TITLE

Socio-economic Assessment of Refugees in Gozamir and Belom Camps 2015

COUNTRY/ECONOMY

Name	Country code
Chad	TCD

STUDY TYPE

Other Household Survey [hh/oth]

SERIES INFORMATION

UNHCR conducts socio-economic assessments of persons-of-concern (i.e. refugees, asylum-seekers, IDPs, etc.) in a variety of countries in order to inform and improve its programming with the goal of promoting self-reliance. While these assessments are not fully standardized and are tailored to their specific country context, the quantitative surveys share strong similarities in their design and objectives, and are therefore considered a survey series for the purpose of microdata documentation/archiving.

ABSTRACT

In 2014/2015, WFP and UNHCR, the Government's main partners in providing assistance to refugees, conducted a "socio-economic categorization" in select refugee camps in Chad. This dataset covers a total of 12,643 households in the Gozamir and Belom refugee camps.

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

Household and individual

Version

VERSION DESCRIPTION

Edited, anonymous dataset for public distribution.

VERSION DATE

2018-12-15

Scope

NOTES

The scope of this socio-economic assessment includes:

- Identification of the household
- Characteristics of the household head
- Livestock ownership
- Asset ownership
- Economic activity
- Debt

TOPICS

Topic
Livelihood & Social cohesion

KEYWORDS

Keyword
Refugees
Asylum seekers
Forced displacement

Sampling

SAMPLING PROCEDURE

The survey's objective was to deliver representative data of all refugees living in Chad's Gozamir and Belom refugee camps. The total population of refugees in these camps at the time of the survey was estimated at slightly below 13,000 households.

The survey applied a full-coverage (census) approach, i.e. no sample selection was made. The registration database served as the list frame. The total number of completed interviews was 12,643 households (7,393 in Gozamir and 5,250 in Belom).

While the original data collection took a full-coverage approach, the public-release version of the dataset contains a systematically drawn sub-sample of this original data for reasons of statistical disclosure control. The total sample size in the dataset presented for public release is 2,528 households (1,478 in Gozamir and 1,050 in Belom).

RESPONSE RATE

Information unavailable.

WEIGHTING

This dataset is self-weighting. Nevertheless, since the dataset presented here for public release contains only a sub-sample of the original data (see above), a uniform weights variable is provided in the data.

DATA EDITING

The dataset presented here has undergone light checking, cleaning and restructuring (data may still contain errors) as well as anonymization (includes removal of direct identifiers and sensitive variables, and grouping values of select variables). Moreover, it constitutes a sub-sample of the data originally collected.

CONFIDENTIALITY

No attempt will be made to identify respondents or microdata providers, and no use will be made of the identity of any person, facility or establishment discovered inadvertently. Any such discovery would immediately be reported to UNHCR, to allow evaluation of further use, apply further statistical disclosure control methods, impose further restrictions on access, or appropriately re-classify the data. No attempt will be made to create links between datasets provided by UNHCR, or between UNHCR data and other datasets that could identify individuals or organizations.

CITATION REQUIREMENTS
