

Valid cases: 0  
 Invalid: 0

### Description

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

## Industry, general recode (INDGEN)

File: BRA1980-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 3  
 Decimals: 0  
 Range: 0-999

Valid cases: 0  
 Invalid: 0

### Description

INDGEN recodes the industrial classifications of the various samples into twelve groups that can be fairly consistently identified across all available samples. The groupings roughly conform to the International Standard Industrial Classification (ISIC). The third digit of INDGEN retains important detail among the service industries that could not be consistently distinguished in all samples.

"Industry" refers to the activity or product of the establishment or sector in which a person worked.

## Industry, unrecoded (IND)

File: BRA1980-P-H

### Overview

Type: Continuous  
 Format: numeric  
 Width: 5  
 Decimals: 0

Valid cases: 0  
 Invalid: 0

### Description

"Industry" refers to the activity or product of the establishment or sector in which the person worked. IND is classified according to the system used by the respective national census office at the time, and is not recoded by IPUMS-International.

## Status in employment (class of worker) [general version] (CLASSWK)

File: BRA1980-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 1

### Description

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

- ☐ 0 none

#### Interviewer instructions

The following questions will be filled out only for persons age 5 or over, that is, those born before September 1, 1975.  
[Applies to questions 19 - 24]

Questions 20, 21 and 22 - For persons who attend school

Consider as attending the school not only those who take regular courses, but also those attending Pre-school, Adult literacy course, General Education (attending class on the radio or television), College entrance exam course, Master's degree or Doctor's degree.

Also consider as attending school persons who, are duly registered but, on the date of reference, are temporarily unable to attend for reasons of illness, etc.

Do not consider as attending school persons who, on the date of the Census, are attending only short courses for professional specialization or cultural extension, such as sewing, dancing, typing, etc.

Question 20 - Grade currently attended

For persons who attend courses in grades/years, mark the grade/year they attend.

If the course attended is not organized by year, but according to a credit system, academic periods, semesters, phases, modules, etc., these credits, periods, etc. should be converted into the traditional grades or years. Therefore, the 5th period of credits at a university is usually equivalent to the 3rd year; each phase or division of schooling generally corresponds to a grade or year in regular courses.

For persons who attend non-graded courses or who do not attend school. Box 0 - None - will be marked.

28. Worked in last 12 months (Sept 1, 1979- Aug 31, 1980)

[ ] 1- yes  
[ ] 3- no

**Interviewer instructions**

The following questions will only be filled out for persons age 10 or over, that is, those born before September 1, 1970.

[Applies to questions 25-49]

**Question 28 - Worked during the last 12 months (9/1/1979 to 8/31/1980)**

This question is intended to identify if the person worked during the last 12 months, that is, between September 1, 1979 and August 31, 1980.

Yes will be marked for persons who, during the entire preceding 12-month period or part of same, exercised work for monetary remuneration and/or products or merchandise, including persons on paid leave with remuneration for illness (receiving temporary pension from the Federal Social Security Institute [INAMPS], scholarship, etc., and those without remuneration who regularly worked 15 hours or more per week in an economic activity, helping a person with whom he or she resided or an institution of charity or a cooperative, or as an apprentice, trainee, etc.

The following will also answer Yes:

- a) persons who exercised seasonal or intermittent work during the last 12 months, as is the case of farm workers who only worked during planting, cutting or harvesting time, pickers, gatherers or breakers of extractive plant products, etc.
- b) women who, having worked during any part of the last 12 months, ceased to work due to marriage, childbirth, etc.; or
- c) persons retired during the last 12 months even if they currently do not exercise an economic occupation.

The box no will be marked for persons who, during the entire period between 9/1/1979 and 8/31/1980, had only one or more of the following situations: exercised domestic chores in the home, studied, lived on earnings from retirement or from investment of capital, were imprisoned and serving sentence, sick or invalid without being on leave from work, unemployed without having found work, or did not work because they did not want to.

- ☐ 8x homemaker
- ☐ 9x no occupation

#### Interviewer instructions

The following questions will only be filled out for persons age 10 or over, that is, those born before September 1, 1970.

[Applies to questions 25-49]

Question 29 - If the person answered yes in Question 28, mark Box 0 (zero) and go on to Question 30. If he or she answered no, indicate the appropriate situation or occupation, following the numbered order, and then go on to Question 46

When the answer to Question 28 is yes, the Box - Worked - will be marked and the following questions will be answered. When the answer to Question 28 is no, one of Boxes 1 to 9 will be marked, as the case may be; Question 46 will then be asked, and Questions 30 to 45 will be left blank. If the person can be classified into more than one of the situations presented, the first in the order presented will be marked. For these, consider:

Looking for work - Already worked - a person who had worked before 9/1/1979, is willing to work, and has taken some measure in the last 2 months to find work, specifically: made contact with employers, employment agencies, labor unions or the like; asked relatives, friends or colleagues; looked for a job in want ads, etc.; this category includes those who have found work and are waiting to be called or who have signed up for a selection process;

Looking for work - Never worked - a person who never worked but is willing to work and who, in recent months, took at least one of the measures described in the preceding item;

Retired or pensioner - a person who receives income resulting from retirement from work which he or she exercised at an earlier date (retired, etc.) or who receives a pension from a government pension or social assistance fund left upon the death of a person upon whom he or she was dependent. A person who, retired during the reference period (9/1/1979 to 8/31/1980), should not be considered as retired. In this case yes will be marked in Question 28, - the declared [occupation], and the occupation exercised upon retirement, in Question 30.

Lives on earnings - a person who lives only on earnings arising from use of capital or property of which he or she has usus fructus, such as rent from real estate, movable items, etc., interest from stocks and bonds, dividends, etc.;

Prisoner - serving sentence, even if he or she exercises an occupation in the prison;

Student - a person who did not work nor looked for work, does not live on earnings, nor was a prisoner, and was attending some course among those listed in Questions 21 or 22;

Sick or invalid - a person who cannot work due to illness or permanent disability, but is not on leave from work, retired, living on earnings, in prison or a student;

Domestic chores - a person who only works caring for the house where he or she lives; or

No occupation - a person who does not want to work or who, although desiring to work, stopped looking because he or she failed to find any job and does not fit into any of the above categories.

\_\_\_ Code

### Interviewer instructions

The following questions will only be filled out for persons age 10 or over, that is, those born before September 1, 1970.

[Applies to questions 25-49]

Question 30 - What occupation, profession, position, function, etc. the person regularly exercised during the last 12 months

This entry will be for the usual occupation that the enumerated person exercised between 9/1/1979 and 8/31/1980.

Usual occupation is considered that exercised during most of the referred period.

When a person has changed occupations and intends this change to be permanent, the occupation he or she exercised last will be recorded, regardless of the time spent on each during this period. Included in this case are persons who changed occupations or functions due to promotion or change in career, such as:

1st case - a farm worker who immigrated to the city and went to work as a Hod Carrier in the construction of a building;

2nd case - a billing Clerk in an industrial company who was promoted to Accounting Technician;

3rd case - an office helper at a bank who was promoted to the position of Cashier.

When the person has changed occupations, but the change is transitory due to circumstantial or seasonal factors, the usual occupation will be entered and not the transitory occupation, such as:

1st case - for a farm worker who, during the time between planting and harvesting, worked in a village as a stone mason, woodcutter, etc., record, as the case may be, Hoe worker, Cotton picker, etc.;

2nd case - for a farm worker who sometimes works with a machine at a sugar plant, etc., the occupation of farm worker will be recorded;

3rd case - for a driver who, unable to work in his or her profession, is exercising some other occupation until he is again able to work as a driver, the occupation of Driver will be recorded;

4th case - for a specialized worker who, when unable to find a placement in his or her profession, is exercising another occupation, Welder, Cabinet maker, Weaver, etc. will be recorded, as the case may be.

When the person simultaneously exercises different occupations, the main occupation should be recorded.

Main occupation is considered that which occupies the greatest number of the person's hours per week or, if this number is the same, that which provides the highest income, such as:

For persons on vacation or on leave, even if they were exercising another occupation, the usual occupation will be recorded and not that exercised temporarily during vacation or leave.

Occupation should not be confused with professional specialization. For example, for a commercial director with a degree in economics, or a high school teacher with a degree in medicine, the entries will be, respectively: Commercial director and High school teacher.

Vague or generic answers which do not correctly characterize the person's occupation should not be recorded.

Some examples are given below:

Incorrect entry: Agent

Correct entry: Railroad station agent, travel agent, advertising agent, etc.

Incorrect entry: Assistant

Correct entry: Office assistant, kitchen assistant, stock assistant, etc.

Incorrect entry: Bank worker

Correct entry: Bank cashier, file clerk, accountant, etc.

Incorrect entry: Commercial worker

Correct entry: Shop attendant, invoice clerk, merchandise placer, etc.

Incorrect entry: Government employee

Correct entry: Attendant, administrative official, stock clerk, etc.

Incorrect entry: Mechanic

Correct entry: Automobile mechanic, mechanic for calculators, aircraft mechanic, etc.

Incorrect entry: Factory worker

Correct entry: Carpenter, welder, hod carrier, etc.

Incorrect entry: Teacher

Correct entry: Primary teacher [Grades 1-8], high school teacher [grades 9-11], university teacher or professor, gym teacher, etc.

Incorrect entry: Farm worker

Correct entry: Hoe worker, cotton picker, sugar cane cutter, etc.

For employees and for persons who are self-employed or without remuneration, the occupation, profession, position, function, etc., which they exercised, will be recorded.

If the person is engaged in farming, either individually or only with the help of a resident of the household who is not paid for the work, record respectively Field hand or Animal raiser.

If the person has a commercial establishment, individually or only with the help of a non-remunerated person, record Commercial businessman.

Liberal professionals (Doctors, Dentists, Lawyers, Engineers, etc.), who employ up to 2 attendants or nurses in their offices should record their profession.

[p.54]

For Employers (partners or tenants) who are owners of establishments, firms or companies where they work (condition of being owner and employer), the entry should indicate this condition, such as Ranch owner, Chicken-farm owner, Owner of industry, Store owner, Barbershop owner, Clinic owner, Transportation company owner, etc. Below are some examples to better clarify these situations:

Situation: Barber, barbershop employee

Correct entry: Barber

Situation: Barber, barbershop owner, working only with the help of a non-remunerated son or daughter

Correct entry: Barber

Situation: Barber, working with his father without receiving remuneration

Correct entry: Barber

Situation: Barber, owner of a barbershop, working with the help of employees

Correct entry: Barbershop owner

32. Function or activity class of the establishment, organization, institution, etc, where exercised occupation in question 30

**Interviewer instructions**

The following questions will only be filled out for persons age 10 or over, that is, those born before September 1, 1970.

[Applies to questions 25-49]

Question 32 - Objective or field of business of the establishment, organization, institution, etc., where the occupation declared in Question 30 is exercised

This question is aimed at determining the objective or field of business of the organization, company or firm to which the enumerated person is subordinated, or the nature of the activity exercised by self-employed persons.

In most cases, the class of activity is not directly related to the occupation. Therefore, a driver may exercise his or her occupation in Highway freight transportation (driver for a transportation company), or at a Textile company (driver for a cloth factory); a doorman may exercise his occupation in Hotel services (hotel doorman) or in the Entertainment industry (doorman at a movie theater); a medical doctor may exercise her occupation for the Federal Health Department (doctor at INAMPS) or at a Private medical service, (doctor at a private hospital or a private office), or at a Steel company (doctor at the Volta Redonda Steel Plant), etc.

In farming establishments (crops or animals), record the main crop or animal at the establishment.

Generic answers should be avoided which do not make it possible to correctly characterize the activity of the establishment or business of the workers being enumerated, such as Agriculture, Commerce, Industry, Public service, etc.

For orientation, a list of the most common activities is presented below, where countless occupations are exercised. It should be made clear that the entry does not have to be one of the expressions on the list; it should characterize the activity of the organization where the occupation is exercised.

[List of occupation sectors was not translated into English]

[Applies to questions 25-49]

Question 33 - Position in the establishment, business, institution, etc., declared in Question 31

This question asks about the position occupied by the person in his or her labor relationship, considering;

Migrant farm worker - With a middleman - a person without a steady job who works at one or more farming or plant extraction establishments, paid per task, per day, or per hour, contracted or recruited by a middleman from whom he or she receives payment;

Migrant farm worker - Without a middleman - a person without a steady job who works at one or more farming or plant extraction establishments, paid per task, per day or per hour, who offers his or her labor directly to the person responsible for the establishment, and receives payment from this person;

Depending on the region, migrants with or without a middleman are known as Migrants, Illegals, Migrant Middlemen, Bóias-frias, Calungas, Turmeiros, etc.;

Sharecropper (Parceiro ou meeiro) - a person who is engaged in or exercises an economic activity (farming, cattle raising, plant extraction, fishing or gold mining) and receives part of the production for the work or pays for the use of the land with part of the production.

When a sharecropper has no employees and is free to cede the partnership to whomever he or she wishes, mark Self-employed sharecropper (parceiro).

When the sharecropper (parceiro ou meeiro) is helped by one or more employees, mark Employer sharecropper (Parceiro empregado).

When the sharecropper has no employees and is not free in terms of to whom he or she cedes the partnership, mark Employed sharecropper.

Employee - a person who has a steady job and works for an employer, with remuneration that is either solely monetary or monetary and in products. Apprentices and trainees, remunerated or not, will also be considered Employees, as well as domestic employees who receive only in benefits (housing, food, clothing, etc.);

Employer - a person who is engaged in an economic activity with the help of one or more employees. Persons who have only domestic employees will not be considered employers;

Self-employed - a person who exercises an activity individually or with the help of one or more non-remunerated persons who are residents in the household; or

Without remuneration - a person who exercises an economic activity without remuneration and works at least 15 hours per week helping a member of the household or who helps a religious or charitable institution.

Note: priests, church ministers, rabbis, friars and nuns will be considered employees when they receive monetary remuneration. If they receive only benefits, they will be classified as Without remuneration.

### Interviewer instructions

The following questions will only be filled out for persons age 10 or over, that is, those born before September 1, 1970.

[Applies to questions 25-49]

Question 34 - Is a contributor to Federal Social Security

Considering all the occupations exercised, mark:

Federal - for persons who contribute to a Federal Social Security Institute - IAPAS (INPS, INAMPS, IPASE, SASSE, etc.);  
State - for persons who contribute to a state social security institute, including members of the police forces or military auxiliaries;  
Municipal - for persons who contribute to a municipal social security institute, including members of the auxiliary police or military forces; or  
Is not - for persons who are not contributors to any social security institute. Also mark no for persons who are only contributors to private social security and for military members of the army, navy or air force.

If the person contributes to more than one social security institute, record that which corresponds to the occupation declared in Question 30.

Contributions to the FUNRURAL system are made by employers as legal entities and, for this reason, should not be considered.

#### Question 28 - Worked during the last 12 months (9/1/1979 to 8/31/1980)

This question is intended to identify if the person worked during the last 12 months, that is, between September 1, 1979 and August 31, 1980.

Yes will be marked for persons who, during the entire preceding 12-month period or part of same, exercised work for monetary remuneration and/or products or merchandise, including persons on paid leave with remuneration for illness (receiving temporary pension from the Federal Social Security Institute [INAMPS], scholarship, etc., and those without remuneration who regularly worked 15 hours or more per week in an economic activity, helping a person with whom he or she resided or an institution of charity or a cooperative, or as an apprentice, trainee, etc.

The following will also answer Yes:

- a) persons who exercised seasonal or intermittent work during the last 12 months, as is the case of farm workers who only worked during planting, cutting or harvesting time, pickers, gatherers or breakers of extractive plant products, etc.
- b) women who, having worked during any part of the last 12 months, ceased to work due to marriage, childbirth, etc.; or
- c) persons retired during the last 12 months even if they currently do not exercise an economic occupation.

The box no will be marked for persons who, during the entire period between 9/1/1979 and 8/31/1980, had only one or more of the following situations: exercised domestic chores in the home, studied, lived on earnings from retirement or from investment of capital, were imprisoned and serving sentence, sick or invalid without being on leave from work, unemployed without having found work, or did not work because they did not want to.

- ☐ 3 13
- ☐ 4 14
- ☐ 5 15
- ☐ 6 16 or more
- ☐ 0 not employed

### Interviewer instructions

The following questions will only be filled out for persons age 10 or over, that is, those born before September 1, 1970.

[Applies to questions 25-49]

Question 29 - If the person answered yes in Question 28, mark Box 0 (zero) and go on to Question 30. If he or she answered no, indicate the appropriate situation or occupation, following the numbered order, and then go on to Question 46

When the answer to Question 28 is yes, the Box - Worked - will be marked and the following questions will be answered. When the answer to Question 28 is no, one of Boxes 1 to 9 will be marked, as the case may be; Question 46 will then be asked, and Questions 30 to 45 will be left blank.

If the person can be classified into more than one of the situations presented, the first in the order presented will be marked. For these, consider:

Looking for work - Already worked - a person who had worked before 9/1/1979, is willing to work, and has taken some measure in the last 2 months to find work, specifically: made contact with employers, employment agencies, labor unions or the like; asked relatives, friends or colleagues; looked for a job in want ads, etc.; this category includes those who have found work and are waiting to be called or who have signed up for a selection process;

Looking for work - Never worked - a person who never worked but is willing to work and who, in recent months, took at least one of the measures described in the preceding item;

Retired or pensioner - a person who receives income resulting from retirement from work which he or she exercised at an earlier date (retired, etc.) or who receives a pension from a government pension or social assistance fund left upon the death of a person upon whom he or she was dependent. A person who, retired during the reference period (9/1/1979 to 8/31/1980), should not be considered as retired. In this case yes will be marked in Question 28, - the declared [occupation], and the occupation exercised upon retirement, in Question 30.

Lives on earnings - a person who lives only on earnings arising from use of capital or property of which he or she has usus fructus, such as rent from real estate, movable items, etc., interest from stocks and bonds, dividends, etc.;

Prisoner - serving sentence, even if he or she exercises an occupation in the prison;

Student - a person who did not work nor looked for work, does not live on earnings, nor was a prisoner, and was attending some course among those listed in Questions 21 or 22;

Sick or invalid - a person who cannot work due to illness or permanent disability, but is not on leave from work, retired, living on earnings, in prison or a student;

Domestic chores - a person who only works caring for the house where he or she lives; or

No occupation - a person who does not want to work or who, although desiring to work, stopped looking because he or she failed to find any job and does not fit into any of the above categories.

[Applies to questions 25 -49]

46. Monthly gross income received from retirement (FUNRURAL, reform, retirement, etc) from Pensão de Instituto, Caixa de Assistência Social o Fundo de Pensão, from Abono, Permanência [varias pension funds], and, divided by 12 the 14th minimum salary received from PIS or PASEP

\_\_\_ Cr\$

#### Interviewer instructions

The following questions will only be filled out for persons age 10 or over, that is, those born before September 1, 1970.

[Applies to questions 25-49]

Question 46 - Average gross monthly income received from Retirement (FUNRURAL, Military Retirement, Teachers' Retirement, etc.), from a pension paid by a Federal Social Security Institute, the Social Welfare Fund or a Pension Fund, or from a Continuance Bonus and, divided by 12, the 14th wage received from the PIS or PASEP Tax Funds

The entry will be the sum total of the income for the month of August deriving from:

- a) work exercised previously (retirement, including FUNRURAL and other forms of retirement, etc.);
- Note: For persons who retired during the last 12 months (9/1/1979 to 8/31/1980) the income from retirement will not be recorded, since they already declared the income from the occupation exercised upon retirement.
- b) a pension left by a person of whom the respondent was a beneficiary, paid by a Social Security Institute, Welfare Fund or Social Security Institute. Do not include alimony (spontaneous or legally demanded);
- c) longevity bonus (Pé-na-cova); and
- d) the amount of 1/12 (divided by 12) of the 14th wage received from the PIS/PASEP Tax Fund, as well as other types of aid received from an Institute or Fund, such as childbirth allowance, disability benefits, etc.

Do not include income deriving from contributions paid in the past to private funds or wage supplementing funds (CAPEMI, MONGERAL, GEBOEX, Montepio da Família Militar, SIAS, etc.).

47. Average monthly earnings from rent or rentals of property, furniture, vehicles, machinery, etc, including subleases

\_\_\_ Cr\$

#### Interviewer instructions

The following questions will only be filled out for persons age 10 or over, that is, those born before September 1, 1970.

[Applies to questions 25-49]

Question 47 - Average monthly income deriving from rentals or leasing of real estate, furniture, vehicles, machines, etc., including sub-letting

Record the average of the last 12 months of the income deriving from letting, sub-letting, leasing or subleasing, sale of right to use of real estate (house, apartment, land, pasture, winter pasture, factory, store, etc.), vehicle, machine or other movable property. Maintenance, collection and condominium expenses should be deducted from the income, as well as taxes and fees levied directly on the property through which the income was obtained (property tax, trash collection fee, etc.).

In this question, do not consider income deriving from the business where the person works, rentals of vehicles, machines, real estate, etc. This income will be recorded in Question 37 or 39, as the case may be (income from work).

## Income received from donations (BR1980A\_0449)

[Applies to questions 25 -49]

48. Average monthly earnings received as donations in money, monthly allowance from person not a resident in this household or food allowance

\_\_\_ Cr\$

### Interviewer instructions

The following questions will only be filled out for persons age 10 or over, that is, those born before September 1, 1970.

[Applies to questions 25-49]

Question 48 - Average monthly income regularly received, deriving from monetary donations, allowance from non-residents of the household, or alimony

Only amounts should be recorded that were received regularly from donations or benefits, paid by a non-resident of the household being enumerated, and without corresponding work being carried out.

Any rent or installment normally paid by a non-resident of the household should be considered a donation, unless the household has been ceded.

Benefits or donations received from residents in the household will not be included in the questions on income.

\_\_\_\_ Cr\$

**Interviewer instructions**

The following questions will only be filled out for persons age 10 or over, that is, those born before September 1, 1970.

[Applies to questions 25-49]

Question 49 - Monthly average of other income received during the last 12 months and deriving from investment or other use of capital

The average (total divided by 12) income from capital received during the last 12 months will be recorded, including:

- a) profits earned by owners (or partners) of limited liability companies when such profits are distributed by the owner of the shares in the form of dividends or new shares;
- b) income derived from investments in savings accounts, exchange bonds, housing-financing notes, bonds of public debt, fixed-duration deposits, debentures, stocks, shares, etc. in the form of interest, monetary correction, deductions, premiums, etc.;
- c) pension received by the respondent himself or herself resulting from participation in pension funds;
- d) pension left by a person of whom the person enumerated was beneficiary, paid by a pension fund; and
- e) wage supplement paid by an insurance organization.

Note - Donations, inheritances, compensation, funds received from the Worker's Severance Fund (FGTS) and monetary prizes won in lotteries, contests or drawings will not be included in the questions on income.

File: BRA1980-P-H

### Overview

Type: Continuous  
 Format: numeric  
 Width: 8  
 Decimals: 2

Valid cases: 0  
 Invalid: 0

### Description

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

## Year of last birth (LASTBYR)

### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0  
 Invalid: 0

### Description

YRSCHOOL indicates the highest grade/level of schooling the person had completed, in years. Only formal schooling is counted. YRSCHOOL accounts for the number of years of study, regardless of the track or kind of study. Information on degree and/or technical track is available in EDATTAIN. Years of schooling for Israel, categorized into intervals, are given in YRSCHOOL2.

Users should pay close attention to the top-codes in each sample, as discussed in the comparability section.

File: BRA1980-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-9

Valid cases: 0  
Invalid: 0

### Description

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.
