TITLE
COVID-19 LAC High Frequency Phone Surveys 2021, Wave 1

COUNTRY/ECONOMY

Name	Country code
Guyana	GUY

STUDY TYPE
Socio-Economic/Monitoring Survey [hh/sems]

SERIES INFORMATION
These surveys are the second of the series of LAC: COVID-19 High Frequency Monitoring Project (Phase1 - P173987) &
(Phase 2- P175839).

ABSTRACT
After implementing Phase 1 of the High-Frequency Phone Survey (HFPS) project in Latin America and The Caribbean in 2020,
the World Bank conducted Phase 2 in 2021 to continue to assess the socio-economic impacts of the COVID-19 pandemic on
households. This new phase, conducted in partnership with the UNDP LAC Chief Economist office, included two waves. Wave
1 collected between May and July 2021, covering 23 countries. Of these countries, 13 participated in Phase 1: Argentina,
Bolivia, Colombia, Costa Rica, Chile, Dominican Republic, Ecuador, El Salvador, Guatemala, Honduras, Mexico, Paraguay and
Peru. Countries that joined in Phase 2 are: Antigua & Barbuda, Belize, Dominica, Guyana, Haiti, Jamaica, Nicaragua, Panama,
St. Lucia and Uruguay.

This study presents information from these 23 countries. Brazil was later integrated into the LAC HFPS Phase 2 project. See
the project information here: https://microdata.worldbank.org/index.php/catalog/4533. For additional information on the LAC
HFPS Phase 1, see here:
https://pubdocs.worldbank.org/en/238561622829862035/HFPS-TECHNICAL-NOTE-MAY2021-FINAL.pdf

UNIT OF ANALYSIS
Households and individuals of 18 years of age and older.

Version

VERSION DESCRIPTION
Edited, anonymized dataset for public distribution.

VERSION DATE
2022-08-16

VERSION NOTES
This version includes an adjustment in the labels of the variables in the digital module. Additional updates to the databases
for Ecuador as the previous ones included surveys to Venezuelan migrants, which are not part of the population for which
the survey is representative of.

Scope

NOTES
The 2021 HFPS collects information on changes in employment and income, prevalence of food insecurity, access to health,
education, and financing services. This allows users to compare certain indicators of living conditions of households and
individuals with the 2020 HFPS. Additionally, the 2021 phase gathered information on access and use of internet and digital
banking services, gender issues, mental health, coping mechanisms and childcare. As in the first phase, the surveys are

representative of individuals of 18 years of age or above who have an active cellphone number or a landline at home. An improvement in the sampling methodology also allows for the data of Phase 2 Wave 1 to be representative of school-age children and adolescents for the education module.

Eligible respondents for the HFPS were adults 18 years old and above. Only one respondent per household was interviewed, and he/she answered individual, child and household-level questions.

Sampling

SAMPLING PROCEDURE
Phase 2 Wave 1 samples for the Original Countries included two components: a) a panel formed by respondents to Phase 1 Wave 1, and b) a supplement fresh sample of phone numbers to compensate for attrition between Phase 1 Wave 1 and Phase 2 Wave 1, and to slightly increase the overall sample size. The samples of the Added Countries (i.e. those only included in Phase 2) is based on a dual frame of cell phone and landline numbers generated through a Random Digit Dialing (RDD) process. In the first phase, a large sample was selected in both frames, and then screened through an automated process to identify the active, eligible numbers. A smaller second-phase sample was selected from the active residential numbers from in the first-phase sample and was delivered to the country teams. See Sampling Design and Weighting document for more detail.

WEIGHTING
HFPS Phase 2 has three units of analysis: households, adult individuals (18 years lof age and older) and children 6 through 17 years of age. Weights were computed for each sample unit and should be used according to the estimate of interest.

The weighting process for the 13 Countries included in LAC HFPS Phase 1 involve five steps:
1. Calculation of the inclusion probabilities of landline and cell phone numbers.
2. Computation of design weights for households and individuals.

3. Attrition nonresponse weighting adjustment for the panel sample component, and first-time nonresponse adjustment for the supplement sample component.
4. Calibration of household, adult and child/adolescent weights, using external ancillary data from official sources (adjusted by national phone coverage).
5. Weight trimming and recalibration.

The sample design and weighting procedures for new countries are the same ones used for the Original Countries in Phase 1 Wave 1. For a detailed description, see
https://documents1.worldbank.org/curated/en/336371631859678760/pdf/COVID-19-High-Frequency-Phone-Surveys-in-Latin-America-Technical-Note-on-Sampling-Design-Weighting-and-Estimation.pdf

Data Collection

DATES OF DATA COLLECTION

Start	End	Cycle
2021-05-17	2021-07-30	Wave 1

DATA COLLECTION MODE
Computer Assisted Telephone Interview [cati]

SUPERVISION
Sistemas integrales jointly with the World Bank and UNDP teams were in charge of all supervision activities.

Questionnaires

QUESTIONNAIRES
Available in language of data collection for each country (i.e. Spanish, English, French).

High-Frequency Phone Survey (HFPS) - Phase 2 Sampling Design, Weighting, and Estimation

Title   High-Frequency Phone Survey (HFPS) - Phase 2 Sampling Design, Weighting, and Estimation
Language   English
Contributor(s) This document was prepared by Ramiro Flores Cruz, partner at Sistemas Integrales and World Bank consultant on survey methodology and sampling, with the financial support from the Latin American and Caribbean Regional Vice Presidency
Description This document describes the sampling design, weighting and the right procedure to estimate indicators for the LAC HFSP Phase 2 surveys. For the sake of clarity, countries participating in Phase 1 in 2020 will be called Original Countries. The countries added in Phase 2 in 2021 will be called Added Countries.
