TITLE
Monitoring of the Shelter Programme 2017

COUNTRY/ECONOMY

Name	Country code
Ukraine	UKR

STUDY TYPE
Socio-Economic/Monitoring Survey [hh/sems]

ABSTRACT
The monitoring of 2017 shelter activities confirms that shelter assistance - in terms of repair of houses damaged by conflict-related activities - is highly appreciated by the recipients and is generally executed with good quality. The consistent quality is related to the fact that it is easy to find construction companies and brigades with sufficient expertise, and the technology involved is basic and repetitive.

Based on the received forms, in all 232 cases, the repair works were deemed to be in accordance with the locally accepted standards and good construction practices.

During the monitoring, shelter colleagues perform visual verification of the materials actually used in the repairs against what partners/contractors reported in the lists of utilized construction materials (including materials procured by both UNHCR and partners). In all 232 cases, the visual check confirmed the consistency of the actual utilization with what partners/contractors had reported.

KIND OF DATA
Sample survey data [ssd]

UNIT OF ANALYSIS
Households

Version

VERSION DESCRIPTION
Edited, anonymous dataset for licensed distribution.

VERSION DATE
2021-11-29

Scope

NOTES
The study covered the following topics:
Geographical characteristics of repaired shelter; beneficiary's information and protection assessment; vulnerability criteria; safety; technical assessments of buildings; satisfaction with repairs; access to basic services.

TOPICS

Topic
Emergency Shelter and NFI
Community Services

Logistics
Housing, Land and Property

Coverage

GEOGRAPHIC COVERAGE
Mariupol, Sloviansk and Severodonetsk, and Donetsk and Luhansk

UNIVERSE
All 1732 repairs conducted by UNHCR between December 2017 and August 2018.

Producers and sponsors

PRIMARY INVESTIGATORS

Name	Affiliation
UN Refugee Agency (UNHCR)	UN

Sampling

SAMPLING PROCEDURE
The monitored sample covers all five UNHCR offices in the field (Mariupol, Sloviansk and Severodonetsk in GCA1; Donetsk and Luhansk in NGCA).

Nonrandom sample, selected to comply with 3 principles:
- to cover as many areas as possible to capture the different conditions in which house repairs are conducted, while giving priority to areas with difficult access and conditions
- to accord priority to problematic cases (in terms of technical or protection-related issues)
- to cover all types of repairs, but giving priority to interventions that have required high investments in terms of time and money (heavy repairs and reconstructions)

Data Collection

DATES OF DATA COLLECTION

Start	End
2017-12-01	2018-08-31

DATA COLLECTION MODE
Computer Assisted Telephone Interview [cati]

DATA COLLECTION NOTES
The monitoring visits took place between December 2017 and August 2018 and were performed by teams composed by at least two members, one from the Shelter team and one from the Protection unit.

The collection of the information was based on the standard Kobo Shelter Monitoring Form (is provided in the Documentation tab), which has two main sections, one focused on technical aspects, the other on Protection.

All visits were conducted also in accordance with the recommendations included in the Shelter SOPs (see Annex 4 of the report) and the dedicated guidelines (see Annex 5 of the report).

DATA COLLECTORS

UN Refugee Agency	UNHCR	UN

Questionnaires

QUESTIONNAIRES
The survey questionnaire/ form consisted of the following sections:
- Survey details
- Location
- Beneficiary's info
- Technical assessment
- Quality assessment/ satisfaction level
- Selection and vulnerability criteria
- Safety
- Access to basic services
- Sustainability of the intervention
- Other comments/ important information
