#### VERSION DESCRIPTION

Version 6.4. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

In v6.4, the research team continued to carry out improvements to geography, providing harmonized geographic units for the second administrative level for roughly half the countries. More information about IPUMS geography variables is available [here](https://international.ipums.org/international/geography_variables.shtml). Also, approximately 100 integrated variables were renamed. Affected variables with their current and previous names are listed [here](https://international.ipums.org/international/resources/misc_docs/renamed_variables_sept2015.pdf). Geography variable also underwent wholesale renaming.

In this update, IPUMS added 19 new samples for Armenia, Austria, Costa Rica, Ethiopia, France, Ghana, Mozambique, Paraguay, Portugal, Puerto Rico, South Africa, and Spain. Ethiopia, Mozambique, and Paraguay were newly added countries to IPUMS. Samples for other countries extend pre-existing series for those countries.

#### ABSTRACT

IPUMS-International is an effort to inventory, preserve, harmonize, and disseminate census microdata from around the world. The project has collected the world's largest archive of publicly available census samples. The data are coded and documented consistently across countries and over time to facilitate comparative research. IPUMS-International makes these data available to qualified researchers free of charge through a web dissemination system.

The IPUMS project is a collaboration of the Minnesota Population Center, National Statistical Offices, and international data archives. Major funding is provided by the U.S. National Science Foundation and the Demographic and Behavioral Sciences Branch of the National Institute of Child Health and Human Development. Additional support is provided by the University of Minnesota Office of the Vice President for Research, the Minnesota Population Center, and Sun Microsystems.

#### KIND OF DATA

Census/enumeration data [cen]

#### UNITS OF ANALYSIS

Dwelling

#### UNITS IDENTIFIED:

- Dwellings: No (dwellings in original sample are interpreted as households in IPUMS)
- Vacant units: Yes
- Households: Yes
- Individuals: Yes

- Group quarters: Yes

#### UNIT DESCRIPTIONS:

- Households: Structurally independent living quarters, consisting of one or more rooms with a private entrance, serving up to five families.

- Group quarters: Group living together under relations of administrative subordination; or a dwelling with more than 5 families.

### DDI DOCUMENT VERSION

- v6.4 April 2016

Documentation of census data and harmonized variables as found in IPUMS-International. The International Household Survey Network (IHSN) contracted IPUMS International for generating DDI and Dublin Core-compliant metadata related to population and housing census datasets from developing countries. The objective was to provide countries with detailed metadata in a format compatible with the DDI standard used by most of these countries, with a view to guarantee the preservation of the data and metadata, and the publishing of metadata.

The intellectual rights (including copyright) for the data and metadata in IPUMS are retained by the countries under a Memorandum of Understanding with the contributing countries. IPUMS-International has distribution rights to the metadata and data. The XML documents generated by this process are viewed as a distribution of the metadata.

Fields edited by the World Bank are: DDI ID and study ID to match World Bank study naming convention, as well as DDI Document Version and Version Description to reflect changes included in version 6.4.

Previous version documented in the World Bank Microdata Library:

- v6.3 (August 2014)

## Record type (RECTYPE)

File: BRA1991-H-H

### Overview

Type: Discrete  
Format: character  
Width: 1

Valid cases: 0  
Invalid: 0

### Description

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

## Year (YEAR)

File: BRA1991-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 4  
Decimals: 0  
Range: 1960-2011

Valid cases: 0  
Invalid: 0

### Description

YEAR gives the year in which the census was taken.

## IPUMS sample identifier (SAMPLE)

File: BRA1991-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 9  
Decimals: 0  
Range: 32197001-894201001

Valid cases: 0  
Invalid: 0

### Description

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g, 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

## Household serial number (SERIAL)

File: BRA1991-H-H

### Overview

Type: Continuous  
 Format: numeric  
 Width: 10  
 Decimals: 0

Valid cases: 0  
 Invalid: 0

### Description

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002  
 Colombia 1993, 2005  
 Costa Rica 1984, 2000  
 Cuba 2002  
 Dominican Republic 1981, 2002, 2010  
 Ecuador 1990, 2001  
 Germany 1971  
 Hungary 1980, 1990, 2001  
 Jamaica 1982, 1991, 2001  
 Malaysia 1970, 1991, 2000  
 Mexico 1995, 1990, 2000, 2005  
 Nigeria 2006  
 Panama 2000  
 Peru 1993, 2007  
 Portugal 1981, 1991, 2001  
 Spain 1991  
 Uruguay 2011  
 Venezuela 1990, 2001  
 Vietnam 1989

In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

## Number of person records in the household (PERSONS)

File: BRA1991-H-H

### Overview

Type: Continuous  
 Format: numeric  
 Width: 3  
 Decimals: 0

Valid cases: 0  
 Invalid: 0

### Description

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

## Subsample number (SUBSAMP)

File: BRA1991-H-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0  
 Invalid: 0

**Description**

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

## Group quarters (collective dwelling) status (GQ)

File: BRA1991-H-H

**Overview**

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0  
Invalid: 0

**Description**

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

## Number of unrelated persons (UNREL)

File: BRA1991-H-H

**Overview**

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-9

Valid cases: 0  
Invalid: 0

**Description**

UNREL indicates the number of persons in the household who are unrelated to the head.

## Urban-rural status (URBAN)

File: BRA1991-H-H

**Overview**

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 1-9

Valid cases: 0  
Invalid: 0

**Description**

URBAN indicates whether the household was located in a place designated as urban or as rural.

## Continent and region of country (REGIONW)

File: BRA1991-H-H

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 11-54

Valid cases: 0  
 Invalid: 0

### Description

REGIONW identifies the continent and region of each country.

## Brazil, Region (REGNBR)

File: BRA1991-H-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 1-5

Valid cases: 0  
 Invalid: 0

### Description

REGNBR indicates the region in Brazil in which the household was enumerated. REGNBR is harmonized by name and does not account for boundary changes over time.

The full set of geography variables for Brazil can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

## Brazil, Mesoregion (MESOBR)

File: BRA1991-H-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 4  
 Decimals: 0  
 Range: 1101-5301

Valid cases: 0  
 Invalid: 0

### Description

MESOBR indicates the "Mesorregião Geográfica" (mesoregion) in Brazil where the household was enumerated for the 1980 - 2010 samples. MESOBR is harmonized by name and does not account for boundary changes over time.

The full set of geography variables for Brazil can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

## Brazil, Municipality (MUNIBR)

File: BRA1991-H-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 7  
 Decimals: 0  
 Range: 1199901-5300108

Valid cases: 0  
 Invalid: 0

### Description

MUNIBR indicates the municipality in Brazil where the household was enumerated for the 1980-2010 samples. MUNIBR is harmonized by name and does not account for boundary changes over time.

The full set of geography variables for Brazil can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

## Brazil, Metropolitan region (METROBR)

File: BRA1991-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 3  
Decimals: 0  
Range: 0-430

Valid cases: 0  
Invalid: 0

### Description

METROBR indicates the metropolitan region within Brazil in which the household was enumerated for the 1991 - 2010 sample years. METROBR is harmonized by name and does not account for boundary changes over time.

The full set of geography variables for Brazil can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

## Water supply (WATSUP)

File: BRA1991-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0  
Invalid: 0

### Description

WATSUP describes the physical means by which the housing unit receives its water. The primary distinction is whether or not the household had piped (running) water.

## Sewage (SEWAGE)

File: BRA1991-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0  
Invalid: 0

### Description

SEWAGE indicates whether the household has access to a sewage system or septic tank.

## Telephone availability (PHONE)

File: BRA1991-H-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

#### Description

RADIO indicates whether the household had a radio.

## Number of rooms (ROOMS) File: BRA1991-H-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0  
 Invalid: 0

**Description**

ROOMS indicates the number of rooms occupied by the housing unit.

## Wall or building material (WALL)

File: BRA1991-H-H

**Overview**

Type: Discrete  
Format: numeric  
Width: 3  
Decimals: 0  
Range: 0-999

Valid cases: 0  
Invalid: 0

**Description**

This variable indicates the primary material used in the construction of the dwelling, particularly the dwelling's exterior walls.

## Roof material (ROOF)

File: BRA1991-H-H

**Overview**

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0  
Invalid: 0

**Description**

This variable indicates the dwelling's predominant roofing material.

## Household classification (HHTYPE)

File: BRA1991-H-H

**Overview**

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0  
Invalid: 0

**Description**

HHTYPE is a constructed variable that describes the composition of households.

HHTYPE is constructed from information in RELATE (relationship to head), from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father), and from information on group quarters status, GQ.

## Number of families in household (NFAMS)

File: BRA1991-H-H

**Overview**

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-9

Valid cases: 0  
Invalid: 0

**Description**

NFAMS is a constructed variable that indicates the number of families within each household. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and her servant contains two families; a household consisting of a large, multiple-generation extended family with no lodgers or servants would count as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

## Head's location in household (HEADLOC)

File: BRA1991-H-H

### Overview

Type: Continuous  
Format: numeric  
Width: 3  
Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

HEADLOC gives the person number of the head of household in samples in which persons are organized into households.

## Land ownership (LANDOWN)

File: BRA1991-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0  
Invalid: 0

### Description

This variable indicates whether the land on which the dwelling was located was owned, either in full or in part, by one of the dwelling's residents.

Conceivably, a resident might own land but not the dwelling on which it resides. Such a case would be classified as NIU (not in universe): only dwellings indicating that a resident owned the dwelling were asked about land ownership.

## 1st subnational geographic level, world [consistent boundaries over time] (GEOLEV1)

File: BRA1991-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 6  
Decimals: 0  
Range: 32002-894010

Valid cases: 0  
Invalid: 0

### Description

GEOLEV1 indicates the major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. First administrative units in GEOLEV1 have been spatiotemporally harmonized to provide spatially consistent boundaries across samples in each country.

### Interviewer instructions

## Question 2 - Type

Consider:

House - a private household located in a building, with direct access to a thoroughfare (street, court, lane, avenue, path, etc.), legalized or no not, regardless of the material used in its construction.

Buildings with one or more floors or levels which contain a single household should be considered as houses, even if one the floors has non-household use; or

Apartment - An apartment is a private household located in a building of one or more floors containing more than one household and having common spaces (entrance hall, stairways, corridors, entrance gate and other areas).<sup>2</sup>

Mark, as the case may be:

- 1 - Separate house or house in a condominium - for a household located in a house with access to a thoroughfare, regardless of the material used in its construction, or one that is part of a condominium without being an integral part of a housing or subnormal complex. Included in this case are houses in "Courts," "Avenues" etc., with one or more numbers on the thoroughfare and some sub-number or specific designation;
- 2 - House in a lower-income complex - for households located in homes that are part of housing complexes, usually for low-income families, whose urban improvements (streets, curbing, sidewalks, pipes, etc.), [p. 43] were installed simultaneously, usually financed by for public organs such as COHAB, CEHAB, COOPHAB, etc., and in some cases by private companies;
- 3 - House in a subnormal agglomeration - for households located in subnormal housing complexes, also known as "informal settlements," regardless of the material used in their construction, such as a shantytowns, huts, houses on stilts over water, etc. What characterizes a subnormal agglomeration is its disorganized occupation and the fact that the occupants had no possession or deed to the land when it was built;
- 4 - Separate apartment or apartment in a condominium - for households located in apartment buildings with access to a thoroughfare or that are part of a condominium, without being an integral part of a housing or subnormal complex;
- 5 - Apartment in a low-income housing complex - for households located in apartment buildings that are part of housing complexes, usually for low-income families, whose urban improvements (streets, curbing, sidewalks, pipes, etc.) were built simultaneously, usually financed by a public organ such as COHAB, CEHAB, COOPHAB, etc., and in some cases by private companies;
- 6 - Apartment in subnormal agglomerate - for households located in apartment buildings that are part of a subnormal complex, also known as "informal settlements," such as shantytowns, huts, houses on stilts over water, etc. What characterizes a subnormal agglomeration is its disorganized occupation and the fact that the occupants had no possession or deed to the land when it was built; or
- 7 - Room(s) - for households located in one or more rooms of a house occupied by the room, inner-city slums, etc.

Note- Consideration of families that live in rooms in a house or apartment in the company of other(s) will be as follows:

- a) If there are common areas - bathroom, kitchen, etc. - They will be considered Families in a co-residing family household (except for houses occupied by the room), as they do not comply with the concept of separation; and
- b) If there are no common areas - They will be considered Residents of another household, as they do not comply with the concept of independence and separation.

[p. 44]

Observations:

- a) A house or apartment in a housing complex or subnormal agglomeration should only be marked when there are a number of households in the same situation; and
- b) Apartments in subnormal agglomerations should be very rare.

The following questions are to be filled out for those with electricity  
[Applies to questions 22 - 27]

22. Refrigerator

- ☐ 1 1 door
- ☐ 2 more than one door
- ☐ 0 don't have

### Interviewer instructions

The following questions will only be filled out for households that have electric lighting with or without a meter.  
[Applies to questions 22 - 27]

Question 22 - Refrigerator

Mark:

- 1 - 1 door - when the household only has (1 or more) single-door electric refrigerators;
- 2 - More than 1 door - when there is an electric refrigerator with two or more doors in the household, only this box will be marked, even if there is another, one-door, refrigerator; or
- 0 - Does not have - when there is no electric refrigerator in the household, even if there is a gas or kerosene refrigerator.

## Black-and-white television (BR1991A\_0043)

File: BRA1991-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 1-9

Valid cases: 0  
Invalid: 0

### Description

This variable indicates whether the dwelling has a black and white TV.

### Universe

Dwellings with light, except improvised or collective dwellings

### Literal question

The following questions are to be filled out for those with electricity  
[Applies to questions 22 - 27]

23. Black and White Television

- ☐ 1 have
- ☐ 0 don't have

### Interviewer instructions

The following questions will only be filled out for households that have electric lighting with or without a meter.  
[Applies to questions 22 - 27]

#### Question 23 - Black and white television

Mark:

1 - Has - when there is a black-and-white television set in operating condition in the household; or  
0 - Does not have - when there is no black-and-white television set in operating condition in the household or when there is a set but it is not in operating condition.

## Color television (BR1991A\_0044)

File: BRA1991-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 1-9

Valid cases: 0  
Invalid: 0

### Description

This variable indicates whether the dwelling has a color TV.

### Universe

Dwellings with light, except improvised or collective dwellings

### Literal question

The following questions are to be filled out for those with electricity  
[Applies to questions 22 - 27]

#### 24. Color Television

- ☐ 1 1 television
- ☐ 2 2 televisions
- ☐ 3 3 televisions
- ☐ 0 don't have

### Interviewer instructions

The following questions will only be filled out for households that have electric lighting with or without a meter.  
[Applies to questions 22 - 27]

#### Question 24 - Color television

Mark:

- 1 - 1 set - when there is only one colored television set in operating condition in the household;  
2 - 2 sets - when there are two colored television sets, both in operating condition, in the household;

[p. 53]

- 3 - 3 or more sets - when there are three or more colored television sets in the household, at least three in operating condition; or  
0 - Does not have - when the household has no colored television set or when there is a colored television set that is not in operating condition.

## Freezer (BR1991A\_0045) File: BRA1991-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 1-9

Valid cases: 0  
Invalid: 0

### Description

This variable indicates whether the dwelling has a freezer.

### Universe

Dwellings with light, except improvised or collective dwellings

### Literal question

The following questions are to be filled out for those with electricity  
[Applies to questions 22 - 27]

#### 25. Freezer

- ☐ 1 have  
☐ 0 don't have

### Interviewer instructions

The following questions will only be filled out for households that have electric lighting with or without a meter.  
[Applies to questions 22 - 27]

#### Question 25 - Freezer

Mark:

- 1 - Has - when the household has a freezer; or  
0 - Does not have - when there is no freezer in the household.

## Clothes washing machine (BR1991A\_0046)

File: BRA1991-H-H

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 1-9

Valid cases: 0  
 Invalid: 0

**Description**

This variable indicates whether the dwelling has a washing machine.

**Universe**

Dwellings with light, except improvised or collective dwellings

**Literal question**

The following questions are to be filled out for those with electricity  
 [Applies to questions 22 - 27]

## 26. Washing Machine

- ☐ 1 have  
☐ 0 don't have

**Interviewer instructions**

The following questions will only be filled out for households that have electric lighting with or without a meter.  
 [Applies to questions 22 - 27]

Question 26 - Clothes washing machine

Mark:

1 - Has - when the household has a washing machine, including a machine that only washes, known as "tanquinho" ; or  
 0 - Does not have - when there is no washing machine in the household.

## Vacuum cleaner (BR1991A\_0047)

File: BRA1991-H-H

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 1-9

Valid cases: 0  
 Invalid: 0

**Description**

This variable indicates whether the dwelling has a vacuum cleaner.

**Universe**

Dwellings with light, except improvised or collective dwellings

**Literal question**

The following questions are to be filled out for those with electricity  
[Applies to questions 22 - 27]

## 27. Vacuum Cleaner

- ☐ 1 have  
☐ 0 don't have

### Interviewer instructions

The following questions will only be filled out for households that have electric lighting with or without a meter.  
[Applies to questions 22 - 27]

## Question 27 - Vacuum cleaner

Mark:

- 1 - Has - when there is a vacuum cleaner in the household; or  
0 - Does not have - when there is no vacuum cleaner in the household.

## Weight or factor for expanding sample (BR1991A\_0048) File: BRA1991-H-H

### Overview

Type: Continuous  
Format: numeric  
Width: 10  
Decimals: 8

Valid cases: 0  
Invalid: 0

### Description

This variable indicates weight or factor for expanding the sample.

### Universe

All households

### Literal question

Weight or factor for expanding sample

## Strata (BR1991A\_0049) File: BRA1991-H-H

### Overview

Type: Continuous  
Format: numeric  
Width: 6  
Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

This variable is the strata identifier for the sample. Strata is a constructed variable that captures implicit geographic stratification resulting from the sample design. It is created by assigning a unique identifier to groups of between 10 and 19 adjacent households. Additional documentation is available on the Variance Estimation page.

### Universe

All households

### Literal question

Strata

## Household weight (HHWT)

File: BRA1991-H-H

### Overview

Type: Continuous  
Format: numeric  
Width: 8  
Decimals: 2

Valid cases: 0  
Invalid: 0

### Description

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

## Brazil, State 1960 - 2010 [Level 1; consistent boundaries, GIS] (GEO1\_BR)

File: BRA1991-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 6  
Decimals: 0  
Range: 76011-76053

Valid cases: 0  
Invalid: 0

### Description

GEO1\_BR identifies the household's state within Brazil in all sample years. States are the first level administrative units of the country. GEO1\_BR is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO1\_BR can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Brazil can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

At the present moment, IPUMS International is only releasing integrated geography for the first level of geography for Brazil. Year specific geography and maps along with variables that are spatially harmonized at the second level of geography and account for political boundary changes across census years will become available in the near future.

## Brazil, State 1960 - 2010 [Level 1; inconsistent boundaries, harmonized by name] (GEO1\_BRX)

File: BRA1991-H-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 11-53

Valid cases: 0  
Invalid: 0

### Description

GEO1\_BRX identifies the household's state within Brazil in all sample years. States are the first level administrative units of the country. GEO1\_BRX is harmonized by name and does not account for boundary changes over time.

The full set of geography variables for Brazil can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

## Brazil, Municipality 1960 - 2010 [Level 2; inconsistent boundaries, harmonized by name] (GEO2\_BRX)

File: BRA1991-H-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 7	
Decimals: 0	
Range: 1100015-5300108	

### Description

GEO2\_BRX identifies the household's municipality within Brazil from 1980 to 2010. Municipalities are the second level administrative units of the country, after states. GEO2\_BRX is harmonized by name and does not account for boundary changes over time.

The full set of geography variables for Brazil can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

At the present moment, IPUMS International is only releasing integrated geography for the first level of geography for Brazil. ## Number of married couples in household (NCOUPLES)

File: BRA1991-H-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 0-9	

### Description

NCOUPLES is a constructed variable indicating the number of married/in-union couples within a household.

NCOUPLES is constructed using the IPUMS-International pointer variable SPLOC (spouse's location in the household).

## Number of mothers in household (NMOTHERS)

File: BRA1991-H-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 0-9	

**Description**

NMOTHERS is a constructed variable indicating the number of mothers -- of persons of any age -- within a household.

NMOTHERS is constructed using the IPUMS-International pointer variable MOMLOC (mother's location in the household).

## Number of fathers in household (NFATHERS)

File: BRA1991-H-H

**Overview**

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-9

Valid cases: 0  
Invalid: 0

**Description**

NFATHERS is a constructed variable indicating the number of fathers -- of persons of any age -- within a household.

NFATHERS is constructed using the IPUMS-International pointer variable POPLOC (father's location in the household).

## Country (COUNTRY)

File: BRA1991-H-H

**Overview**

Type: Discrete  
Format: numeric  
Width: 3  
Decimals: 0  
Range: 32-894

Valid cases: 0  
Invalid: 0

**Description**

COUNTRY gives the country from which the sample was drawn. The codes assigned to each country are those used by the UN Statistics Division and the ISO (International Organization for Standardization).

## Electricity (ELECTRIC)

File: BRA1991-H-H

**Overview**

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-9

Valid cases: 0  
Invalid: 0

**Description**

ELECTRIC indicates whether the household had access to electricity.

## Number of bedrooms (BEDROOMS)

File: BRA1991-H-H

**Overview**

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0  
Invalid: 0

**Description**

BEDROOMS indicates the number of rooms available to members of the household for sleeping.

## Number of bathrooms (BATHROOMS)

File: BRA1991-H-H

**Overview**

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0  
Invalid: 0

**Description**

BATHROOMS indicates the number of bathrooms in the dwelling available for use by the household.

## Ownership of dwelling [general version] (OWNERSHIP)

File: BRA1991-H-H

**Overview**

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-9

Valid cases: 0  
Invalid: 0

**Description**

OWNERSHIP indicates whether a member of the household owned the housing unit. Households that acquired their unit with a mortgage or other lending arrangement were understood to "own" their unit even if they had not yet completed repayment. For those that did not own their housing unit, several options were possible: renting (from various types of owners), subletting, usufruct, and de facto occupation.

## Ownership of dwelling [detailed version] (OWNERSHIPD)

File: BRA1991-H-H

**Overview**

Type: Discrete  
Format: numeric  
Width: 3  
Decimals: 0  
Range: 0-999

Valid cases: 0  
Invalid: 0

**Description**

## Cooking fuel (FUELCOOK)

File: BRA1991-H-H

**Overview**

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0  
Invalid: 0

**Description**

FUELCOOK indicates the predominant type of fuel or energy used for cooking.

## Strata identifier (STRATA)

File: BRA1991-H-H

**Overview**

Type: Continuous  
Format: numeric  
Width: 12  
Decimals: 0

Valid cases: 0  
Invalid: 0

**Description**

This variable is the strata identifier for the sample. The STRATA variable provides information about the sample design that can be used to improve estimation.

## Person number (PERNUM)

File: BRA1991-P-H

### Overview

Type: Continuous  
Format: numeric  
Width: 3  
Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

## Mother's location in household (MOMLOC)

File: BRA1991-P-H

### Overview

Type: Continuous  
Format: numeric  
Width: 3  
Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships.

## Father's location in household (POPLOC)

File: BRA1991-P-H

### Overview

Type: Continuous  
Format: numeric  
Width: 3  
Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

POPLOC is a constructed variable that indicates whether or not the person's father lived in the same household and, if so, gives the person number of the father (see PERNUM). POPLOC makes it easy for researchers to link the characteristics of children and their (probable) fathers.

The method by which probable child-father links are identified is described in PARRULE.

The general design of POPLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly.

Note: POPLOC identifies social relationships (such as stepfather and adopted father) as well as biological relationships. The variable STEPPOP is designed to identify some of these social relationships.

## Spouse's location in household (SPLOC)

File: BRA1991-P-H

### Overview

Type: Continuous  
Format: numeric  
Width: 3  
Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

SPLOC is a constructed variable that indicates whether or not the person's spouse lived in the same household and, if so, gives the person number (PERNUM) of the spouse. SPLOC makes it easy for researchers to link the characteristics of (probable) spouses.

The method by which probable spouse-spouse links are identified is described in SPRULE.

The general design of SPLOC and other constructed variables is modeled on the methods developed for IPUMS-USA "Family Interrelationships", but the details vary significantly.

## Rule for linking parent (PARRULE)

File: BRA1991-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-52

Valid cases: 0  
Invalid: 0

### Description

PARRULE describes the criteria by which the IPUMS-International variables MOMLOC and POPLOC linked the person to a probable mother and/or father.

IPUMS-International establishes child-parent links according to five basic rules, and PARRULE gives the number of the rule that applied to the link in question. A link to any parent automatically generates a second link to that parent's spouse or partner, so only one rule is needed to describe both MOMLOC and POPLOC.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

## Rule for linking spouse (SPRULE)

File: BRA1991-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-6

Valid cases: 0  
Invalid: 0

### Description

SPRULE explains the criteria by which the IPUMS-International variable SPLOC linked the person to his/her probable spouse.

IPUMS-International establishes spouse-spouse links according to five basic rules, and SPRULE gives the number of the rule that applied to the link in question. A sixth rule identifies sample-specific linking procedures only imposed in selected instances.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

## Probable stepmother (STEPMOM)

File: BRA1991-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-6

Valid cases: 0  
Invalid: 0

### Description

STEPMOM indicates whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEPMOM explain why it is probable that the person's mother was a step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household.

The codes for STEPMOM are as follows:

- 0 = Biological mother or no mother of this person present in household.
- 1 = Mother has no children borne or surviving.
- 2 = Child reports mother is deceased.
- 3 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner, stepchild/child-in-law).
- 4 = Mother reports no children in the home.
- 5 = Age difference between mother and child was less than 12 or greater than 54 years.
- 6 = Child exceeds known fertility of mother.

See PARRULE for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEPMOM will always under-represent their actual number in the population.

## Probable stepfather (STEPPOP)

File: BRA1991-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-3

Valid cases: 0  
Invalid: 0

### Description

STEPPOP indicates whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPPOP explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household.

The codes for STEPPPOP are as follows:

- 0 = Biological father or no father of this person present in household.
- 1 = Child reports father is deceased.
- 2 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner; stepchild/child-in-law).
- 3 = Age difference between father and child was less than 12 or greater than 54 years.

See PARRULE for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPPOP will always under-represent their actual number in the population.

## Man with more than one wife linked (POLYMAL)

File: BRA1991-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-1

Valid cases: 0  
Invalid: 0

### Description

POLYMAL indicates if a man had more than one wife linked to him in the constructed IPUMS variable SPLOC -- Spouse's Location in Household.

The point of POLYMAL is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

## Woman is second or higher order wife (POLY2ND)

File: BRA1991-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-1

Valid cases: 0  
Invalid: 0

### Description

POLY2ND indicates if a woman was the second or higher order wife linked to a husband in the constructed IPUMS variable SPLOC -- Spouse's Location in Household. The variable does not suggest the actual marital order of wives, only their relative positions in the person order of the household as it was enumerated.

The point of POLY2ND is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

## Family unit membership (FAMUNIT)

File: BRA1991-P-H

### Overview

Type: Continuous  
Format: numeric  
Width: 2  
Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

FAMUNIT is a constructed variable indicating to which family within the household a person belongs.

All persons related to the household head receive a 1 (see RELATE). Each secondary family or secondary individual receives a higher code. For purposes of FAMUNIT, secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

## Number of own family members in household (FAMSIZE)

File: BRA1991-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 1-99

Valid cases: 0  
 Invalid: 0

### Description

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

## Number of own children in household (NCHILD)

File: BRA1991-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

### Description

NCHILD provides a count of the person's own children living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

## Number of own children under age 5 in household (NCHLT5)

File: BRA1991-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

### Description

NCHLT5 provides a count of the person's own children under age five living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

## Age of eldest own child in household (ELDCH)

File: BRA1991-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0  
 Invalid: 0

### Description

ELDCH gives the age of the person's oldest own child living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

ELDCH is top-coded at age 50 or older.

## Age of youngest own child in household (YNGCH)

File: BRA1991-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0  
Invalid: 0

### Description

YNGCH gives the age of the person's youngest own child living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

YNGCH is top-coded at age 50 or older.

## Relationship to household head [general version] (RELATE)

File: BRA1991-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 1-9

Valid cases: 0  
Invalid: 0

### Description

RELATE describes the relationship of the individual to the head of household (sometimes called the householder or reference person).

## Relationship to household head [detailed version] (RELATED)

File: BRA1991-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 4  
Decimals: 0  
Range: 1000-9999

Valid cases: 0  
Invalid: 0

### Description

RELATE describes the relationship of the individual to the head of household (sometimes called the householder or reference person).

## Age (AGE)

File: BRA1991-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 3  
 Decimals: 0  
 Range: 0-999

Valid cases: 0  
 Invalid: 0

#### Description

AGE gives age in years as of the person's last birthday prior to or on the day of enumeration.

## Age, grouped into intervals (AGE2)

#### Description

[program universe for et,mz samples.

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

## Relationship to head of subfamily (SUBFREL)

File: BRA1991-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 4  
Decimals: 0  
Range: 1000-9999

Valid cases: 0  
Invalid: 0

### Description

SUBFREL describes the relationship of the individual to the head of the subfamily (in most cases, conjugal unit). It is distinct from RELATE, which identifies a person's relationship to the head of the household. There can be multiple subfamilies within households. The particular subfamily to which a person belongs is recorded in SUBFNUM.

Persons living alone without other family are identified as "heads" of family.

## Subfamily membership number (SUBFNUM)

File: BRA1991-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 3  
Decimals: 0  
Range: 0-13

Valid cases: 0  
Invalid: 0

### Description

SUBFNUM gives the number of the subfamily to which the person belongs within the household (1 = first subfamily, 2 = second subfamily, etc.). SUBFNUM records the identification of subfamilies in the original dataset, which generally correspond to conjugal units and their offspring.

## Children ever born (CHBORN)

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0  
Invalid: 0

### Description

CHBORN reports the number of children ever born to each woman of whom the question was asked. In most samples, women were to report all live births by all fathers, whether or not the child was still living.

## Children surviving (CHSURV)

File: BRA1991-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0

### Description

CHSURV reports the number of children born to a woman who were still living at the time of the census.

## Mortality status of mother (MORTMOT)

File: BRA1991-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 1-9

Valid cases: 0  
Invalid: 0

### Description

MORTMOT indicates whether the person's biological mother was still living at the time of the census.

## State of birth, Brazil (BPLBR)

File: BRA1991-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 11-99

Valid cases: 0

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 10-99

Valid cases: 0  
Invalid: 0

### Description

Race identifies the racial group with which a person identified himself or herself, or to which an enumerator assigned them. Determinations of race are based largely on appearance or ancestral place of origin.

## Member of an indigenous group (INDIG)

File: BRA1991-P-H

### Overview

Type: Discrete

### Description

INDIG indicates whether the person belonged to an indigenous group.

## School attendance (SCHOOL)

File: BRA1991-P-H

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0

**Description**

SCHOOL indicates whether or not the person attended school at the time of the census or within some specified period of time prior to the census.

## Literacy (LIT)

File: BRA1991-P-H

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

**Description**

LIT indicates whether or not the respondent could read and write in any language. A person is typically considered literate if he or she can both read and write. All other persons are illiterate, including those who can either read or write but cannot do both.

## Educational attainment, Brazil (EDUCBR)

File: BRA1991-P-H

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 4  
 Decimals: 0  
 Range: 0-9000

Valid cases: 0  
 Invalid: 0

**Description**

EDUCBR usually indicates the person's educational attainment in terms of the amount of schooling completed -- both the level (for example, primary, secondary, or higher education) and typically the number of years or grades completed at that level. For some classifications, the variable indicates the level or grade that the person is currently attending; all such classifications are explicitly indicated in the code labels for EDUCBR.

## Activity status (employment status) [general version] (EMPSTAT)

File: BRA1991-P-H

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

**Description**

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

## Occupation, ISCO general (OCCISCO) File: BRA1991-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 1-99

Valid cases: 0  
Invalid: 0

### Description

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is typically the one in which the person had spent the most time or earned the most money.

## Occupation, unrecoded (OCC) File: BRA1991-P-H

### Overview

Type: Continuous  
Format: numeric  
Width: 4  
Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

## Industry, general recode (INDGEN)

File: BRA1991-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 3  
Decimals: 0  
Range: 0-999

Valid cases: 0  
Invalid: 0

### Description

INDGEN recodes the industrial classifications of the various samples into twelve groups that can be fairly consistently identified across all available samples. The groupings roughly conform to the International Standard Industrial Classification (ISIC). The third digit of INDGEN retains important detail among the service industries that could not be consistently distinguished in all samples.

"Industry" refers to the activity or product of the establishment or sector in which a person worked.

## Industry, unrecoded (IND)

Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

"Industry" refers to the activity or product of the establishment or sector in which the person worked. IND is classified according to the system used by the respective national census office at the time, and is not recoded by IPUMS-International.

## Status in employment (class of worker) [general version] (CLASSWK)

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-9

Valid cases: 0  
Invalid: 0

### Description

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

**Interviewer instructions**

Question 3 - Kinship or relationship with the head of the household

Mark the box corresponding to the relationship between each member of the family and the person responsible for the family in the household to which he or she belongs.

The entries regarding condition in the household and condition in the family should comply with the following criteria:

- 1 - Head - person (man or woman) responsible for the household or family;
- 2 - Spouse - person (man or woman) who lives conjugally with the Head of the household or Head of the family, whether or not there is a matrimonial bond;
- 3 - Child - including adopted and foster children;
- 4 - Stepson or stepdaughter - a son or daughter only of the spouse, even if the spouse has died or does not live in the household;
- 5 - Father or mother - including stepfather and stepmother;
- 6 - Father-in-law or mother-in-law - even if not a relative of the current spouse;
- 7 - Grandfather, grandmother, great-grandfather or great-grandmother - including only of the spouse;
- 8 - Grandson, granddaughter, great-grandson or great-granddaughter - including only of the spouse;
- 9 - Son-in-law or daughter-in-law - including only of the spouse;
- 10 - Sibling;
- 11 - Brother-in-law or sister-in-law - even if not a relative of the current spouse;
- 12 - Other relative - nephew, niece, uncle, aunt, cousin, including only of the spouse;
- 13 - Agregado - a person who has fixed residence in the household without being a relative, boarder, domestic employee or relative of the employee, and does not pay for lodgings;
- 14 - Boarder - a person who, without being a relative, has fixed residence in the household and pays for lodgings;
- 15 - Domestic employee - a person who provides remunerated domestic services to residents of the household;
- 16 - Relative of employee - a person who is a relative of a domestic employee and who does not exercise remunerated domestic work for residents in the household. This designation is not shown in Question 3 of CD 1.02 because, in the composition of the family, a relative of a domestic employee is a member of the domestic employee's family.

[p. 56]

In collective dwellings, Box 20 - Individual will always be marked for persons who live alone. For families, the relationship or dependence will always be in relation to the Head of the family, both in Question 2 and in Question 3.

### Interviewer instructions

Question 4 - Family the person belongs to

In private households, mark, for each person, the number of the family he or she belongs to, in the following manner:

1 - Single - when the household is inhabited by a single family.

When more than one family lives in the household, consider:

3 - 1st family in multiple family household - for members of the family of the head of the household;

4 - 2nd family in multiple family household - for members of the 2nd family in the co-residing family household;

5 - 3rd family in multiple family household - for members of the 3rd family in the co-residing family household;

6 - 4th family in multiple family household - for members of the 4th family in the co-residing family household; and

7 - 5th family in multiple family household - for members of the 5th family in the co-residing family household.

Notice that if there are more than 5 families living in a private co-residing family household, the household will be considered a collective dwelling and the questionnaires should be filled out according to the respective instructions and a CD 1.03 - List of Collective Dwelling, should be issued.

In collective dwellings, mark Box 2 - Collective Dwelling for all persons belonging to the resident family as well as to for persons alone who live in the collective dwelling - Individual.

#### Interviewer instructions

Question 5 - If the mother lives in the household, mark the number of order in which she was enumerated. If she does not live there, mark if she is alive, deceased, or if this is not known

When the mother of the person enumerated lives in the household, the number of order in which she was enumerated will be recorded. If the number of the person is less than 10, complete the entry with a zero to the left.

When the mother of the person enumerated does not live in the household, mark one of the following boxes:

70 - Is alive - when the enumerated person's mother is alive, even if she does not live in the household;

80 - Deceased - when the enumerated person's mother is deceased; or

90 - Does not know - when the enumerated person does not know if his or her mother is alive or deceased.

### Interviewer instructions

Question 6 - Month and year of birth

Record the person's month and year of birth. Do not record the day of birth. When the number of the month of birth is less than 10, complete with a zero to the left. The year of birth will be recorded with three digits; for example: 940 and not 1940 or 40; 899 and not 1899 or 99.

[p. 59]

For persons who only know their day and/or month of birth, without remembering the year, the year cannot be calculated based on the information regarding presumed age.

This question will remain blank when the person is unable to state the month and year of birth.

Question 7 - Presumed age

This question will only be filled out when the respondent does not know his or her month and year of birth. Presumed age will only be recorded after all efforts at obtaining the month and year of birth have been exhausted.

If the age is 1 year or older, record the full number of months years in One Year or Older Field. When the presumed age is insufficient to fill in the fields reserved for this record, complete with zero(s) to the left.

If the age is less than 1 year, record the number of full months in the Less Than 1 Year Field. When the number of months is less than 10, complete with one zero to the left. For newborn children less than 1 month old, if it is not possible to inform the month and year of birth, record 00.

Note that the entry of the presumed age for children under the age of 1 should be very rare and admissible only in exceptional cases.

**Interviewer instructions**

## Question 11 - Physical or mental handicap

Mark:

- 1 - Blindness - for persons who have been totally blind since birth or who lost their sight later due to disease or accident. A person who sees with difficulty is not considered blind;
- 2 - Deafness - for persons who have been totally deaf since birth (deafness and dumbness) or who lost their hearing later [p. 61] due to disease or accident. A person who hears with difficulty is not considered deaf;
- 3 - Paralysis of one side - for hemiplegic persons, that is, persons who are paralyzed or handicapped with motor deficiency on one side due to injury of the nervous system;
- 4 - Paralysis of the legs - for paraplegic persons, that is, persons with the lower members paralyzed;
- 5 - Total paralysis - for quadriplegic persons, that is, persons with both the upper members (arms) and lower members (legs) paralyzed;
- 6 - Is missing one or more limbs or part of a limb:

- a) Is missing one upper limb or part of an upper limb - for persons who are missing one or both upper limbs since birth or from later amputation due to disease or accident. Consider as missing an upper member the loss of an arm, forearm or hand. Do not consider the lack of fingers;
- b) Is missing one lower limb or part of a lower limb - for persons who are missing one or both lower limbs since the birth or from later amputation due to disease or accident. Consider as missing a lower limb the loss of an entire leg, part of a leg or a foot. Do not consider lack of toes;

- 7 - Mental deficiency - for persons with mental retardation due to irreversible lesion or syndrome which was first determined during childhood and which is characterized by great difficulty in learning and social adaptation. Do not consider as such those persons who present a mental disturbance or disorder such as neurotics, psychotics or schizophrenics, vulgarly known as mad or crazy;
- 8 - More than one - for persons with more than one of the listed handicaps; and
- 0 - None of the above - for persons who do not have any of the deficiencies described above or for those who are not handicapped.

## Questions 24, 25 and 26 - For persons who attend school

Consider as attending school not only those who take regular courses, but also those attending Pre-school, Adult literacy course, General education (organized or not by years or grades), College entrance exam course, Master's degree or Doctor's degree.

Consider as attending school persons who are duly registered but, on the date of reference, are temporarily unable to attend for reasons of illness, etc.

[p. 67]

Do not consider as attending school persons who, on the date of the census, are attending only some short course "on the radio or television," for professional specialization or cultural extension, such as sewing, dancing, typing, etc.

## Question 24 - Grade currently attending

For persons who attend courses in grades/years, mark the grade/year they attend.

If the course attended is not organized by grade or year, but according to a credit system, academic periods, semesters, phases, modules, etc., these credits, periods, etc. should be converted into the traditional grades or years. Therefore, the 5th period of credits at a university is usually equivalent to the 3rd year; each phase or division of schooling generally corresponds to a grade or year in regular courses.

For persons who attend non-graded courses or who do not attend school, Box 0 - None - will be marked

Worked:

- ☐ 1 regularly
- ☐ 2 sporadically
- ☐ 3 didn't work

## Interviewer instructions

## Question 45 - Worked during all or some of the last 12 months (9/1/1989 to 8/31/1990)

This question is intended to identify whether the person worked during the last 12 months, that is, between September 1, 1989 and August 31, 1990.

Persons will be considered as having worked if, during the entire last 12 months or part thereof, they exercised remunerated work paid in monetary values or in products or merchandise, including workers on paid leave (determined by the Federal Health Service (INAMPS)), scholarship grant, pregnancy allowance, breast feeding allowance, etc. and those without remuneration who worked regularly at least 15 hours per week in an economic activity helping a person with whom he or she lived or cooperating with charitable, social, or cooperative institutions or as a trainee, apprentice, etc.

For persons who worked, mark:

1 - Regularly - persons who exercised a remunerated occupation, even if only for a few hours per day, per week or per month as a salaried or self-employed worker or as an employer, or non-remunerated persons who worked regularly at least 15 hours per week.

[p. 74]

According to these criteria, the following people are included in this category:

Persons who exercised seasonal or intermittent work in the last 12 months, as is the case of persons who are contracted during certain periods for agricultural activity (planting, harvesting, cutting, etc.), for an activity involving plant extraction (pickers, cutters, breakers, etc.) or mineral extraction (gold miner, diver) who worked only during certain periods for climatic reasons, such as the rainy season, high water season on the rivers, etc.;

Workers such as plumbers, gas workers, stone masons, house painters, upholsterers, seamstresses, manicures, etc. who exercise one or multiple unestablished trades and who do not work all the time, but who have a place where they can be found or receive a message when their work is needed;

Religious who exercised some productive work, such as education, nursing, social work, religious services, etc.;

Soldiers convoked for military service;

Women who worked during the last 12 months even if, at the end of the period, have ceased working due to marriage or childbirth; or

Persons who worked part of the year preceding the date of the census but ceased to work due to retirement, whether or not they currently exercise an economic activity.

2 - Worked occasionally - persons who exercised only remunerated work for a certain period, without being able to continue due to any of a number of situations, such as:

Students during vacation periods;

Lack of job opportunities - for persons who only work in industrial establishments or clothing factories during periods of heavy production;

In commercial or service establishments for periodic events such as religious celebrations (Christmas, pilgrimages, etc.), Mardi Gras, or other tourist occasions; or

For not wanting to work or for lack of opportunity, better known as "jack-of-all-trades" or persons who do "odd jobs."

[p. 75]

3 - Did not work - persons who, between September 1, 1989, and August 31, 1990, was only looking for work, exercising domestic tasks at their own home, studying, living on earnings, on capital investments, on retirement, on pension left by another person, on alimony, being sick or invalid without being on leave from a job, or who did not work for having given up looking, for lack of success.

The following will also be included as not worked:

Persons not remunerated who worked regularly for less than 15 hours per week;

Religious who are dedicated exclusively to study or meditation; or

Prisoners serving sentence, even if they exercised a productive activity in the prison.

If Box 3 - Did not work - was marked, go on to Question 58.

**Literal question**

46. Occupation, profession, task, function, etc., that was exercised for the longest time. (If changed occupations definitively note current occupation)

---

**Interviewer instructions**

Question 46 - What occupation, profession, position, function, etc. the person regularly exercised during the last 12 months or during part them

This entry will be for the usual occupation that the enumerated person exercised between 9/1/1989 and 8/31/1990.

Usual occupation is considered that exercised during most of the referred period.

When a person has changed occupations and intends this change to be permanent, the occupation he or she exercised last will be recorded, regardless of the time spent on each during this period. Included in this case are persons who changed occupations or functions due to promotion or change in career, such as:

1st case - A farm worker who emigrated to the city and went to work as a hod carrier in the construction of a building;

2nd case - A billing clerk in an industrial company who was promoted to Accounting Technician;

3rd case - An office helper at a bank who was promoted to the position of cashier.

When the person has changed occupations, but the change is transitory due to circumstantial or seasonal factors, [p. 76] the usual occupation will be entered and not the transitory occupation, such as:

1st case - For a farm worker who, during the time between planting and harvesting, worked in a village as a stone mason, woodcutter, etc., record, as the case may be, Hoe worker, Cotton picker, etc.;

2nd case - For a farm worker who, during certain periods, works at a machine at a sugar plant, etc., the occupation of farm worker will be recorded;

3rd case - For a driver who, unable to work in his profession, is exercising some other occupation until he is again able to work as a driver, the occupation of Driver will be recorded;

4th case - For a specialized worker who, when unable to find a placement in his or her profession, is exercising another occupation, will be recorded, as the case may be: Welder, Cabinet maker, Weaver, etc.

When the person simultaneously exercises different occupations, the main occupation should be recorded.

Main occupation is considered that which occupies the greatest number of the person's hours per week or, if this number is the same, that which provides the highest income, such as:

[Type] / Occupation / Hours / Income Cr\$

Main / Teacher / 24 / 1,200.00

Secondary / Doctor / 12 / 3,000.00

Main / Journalist / 21 / 4,000.00

Secondary / Lawyer / 21 / 2,000.00

For persons on vacation or on leave, even if they were exercising another occupation, the usual occupation will be recorded and not that exercised temporarily during vacation or leave.

Occupation should not be confused with professional specialization. For example, for a commercial director with a degree in economics, or a high school teacher with a degree in medicine, the entries will be, respectively: Commercial director and High school teacher.

[p. 77]

Vague or generic answers which do not correctly characterize the person's occupation must not be recorded.

[List of examples on page 77 was not translated into English]

For employees and for persons who are Self-employed or without remuneration, the occupation, profession, position, function, etc., which they exercised, will be recorded.

If the person is engaged in farming, either individually or only with the help of a resident of the household who [p. 78] is not paid for the work, record respectively Field hand or Animal raiser.

If the person has a commercial establishment, individually or only with the help of a non-remunerated person, record Commercial businessman.

Liberal professionals (Doctors, Dentists, Lawyers, Engineers, etc.), who employ up to 2 attendants or nurses in their offices should record their profession.

For Employers (partners or tenants) who are owners of establishments, firms or companies where they work (condition of being owner and employer), the entry should indicate this condition, such as Ranch owner, Chicken-farm owner, Owner of industry, Store owner, Barbershop owner, Clinic owner, Transportation company owner, etc.

Below are some examples to better clarify these situations:

Situation: Barbershop employee

Correct entry: Barber

Situation: Barber, barbershop owner, working only with the help of a non-remunerated son or daughter

Correct entry: Barber

Situation: Barber, working with his father without receiving remuneration

Correct entry: Barber

Situation: Barber, barbershop owner working with the help of employees

Correct entry: Barbershop owner

**Literal question**

47. Sector or area activity of establishment, business, institution, etc., where exercised occupation in question 46.

**Interviewer instructions**

Question 47 - Sector or field area of activity, business, organization, institution, etc. in which the respondent exercised the occupation declared in question 46

This question is aimed at determining the objective or field of business of the organization, company or firm to which the enumerated person is related, or the nature of the activity exercised by self-employed persons.

In most cases, the class of activity is not directly related to the occupation. Therefore, a driver may exercise his or her [p. 79] occupation in Highway freight transportation (driver for a transportation company), or at a Textile company (driver for a cloth factory); a doorman may exercise his occupation in Hotel services (hotel doorman) or in the Entertainment industry (doorman at a movie theater); a medical doctor may exercise her occupation for the Federal Health Department (doctor at INAMPS) or at a Private medical service, (doctor at a private hospital or a private office), or at a Steel company (doctor at the Volta Redonda Steel Plant), etc.

In farming establishments (crops or animals), record the main crop or animal at the establishment.

Generic answers should be avoided which do not facilitate correct characterization of the activity of the establishment or business of the workers being enumerated, such as Agriculture, Commerce, Industry, Public service, etc.

For orientation, a list of the most common activities is presented below, containing countless occupations that are exercised. It should be made clear that the entry does not have to be one of the expressions on the list; it should characterize the activity of the organization where the occupation is exercised.

### Interviewer instructions

Question 49 - Relationship of work or the position of the occupation in the establishment, business, institution, etc., declared in question 48

This item investigates the position occupied by the person or the labor relationship.

Mark:

1 - Migrant farm worker - a person without a steady job who works in one or more establishments for farming, cattle raising or plant extraction paid by the task, day or hour, who offers his or her services directly to the person responsible for the establishment, receiving payment for such work, or when contracted or recruited by a middleman, receiving the payment from this latter.

Depending on the region, migrant workers are also known as Illegals, Bóias-frias, Calungas, Turmeiros, etc.;

Sharecropper (parceiro ou meeiro) - a person who is engaged in or exercises an economic activity (farming, cattle raising, plant extraction, fishing or gold mining) and receives part of the production for the work or pays part of the production for the use of the land, boat or per section of gold mining. According to the [degree of] autonomy, mark:

2 Sharecropper - Employed - for persons, helped or not by another, non-remunerated, resident of the household who do not have autonomy regarding the person who has assigned the partnership (may only plant what has been determined);

3 - Sharecropper - Self-employed - for persons helped or not by another, non-remunerated, resident of the household, and has autonomy in the relation to the person who has assigned the partnership (may plant whatever he or she considers most convenient);

NOTE: consider as an employer a sharecropper who works with the help of employees.

Domestic worker - a person who does remunerated domestic work at the home of an employer. As the case may be, mark:

4 - Domestic worker - Employee - for persons who do daily domestic work for a single employer, whether or not he or she sleeps at the employer's house, usually paid monthly, as is the case of a cook, housemaid, nursemaid, etc.;

5 - Domestic worker - Self-employed - for persons who do remunerated domestic work usually for more [p. 86] than one employer, not working every day and generally being paid for the days actually worked, is as the case of cleaning women, laundresses, ironing women, maids paid by the day, etc.;

6 - Employee in the private sector - for persons who work for a company, firm, business, institution, etc., limited liability company, corporation, quota company, open capital company, etc. Note that companies whose main shareholder is the government (federal, state or municipal) are not considered private companies;

Employee of the public sector - a person who works for an organ or company of direct public administration, autonomous government agency, foundation, or public company of mixed ownership of which the government is the single or main shareholder. As the case may be, mark:

7 - Public employee - for persons who work for the government, in direct administration, an autonomous government agency or a foundation under the Statute of Public Employees or the Labor Code (CLT). Included in this case are teachers, physicians, nurses, policemen and firemen who work in the public school, health or security system as well as employees in technical, bureaucratic and manual occupations who work in ministries, state or municipal departments, or autonomous government agencies and foundations, such as the Brazilian Census Office (IBGE), FUNABEM, etc.;

8 - Employee of the public sector - in a government-owned company - for persons who work in a public company or company of joint public and private ownership whose employment bond is usually governed by the CLT and in some cases may also be governed by the Statute of Public Employees, such as Banco do Brasil, Banco do Estado, Banco da Amazônia, Companhia Vale do Rio Doce, ELETROBRÁS, EMBRAER, PETROBRAS, Rede Ferroviária Federal (RFFSA), SERPRO, etc.;

9 - Self-employed - for persons who work individually or with the help of a non-remunerated resident of the household;

10 - Employer - for persons who are engaged in an economic activity with the help of one or more employees; and

11 - Without remuneration - a person who exercises an economic activity without remuneration and works at least 15 hours per week helping a member of the household or who helps a religious or charitable institution.

[p. 87]

Note: Priests, Church Ministers, Rabbis, Friars and Nuns will be considered employees when they receive monetary remuneration. If they receive only benefits, they will be classified as without remuneration.

Question 51 - How many persons work in the establishment, business, institution, etc. declared in question 48

Depending on the labor relationship or the position of the occupation exercised, consider:

Employee - a person who exercises an economic activity or works in an establishment, business, institution, office, etc. where other persons may also work as employees, including the enumerated person, if this latter is classified as an employee. Persons who do domestic work should not be included in this group.

Employer - a person who is engaged in an economic activity with the help of one or more employees. In the case of an employer, the code corresponding to the number of employees in the establishment will be marked.

[p. 88]

Mark:

- 1 - For persons who work in establishments that have 1 or 2 employees;
- 2 - For persons who work in establishments that have 3 or 4 employees;
- 3 - For persons who work in establishments that have 5 to 9 employees;
- 4 - For persons who work in establishments that have 10 or more employees;
- 5 - Works alone - for persons who exercise their activities without the help of any other person. Do not consider a person who carries out domestic work in this category;
- 6 - With one or one partners or non-remunerated persons - for persons who exercise their work only with the help of a partner and/or of non-remunerated persons; or persons who exercise an activity without remuneration, working or not with other persons considered as non-remunerated;
- 7 - Domestic worker - for persons who exercise a domestic occupation, regardless of the number of persons who also do domestic work at the same place; or
- 8 - Does not know - for persons who do not know how many persons work in the establishment or business and/or the labor relationship they have.

Note: For persons who carry out an economic activity in an establishment that has more than one type of labor relationship (employees and non-remunerated) the record should be in reference to the number of employees who work there.

## Question 52 - Workplace where the occupation declared in question 46 is exercised

Mark:

1 - In the household - without an exclusive place - for persons who exercise their occupation in manufacturing, selling objects or rendering services in their own household without having a place reserved exclusively for this purpose, such as seamstresses, manicures, hairdressers, liberal professionals, etc., who use their own living room [p. 89] or dining room, a bedroom, a kitchen, etc., to exercise their occupation. Domestic employees who sleep in their employer's homes are not included in this case.

2 - In the household - with an exclusive place - for persons who exercise their occupation in manufacturing, selling objects or rendering services in their own household in an exclusive place for this purpose. Include persons who exercise their occupation a non-household unit separated by walls or floors and that have direct access or communication with their household, even if there is also independent access.

Example: a liberal professional who has an office in her house reserved exclusively for this purpose; craftsmen such as carpenters, mechanics and others who exercise their work in a workshop, garage, etc., adapted in the backyard; manufacturers, commercial traders, hairdressers, bar owners, etc. who use a non-residential unit - a store, ground floor, etc. - with direct connection to the household;

3 - Public thoroughfare with heavy equipment - for persons who exercise their occupation without being related to an establishment, company, institution, etc. working on public streets, either as owners or employees, using heavy equipment such as trucks, utility vehicles, taxis, farm wagons, newspaper stands, etc.;

4 - Public thoroughfare - with light equipment or without equipment - for persons who exercise their occupation without being related to an establishment, business, institution, etc. working on a public thoroughfare, whether an owner or employee, using light equipment or without equipment, such as a stand, cart, table, tools, etc.

Example: street market vendors, popcorn man, ice-cream seller, automobile guards, etc.;

5 - Farming and cattle raising property - a person who exercises his or her occupation in a farming or animal-raising establishment or for plant or mineral extraction;

6 - Company or firm - for persons who exercise their occupation for a company, business, institution, etc., such as a bank, factory, school, etc. Persons who work for an establishment and perform their work in households or on public streets are included in this category, for example: machinery or equipment technicians (authorized technical services), mailmen, garbage collectors, etc.;

7 - At the homes of clients or employers - for persons who exercise their occupation at the home of clients or employers, such as [p. 90] maids or self-employed workers such as plumbers, manicures, television technicians or those who participate in an economic activity carried out by their employer or partner in this latter's household; or

8 - Other - for persons who exercise their work at non-enumerated places, such as self-employed fishermen, crab catchers, etc.

#### Interviewer instructions

Question 54/55 - Hours regularly worked per week

The time worked per week will be entered in whole hours, considering thirty minutes or more as one hour and disregarding periods of less than 30 minutes (e.g., 40 hours and 30 minutes will be recorded as 41 hours; 35 hours and 20 minutes will be recorded as 35 hours).

Compute time spent away from the workplace on tasks related to the occupation. For example, the time a teacher spends at home preparing classes or correcting exercises or tests.

Hours worked in the occupation referred to in Question 46 - Record the number of hours worked per week in the occupation declared in Question 46.

When a person exercises the occupation declared in Question 30 at more than one establishment, business, institution, etc., the sum total of the hours regularly worked at all these establishments, businesses, etc. will be recorded.

[p. 91]

Hours worked in other occupations - When the person exercises only the occupation declared in Question 46, record 00. When he or she exercises one or more additional occupations besides that declared in Question 46, record the number of hours worked per week in the other occupation(s).

Examples:

1st case - A medical doctor who works 30 hours per week at the Federal Health Service (INAMPS) and 20 hours per week at a private office, record:

In the occupation in Question 46 - 50 hours

Question 56 - Gross income for the month of august, 1990, from the occupation declared in question 46

For Employees (including migrant farm workers), the gross remuneration (including fixed and variable parts) will be recorded, including the amount of withholding tax, social security contributions, labor union fees, etc., received during the month of August, 1990. If the person did not work during the August, 1990, record the gross income for the last month worked.

Do not compute the 13th-month wage nor shares in profits received by employees, even when paid in the form of monthly wages (14th, 15th, 16th month, etc.). Amounts received from other benefits or advantages earned will also not be computed, such as meal tickets, bus tickets, etc.

For Employers who receive a fixed part of a company's earnings taken out monthly, this amount will be recorded. When Employers receive a variable part, with inflation correction, the amounts received during the last 12 months (profits, representation allowances, etc.) will be recorded in such a way that the average to be calculated represents the amount updated to August. For those who did not work during the month of August, the average updated amount for the last month worked should be recorded.

For Self-employed persons, the income received as fees from the free exercise of a liberal profession, services, representation, brokerage, [p. 92] individual profits, contracts or agreements of any nature, as well as remuneration for any other permanent self-employed or occasional work, must be corrected for monthly inflation in such a way that the calculated average represents the amount updated to the last month worked. Usual and normal expenses necessary for the exercise of the activity should be deducted.

For persons who have no income, mark Box 0 - Does not have.

When income is declared, record, in the No. of Digits field, the number of digits that comprise the amount of income declared.

Note - Answers to all questions on income will be recorded in Cruzeiros.

58. If in question 45, responded "don't work", indicate the situation or occupation currently in, following the enumerated order. If "worked", skip to question 59.

Seeking work:

- ☐ 1 have worked
- ☐ 2 never worked
- ☐ 3 retired
- ☐ 4 pensioner
- ☐ 5 live on rent
- ☐ 6 prisoner
- ☐ 7 student
- ☐ 8 sick or invalid
- ☐ 9 homemaker
- ☐ 0 no occupation

**Interviewer instructions**

Question 58 - If, in question 45, the person marked did not work, indicate his or her situation or occupation, according to the specified numbered order. If the person worked, do not fill out this question, and go on to question 59

When, in Question 45, the answer was Did Not Work, one of the Boxes from 1 to 0 should be marked, as the case may be.

If the person is classified into more than one of the listed situations, the first in the order established will be marked.

Consider:

1 - Looking for work - Already worked - a person who had worked before 9/1/1989, is willing to work, and has taken some measure in the last 2 months to find work, specifically: made contact with employers, employment agencies, labor unions or the like; asked relatives, friends or colleagues; looked for a job in want ads, etc.; this category includes those who have found work and are waiting to be called or who have signed up for a selection process;

[p. 93]

2 - Looking for work - Never worked - a person who never worked but is willing to work and who, in the last 2 months, took at least one of the measures described in the preceding item;

3 - Retired - a person who lives on income deriving from work exercised in the past (retired, etc.). Do not consider as retired a person who has worked part of the period of reference;

4 - Pensioner - a person who lives on income from a pension fund or institute. Do not consider a person who lives only on alimony as a pensioner;

5 - Lives on earnings - a person who lives only on earnings arising from use of capital or property of which he or she has usus fructus, such as rent from real estate, movable items, etc., interest from stocks and bonds, dividends, etc.;

6. Prisoner - serving sentence, even if he or she exercises an occupation in the prison;

7. Student - a person who did not work nor looked for work, does not live on earnings, nor was a prisoner, and was attending some course among those listed in Questions 25 or 26;

8. Sick or invalid - a person who cannot work due to illness or permanent disability, but is not on leave from work, retired, living on earnings, in prison or a student;

9. Domestic chores - a person who only works caring for the house where he or she lives and is not remunerated.

A person who regularly carries out domestic chores but who helps a person with whom he or she lives (even without remuneration) in an economic activity (cutting sugar cane, clearing land, harvesting, etc.) will be considered as having worked; or

0 - No occupation - a person who does not want to work or who, although desiring to work, stopped looking because he or she failed to find any job and does not fit into any of the above categories.

**Interviewer instructions**

Question 61 - Gross income from the month of august, 1990, or monthly average from other income that cannot be classified into any of the categories listed above - rentals, leasing, donations, use of capital, etc.

Record:

I - The fixed income earned in the month of August, 1990, deriving from:

a) Renting or sub-renting, leasing or subleasing, sale of right to use of real estate (house, apartment, land, pasture, winter pasture, factory, store, etc.), vehicle, machine or other movable property. Maintenance, collection and condominium expenses should be deducted from the income, as well as taxes and fees levied directly on the property through which the income was obtained (property tax, trash collection fee, etc.).

In this question, do not consider income deriving from the business where the person works, rentals of vehicles, machines, real estate, etc. This income will be recorded in Question 56 or 57, as the case may be (income from work).

b) Family salary;

[p. 95]

c) Alimony (spontaneous or legally demanded);

d) Longevity bonus (pé-na-cova).

Additional wage or pension deriving from private funds (PREVI, PETROS, ITAUBANCO, SIAS, etc.); and

Amounts regularly received from donations or allowance without corresponding work having been exercised, deriving from a non-resident of the household being surveyed.

The rent or monthly installment normally paid by a non-resident of the household should be considered as a donation, provided the household is not ceded. Allowances or donations deriving from a resident of the household being enumerated will not be included in questions on income.

II - The average of the last 12 months, corrected for inflation, for income deriving from:

a) Profits earned by an owner or partner [sócio] of limited liability companies when, due to the ownership of shares, said profits are distributed in the form of dividends or more shares; and

b) Earnings derived from investments in savings accounts, exchange bonds, real-estate bonds, stocks and public debt securities, fixed-maturation deposits, debentures, shares, etc., in the form of interest, monetary correction, discounts, premiums, etc.

The criteria for recording are the same as those set forth in Question 56.

Note - On CD 1.01 - Basic Questionnaire, Question 8 - Gross Monthly Income of the Head of the Household

Record the sum total of all income described in Questions 56, 57, 60 and 61, from CD 1.02 - Sample Questionnaire - corresponding to the Head of the household.

### Literal question

10. Religion

### Interviewer instructions

## Question 10 - Religion or denomination

The record should identify the sect, denomination or branch of the religion professed, such as: Roman Catholic, Orthodox Catholic, Brazilian Catholic, Anglican, Episcopalian, Lutheran, Baptist, Christian Congregation of Brazil, Pentecostal, Adventist, Kardecist, Umbanda, Candomblé, Buddhist, Israelite, Shintoist, Mohammedan, Esoteric, Jehovah's Witness, etc.

Do not record generic expressions such as Catholic, Protestant, Spiritualist, etc.

For persons who do not profess any religion, NO RELIGION should be recorded.

In case of doubt in defining the religion of minors, the mother's religion should be recorded.

The Enumerator should ask the respondents about the religion of each person in the household. Religion may not be based on the declaration of the head of the household of family.

Note - The record must be legible in order to facilitate the subsequent stages (if possible print the answers).

This procedure is valid for Questions 16, 19, 21, 29, and 46 to 48.

File: BRA1991-P-H

**Overview**

Type: Continuous  
Format: numeric  
Width: 8  
Decimals: 2

Valid cases: 0  
Invalid: 0

**Description**

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

## Disability status (DISABLED)

#### Description

MIGYRS2 indicates the number of years that the respondent has lived in his/her current dwelling.

## Years of schooling (YRSCHOOL)

File: BRA1991-P-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0  
 Invalid: 0

#### Description

YRSCHOOL indicates the highest grade/level of schooling the person had completed, in years. Only formal schooling is counted. YRSCHOOL accounts for the number of years of study, regardless of the track or kind of study. Information on degree and/or technical track is available in EDATTAIN. Years of schooling for Israel, categorized into intervals, are given in YRSCHOOL2.

Users should pay close attention to the top-codes in each sample, as discussed in the comparability section.

### Description

MIGRATEP indicates whether the person's most recent move (if any) was between minor administrative units, major units, or countries.

## Educational attainment, international recode [general version] (EDATTAIN)

File: BRA1991-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

### Description

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.
