# Domestic Tourism Survey

## 2018

### Metadata

Report No. P0352.1

ISBN: 978-0-621- 49189-0

## General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

## Domestic Tourism Survey 2018

The Domestic Tourism Survey 2018 data are in two files. The files are flat, ASCII, fixed field files, with one line of given length per record. This format was chosen so as to make the data usable with as many statistical programs as possible, and thus accessible to as wide a range of people.

Users can also access, explore and download the microdata in various formats, i.e. SAS, SPSS, Stata, etc. Users can access the metadata from StatsOnline at [www.statssa.gov.za](http://www.statssa.gov.za).

Other important information for users is found in the:

- Questionnaire
- Relevant publications
- Website ([www.statssa.gov.za](http://www.statssa.gov.za))

### Data files

The files and the corresponding sections of the questionnaire are as follows:

Daytrips:	Data from Flap and Sections 1 to 3 and 7
Overnighttrips:	Data from Flap and Sections 4 to 6 and 7

The files also contain some derived variables.

The information in each file contains the following:

- Nature of records in the file and population covered
- Description of variables

### Description of variables

The description of the variables comprises the following information:

**Descriptive name:** This is a short English description plus the variable name in the original file used by Stats SA to construct the ASCII file.

**Position of the variable:** The position of the data within the record, recorded in the format (@xxx y.). '@xxx' indicates that the data begin at position (i.e. column) xxx and 'y' indicates that it is y digits wide. All data are numeric. All data are right justified.

**Source:** This is either the question in the questionnaire or, for derived variables, the method of derivation. Derived variables are usually found towards the end of a file.

**Valid range:** The range of valid values for the variable. For continuous variables this reflects the upper and lower limits as found in the data.

**Not applicable:** The code for 'not applicable' is provided for each variable. These are now numeric.

**Missing value:** A code for 'missing/unspecified' values is given for each variable.

**Notes:** Specific observations to be noted by users.

Most questions in the Domestic Tourism Survey questionnaire are pre-coded, i.e. there is a set number of choices from which one or more must be selected. For open-ended 'write-in' questions, the description will state that post-coding occurred and explain how this was done. Most variables have been pre-coded from the questionnaire and are not repeated in the variable description. Where the coding is not apparent, the description either provides the codes or indicates where code lists are to be found.

## Linking files

The data from different files can be linked on the basis of a record identifier. The record identifier is the first field/s in each file. Each record contains a number (UqNo), which constitutes a unique household identifier. All records with a given unique household identifier, no matter which file they are in, belong to the same household. For individuals, a further two digits constitute the Person number (PersonNo). When these are added to the unique household identifier, a unique individual identifier is created. Again, these can be used to link records from the respective files.

## Methodology

### Target population

The target population of the survey consists of all private households in all nine provinces of South Africa and residents in workers' hostels. The survey does not cover other collective living quarters such as students' hostels, old-age homes, hospitals, prisons and military barracks, and is therefore only representative of non-institutionalised and non-military persons or households in South Africa.

#### A. Sample design of the DTS 2018

The sample design for the DTS 2018 was based on a Master Sample (MS) that was originally designed for the QLFS. This Master Sample is shared by the Quarterly Labour Force Survey (QLFS), General Household Survey (GHS), Living Conditions Survey (LCS), Domestic Tourism Survey (DTS), Income and Expenditure Survey (IES), and Victims of Crime Survey (VOCS).

The Master Sample used a two-staged, stratified design with probability-proportional-to-size (PPS) sampling of PSUs from within strata, and systematic sampling of dwelling units (DUs) from the sampled primary sampling units (PSUs). A self-weighting design at provincial level was used. Stratification was done in two stages: Primary stratification was defined by metropolitan and non-metropolitan geographic area type. During secondary stratification, the Census 2001 data were summarised at PSU level. The following variables were used for secondary stratification: household size, education, occupancy status, gender, industry and income.

Census enumeration areas (EAs) as delineated for Census 2001 formed the basis of the PSUs. The following additional rules were used:

- Where possible, PSU sizes were kept between 100 and 500 dwelling units (DUs);
- EAs with fewer than 25 DUs were excluded;
- EAs with between 26 and 99 DUs were pooled to form larger PSUs and the criteria used was 'same settlement type';
- Virtual splits were applied to large PSUs: 500 to 999 split into two; 1 000 to 1 499 split into three; and 1 500 plus split into four PSUs; and
- Informal PSUs were segmented.

A randomised probability-proportional-to-size (RPPS) systematic sample of PSUs was drawn in each stratum, with the measure of size being the number of households in the PSU. Altogether, approximately 3 080 PSUs were selected. In each selected PSU, a systematic sample of this particular report deals with the data that were collected from January 2018 to March 2019. Given that a three-month recall period is used, the data of DTS 2019 January to March had to be included to fully construct the October, November and December 2018 datasets. The DTS 2018 was based on the new Master Sample that was developed after Census 2011.

#### B. Sample design of the DTS 2019 Quarter 1

One of the objectives of the DTS is to obtain the estimates that indicate the Tourism contribution toward the South Africa economy. However this can be obtained by calculating estimates within the calendar year. Due to the rolling three month recall period, there was a need to supplement the DTS 2018 data with the DTS 2019 Quarter 1 data. This first quarter of the DTS 2018 contain data from October, November and December 2019.

It should be noted that the DTS 2018 PSU's were drawn from the new master sample (201). Approximately 3 324 PSU's were selected. Similar sampling method that was used for DTS 2014 was applied to the DTS 2018.

One of the weaknesses of the 2014 DTS was that the dwellings were not assigned to survey months within the quarters. We selected the DU sample for the 2018 DTS from the redesigned master sample, and considered two scenarios to assign dwellings to the survey months within the quarters: (1) Assign 1/3rd of the sampled DUs from each of the master sample PSUs to each of the 3 survey months within the quarter, and (2) Assign all sampled DUs from 1/3rd of the master sample PSUs to each of the 3 survey months within the quarter. Based on the cost-variance analysis the scenario 1 was found to be more efficient. Therefore, the scenario 1 was implemented to assign sampled DUs to the survey months within the quarters.

### Allocating sample sizes to strata<sup>1</sup>

The randomised PPS systematic sampling method is described below. This procedure was applied independently within each design stratum.

Let  $N$  be the total number of PSUs in the stratum, and the number of PSUs to be selected from the stratum is denoted by  $n$ . Also, let  $x_i$  denote the size measure of the PSU  $i$  within the stratum, where  $i = 1, 2, 3, \dots, N$ . Then, the method for selecting the sample of  $n$  PSUs with the Randomised PPS systematic sampling method can be described as follows:

#### Step 1: Randomise the PSUs within the stratum

The list of  $N$  PSUs within the stratum can be randomised by generating uniform random between 0 and 1, and then by sorting the  $N$  PSUs in ascending or descending order of these random numbers. Once the PSUs have been randomised, we can generate permanent sequence numbers for the PSUs.

#### Step 2: Define normalised measures of size for the PSUs

We denote by  $x_i$  the measure of size (MOS) of PSU  $i$  within the design stratum. Then, the measure of size for the

stratum is given by  $X = \sum_{i=1}^N x_i$ . We define the normalised size measure  $p_i$  of PSU  $i$  as

$p_i = x_i / X$ ;  $i = 1, 2, 3, \dots, N$ , where  $N$  is the total number of PSUs in the design stratum. Then,  $p_i$  is the relative size of the PSU  $i$  in the stratum, and  $\sum_{i=1}^N p_i = 1$  for all strata.

It should be noted that the value of  $n \times p_i$ , which is the selection probability of PSU  $i$  must be less than one.

#### Step 3: Obtain inverse sampling rates (ISRs)

Let  $R$  be the stratum inverse sampling rate (ISR). The stratum ISR is the same as the corresponding provincial ISR, because of the proportional allocation within the province.

It should also be noted that the proportional allocation within the province also results in a self-weighting design.

Then, the PSU inverse sampling rates (ISRs) are obtained as follows:

<sup>1</sup> Source: Sample Selection and Rotation for the Redesigned South African Labour Force Survey, by G. Hussain Choudhry, 2007.

First, define  $N$  real numbers  $Z_i = n \times p_i \times R; i = 1, 2, 3, \dots, N$ . It is easy to verify that  $\sum_{i=1}^N Z_i = n \times R$ . Next, round the  $N$  real numbers  $Z_i; i = 1, 2, 3, \dots, N$  to integer values  $R_i; i = 1, 2, 3, \dots, N$  such that each  $R_i$  is as close as possible to the corresponding  $Z_i$  value and the  $R_i$  values add up to  $n \times R$  within the stratum. In other words, the sum of the absolute differences between the  $R_i$  and the corresponding  $Z_i$  values is minimised subject to the constraint that the  $R_i$  values add up to  $n \times R$  within the stratum. Drew, Choudhry and Gray (1978) provide a simple algorithm to obtain the integer  $R_i$  values as follows:

Let " $d$ " be the difference between the value  $n \times R$  and the sum  $S = \sum_{i=1}^N [Z_i]$ , where  $[\cdot]$  is the integer function, then  $R_i$  values can be obtained by rounding up the " $d$ "  $Z_i$  values with the largest fraction parts, and by rounding down the remaining  $(N - d)$  of them.

It should be noted that the integer sizes  $R_i; i = 1, 2, 3, \dots, N$  are also the PSU inverse sampling rates (ISRs) for systematic sampling of dwelling units.

#### Step 4: Obtain cumulative ISR values

We denote by  $C_i; i = 1, 2, 3, \dots, N$  the cumulative ISRs of the PSUs within the stratum. It should be noted that the PSUs within the stratum have been sorted according to the sequence numbers that were assigned after the randomisation. Then, the cumulative ISRs are defined as follows:

$$C_1 = R_1,$$

$$C_j = C_{(j-1)} + R_j; \quad j = 2, 3, \dots, N.$$

It should be noted that the value  $C_N$  will be equal to  $n \times R$ , which is also the total number of systematic samples of dwelling units that can be selected from the stratum.

**Step 5: Generate an integer random number  $r$  between 1 and  $R$ , and compute  $n$  integers  $r_1, r_2, \dots, r_n$  as follows:**

$$r_1 = r$$

$$r_2 = r_1 + R$$

$$r_3 = r_2 + R$$

.

.

$$r_i = r_{(i-1)} + R$$

.

.

$$r_n = r_{(n-1)} + R.$$

**Step 6: Select  $n$  PSUs out of the  $N$  PSUs in the stratum with the labels (sequence numbers) number  $i_1, i_2, \dots, i_n$  such that:**

$$C_{i_1-1} < r_1 \leq C_{i_1}$$

$$C_{i_2-1} < r_2 \leq C_{i_2}$$

.

.

$$C_{i_n-1} < r_n \leq C_{i_n}.$$

Then, the  $n$  PSUs with the labels  $i_1, i_2, \dots, i_n$  would get selected with probabilities proportional to size, and the selection probability of the PSU  $i$  will be given by  $R_i / R$ .

### Weighting

DTS 2018 was collected continuously, based on a rolling three month recall period. This meant that to reconstruct travel for the period January to December 2018 the data from the 2018 DTS and the DTS 2019 January to March collection to create the final data set. Thus 14 survey months from February 2018 to March 2019 were used to create the 12 monthly data files for the calendar year 2018. The sampling weights were then constructed for the 12 reference months. These included both full sample and replicate weights for each of the 12 reference months. The full sample and replicate weights were calibrated using the population control totals for the cells defined by the cross-classification Age-Group x Population-Group x Gender at the national level, and broad Age Groups at the province level. These are the same population control totals that are used for constructing the calibrated weights for the Quarterly Labour Force Survey and the other household surveys. The weighted monthly data files can be combined to produce annual and bi-annual estimates with the WESVAR software.

### Sampling and the interpretation of the data

Caution must be exercised when interpreting the results of the DTS at low levels of dis-aggregation. Revisions to the DTS data sets based on the new population estimates involved benchmarking at national level in terms of age, sex and population group while at provincial level, benchmarking was by population group only. The sample and reporting are based on the provincial boundaries as defined in December 2005. The DTS 2018 data was collected from January to December 2018 and therefore takes seasonality into consideration. Its unique weighting method also results in the data not being comparable with the data collected during the previous years.

### Coverage

The target population is private households in all nine provinces of South Africa, and residents in workers' hostels. The survey does not cover other collective living quarters such as students' hostels, old age homes, hospitals, prisons and military barracks.

### Definitions of terms

A **trip** is a journey taken outside the usual environment of the household.

**Day trip** is a trip during which the respondent or members of the household went for the trip and returned on the same day.

**Overnight trip** is a trip on which the respondent spent one or more nights away from his or her usual environment.

**Package trip** is a trip in which two or more items are included in the price of the trip (e.g. accommodation and transport).

**Tourism** includes all trips away from one's usual environment, not just holiday/leisure trips. It also includes trips related to business, visiting friends and/or relatives, medical/health, and religious journeys amongst others.

The **usual environment** is defined as all places within a 40 kilometres radius of the place of usual residence of the respondent, and all places that the respondent visits at least once a week (e.g. going to work), irrespective of the distance from their usual residence.

**Period of reference** refers to the three months prior to the survey period. For example, for the survey period January 2018, the period of reference period would be October 2018; November 2018 and December 2018. For the February 2018 survey, it would be November 2018; December 2018 and January 2019. For March 2019, it would be December 2018; January 2019 and February 2019.

**Table A: Contents of the DTS 2018 questionnaire**

<b>Table A: Contents of the DTS 2018 questionnaire</b>		
<b>Section</b>	<b>Number of questions</b>	<b>Details of each section</b>
Cover page		Household information, response details, result codes, field staff information, etc.
Background	15	Demographic information (name, sex, age, population group, education, tourism employment)
Section 1	8	Domestic day trips
Section 2	47	Domestic day trips taken by the respondent only or with other household members
Section 3	7	Domestic day trips taken by other household members without the respondent
Section 4	49	Domestic overnight trips
Section 5	20	Overnight trips taken by the respondent only or with other household members
Section 6	11	Overnight trips taken by other household members without the respondent
Section 7	8	Household Living Conditions

**Table B: Response rates per province (percentages), DTS 2018 in thousands**

<b>Province</b>	<b>Per cent</b>
<b>South Africa</b>	<b>89,52</b>
Western Cape	91,50
Eastern Cape	94,28
Northern Cape	94,57
Free State	95,20
KwaZulu-Natal	93,71
North West	90,76
Gauteng	77,28
Mpumalanga	96,16
Limpopo	98,61

**Data file: Day trips****Data transformation for Section 2 and Section 3.**

**Note to users:** The DTS questionnaire had two sections for the domestic day trips taken by the respondent and other household members without the respondent namely section 2(domestic day trips undertaken by the respondent alone or with other household members) and section 3 (domestic day trips undertaken by other household members without the respondent). The purpose of this split was to collect as many domestic day trips as possible from the households. However, in order to ensure statistical consistency, only the most recent trip of each individual is contained in the final data set. Thus the final data set does not distinguish between trips taken with or without the respondent.

Therefore the combination of section 2 and section 3 formed one dataset for domestic day trips. Only variable names for section 2 have been retained since questions in both sections were the same.

Note that expenses (monetary values) in the data are expressed as averages. Thus the total amount spent on the trip by the number of household members who went on a trip. This was done because we found that respondents are more likely to know the total costs of a trip, than the amount that was spent on each individual undertaking the trip.

The process followed to merge the two data sets:

If the trip in section 3 was more recent than the trip in section 2 the data values of section 3 replace the data values of section 2. This comparison was not possible for cases with missing or out of range or invalid values for the trip dates. In those cases the trip details of section 1 are retained.

**Unique number (UQNO)** (@1 18.)

Unique Household Identifier

Note: This is the unique household identifier, which can be used to link data from this file with data for the same household from other files.

**Valid range:** 160100720000014201 - 987106920000053501

**Person number (PersonNO)** (@19 2.)

Person (respondent) number within Household

**Valid range:** 01–24

Note: The two fields above (unique number and person number) create an 18-digit unique person identifier, which can be used to link a record from this file with another record for the same individuals from other files.

**Individual number (IndividualNo)** (@21 2.)

Person (respondent) number within Household

**Valid range:** 1–24

**Survey date (Surveydate)** (@23 7.)

Identifies the quarter, month and the year in which the survey takes place

**Valid range:** 1012019 – 1122018

**Data month (datamonth)**

(@30 9.)

Identifies the month for which recall was done

**Valid range: 01JAN2018 – 12DEC2018****Province (Pr\_code)**

(@39 1.)

South African provinces

Derived variable: Derived from the first digit of the Unique Number, taking the December 2005 provincial boundaries into account.

**Final code list**

- 1 = Western Cape
- 2 = Eastern Cape
- 3 = Northern Cape
- 4 = Free State
- 5 = KwaZulu-Natal
- 6 = North West
- 7 = Gauteng
- 8 = Mpumalanga
- 9 = Limpopo

**Stayed Nights (B\_NIGHTS)**

(@40 1.)

<b>B</b>	<b>Has ..... stayed here (in this household) for at least four nights on average per week during the last four weeks?</b>
1 = YES	If "No",
2 = NO	→ End of interview for this person

**Note to users**

This question is asked for each person found in the selected dwelling. Those who are not household members (i.e. those who haven't spent at least four nights per week) would be eliminated on the second category (2 = No). The instruction in this question is to end the interview with those who have answered 'No' to this question. It is through this question where household members are identified within the selected dwelling.

**Universe**

Every person who normally resides in this household for at least four nights per week.

**Final code list**

- 1 = Yes
- 9 = unspecified

**Gender (C\_GENDER)**

(@41 1.)

<b>C</b>	<b>Is ..... a male or a female?</b>
1 = MALE	
2 = FEMALE	

**Note to users**

This question is asked for each household member, to determine his or her gender. This question, and all consequent questions, are applicable only if there is a 'Yes' answer in the previous question, which determines whether a person is

a household member or not. The enumerators are instructed not to assume the gender of the members of the households by just looking at people's names or physical appearances.

### Universe

Every person who normally resides in this household at least four nights per week.

### Final code list

1 = Male

2 = Female

<b>D</b>	<b>What is ..... 's date of birth and age in completed years?</b>
----------	---

### Note to users

This question is asked to find out the ages of the household members. The instruction is to write the years in whole numbers and not in words. Must record age at last birthday or age in completed years. Moreover, these years must be completed, thus if a person is two years and six months, the instruction is to write the two completed years. For infants under one year, the instruction is to write 000.

### Universe

Every person who normally resides in this household at least four nights per week.

### Final code list

**Day of birth (D\_DAY)** (@42 2.)

**Valid range:** 1 - 31

99 = Unspecified

**Month of birth (D\_MONTH)** (@44 2.)

**Valid range:** 1- 12

99 = Unspecified

**Year of birth (D\_YEAR)** (@46 4.)

**Valid range:** 1906 - 2016

9999 = Unspecified

**Age (D\_AGE)** (@50 3.)

**Less than 1 year** = 0

**Valid range:** 0 – 103

999 = Unspecified

**Population group (E\_POPULATION)** (@53 1.)

<b>E</b>	<b>What population group does ..... belong to?</b>
	1 = AFRICAN/BLACK
	2 = COLOURED
	3 = INDIAN/ASIAN
	4 = WHITE
	5 = OTHER,specify.....

**Note to users**

This question is asked to determine the population group of persons from the selected dwelling. The respondent must answer for each member without any assumptions. In this instance the enumerator is also instructed not to make any conclusions which may be influenced by his observation or using people's names during the interview. This question may seem very sensitive to some respondents especially in this post-apartheid era, but it is really important to find out the composition of the South African population.

**Universe**

Every person who normally resides in this household at least four nights per week.

**Final code list**

- 1 = African/Black
- 2 = Coloured
- 3 = Indian/Asian
- 4 = White

**Marital status (MARITAL\_com)**

(@54 1.)

<b>F(i)</b>	<b>What is .....’s present marital status?</b> 1 = Legally married (include customary, traditional, religious, etc.) 2 = Living together like husband and wife/partners 3 = Divorced → <b>Go to G</b> 4 = Separated, but still legally married → <b>Go to G</b> 5 = Widowed → <b>Go to G</b> 6 = Single, but have lived together with someone as husband/wife before → <b>Go to G</b> 7 = Single and have never been married/never lived together as husband/wife before → <b>Go to G</b>
-------------	--

**Note to users**

This question is about the marital status of the members of the household. Both modern and traditional marriages are considered in this question. If the response is 'widow/widower', 'divorced or separated', or 'never married', the enumerator is instructed to go to Question G.

**Universe**

Every person who normally resides in this household for at least four nights per week.

**Final code list**

- 1 = Legally married (include customary, traditional, religious, etc.)
- 2 = Living together like husband and wife/partners
- 3 = Divorced
- 4 = Separated, but still legally married
- 5 = Widowed
- 6 = Single, but have lived together with someone as husband/wife before
- 7 = Single and have never been married/never lived together as husband/wife before
- 9 = Unspecified

**Partner (F2\_SPOUSEINHH)**

(@55 1.)

<b>F(ii)</b>	<b>Does .....’s spouse/partner live in this household?</b> 1 = Yes 2 = No → <b>Go to G</b>
--------------	--

**Universe**

This question is only applicable to those people who indicated that they are 'Married' or 'Living together like husband and wife' (F1).

**Final code list**

1 = Yes  
2 = No  
8 = Not applicable  
9 = Unspecified

**Spouse number (F3\_WHICHSPOUSE)**

(@56 2.)

<b>F(iii)</b>	<b>Which person is the spouse/partner of .....?</b> <i>Give person number</i>
---------------	--

**Universe**

This question is only applicable to those people who indicated that they are 'Married' or 'Living together like husband and wife' (F1).

**Valid range: 1 - 17**

88 = Not applicable  
99 = Unspecified

**Highest Grade (EDU\_com)**

(@58 2.)

<b>G</b>	<b>What is the highest level of education that ..... has successfully completed?</b> <i>Diplomas or certificates must be of six months plus study duration full-time (or equivalent) to be included</i> 98 = NO SCHOOLING 00 = GRADE R/00 01 = GRADE 1/ SUB A/CLASS 1 02 = GRADE 2 / SUB B/CLASS 2 03 = GRADE 3/STANDARD 1/ ABET 1(KHA RI GUDE, SANLI) 04 = GRADE 4/ STANDARD 2 05 = GRADE 5/ STANDARD 3/ ABET 2 06 = GRADE 6/STANDARD 4 07 = GRADE 7/STANDARD 5/ ABET 3 08 = GRADE 8/STANDARD 6/FORM 1 09 = GRADE 9/STANDARD 7/FORM 2/ ABET 4 10 = GRADE 10/ STANDARD 8/ FORM 3 11 = GRADE 11/ STANDARD 9/ FORM 4 12 = GRADE 12/STANDARD 10/FORM 5/MATRIC (NO EXEMPTION) 13 = GRADE 12/STANDARD 10/FORM 5/MATRIC (EXEMPTION *) 14 = NTC 1/ N1/NC (V) LEVEL 2 15 = NTC 2/ N2/ NC (V) LEVEL 3
----------	--

16 = NTC 3/ N3/NC (V)/LEVEL 4
17 = N4/NTC 4
18 = N5/NTC 5
19 = N6/NTC 6
20 = CERTIFICATE WITH LESS THAN GRADE 12/STD 10
21 = DIPLOMA WITH LESS THAN GRADE 12/STD 10
22 = CERTIFICATE WITH GRADE 12/STD 10
23 = DIPLOMA WITH GRADE 12/STD 10
24 = HIGHER DIPLOMA (TECHNIKON)
25 = POST HIGHER DIPLOMA (TECHNIKON MASTERS, DOCTORAL)
26 = BACHELORS DEGREE
27 = BACHELORS DEGREE AND POST-GRADUATE DIPLOMA
28 = HONOURS DEGREE
29 = HIGHER DEGREE (MASTERS, DOCTORATE)
30 = OTHER, specify.....
31 = DO NOT KNOW

**Note to users**

The interviewers are instructed to recognise qualifications that have already been completed and only diploma and certificates with duration of at least six months and more.

**Universe**

Every person who normally resides in this household for at least four nights per week.

**Final code list**

98 = No schooling  
00 = Grade R/00  
01 = Grade 1/ Sub A/Class 1  
02 = Grade 2 / Sub B/Class 2

**Other person (I\_OTHERPERS)**

(@60 1.)

I	Is there any other person residing in this household, other than those already mentioned, who is not presently here?
---	--

**Universe**

The respondent who is responding on behalf of the household.

**Final code list**

1 = Yes  
 2 = No  
 9 = Unspecified

**Note to users**

Sometimes it is possible that the respondent may have forgotten some household members. Mark the appropriate box with an X.  
 Go back to Question A if some members were forgotten.

**Person who was the respondent (J\_Respondent)**

(@61 2.)

J	Indicate the column number of the person who was the respondent throughout the questionnaire
---	--

**Note to users**

This question was in Section 8 in the previous surveys. It is important to identify your respondent first when conducting the DTS questionnaire since the respondent is most of the time our reference person. Hence the question is moved in the initial stages of the interview.

**Universe**

The respondent who is responding on behalf of the household.

**Valid range:** 1–11

99 = Unspecified

**Day trip (Q11DAYSA\_com)**

(@63 1.)

1.1	<p>In the past three calendar months, has ... taken any day trip inside South Africa?.</p> <p>1 = YES → Go to 1.3</p> <p>2 = NO</p>
-----	---

**Note to users**

This is about day trip(s) the members of the household took and returned on the same day within the borders of South Africa i.e. members of the household did not spend the night away or sleep over.  
 If the respondent(s) answered 'Yes', go to Q1.3, whereas if the response is 'No' go to Q1.2

**Universe**

Every person who normally resides in this household at least four nights per week

**Final code list**

1 = Yes

2 = No

**Why were no day trips taken (Q12WHYNOD\_com)**

(@64 2.)

<b>1.2</b>	<p><b>Why did ... not take any trips inside South Africa in the past three calendar months?</b></p> <p>Record only ONE response</p> <p>01 = TRIPS WITHIN 40KM RADIUS/FAMILY RELATIVES STAYS WITHIN 40KM RADIUS</p> <p>02 = FINANCIAL REASONS (NOT ENOUGH MONEY)</p> <p>03 = TOO EXPENSIVE/ I WOULD RATHER SPEND MONEY ON SOMETHING ELSE</p> <p>04 = NOT ENOUGH TIME TO TRAVEL</p> <p>05 = TOO BUSY AT WORK/ SCHOOL</p> <p>06 = NO FAMILY/FRIENDS TO VISIT SOMEWHERE ELSE</p> <p>07 = TOO MUCH HASSLE TO TRAVEL</p> <p>08 = SICK</p> <p>09 = DISABLED</p> <p>10 = TOO OLD TO TRAVEL</p> <p>11 = WORRIED ABOUT SAFETY/SECURITY/CRIME</p> <p>12 = HAVE YOUNG CHILDREN</p> <p>13 = I NO LONGER WISH TO TRAVEL</p> <p>14 = NO INTEREST/NOTHING TO SEE OR DO THAT APPEALS TO ME</p> <p>15 = TAKING CARE OF SICK/ELDERLY RELATIVE</p> <p>16 = PREGNANCY</p> <p>17 = IN MOURNING</p> <p>18 = NO PARTICULAR REASON</p> <p>19 = OTHER, specify.....</p> <p>→ Go to Section 4</p>
------------	--

**Note to users**

The purpose of the question is to find out why the respondent and/or other household members didn't go on any day trips in the three months prior to the survey. This question is asked if the response to Q1.2 was 'No'.

**Universe**

All members of the household who did not take any day tips inside South Africa.

**Final Code List**

01 = Trips within 40 km radius/family relatives stays within 40km radius

02 = Financial reasons (Not enough money)

03 = Too expensive/ I would rather spend money on something else

04 = Not enough time to travel

05 = Too busy at work/ school

06 = No family/friends to visit somewhere else

07 = Too much hassle to travel

08 = Sick

09 = Disabled

10 = Too old to travel

11 = Worried about safety/security/crime

12 = Have young children

13 = I no longer wish to travel

14 = No interest/nothing to see or do that appeals to me

15 = Taking care of ....sick/elderly relative

16 = Pregnancy

17 = In mourning  
 18 = No particular reason  
 19 = Other, specify.....  
 88 = Not applicable  
 99 = Unspecified

**First time (Q13FIRST)**

(@66 1.)

1.3	<b>Was this the first time ...undertook any day trip in the past three calendar months?</b>  1=YES  2= NO
-----	---

**Note to users**

This question aims to determine whether the respondent and other members of the household have travelled before or are first time travellers or have travelled for the first time.

**Universe**

The household members who took day trips.

**Final code list**

1 = Yes  
 2 = No  
 8 = Not applicable  
 9 = Unspecified

1.4	<b>How many day trips did ... take inside South Africa in the past three months?</b>
-----	--

**Note to users**

The purpose of the question is to find out about the number of day trip(s) the member(s) of the household took inside South Africa within the reference period, i.e.the past three months.

**Universe**

The household members who took day trips.

**Number of trips taken (Q14BDAYSAC)**

(@67 2)

(@69 2)

**Valid range:** 1 – 21

88 = Not applicable  
 99 = Unspecified

**Month of trip**

Read out the following statement to the respondent: **You've already told me that you took a day trip(s) inside South Africa in the past three Calendar months,**

<b>1.5</b>	<b>Can you tell me which month(s) these trips took place?</b>  <b>Record number of trips per month. If exact months are not known, help respondent to make rough estimates.</b>	<b>NUMBER OF TRIPS</b>
	<b>( A ) Interview month January</b>	<input type="text"/> <input type="text"/>
	01 = December	<input type="text"/> <input type="text"/>
	02 = November	<input type="text"/> <input type="text"/>
	03 = October	<input type="text"/> <input type="text"/>
	<b>Total (Add 01 – 03 to confirm total)</b>	<input type="text"/> <input type="text"/>
	<b>( B ) Interview month February</b>	<input type="text"/> <input type="text"/>
	04 = January	<input type="text"/> <input type="text"/>
	05 = December	<input type="text"/> <input type="text"/>
	06 = November	<input type="text"/> <input type="text"/>
	<b>Total (Add 04 – 06 to confirm total)</b>	<input type="text"/> <input type="text"/>
	<b>( C ) Interview month March</b>	<input type="text"/> <input type="text"/>
	07 = February	<input type="text"/> <input type="text"/>
	08 = January	<input type="text"/> <input type="text"/>
	09 = December	<input type="text"/> <input type="text"/>
	<b>Total (Add 07 – 09 to confirm total)</b>	<input type="text"/> <input type="text"/>

**Note to users**

The months used for this question differ between quarters. The example is based on a Quarter 1 questionnaire. The question seeks to find out the number of trips taken by the member(s) of the household in each month or months within the reference period, i.e. the past three months.. The instruction to the interviewer is to record the number of all trips taken. These are day trip(s) taken outside the usual environment i.e. 40 kilometres and above the usual place of residence.

**Note to users**

The purpose of the question is to find out about the final destination of the member(s) of the household. The member(s) of the household was asked to tick the Province and the District that was visited and write the place name of the town(s) that was visited during the trip. The place names of the town(s) are included in the final datasets but not in a coded format and were not standardised. Only spelling errors were corrected and released as it was received from the field. The updated code list for placenames will be available after Census 2011. The next wave of this survey will be released in a code format.

	13 = RELIGIOUS
	14 = CHILD CARE
	15 = CULTURAL OCCASION (E.G. INITIATION)
	16 = OTHER SOCIAL EVENTS (E.G. WEDDING, PARTY)
	17 = OTHER, specify.....

**Note to users**

This question determines the main purpose of the trip in the absence of which the trip would not have been made or the given destination would not have been visited. A person may be travelling for a certain purpose on a trip, but find herself/himself also having undertaken certain businesses along the way or at the place of the destination. Example would be a person who attended a funeral service, but also having met a business partner to discuss some new business deals/ proposals on his way to the funeral, or having attended a party of some sort after the funeral. The business and the party may not be mentioned as reasons or some of the reason, but only the main reason, which is the funeral.

-------------	--

**Notes to the user**

The aim of the question is to find out the total expenditure incurred by each person for any expenditure strictly related to the trip. Question 2.10 and 2.11 refers to two different types of expenditure, although the questions were phrased in the same manner. It should be noted that Question 2.11. refers to "on trip" and Question 2.10 "before trip". This will

be items such as food for the trip, medication package, petrol expenses, and any other expenses directly related to the trip.

#### Money spent on trip

2.11	<p><b>How much money did you and/or other members of your household spend on the following whilst on the trip?</b></p> <p>01= Airfare  02= Train  03= Land transport (fuel, Kombi, bus/train tickets, car hire, toll fees, parking)  04= Car hire  05= Food and beverages  06= Recreation/ entertainment (sports, game parks and amusement parks)  07= Cultural services (performing arts/ museums)  08= Medical expenses  09= Shopping  10= Tour guide  11= Child care  12= Other, specify  <b>Total</b></p>
------	---

#### Note to users

The aim of the question is to find out the total amount of money spent on each item during the trip by the members of the household. Questions 2.10 and 2.11 refer to two different types of expenditure, although the questions were phrased in the same manner. It should be noted that Question 2.11 refers to “on trip” and Question 2.10 “before trip”.

The expenses of those who have not been on a package trip must also be given under each person who took the trip. All expenses, including those that were paid for by another party such as the employer, host, or the company, must be included. The instruction to the interviewer when filling in the amounts is to exclude the cents.

**Note to users**

This question was developed to determine the level at which people were satisfied with the service received. Services or products such as accommodation, transport, information and tourist attraction were considered. In some instances value for money is attached. It should be noted that these question was not asked in the last quarter of the data collection, therefore totals will not necessarily add up.

**DERIVED VARIABLES**

**Survey month (Surveymonth)** (@618 2.)

**Note to users**

Identifies the month in which the household was visited during the enumeration stage.

*Derived from:*

Survey date (SURVEYDATE)

**Valid range:** 01–12

4122018 - 1012019

**Verifiedage (Verifiedage)** (@620 3.)

**Note to users**

This question is asked to find out the ages of the household members. The instruction is to write the years in whole numbers and not in words. Must record age at last birthday or age in completed years. Moreover, these years must be completed, thus if a person is two years and six months, the instruction is to write the two completed years. For infants under one year, the instruction is to write 000.

**Universe**

Every person who normally resides in this household at least four nights per week.

**Valid range:** 0 - 112

**Age group (Age\_grp1)** (@623 2.)

**Final code list**

1 = 00–09 years

2 = 10–19 years

3 = 20–29 years

4 = 30–39 years

5 = 40–49 years

6 = 50–64 years

7 = 65+ years

**Age group (Age\_grp2)** (@625 2.)

**Note to users**

This is a broad age group at the province level.

**Final code list**

1 = 00–14 years

2 = 15–34 years

3 = 35–64 years

4 = 65+ years

**PERSON\_ID** (@627 20.)

**Note to users**

This variable was derived from combining the unique number of the household and the person number of a particular member of that household.

*Derived from logical series of questions:*

Unique number (UqNO)

Person number (PersonNO)

**Valid range:** 16010072000001420101- 98710692000005350101

#### **PERSON\_ID2**

(@647 22.)

##### **Note to users**

This variable was derived from combining the data month, which is the month in which the person undertook their trip, and the unique number of the household, as well as the person number of a particular member of that household, i.e. the Person\_ID variable. This variable assists us to aggregate the month in which the trips were undertaken, and also to attach individual household members

*Derived from logical series of questions:*

Data month (datamonth)

Unique number (UqNO)

Person number (PersonNO)

**Valid range:** 01160110090000000210101 – 1198710543000001520107

#### **Month of trip (Month\_flag)**

(@669 2.)

Derived from Datamonth

##### **Note to users**

This is the month in which day trips were undertaken by household members.

**Valid range:** 1 – 11

#### **Month of recent trip (Q22\_Month)**

(@671 2.)

Derived from Q22DATE

##### **Note to users**

This is the month in which the most recent day trips were undertaken by household members.

**Valid range:** 1 – 12

88 = Not applicable

#### **Total number of daytrips (day\_trips\_com)**

(@673 2.)

Derived from logical series of questions:

Q1.5 questions that ask of on which month did the trip take place.

##### **Note to users**

This variable was derived from the responses to the number of trips a member of the household would have taken in the three months before the interview.

**Valid range:** 0 – 15

88 = Not applicable

**Food and beverages (Food\_bev\_com)**

(@675 6.)

Derived from :

Expenses before trip (q210foodc)

Expenses whilst on trip (q211foodc)

**Valid range:** 0 – 12000

999999 = Unspecified

**Domestic transport (domtrans\_comD)**

(@681 6.)

Derived from:

Expenses before trip (q210vehc)

Expenses whilst on trip (q211airfc, q211train, q211landc, q211carhire)

**Valid range:** 0 – 50358

999999 = Unspecified

**Recreation and Culture (Recreation\_comD)**

(@ 687 6.)

Derived from:

Expenses whilst on trip (q211recrcc, q211cultc)

**Valid range:** 0 – 8000

999999 = Unspecified

**Shopping (Shop\_comD)**

(@693 6.)

Derived from:

Expenses before trip (q210giftc, q210clothc, q210toilc, q210luggc, q210elecc)

Expenses whilst on trip (q211shopc)

**Valid range:** 0 – 300000

999999 = Unspecified

**Other (Other\_comD)**

(@699 6.)

Derived from:

Total expenses before trip (q210travinc, q210finc, q210alarmc, q210secuc, q210sitc, q210medic, q210othrc)

Total expenses whilst on trip (q211medic, q211tourc, q211othrc)

**Valid range:** 0 – 20000

999999 = Unspecified

**Total (der\_total\_comD)**

(@705 6.)

Derived from:

This variable is the sum of expenses for the trip (Accommodation, Food, Transport, RecAndCult, Shopping, Other)

**Valid range:** 0 – 300870

999999 = Unspecified

**Ea\_type (ea\_gtype\_code)** (@711 1.)

**Note to users**

This variable is based on the Census 2011 typology. This typology was used to classify all enumeration areas (EA) and per implication the DTS sampled PSUs into one of three classes namely: Urban, traditional and farms.

**Final code list:**

1 = Urban  
2 = Traditional  
3 = Farms

**Municipality code (Municipality\_code)** (@712 3.)

**Valid range:** 160 – 987

**Municipality name (Municipality\_name)** (@715 22.)

Municipality names are listed in the dataset and are not coded.

**Weight (daytripsBYweight)** (@737 12.4.)

**Note to users**

Derived weight variable:

This weight is a product of the number of trips undertaken by a household member and their individual calibrated weight (full\_calwgt). It applies weights to all the trips that an individual undertook during the reference period, and results in a weighted number of trips undertaken by a particular individual. It can be used if one wants to extrapolate the detailed trip information for the most recent trip to all trips undertaken during a particular reference month. This weight was used for the calculation of total expenditure on trips.

**Valid range:** 0-2382263.5013

**Weight (divided\_calwgt)** (@749,4 12.7.)

**Note to users**

Derived weight variable:

This weight was derived by adjusting the calibrated weight (full\_calwgt) by the twelve monthly weight files in the data. This weight is not trip based, but rather population based and should only be used under circumstances where seasonality does not play a role. For example any analysis using absolute numbers and which relate to the population age, sex etc. should be done using this weight.

**Valid range:** 4.166666667 – 3830.7706062

**Weight (full\_calwgt)** (@762,1 12.6.)

**Note to users**

This weight is a monthly weight. It is the result of weighting the recall data for each data month separately up to the total population of South Africa. Thus all weighted data related to the January recall period will add up to the population total of South Africa, that of February to the total population of South Africa and so on. If the whole dataset for all months are combined and analysed, the population total will therefore add up to twelve times the population of South Africa. This weight should always be used if the total number of trips per month needs to be calculated. Most of the analysis in the DTS 2013 release is based on this weight. However, when tables refer to the

---

“most recent trip” only records for which the trip date corresponds with the datamonth is taken into consideration during analysis.

**Valid range:** 50 – 45969.247274

**Data file: Overnight****Data transformation for Section 5 and Section 6.**

**Note to users:** The DTS questionnaire had two sections for the domestic overnight trips. The first section, Section 5 focussed on trips taken by the respondent alone and/ or with other household members, The second section, Section 6 detailed trips taken by other household members without the respondent. Thus section 5 (domestic overnight trips by the respondent) and section 6 (domestic overnight trips by other household members without the respondent). The purpose of this split was to collect as many domestic overnight trips as possible from the households. However, in order to ensure statistical consistency, only the most recent trip of each individual is contained in the final data set. Thus the final data set does not distinguish between trips taken with or without the respondent.

Therefore the combination of section 5 and section 6 formed one dataset for domestic overnight trips. Only variable names for section 5 have been retained since questions in both sections were the same.

Note that expenses (in monetary values) in the data are expressed as averages. Thus the total amount of money spent on the trip was by the number of household members who went on a trip. This was done because it was found that the respondents were more likely to remember the total amount of money spent on a trip than the amounts spent by individuals.

The process followed to merge the two data sets:

If the trip in Section 6 was more recent than the trip in Section 5 the data values of Section 6 replace the data values of Section 5. This comparison was not possible for cases with missing or out of range or invalid values for the trip dates. In those cases the trip details of section two are retained.

**Unique number (UQNO)** (@1 18.)

Unique Household Identifier

Note: This is the unique household identifier, which can be used to link data from this file with data for the same household from other files.

**Valid range:** 160100720000002801 - 987105530000018001

**Person number (PersonNO)** (@19 2.)

Person (respondent) number within Household

**Valid range:** 01–21

Note: The two fields above (unique number and person number) create an 18-digit unique person identifier, which can be used to link a record from this file with another record for the same individuals from other files.

**Individual number (IndividualNo)** (@21 2.)

Person (respondent) number within Household

**Valid range:** 1–21

**Survey date (Surveydate)** (@23 7.)

Identifies the quarter, month and the year in which the survey takes place

**Valid range:** 1012018 – 1032018

**Collection month (COLLMONTH)**

(@30 9.)

**Note to users**

This variable refers to the month in which the data collection was conducted. Data for DTS 2018 was collected from January 2018 to March 2019.

**Valid range:** January – March

**Data month (datamonth)**

(@39 9.)

Identifies the month for which recall was done

**Valid range:** 01JAN2018 – 12DEC2018

**Province (Pr\_code)**

(@48 1.)

South African provinces

Derived variable: Derived from the first digit of the Unique Number taking the December 2005 provincial boundaries into account.

**Final code list**

- 1 = Western Cape
- 2 = Eastern Cape
- 3 = Northern Cape
- 4 = Free State
- 5 = KwaZulu-Natal
- 6 = North West
- 7 = Gauteng
- 8 = Mpumalanga
- 9 = Limpopo

**Stayed Nights (B\_NIGHTS)**

(@49 1.)

<b>B</b>	<b>Has ..... stayed here (in this household) for at least four nights on average per week during the last four weeks?</b>
1 = YES	<b>If "No",</b>
2 = NO	<b>→ End of interview for this person</b>

**Note to users**

This question is asked for each person found in the selected dwelling. Those who are not household members (those who haven't spent at least four nights per week) would be eliminated on the second category (2 = No). The instruction in this question is to end the interview with those who have answered 'No' in this question. It is through this question where household members are identified within the selected dwelling.

**Universe**

Every person who normally resides in this household for at least four nights per week.

**Final code list**

- 1 = Yes

**Gender (C\_GENDER)**

(@50 1.)

<b>C</b>	<b>Is ..... a male or a female?</b>
	1 = MALE
	2 = FEMALE

**Note to users**

This question is asked for each household member, to determine his or her gender. This question, and all consequent questions, are applicable only if there is a 'Yes' answer in the previous question, which determines whether a person is a household member or not. The enumerators are instructed not to assume the gender of the members of the households by just looking at people's names or physical appearances.

**Universe**

Every person who normally resides in this household at least four nights per week.

**Final code list**

1 = Male  
2 = Female

<b>D</b>	<b>What is ..... 's date of birth and age in completed years?</b>
----------	---

**Note to users**

This question is asked to find out the ages of the household members. The instruction is to write the years in whole numbers and not in words. Must record age at last birthday or age in completed years. Moreover, these years must be completed, thus if a person is two years and six months, the instruction is to write the two completed years. For infants under one year, the instruction is to write 000.

**Universe**

Every person who normally resides in this household at least four nights per week.

**Final code list****Day of birth (D\_DAY)**

(@51 2.)

**Valid range:** 1 - 31  
99 = Unspecified

**Month of birth (D\_MONTH)**

(@53 2.)

**Valid range:** 1- 12  
99 = Unspecified

**Year of birth (D\_YEAR)**

(@55 4.)

**Valid range:** 1906 - 2016  
9999 = Unspecified

**Age (D\_AGE)**

(@59 3.)

**Less than 1 year = 0**

**Valid range:** 0 – 103  
999 = Unspecified

**Population group (E\_POPULATION)**

(@62 1.)

<b>E</b>	<b>What population group does ..... belong to?</b>
	1 = AFRICAN/BLACK
	2 = COLOURED
	3 = INDIAN/ASIAN
	4 = WHITE
	5 = OTHER,specify.....

**Note to users**

This question is asked to determine the population group of persons from the selected dwelling. The respondent must answer for each member without any assumptions. In this instance the enumerator is also instructed not to make any conclusions which may be influenced by his observation or using people's names during the interview. This question may seem very sensitive to some respondents especially in this post-apartheid era, but it is really important to find out the composition of the South African population.

**Universe**

Every person who normally resides in this household at least four nights per week.

**Final code list**

- 1 = African/Black
- 2 = Coloured
- 3 = Indian/Asian
- 4 = White
- 5 = Other

**Marital status (MARITAL\_com)**

(@63 1.)

<b>F(i)</b>	<b>What is .....’s present marital status?</b>
	1 = Legally married (include customary, traditional, religious, etc.)
	2 = Living together like husband and wife/partners
	3 = Divorced → <b>Go to G</b>
	4 = Separated, but still legally married → <b>Go to G</b>
	5 = Widowed → <b>Go to G</b>
	6 = Single, but have lived together with someone as husband/wife before → <b>Go to G</b>
	7 = Single and have never been married/never lived together as husband/wife before → <b>Go to G</b>

**Note to users**

This question is about the marital status of the members of the household. Both modern and traditional marriages are considered in this question. If the response is 'widow/widower', 'divorced or separated', or 'never married', the enumerator is instructed to go to Question G.

**Universe**

Every person who normally resides in this household for at least four nights per week.

**Final code list**

- 1 = Legally married (include customary, traditional, religious, etc.)
- 2 = Living together like husband and wife/partners
- 3 = Divorced
- 4 = Separated, but still legally married
- 5 = Widowed
- 6 = Single, but have lived together with someone as husband/wife before
- 7 = Single and have never been married/never lived together as husband/wife before
- 8 = Not applicable
- 9 = Unspecified

**Partner (F2\_SPOUSEINHH)**

(@64 1.)

<b>F(ii)</b>	<b>Does .....’s spouse/partner live in this household?</b>
	1 = Yes
	2 = No → Go to G

**Universe**

This question is only applicable to those people who indicated that they are 'Married' or 'Living together like husband and wife' (F1).

**Final code list**

- 1 = Yes
- 2 = No
- 8 = Not applicable
- 9 = Unspecified

**Spouse number (F3\_WHICHSPOUSE)**

(@65 2.)

<b>F(iii)</b>	<b>Which person is the spouse/partner of .....?</b>
	<i>Give person number</i>

**Universe**

This question is only applicable to those people who indicated that they are 'Married' or 'Living together like husband and wife' (F1).

**Valid range: 1 - 32**

- 88 = Not applicable
- 99 = Unspecified

**Highest Grade (Edu\_com)**

(@67 2.)

<b>G</b>	<p><b>What is the highest level of education that ..... has successfully completed?</b></p> <p><i>Diplomas or certificates must be of six months plus study duration full-time (or equivalent) to be included</i></p> <p>98 = NO SCHOOLING  00 = GRADE R/00  01 = GRADE 1/ SUB A/CLASS 1  02 = GRADE 2 / SUB B/CLASS 2  03 = GRADE 3/STANDARD 1/ ABET 1(KHA RI GUDE, SANLI)  04 = GRADE 4/ STANDARD 2  05 = GRADE 5/ STANDARD 3/ ABET 2  06 = GRADE 6/STANDARD 4  07 = GRADE 7/STANDARD 5/ ABET 3  08 = GRADE 8/STANDARD 6/FORM 1  09 = GRADE 9/STANDARD 7/FORM 2/ ABET 4  10 = GRADE 10/ STANDARD 8/ FORM 3  11 = GRADE 11/ STANDARD 9/ FORM 4  12 = GRADE 12/STANDARD 10/FORM 5/MATRIC (NO EXEMPTION)  13 = GRADE 12/STANDARD 10/FORM 5/MATRIC (EXEMPTION *)  14 = NTC 1/ N1/NC (V) LEVEL 2  15 = NTC 2/ N2/ NC (V) LEVEL 3  16 = NTC 3/ N3/NC (V)/LEVEL 4  17 = N4/NTC 4  18 = N5/NTC 5  19 = N6/NTC 6  20 = CERTIFICATE WITH LESS THAN GRADE 12/STD 10  21 = DIPLOMA WITH LESS THAN GRADE 12/STD 10  22 = CERTIFICATE WITH GRADE 12/STD 10  23 = DIPLOMA WITH GRADE 12/STD 10  24 = HIGHER DIPLOMA (TECHNIKON)  25 = POST HIGHER DIPLOMA (TECHNIKON MASTERS, DOCTORAL)  26 = BACHELORS DEGREE  27 = BACHELORS DEGREE AND POST-GRADUATE DIPLOMA  28 = HONOURS DEGREE  29 = HIGHER DEGREE (MASTERS, DOCTORATE)  30 = OTHER, specify.....  31 = DO NOT KNOW</p>
----------	--

**Note to users**

The interviewers are instructed to recognise qualifications that have already been completed and only diploma and certificates with duration of at least six months and more.

**Universe**

Every person who normally resides in this household for at least four nights per week.

**Final code list**

98 = No schooling  
00 = Grade R/00  
01 = Grade 1/ Sub A/Class 1  
02 = Grade 2 / Sub B/Class 2  
03 = Grade 3/Standard 1/ ABET 1(Kha Ri Gude, Sanli)  
04 = Grade 4/ Standard 2  
05 = Grade 5/ Standard 3/ ABET 2

 25 = Post Higher Diploma (Technikon Masters, Doctoral)  
 26 = Bachelors Degree  
 27 = Bachelors Degree and post-graduate diploma  
 28 = Honours Degree  
 29 = Higher degree (Masters, Doctorate)  
 30 = Other  
 31 = Do not know  
 88 = Not applicable  
 99 = Unspecified

**Other person (I\_OTHERPERS)**

(@69 1.)

I	Is there any other person residing in this household, other than those already mentioned, who is not presently here?
---	--

**Universe**

The respondent who is responding on behalf of the household.

**Final code list**

1 = Yes  
 2 = No  
 9 = Unspecified

**Note to users**

Sometimes it is possible that the respondent may have forgotten some household members. Mark the appropriate box with an X.

Go back to Question A if some members were forgotten.

**Person who was the respondent (J\_Respondent)**

(@70 2.)

J	Indicate the column number of the person who was the respondent throughout the questionnaire
---	--

**Note to users**

This question was in Section 8 in the previous surveys. It is important to identify your respondent first when conducting the DTS questionnaire since the respondent is most of the time our reference person. Hence the question is moved to the initial stages of the interview.

**Universe**

The respondent who is responding on behalf of the household.

**Valid range:** 01–11

99 = Unspecified

**Overnight Trips (Q41TAKEOVEN\_com)**

(@72 1.)

4.1	<p><b>In the past three Calendar months, has ... taken any overnight trips inside South Africa?</b></p> <p>1 = YES → Go to 4.3</p> <p>2 = NO</p>
-----	--

**Note to users**

The purpose of the question is to find out whether the member(s) of the household undertook an overnight trip, which is a trip where they spent at least one night or more away from their usual residence, but inside the borders of South Africa.

If the respondent(s) answered 'Yes', go to Q4.3, whereas if the response is 'No' go to Q4.2

**Universe**

All members of the household by whether they took overnight trips

**Final code list**

1 = Yes

2 = No

**Why were no overnight trips taken (Q42WHYNOVEN\_com)**

(@73 2.)

<b>4.2</b>	<p><b>Why did ... not take any overnight trips inside South Africa in the past three Calendar months?</b></p> <p>Record only ONE response</p> <p>01 = TRIPS WITHIN 40KM RADIUS/FAMILY RELATIVES STAYS WITHIN 40KM RADIUS</p> <p>02 = FINANCIAL REASONS (NOT ENOUGH MONEY)</p> <p>03 = TOO EXPENSIVE/ I WOULD RATHER SPEND MONEY ON SOMETHING ELSE</p> <p>04 = NOT ENOUGH TIME TO TRAVEL</p> <p>05 = TOO BUSY AT WORK/ SCHOOL</p> <p>06 = NO FAMILY/FRIENDS TO VISIT SOMEWHERE ELSE</p> <p>07 = TOO MUCH HASSLE TO TRAVEL</p> <p>08 = SICK</p> <p>09 = DISABLED</p> <p>10 = TOO OLD TO TRAVEL</p> <p>11 = WORRIED ABOUT SAFETY/SECURITY/CRIME</p> <p>12 = HAVE YOUNG CHILDREN</p> <p>13 = I NO LONGER WISH TO TRAVEL</p> <p>14 = NO INTEREST/NOTHING TO SEE OR DO THAT APPEALS TO ME</p> <p>15 = TAKING CARE OF SICK/ELDERLY RELATIVE</p> <p>16 = PREGNANCY</p> <p>17 = IN MOURNING</p> <p>18 = NO PARTICULAR REASON</p> <p>19 = OTHER, specify.....</p> <p>→ <b>Go to Section 7</b></p>
------------	---

#### Note to users

The purpose of the question is to find out the reasons why the member(s) of the household did not take any overnight trips in the three months prior to the survey. This question is asked if the response to Q4.1 was 'No'.

#### Universe

All members of the household who did not take any overnight trips inside South Africa.

#### Final code list

01 = Trips within 40 km radius/family relatives stays within 40km radius

02 = Financial reasons (Not enough money)

03 = Too expensive/ I would rather spend money on something else

04 = Not enough time to travel

05 = Too busy at work/ school

06 = No family/friends to visit somewhere else

07 = Too much hassle to travel

08 = Sick

09 = Disabled

10 = Too old to travel

11 = Worried about safety/security/crime

12 = Have young children

13 = I no longer wish to travel

14 = No interest/nothing to see or do that appeals to me

15 = Taking care of ....sick/elderly relative

16 = Pregnany

17 = In mourning

18 = No particular reason

19 = Other

88 = Not applicable

**First time tourists (Q43FIRST)**

(@75 1.)

<b>4.3</b>	<p><b>Was this the first time ...undertook any overnight trip in the past three Calendar months?</b></p> <p>1 =YES</p> <p>2 = NO</p>
------------	--

**Note to users**

This question aims to determine whether the respondent and/ or the other members of the household have travelled before or are frequent travellers or have travelled for the first time.

**Universe**

All members of the household who took overnight trips inside South Africa

**Final code list**

1 = Yes  
 2 = No

<b>Total (Add 07 – 09 to confirm total)</b>	<input type="text"/> <input type="text"/>

**Note to users**

The months used for this question differ between quarters. The example is based on a Quarter 1 questionnaire. The question seeks to find out the number of trips taken by the member(s) of the household in each month or months within the reference period, i.e. the past three months. The instruction to the interviewer is to record the number of all trips taken. These are overnight trip(s) taken outside the usual environment i.e. 40 kilometres and above the usual place of residence.

**Most recent overnight trip by respondent (Q46ARDTRI)**

(@170 2.)

4.6a	<p><b>Ask the respondent</b></p> <p><i>Identify the most recent overnight trip that the respondent undertook.</i></p> <p><b>On the most recent overnight trip, indicate which (if any) household member(s) travelled with you</b></p>	<p><b>Person number</b></p> <p><input type="text"/> <input type="text"/></p>
------	---	--

**Note to users**

This question's primary purpose is to identify the most recent overnight trip undertaken by the respondent with or without other household members, but once transcription has taken place this variable then refers to trips undertaken by all members of the household and not just the respondent.

**Universe**

All members of the household who took overnight trips in South Africa

**Valid range:** 1 – 9

88- Not applicable

**Month in which respondent took the trip (Q46BMNTH)**

(@172 2.)

4.6b	<p><b>Record the month in which this trip took place</b></p> <p><b>GO TO SECTION 5</b></p>	<p><input type="text"/> <input type="text"/></p>
------	--	--

**Note to users**

This question aims to identify the month in which the most recent overnight trip for the respondent with or without other household members took place, but once transcription has taken place this variable then refers to trips undertaken by all members of the household and not just the respondent.

**Universe**

Member(s) of the household who took day trips

**Valid range:** 1 – 9  
88- Not applicable  
99 = Unspecified

**Number of overnights (Q53NRNIGHTS\_com)**

(@1074 3.)

5.3	How many nights were spent on this trip?
-----	--

**Note to users**

The question seeks to find out the total number of nights, the member(s) of the household spent on the trip. The answer to the question is derived from the date in Q5.2.2 minus the date of Q5.2.1 for check reference.

**Universe**

To the members of the household who took overnight trip(s) in South Africa.

**Valid range:** 1 - 391

888 = Not applicable

999 = Unspecified

**Total on trip (Q54TOTAL)**

(@1077 3.)

5.4	Including yourself, how many people in total went on this trip? Include those who are not members of your house hold.
-----	--

**Note to users**

The purpose of the question is to find out the total number of people who were travelling together with the members of the household to the same destination for the same purpose, and are known to the members of the household.

**Universe**

To members of the household who took overnight trip(s) in South Africa.

**Valid range:** 001 - 138

888 = Not applicable

999 = Unspecified

**Household members (Q55HH)**

(@1080 2.)

5.5	Of the people mentioned above, how many were members of your household?
-----	---

**Note to users**

The purpose of the question is to find out from Question 5.4, that out of the group that was travelling with the members of the household, how many were members of the household. The members of the household might have been travelling in a bus or kombi to either a funeral or football match, but the question tries to find only the number of the household members that went along with the group.

**Universe**

To the members of the household who took overnight trip/trips in South Africa.

**Valid range:** 1 - 9

88 = Not applicable

**Main transport (Q58Trans\_com)**

(@1154 2.)

<b>5.8</b>	<b>What was the main type of transport used to reach the main destination?</b> <i>This is the transport used for the longest part of the journey in terms of distance to reach the destination.</i> 1 = AIRCRAFT 2 = BUS 3 = CAR 4 = MOTORCYCLE/SCOOTER 5 = BICYCLE 6 = TAXI 7 = TRAIN 8= OTHER, Specify.....
------------	--

**Notes to the user**

The purpose of the question is to find out the main type of transport that was used to travel to the destination. This should be the transport that covered most or the longest part of the journey in kilometres, before reaching the destination. An example would be a situation where the family flies to a destination for a holiday, and then rent a car upon their arrival to travel to the hotel. In this case, the main type of transport would be an Aircraft.

**Universe**

<b>5.11</b>	<b>How was the trip booked? Was it through.....</b>  1 = A Tour operator 2 = A Travel agent 3 = Booked independently 4 = No booking necessary 5 = Did not make booking myself, don't know
-------------	---

→ **Go to 5.14**  
 → **Go to 5.14**

**Notes to the user**

The aim of the question is to find out which methods the members of the household used to book their trip, if any bookings were necessary for their trip. The traveller(s) might have booked for himself/herself or used agents such as Travel Agents that are intermediaries between themselves and the Tour Operator and also deal with package deals to make the bookings for them. If the answer is option 4 or 5, then the interviewer is instructed to go to Q5.14 as a skip instruction.

**Universe**

To the members of the household who took overnight trip(s) in South Africa.

**Trip bookings (Q511BOOK)**

(@1200 1.)

**Final code list**

- 1 = Tour operator

**Person number (Q515PERSON)**

(@1216 2.)

5.15	Please indicate exactly which members of the household went on this trip
------	--

**Notes to the user**

This variable reflects the person numbers of household members who undertook the trip.

**Universe**

To the member(s) of the household who took overnight trip(s) in South Africa.

**Valid Range:** 01 – 11

88 = Not applicable

99 = Unspecified

**Money spent before the trip**

5.16	<p><b>How much money did you and/or other members of your household spend on the following before the trip?</b></p> <p>01 = Food for the trip</p> <p>04 = Gifts</p> <p>03 = Travel insurance</p> <p>04 = Other financial services</p> <p>05 = Servicing the vehicle</p> <p>06 = Checking/ servicing alarm systems</p> <p>07 = Hiring security</p> <p>08 = Hiring house sitter</p> <p>09 = Clothing</p> <p>10 = Toiletries</p> <p>11 = Luggage</p> <p>14 = Medical supplies/ inoculations</p> <p>13 = Electrical appliances e.g. adaptors</p> <p>14 = Child care</p> <p>15 = Other, Specify</p> <p><b>Total</b></p>
------	--

**Notes to the user**

The aim of the question is to try and relate every cost to the relevant item. For example if the people used a car for the trip, then the cost will be allocated to the car expenses, if anyone of them consulted a doctor or bought any medication, then it will be for medical supplies etc. It is also possible that one member of the household might have incurred the majority of spending on behalf of other members by purchasing food and beverages for all, and then the total

expenditure for food must be allocated only to that person who paid for the others, not to the beneficiaries. The interviewer must, where possible, allocate every cost necessary to the person who paid for it. When recording the amount, the Interviewer must start with the last digit from the right to the left, bottom upwards.

Exclude domestic services related to business purposes. Record either 'Yes' or 'No'.

**Universe**

The respondent who is responding on behalf of the household.

**Household living conditions (Q77DOMEST)**

(@1549 1.)

**Final code list**

1 = Yes

2 = No

9 = Unspecified

**Household living conditions (Q77DOMESTc)**

(@1550 1.)

**Final code list**

1 = Yes

0 = No

8 = Not applicable

9 = Unspecified

**DERIVED VARIABLES**

**Survey month (Surveymonth)** (@1551 2.)

**Note to users**

Identifies the month in which the household was visited during the enumeration stage.

*Derived from:*

Survey date (SURVEYDATE)

**Valid range:** 01–12

**Verifiedage (Verifiedage)** (@1553 3.)

**Note to users**

This question is asked to find out the ages of the household members. The instruction is to write the years in whole numbers and not in words. Must record age at last birthday or age in completed years. Moreover, these years must be completed, thus if a person is two years and six months, the instruction is to write the two completed years. For infants under one year, the instruction is to write 000.

**Universe**

Every person who normally resides in this household at least four nights per week.

**Valid range:** 0 - 111

**Age group (Age\_grp1)** (@1556 2.)

**Final code list**

01 = 00–09 years  
 02 = 10–19 years  
 03 = 20–29 years  
 04 = 30–39 years  
 05 = 40–49 years  
 06 = 50–64 years  
 07 = 65+ years

**Age group (Age\_grp2)** (@1558 2.)

**Note to users**

This is a broad age group at the province level.

**Final code list**

01 = 00–14 years  
 02 = 15–34 years  
 03 = 35–64 years  
 04 = 65+ years

**PERSON\_ID**

(@1560 20.)

**Note to users**

This variable was derived from combining the unique number of the household and the person number of a particular member of that household.

*Derived from logical series of questions:*

Unique number (UqNO)

Person number (PersonNO)

**Valid range:** 16010072000001420101- 98710692000005350101

**PERSON\_ID2**

(@1580 22.)

**Note to users**

This variable was derived from combining the datamonth, which is the month in which the person undertook their trip, and the unique number of the household, as well as the person number of a particular member of that household, i.e. the Person\_ID variable. This variable assists us to aggregate the month in which the trips were undertaken, and also to attach individual household members

*Derived from logical series of questions:*

Data month (datamonth)

Unique number (UqNO)

Person number (PersonNO)

**Valid range:** 0116010090000000210101– 1198710543000001520107

**Month of trip (Month\_flag)**

(@1602 2.)

Derived from Datamonth

**Note to users**

This is the month in which day trips were undertaken by household members.

**Valid range:** 1 – 11

99 = Unspecified

**Month of recent trip (Q522\_Month)**

(@1604 2.)

Derived from Q522ENDDATE

**Note to users**

This is the date (month) on which the member(s) of the household returned back home or their usual place of residence from their respective overnight trips.

**Valid range:** 01 – 12

99 = Unspecified

**Total number of overnight trips (overnight\_trips\_com)** (@1606 2.)

Derived from :  
Q4.5 questions that ask of which month did the trip take place.

**Note to users**

This variable was derived from the responses to the number of trips a member of the household would have taken in the three months before the interview.

**Valid range:** 1 – 15  
99 = Unspecified

**Accommodation (AccommodationO\_com)** (@1608 6.)

Derived from :  
Expenses whilst on trip (Q517Accomc)

**Valid range:** 0 - 80000  
99999 = Unspecified

**Food and beverages (Food\_bevO\_com)** (@1614 6.)

Derived from :  
Expenses before trip (q516foodc)  
Expenses whilst on trip (q517foodc)

**Valid range:** 0 – 12000  
999999 = Unspecified

**Domestic transport (domtransO\_com)** (@1620 6.)

Derived from:  
Expenses before trip (q516vehc)  
Expenses whilst on trip (q517airfc, q517train, q517landc, q517carhire)

**Valid range:** 0 – 50358  
99999 = Unspecified

**Recreation and Culture (RecreationO\_com)** (@ 1626 6.)

Derived from:  
Expenses whilst on trip (q517recrcc, q517cultc)

**Valid range:** 0 – 8000  
999999 = Unspecified

**Shopping (ShopO\_com)** (@1632 6.)

Derived from:  
Expenses before trip (q516giftc, q516clothc, q516toilc, q516luggc, q516elecc)  
Expenses whilst on trip (q517shopc)

**Valid range:** 0 – 300000  
999999 = Unspecified

**Other (OtherO\_com)** (@1638 6.)

Derived from:

Total expenses before trip (q516travinc, q516finc, q516alarmc, q516secuc, q516sitc, q516medic, q516othrc)

Total expenses whilst on trip (q517medic, q517tourc, q517othrc)

**Valid range:** 0 – 20075

999999 = Unspecified

**Total (der\_Total)** (@1644 6.)

Derived from:

This variable is the sum of expenses for the trip (Accommodation, Food, Transport, RecAndCult, Shopping, Other)

**Valid range:** 0 – 300870

999999 = Unspecified

**Ea\_type (ea\_gtype\_code)** (@1650 1.)**Note to users**

This variable is based on the Census 2011 typology. This typology was used to classify all enumeration areas (EA) and per implication the DTS sampled PSUs into one of three classes namely: Urban, traditional and farms.

**Final code list:**

1 = Urban

2 = Traditional

3 = Farms

**Municipality code (Municipality\_code)** (@1651 3.)

**Valid range:** 160 – 987

**Municipality name (Municipality\_name)** (@1654 22.)

Municipality names are listed in the dataset and are not coded.

**Weight (nightrtripsBYweight\_com)** (@1676 12.4)**Note to users**

Derived weight variable:

This weight is a product of the number of trips undertaken by a household member and their individual calibrated weight (full\_calwgt). It applies weights to all the trips that an individual undertook during the reference period, and results in a weighted number of trips undertaken by a particular individual. It can be used if one wants to extrapolate the detailed trip information for the most recent trip to all trips undertaken during a particular reference month. This weight was used for the calculation of total expenditure on trips.

**Valid range:** 50 – 2384981.9433

**Weight (divided\_calwgt)** (@1688,4 12.7.)

**Note to users**

Derived weight variable:

This weight was derived by adjusting the calibrated weight (full\_calwgt) by the twelve monthly weight files in the data. This weight is not trip based, but rather population based and should only be used under circumstances where seasonality does not play a role. For example any analysis using absolute numbers and which relate to the population age, sex etc. should be done using this weight.

**Valid range:** 4.166666667 – 3830.7706062

**Weight (full\_calwgt)**

(@1701,1 12.6.)

**Note to users**

This weight is a monthly weight. It is the result of weighting the recall data for each data month separately up to the total population of South Africa. Thus all weighted data related to the January recall period will add up to the population total of South Africa, that of February to the total population of South Africa and so on. If the whole dataset for all months are combined and analysed the population total will therefore add up to twelve times the population of South Africa. This weight should always be used if the total number of trips per month needs to be calculated. Most of the analysis in the DTS 2013 release is based on this weight. However, when tables refer to the “most recent trip” only records for which the trip date corresponds with the datamonth is taken into consideration during analysis.

**Valid range:** 50 – 45969.247274
