## Identification

### SURVEY ID NUMBER

VNM\_2021\_HFPS-R6\_v01\_M

### TITLE

COVID-19 High Frequency Phone Survey of Households 2021 - Round 6

### COUNTRY/ECONOMY

Name	Country code
Vietnam	VNM

### STUDY TYPE

Socio-Economic/Monitoring Survey [hh/sems]

### SERIES INFORMATION

The main objective of this project is to collect household data for the ongoing assessment and monitoring of the socio-economic impacts of COVID-19 on households and family businesses in Vietnam. The estimated field work and sample size of households in each round is as follows:

Round 1 June/July 2020 fieldwork- approximately 6300 households (at least 1300 minority households)

Round 2 July/Aug 2020 fieldwork - approximately 4000 households (at least 1000 minority households)

Round 3 September 2020 - approximately 4000 households (at least 1000 minority households)

Round 4 January 2021- approximately 4000 households (at least 1000 minority households)

Round 5 March 2021 - - approximately 4000 households (at least 1000 minority households)

Additional rounds are under discussion.

### UNIT OF ANALYSIS

households

## Version

### VERSION DESCRIPTION

Anonymized dataset for public distribution.

### VERSION DATE

2022-08-02

## Coverage

### GEOGRAPHIC COVERAGE

National, regional

## Producers and sponsors

### PRIMARY INVESTIGATORS

Name
World Bank

### PRODUCERS

Name	Role
------	------

---------------------------------------	------------------------

## FUNDING AGENCY/SPONSOR

Name	Abbreviation	Role
World Bank	WB	Partially funded the activity
Department of Foreign Affairs and Trade of Australia	DFAT	Partially funded the activity

## Sampling

## SAMPLING PROCEDURE

The 2021 Vietnam COVID-19 High Frequency Phone Survey of Households (VHFPS) uses a nationally representative household survey from 2018 as the sampling frame. The 2018 baseline survey includes 46,980 households from 3132 communes (about 25% of total communes in Vietnam). In each commune, one EA is randomly selected and then 15 households are randomly selected in each EA for interview. We use the large module of to select the households for official interview of the VHFPS survey and the small module households as reserve for replacement.

After data processing, the final sample size for Round 6 is 3,938 households.

## WEIGHTING

The main steps for weight adjustment to ensure national and regional representativeness are:

- (1) Start with base weights from 2018 survey
- (2) HH selection and non-response adjustment using propensity score and probability of selection correction.
- (3) Post-stratification: Rescale weights to match national, region, urban/rural populations based on the 2019 population census.
- (4) Trim weights

## Data Collection

## DATES OF DATA COLLECTION

Start	End
2021-03-13	2021-03-31

## DATA COLLECTION MODE

Computer Assisted Telephone Interview [cati]

## SUPERVISION

World Bank

## Questionnaires

## QUESTIONNAIRES

The questionnaire for this round consisted of the following sections

- Section 2. Behavior
- Section 3. Health
- Section 4. Education
- Section 5. Employment (main respondent)
- Section 6. Coping
- Section 8. FIES
- Section 10. Opinion

Note: Some categorical responses have been merged in the anonymized data set for confidentiality.

## Access policy

### CONTACTS
