TITLE

Monitoring of the Effects of Economic Deterioration on Refugee Households 2020

SUBTITLE

Wave 3

COUNTRY/ECONOMY

Name	Country code
Lebanon	LBN

STUDY TYPE

Other Household Survey [hh/oth]

ABSTRACT

The Monitoring of the Effects of the Economic Deterioration on Refugee Households dataset is a Phone survey of Syrian and non-Syrian households to monitor the changes over time in key areas in the context of the deteriorating economic situation in Lebanon. This wave focuses on livelihoods, economic vulnerability, living conditions, access to health services, food and livelihood coping strategies, covid-19. This dataset includes only the non-Syrian refugees' cases.

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

Household

Version

VERSION DESCRIPTION

Edited, cleaned, and anonymized data.

VERSION DATE

2021-04-09

Scope

NOTES

The scope of the survey includes:

- Livelihoods: Loss of jobs, salary cuts, job retention and new job opportunities
- Economic vulnerability: household debt - Living conditions: rental costs, mobility, eviction and eviction threats
- Access to health services: demand and access to primary healthcare and hospitalization
- Food and Livelihood Coping Strategies: Rates of key negative food and non-food related coping strategies
- COVID-19: Access to hygiene items

Sampling

SAMPLING PROCEDURE

A nationally representative sample was extracted from the UNHCR database in Lebanon using a simple random sampling approach. Two nationally representative samples were extracted: (1) Syrian refugees, and (2) Non-Syrian refugees. Data collected through the call center via Phone survey. To accounting for non-response rate, 1,000 Syrian and 1,000 non-Syrian cases were sampled. NB: Please note that while comparison is usually made to VARON/VASYR, methodologies completely differ and as such comparisons should be approached with caution and not interpreted to the dot. Result: High non-response rate for non-Syrians (close to 65%). Therefore, results might not be representative of the non-Syrian population and therefore should be treated with caution. 353 interviews completed.

Data Collection

DATES OF DATA COLLECTION

Start	End
2020-09-15	2020-10-15

DATA COLLECTION MODE

Computer Assisted Telephone Interview [cati]

DATA COLLECTION NOTES

Interviews were made by phone.
