

Egypt, Arab Rep. - Population Housing and Establishment Census 1996 - IPUMS Subset

**Central Agency for Public Mobilisation and Statistics, Minnesota Population Center
- University of Minnesota**

Report generated on: March 13, 2019

Visit our data catalog at: <http://microdata.worldbank.org>

Sampling

Sampling Procedure

MICRODATA SOURCE: Central Agency for Public Mobilisation and Statistics

SAMPLE DESIGN: Sample of private households drawn by Egyptian statistical office. Sample method unknown.

SAMPLE UNIT: Household

SAMPLE FRACTION: 10%

SAMPLE SIZE (person records): 5,902,243

Weighting

Calculated by MPC based on village population totals. Use of weights is strongly advised.

Questionnaires

Overview

Special Households Questionnaires; Public Living Quarters Questionnaire; Household and Housing Condition Questionnaire

Data Collection

Data Collection Dates

Start	End	Cycle
1996-11-18	1996-11-19	N/A

Time Periods

Start	End	Cycle
1996-11-18	1996-11-19	N/A

Data Collection Mode

Face-to-face [f2f]

DATA COLLECTION NOTES

De facto, CENSUS DAY: November 18/19, 1996

SUPERVISION

Direct enumeration

Data Processing

No content available

Data Appraisal

No content available

File Description

Variable List

EGY1996-H-H

Content	Household records
Cases	0
Variable(s)	83
Structure	Type: relational Keys: SERIAL(Household serial number)
Version	Version 6.4, IPUMS sample
Producer	Minnesota Population Center
Missing Data	

Variables

ID	Name	Label	Type	Format	Question
V1	RECTYPE	Record type	discrete	character	
V2	YEAR	Year	discrete	numeric	
V3	SAMPLE	IPUMS sample identifier	discrete	numeric	
V4	SERIAL	Household serial number	contin	numeric	
V5	PERSONS	Number of person records in the household	contin	numeric	
V6	SUBSAMP	Subsample number	discrete	numeric	
V7	GQ	Group quarters (collective dwelling) status	discrete	numeric	
V8	UNREL	Number of unrelated persons	discrete	numeric	
V9	URBAN	Urban-rural status	discrete	numeric	
V10	REGIONW	Continent and region of country	discrete	numeric	
V11	WATSUP	Water supply	discrete	numeric	
V12	SEWAGE	Sewage	discrete	numeric	
V13	AUTOS	Automobiles available	discrete	numeric	
V14	AIRCON	Air conditioning	discrete	numeric	
V15	WASHER	Clothes washing machine	discrete	numeric	
V16	FREEZER	Food freezer	discrete	numeric	
V17	REFRIG	Refrigerator	discrete	numeric	
V18	TV	Television set	discrete	numeric	
V19	VCR	Videocassette recorder	discrete	numeric	
V20	ROOMS	Number of rooms	discrete	numeric	
V21	KITCHEN	Kitchen or cooking facilities	discrete	numeric	
V22	TOILET	Toilet	discrete	numeric	
V23	BATH	Bathing facilities	discrete	numeric	
V24	HHTYPE	Household classification	discrete	numeric	
V25	NFAMS	Number of families in household	discrete	numeric	
V26	HEADLOC	Head's location in household	contin	numeric	

ID	Name	Label	Type	Format	Question
V27	GEOLEV1	1st subnational geographic level, world [consistent boundaries over time]	discrete	numeric	
V28	EG1996A_0001	Dwelling number	contin	numeric	Dwelling number
V29	EG1996A_0006	Number of persons in household	discrete	numeric	Number of persons in household
V30	EG1996A_0016	Dwelling created by splitting apart a large dwelling or household	discrete	numeric	Dwelling created by splitting apart a large dwelling or household
V31	EG1996A_0018	Number of persons in large household before it was split	discrete	numeric	Number of persons in large household before it was split
V32	EG1996A_0020	Governorate	discrete	numeric	Governorate: ____ City: ____ District/Markaz: ____ Shyakh/Village: ____ Enumeration area number: ____ Road/Hamlet name: ____ Road/Hamlet number: ____ Block number: ____ Building number or owner's name: ____ Census building number: ____ Household serial number: ____
V33	EG1996A_0023	Urban or rural area	discrete	numeric	Governorate: ____ City: ____ District/Markaz: ____ Shyakh/Village: ____ Enumeration area number: ____ Road/Hamlet name: ____ Road/Hamlet number: ____ Block number: ____ Building number or owner's name: ____ Census building number: ____ Household serial number: ____
V34	EG1996A_0040	Dwelling type	discrete	numeric	Type of housing unit <input type="checkbox"/> 1 Apartment <input type="checkbox"/> 2 More than one apartment <input type="checkbox"/> 3 Villa <input type="checkbox"/> 9 Other
V35	EG1996A_0041	Tenure status	discrete	numeric	Occupancy status <input type="checkbox"/> 1 Rented <input type="checkbox"/> 2 Furnished <input type="checkbox"/> 3 Owned <input type="checkbox"/> 6 Granted <input type="checkbox"/> 7 Other
V36	EG1996A_0042	Source of water	discrete	numeric	Source of water <input type="checkbox"/> 1 Piped public system <input type="checkbox"/> 2 Pump <input type="checkbox"/> 3 Well <input type="checkbox"/> 9 Other
V37	EG1996A_0043	Connection with water supply system	discrete	numeric	Water supply system <input type="checkbox"/> 1 Tap inside house <input type="checkbox"/> 2 Tap inside building <input type="checkbox"/> 3 None
V38	EG1996A_0044	Connection with sewage facilities	discrete	numeric	Connection with sewage facilities
V39	EG1996A_0045	Main type of lighting	discrete	numeric	Main type of lighting <input type="checkbox"/> 1 Electricity <input type="checkbox"/> 2 Kerosene <input type="checkbox"/> 3 Butane <input type="checkbox"/> 4 Other
V40	EG1996A_0046	Fuel used: butane	discrete	numeric	Fuel and energy used <input type="checkbox"/> 1 Butane <input type="checkbox"/> 2 Natural gas <input type="checkbox"/> 3 Kerosene <input type="checkbox"/> 4 Electricity <input type="checkbox"/> 5 Other
V41	EG1996A_0047	Fuel used: natural gas	discrete	numeric	Fuel and energy used <input type="checkbox"/> 1 Butane <input type="checkbox"/> 2 Natural gas <input type="checkbox"/> 3 Kerosene <input type="checkbox"/> 4 Electricity <input type="checkbox"/> 5 Other
V42	EG1996A_0048	Fuel used: kerosene	discrete	numeric	Fuel and energy used <input type="checkbox"/> 1 Butane <input type="checkbox"/> 2 Natural gas <input type="checkbox"/> 3 Kerosene <input type="checkbox"/> 4 Electricity <input type="checkbox"/> 5 Other
V43	EG1996A_0049	Energy used: electricity	discrete	numeric	Fuel and energy used <input type="checkbox"/> 1 Butane <input type="checkbox"/> 2 Natural gas <input type="checkbox"/> 3 Kerosene <input type="checkbox"/> 4 Electricity <input type="checkbox"/> 5 Other
V44	EG1996A_0050	Fuel or energy used: other	discrete	numeric	Fuel and energy used <input type="checkbox"/> 1 Butane <input type="checkbox"/> 2 Natural gas <input type="checkbox"/> 3 Kerosene <input type="checkbox"/> 4 Electricity <input type="checkbox"/> 5 Other
V45	EG1996A_0051	Number of rooms	discrete	numeric	Number of rooms ____
V46	EG1996A_0052	Monthly rent in Egyptian pound	discrete	numeric	Monthly rent ____
V47	EG1996A_0053	Kitchen facility	discrete	numeric	Kitchen <input type="checkbox"/> 1 Private <input type="checkbox"/> 2 Shared <input type="checkbox"/> 3 None
V48	EG1996A_0054	Bathroom facility with toilet	discrete	numeric	Bathroom <input type="checkbox"/> 1 Private <input type="checkbox"/> 2 Shared <input type="checkbox"/> 3 None
V49	EG1996A_0055	Separate bathroom	discrete	numeric	Separate bathroom <input type="checkbox"/> 1 Private <input type="checkbox"/> 2 Shared <input type="checkbox"/> 3 None
V50	EG1996A_0056	Separate toilet	discrete	numeric	Separate toilet <input type="checkbox"/> 1 Private <input type="checkbox"/> 2 Shared <input type="checkbox"/> 3 None

ID	Name	Label	Type	Format	Question
V51	EG1996A_0057	Has a refrigerator	discrete	numeric	Domestic appliances [] 1 Electric refrigerators [] 2 Electric washing machine [] 3 T. V. black and white [] 4 T. V. color [] 5 Cooker [] 6 Water heater [] 7 Deep freezer [] 8 Video [] 9 Air conditioner [] 10 PC [] 11 Dish [] 12 None
V52	EG1996A_0058	Has an electric washing machine	discrete	numeric	Domestic appliances [] 1 Electric refrigerators [] 2 Electric washing machine [] 3 T. V. black and white [] 4 T. V. color [] 5 Cooker [] 6 Water heater [] 7 Deep freezer [] 8 Video [] 9 Air conditioner [] 10 PC [] 11 Dish [] 12 None
V53	EG1996A_0059	Has a black and white television	discrete	numeric	Domestic appliances [] 1 Electric refrigerators [] 2 Electric washing machine [] 3 T. V. black and white [] 4 T. V. color [] 5 Cooker [] 6 Water heater [] 7 Deep freezer [] 8 Video [] 9 Air conditioner [] 10 PC [] 11 Dish [] 12 None
V54	EG1996A_0060	Has a color television	discrete	numeric	Domestic appliances [] 1 Electric refrigerators [] 2 Electric washing machine [] 3 T. V. black and white [] 4 T. V. color [] 5 Cooker [] 6 Water heater [] 7 Deep freezer [] 8 Video [] 9 Air conditioner [] 10 PC [] 11 Dish [] 12 None
V55	EG1996A_0061	Has a cooker	discrete	numeric	Domestic appliances [] 1 Electric refrigerators [] 2 Electric washing machine [] 3 T. V. black and white [] 4 T. V. color [] 5 Cooker [] 6 Water heater [] 7 Deep freezer [] 8 Video [] 9 Air conditioner [] 10 PC [] 11 Dish [] 12 None

V171	COUNTRYP	Country [person version]	contin	numeric	
V172	RECTYPEP	Record type [person version]	discrete	character	

Record type (RECTYPE)

File: EGY1996-H-H

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 0
Invalid: 0

Description

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

Year (YEAR)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 4
Decimals: 0
Range: 1960-2011

Valid cases: 0
Invalid: 0

Description

YEAR gives the year in which the census was taken.

IPUMS sample identifier (SAMPLE)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 9
Decimals: 0
Range: 32197001-894201001

Valid cases: 0
Invalid: 0

Description

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g., 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

Household serial number (SERIAL)

File: EGY1996-H-H

Household serial number (SERIAL)

File: EGY1996-H-H

Overview

Type: Continuous
Format: numeric
Width: 10
Decimals: 0

Valid cases: 0
Invalid: 0

Description

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002
Colombia 1993, 2005
Costa Rica 1984, 2000
Cuba 2002
Dominican Republic 1981, 2002, 2010
Ecuador 1990, 2001
Germany 1971
Hungary 1980, 1990, 2001
Jamaica 1982, 1991, 2001
Malaysia 1970, 1991, 2000
Mexico 1995, 1990, 2000, 2005
Nigeria 2006
Panama 2000
Peru 1993, 2007
Portugal 1981, 1991, 2001
Spain 1991
Uruguay 2011
Venezuela 1990, 2001
Vietnam 1989

In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

Number of person records in the household (PERSONS)

File: EGY1996-H-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0
Invalid: 0

Description

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

Subsample number (SUBSAMP)

File: EGY1996-H-H

Subsample number (SUBSAMP)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

Group quarters (collective dwelling) status (GQ)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

Number of unrelated persons (UNREL)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

UNREL indicates the number of persons in the household who are unrelated to the head.

Urban-rural status (URBAN)

File: EGY1996-H-H

Overview

Urban-rural status (URBAN)

File: EGY1996-H-H

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 0
Invalid: 0

Description

URBAN indicates whether the household was located in a place designated as urban or as rural.

Continent and region of country (REGIONW)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 11-54

Valid cases: 0
Invalid: 0

Description

REGIONW identifies the continent and region of each country.

Water supply (WATSUP)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

WATSUP describes the physical means by which the housing unit receives its water. The primary distinction is whether or not the household had piped (running) water.

Sewage (SEWAGE)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

SEWAGE indicates whether the household has access to a sewage system or septic tank.

Automobiles available (AUTOS)

File: EGY1996-H-H

Overview

Automobiles available (AUTOS)

File: EGY1996-H-H

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

AUTOS records whether a member of the household owned or had use of a vehicle and, in many samples, the number of such vehicles.

Air conditioning (AIRCON)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

This variable indicates whether the household had air conditioning.

Clothes washing machine (WASHER)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

WASHER indicates whether the household had a clothes washing machine.

Food freezer (FREEZER)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

FREEZER indicates whether the household had a food freezer separate from a refrigerator.

Refrigerator (REFRIG)

File: EGY1996-H-H

Overview

Refrigerator (REFRIG)

File: EGY1996-H-H

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

REFRIG indicates whether the household had a refrigerator.

Television set (TV)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

TV indicates whether the household had a television.

Videocassette recorder (VCR)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

VCR indicates whether the household had a videocassette recorder or similar device.

Number of rooms (ROOMS)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

ROOMS indicates the number of rooms occupied by the housing unit.

Kitchen or cooking facilities (KITCHEN)

File: EGY1996-H-H

Overview

Kitchen or cooking facilities (KITCHEN)

File: EGY1996-H-H

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

KITCHEN indicates whether the household had a kitchen, cooking facilities, or room dedicated to food preparation.

Toilet (TOILET)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

TOILET indicates whether the household had access to a toilet and, in most cases, whether it was a flush toilet or other type of installation.

Bathing facilities (BATH)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

BATH indicates whether the household had access to bathing facilities and, in most cases, whether it had exclusive access.

Household classification (HHTYPE)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

HHTYPE is a constructed variable that describes the composition of households.

HHTYPE is constructed from information in RELATE (relationship to head), from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father), and from information on group quarters status, GQ.

Number of families in household (NFAMS)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

NFAMS is a constructed variable that indicates the number of families within each household. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and her servant contains two families; a household consisting of a large, multiple-generation extended family with no lodgers or servants would count as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

Head's location in household (HEADLOC)

File: EGY1996-H-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0
Invalid: 0

Description

HEADLOC gives the person number of the head of household in samples in which persons are organized into households.

1st subnational geographic level, world [consistent boundaries over time] (GEOLEV1)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 6
Decimals: 0
Range: 32002-894010

Valid cases: 0
Invalid: 0

Description

GEOLEV1 indicates the major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. First administrative units in GEOLEV1 have been spatiotemporally harmonized to provide spatially consistent boundaries across samples in each country.

Universe

All households

Literal question

Type of housing unit

- ☐ 1 Apartment
- ☐ 2 More than one apartment
- ☐ 3 Villa
- ☐ 9 Other

Interviewer instructions

1. The apartment building:
It is a building consist of one floor or more and there is more than one apartment in each floor
2. The dwelling:
It is a building consists of one floor or more and in each floor there is one apartment or room or more of the independent rooms.
3. Villa:
It is an independent building consists of two floors connected by interior stairs, it has garden and often the villa is a splendid type and it is considered one housing unit.
4. Rural house:
It is a building consists of one or two floors and it includes a room or more and they are all locked up by the building outer door and it is not necessary to have water circulation in it and this kind is usually spread in villages and it is often built with wet bricks or with clay, the rural house is considered one housing unit whatever the number of households is in it.

Type of building - column no. (3)

It is recorded in this column the answer and the proper code to the type of building for example: apartment building code (1) house code (2) rural house code (3) and so on according to what is explained at the top of the questionnaire regarding that: other includes buildings under construction and buildings under demolition the surrounded land and the not surrounded land that is used for work.

Tenure status (EG1996A_0041)

File: EGY1996-H-H

Width: 1
Decimals: 0
Range: 1-7

Valid cases: 0
Invalid: 0

Description

This variable indicates the tenure status of the dwelling.

Universe

All households

Literal question

Occupancy status

- ☐ 1 Rented
- ☐ 2 Furnished
- ☐ 3 Owned
- ☐ 6 Granted
- ☐ 7 Other

Interviewer instructions

Occupancy status:

Putting in ink the circle that is in front of one of the numbers from (1) to (6) according to the status and if neither of these status corresponds, the circle is put in front of the number (7) in ink as in the case of the ownership of a share in a living quarter by inheritance and renting the other part of it (owned by the rest heirs).

The following is regarded in choosing the type of occupancy status

1. Owned: this is when the household owns its living quarter by inheritance or as a result of buying a share in an estate or buying a whole estate or direct construction
2. Publicly owned: if the living quarter is bought by the currently used system investment with ownership and this system is sometimes done on a free housing unit
3. Grant: this is if the living quarter is owned free without money as a result of a special relation between the tenant and the owner of the housing unit for example, the owner may be father, mother, brother...etc.
4. In return of services: if the worker owns the living quarter free of cash money or pays little rent to the employer as a sample of his salary.

Source of water (EG1996A_0042)

Number of wives of head (EG1996A_0091)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-4

Valid cases: 0
Invalid: 0

Description

This variable indicates the number of wives the household head has.

Universe

All households

Literal question

14. Number of current wives ____

Interviewer instructions

The number of current wives column No.(14)

Record for the married male the number of his current wives at the time of enumeration and the female that is contractually married is counted within this number. Put (-) in any of the following cases:

for male (18 years and over) and never married
for all female even those who are less than marriage age
for male less than (18 years) and never married write underage

Household weight (EG1996A_0093)

File: EGY1996-H-H

Overview

Strata

Household weight (HHWT)

File: EGY1996-H-H

Overview

Type: Continuous
Format: numeric
Width: 8
Decimals: 2

Valid cases: 0
Invalid: 0

Description

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

Egypt, Governorate 1996 - 2006 [Level 1; consistent boundaries, GIS] (GEO1_EG)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 6
Decimals: 0
Range: 818001-818035

Valid cases: 0
Invalid: 0

Description

Egypt, Governorate 1996 - 2006 [Level 1; consistent boundaries, GIS] (GEO1_EG)

File: EGY1996-H-H

GEO1_EG identifies the household's governorate (geographical area) within Egypt in all sample years. Governorates are the first level administrative units of the country. GEO1_EG is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO1_EG can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Egypt can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

At the present moment, IPUMS International is only releasing integrated geography for the first level of geography for Egypt. Year specific geography and maps along with variables that are spatially harmonized at the second level of geography and account for political boundary changes across census years will become available in the near future.

Egypt, District 1996 - 2006 [Level 2; inconsistent boundaries, harmonized by name] (GEO2_EGX)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 4
Decimals: 0
Range: 101-3599

Valid cases: 0
Invalid: 0

Description

GEO2_EGX identifies the household's district (qism/markaz) within Egypt in all sample years. Districts are the second level administrative units of the country, after governorates. GEO2_EGX is harmonized by name and does not account for boundary changes over time.

The full set of geography variables for Egypt can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

At the present moment, IPUMS International is only releasing integrated geography for the first level of geography for Egypt. Year specific geography and maps along with variables that are spatially harmonized at the second level of geography and account for political boundary changes across census years will become available in the near future.

Number of married couples in household (NCOUPLES)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

NCOUPLES is a constructed variable indicating the number of married/in-union couples within a household.

NCOUPLES is constructed using the IPUMS-International pointer variable SPLOC (spouse's location in the household).

Number of mothers in household (NMOTHERS)

File: EGY1996-H-H

Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 0-9	

Description

NMOTHERS is a constructed variable indicating the number of mothers -- of persons of any age -- within a household.

NMOTHERS is constructed using the IPUMS-International pointer variable MOMLOC (mother's location in the household).

Number of fathers in household (NFATHERS)

File: EGY1996-H-H

Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 0-9	

Description

NFATHERS is a constructed variable indicating the number of fathers -- of persons of any age -- within a household.

NFATHERS is constructed using the IPUMS-International pointer variable POPLOC (father's location in the household).

Country (COUNTRY)

File: EGY1996-H-H

Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 3	
Decimals: 0	
Range: 32-894	

Description

COUNTRY gives the country from which the sample was drawn. The codes assigned to each country are those used by the UN Statistics Division and the ISO (International Organization for Standardization).

Electricity (ELECTRIC)

File: EGY1996-H-H

Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 0-9	

Description

ELECTRIC indicates whether the household had access to electricity.

Ownership of dwelling [general version] (OWNERSHIP)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

OWNERSHIP indicates whether a member of the household owned the housing unit. Households that acquired their unit with a mortgage or other lending arrangement were understood to "own" their unit even if they had not yet completed repayment. For those that did not own their housing unit, several options were possible: renting (from various types of owners), subletting, usufruct, and de facto occupation.

Ownership of dwelling [detailed version] (OWNERSHIPD)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Valid cases: 0
Invalid: 0

Description

OWNERSHIP indicates whether a member of the household owned the housing unit. Households that acquired their unit with a mortgage or other lending arrangement were understood to "own" their unit even if they had not yet completed repayment. For those that did not own their housing unit, several options were possible: renting (from various types of owners), subletting, usufruct, and de facto occupation.

Cooking fuel (FUELCOOK)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

FUELCOOK indicates the predominant type of fuel or energy used for cooking.

Computer (COMPUTER)

File: EGY1996-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

COMPUTER indicates whether the household had a personal computer.

Strata identifier (STRATA)

File: EGY1996-H-H

Overview

Type: Continuous

Format: numeric

Width: 12

Decimals: 0

Valid cases: 0

Invalid: 0

Description

This variable is the strata identifier for the sample. The STRATA variable provides information about the sample design that can be used to improve estimation.

Person number (PERNUM)

File: EGY1996-P-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0
Invalid: 0

Description

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

Mother's location in household (MOMLOC)

File: EGY1996-P-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0
Invalid: 0

Description

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships.

Father's location in household (POPLOC)

File: EGY1996-P-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0
Invalid: 0

Description

POPLOC is a constructed variable that indicates whether or not the person's father lived in the same household and, if so, gives the person number of the father (see PERNUM). POPLOC makes it easy for researchers to link the characteristics of children and their (probable) fathers.

The method by which probable child-father links are identified is described in PARRULE.

The general design of POPLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly.

Note: POPLOC identifies social relationships (such as stepfather and adopted father) as well as biological relationships. The variable STEPPOP is designed to identify some of these social relationships.

Spouse's location in household (SPLOC)

File: EGY1996-P-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0
Invalid: 0

Description

SPLOC is a constructed variable that indicates whether or not the person's spouse lived in the same household and, if so, gives the person number (PERNUM) of the spouse. SPLOC makes it easy for researchers to link the characteristics of (probable) spouses.

The method by which probable spouse-spouse links are identified is described in SPRULE.

The general design of SPLOC and other constructed variables is modeled on the methods developed for IPUMS-USA "Family Interrelationships", but the details vary significantly.

Rule for linking parent (PARRULE)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-52

Valid cases: 0
Invalid: 0

Description

PARRULE describes the criteria by which the IPUMS-International variables MOMLOC and POPLOC linked the person to a probable mother and/or father.

IPUMS-International establishes child-parent links according to five basic rules, and PARRULE gives the number of the rule that applied to the link in question. A link to any parent automatically generates a second link to that parent's spouse or partner, so only one rule is needed to describe both MOMLOC and POPLOC.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

Rule for linking spouse (SPRULE)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-6

Valid cases: 0
Invalid: 0

Description

SPRULE explains the criteria by which the IPUMS-International variable SPLOC linked the person to his/her probable spouse.

IPUMS-International establishes spouse-spouse links according to five basic rules, and SPRULE gives the number of the rule that applied to the link in question. A sixth rule identifies sample-specific linking procedures only imposed in selected instances.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

Probable stepmother (STEPMOM)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-6

Valid cases: 0
Invalid: 0

Description

STEPMOM indicates whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEPMOM explain why it is probable that the person's mother was a step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household.

The codes for STEPMOM are as follows:

- 0 = Biological mother or no mother of this person present in household.
- 1 = Mother has no children borne or surviving.
- 2 = Child reports mother is deceased.
- 3 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner, stepchild/child-in-law).
- 4 = Mother reports no children in the home.
- 5 = Age difference between mother and child was less than 12 or greater than 54 years.
- 6 = Child exceeds known fertility of mother.

See PARRULE for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEPMOM will always under-represent their actual number in the population.

Probable stepfather (STEPPOP)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-3

Valid cases: 0
Invalid: 0

Description

STEPPOP indicates whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPPOP explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household.

The codes for STEPPPOP are as follows:

- 0 = Biological father or no father of this person present in household.
- 1 = Child reports father is deceased.
- 2 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner; stepchild/child-in-law).
- 3 = Age difference between father and child was less than 12 or greater than 54 years.

See PARRULE for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPPOP will always under-represent their actual number in the population.

Man with more than one wife linked (POLYMAL)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-1

Valid cases: 0
Invalid: 0

Description

POLYMAL indicates if a man had more than one wife linked to him in the constructed IPUMS variable SPLOC -- Spouse's Location in Household.

The point of POLYMAL is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

Woman is second or higher order wife (POLY2ND)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-1

Valid cases: 0
Invalid: 0

Description

POLY2ND indicates if a woman was the second or higher order wife linked to a husband in the constructed IPUMS variable SPLOC -- Spouse's Location in Household. The variable does not suggest the actual marital order of wives, only their relative positions in the person order of the household as it was enumerated.

The point of POLY2ND is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

Family unit membership (FAMUNIT)

File: EGY1996-P-H

Overview

Type: Continuous
Format: numeric
Width: 2
Decimals: 0

Valid cases: 0
Invalid: 0

Description

FAMUNIT is a constructed variable indicating to which family within the household a person belongs.

All persons related to the household head receive a 1 (see RELATE). Each secondary family or secondary individual receives a higher code. For purposes of FAMUNIT, secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

Number of own family members in household (FAMSIZE)

File: EGY1996-P-H

Overview

Number of own family members in household (FAMSIZE)

File: EGY1996-P-H

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 1-99

Valid cases: 0
Invalid: 0

Description

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

Number of own children in household (NCHILD)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

NCHILD provides a count of the person's own children living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

Number of own children under age 5 in household (NCHLT5)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

NCHLT5 provides a count of the person's own children under age five living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

Age of eldest own child in household (ELDCH)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Age of eldest own child in household (ELDCH)

File: EGY1996-P-H

Description

ELDCH gives the age of the person's oldest own child living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

ELDCH is top-coded at age 50 or older.

Age of youngest own child in household (YNGCH)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

YNGCH gives the age of the person's youngest own child living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

YNGCH is top-coded at age 50 or older.

Relationship to household head [general version] (RELATE)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 0
Invalid: 0

Description

RELATE describes the relationship of the individual to the head of household (sometimes called the householder or reference person).

Relationship to household head [detailed version] (RELATED)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 4
Decimals: 0
Range: 1000-9999

Valid cases: 0
Invalid: 0

Description

RELATED describes the relationship of the individual to the head of household (sometimes called the householder or reference person).

Age (AGE)

File: EGY1996-P-H

Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 3	
Decimals: 0	
Range: 0-999	

Description

AGE gives age in years as of the person's last birthday prior to or on the day of enumeration.

Age, grouped into intervals (AGE2)

File: EGY1996-P-H

Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 1-98	

Description

AGE2 gives computed years of age grouped into intervals.

Sex (SEX)

File: EGY1996-P-H

Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 1-9	

Description

SEX reports the sex (gender) of the respondent.

Marital status [general version] (MARST)

File: EGY1996-P-H

Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 0-9	

Description

[program universe for et,mz samples.

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

Marital status [detailed version] (MARSTD)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Valid cases: 0
Invalid: 0

Description

[program universe for et,mz samples.

MARSTD describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

Polygamous union (POLYGAM)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

POLYGAM indicates whether the respondent was in a polygamous union and, in some samples, the number of wives or the rank order of the wife.

Year of birth (BIRTHYR)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 4
Decimals: 0
Range: 0-9999

Valid cases: 0
Invalid: 0

Description

BIRTHYR gives the person's year of birth.

Month of birth (BIRTHMO)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 1-99

Valid cases: 0
Invalid: 0

Description

BIRTHMO indicates the person's month of birth.

Governorate of birth, Egypt (BPLEG)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 1-99

Valid cases: 0
Invalid: 0

Description

BPLEG indicates the person's governorate of birth within Egypt.

Citizenship (CITIZEN)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 0
Invalid: 0

Description

CITIZEN indicates the person's citizenship status within the country in which they were enumerated.

Country of citizenship (NATION)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 5
Decimals: 0
Range: 0-99999

Valid cases: 0
Invalid: 0

Description

NATION indicates the person's country of citizenship.

Literacy (LIT)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

LIT indicates whether or not the respondent could read and write in any language. A person is typically considered literate if he or she can both read and write. All other persons are illiterate, including those who can either read or write but cannot do both.

Activity status (employment status) [general version] (EMPSTAT)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

Activity status (employment status) [detailed version] (EMPSTATD)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Valid cases: 0
Invalid: 0

Description

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Occupation, ISCO general (OCCISCO)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 1-99

Valid cases: 0
Invalid: 0

Description

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is typically the one in which the person had spent the most time or earned the most money.

Industry, general recode (INDGEN)

File: EGY1996-P-H

Industry, general recode (INDGEN)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Valid cases: 0
Invalid: 0

Description

INDGEN recodes the industrial classifications of the various samples into twelve groups that can be fairly consistently identified across all available samples. The groupings roughly conform to the International Standard Industrial Classification (ISIC). The third digit of INDGEN retains important detail among the service industries that could not be consistently distinguished in all samples.

"Industry" refers to the activity or product of the establishment or sector in which a person worked.

Industry, unrecoded (IND)

File: EGY1996-P-H

Overview

Type: Continuous
Format: numeric
Width: 5
Decimals: 0

Valid cases: 0
Invalid: 0

Description

"Industry" refers to the activity or product of the establishment or sector in which the person worked. IND is classified according to the system used by the respective national census office at the time, and is not recoded by IPUMS-International.

Status in employment (class of worker) [general version] (CLASSWK)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

Status in employment (class of worker) [detailed version] (CLASSWKD)

File: EGY1996-P-H

Overview

Status in employment (class of worker) [detailed version] (CLASSWKD)

File: EGY1996-P-H

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Valid cases: 0
Invalid: 0

Description

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

Sector of employment (EMPSECT)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

EMPSECT indicates the economic sector in which the person was employed. Economic sector is defined in terms of ownership or control of the enterprise in which the person worked.

Governorate of previous residence, Egypt (MIGEG)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

MIGEG indicates the person's governorate of previous residence in Egypt. The migration could have occurred at any time in the past.

Employment disability (DISEMP)

File: EGY1996-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 0
Invalid: 0

Description

DISEMP indicates if the respondent was economically inactive because of disabilities.

Blind or vision-impaired (DISBLND)

File: EGY1996-P-H

Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 0-9	

Description

DISBLND indicates whether the person was blind or had limited vision.

All persons

Literal question

2. Relationship to the head of the household

___ [Person No. 1 is "Head of the H.H."]

Interviewer instructions

Relation to the head of the household column No.(2)

The enumerator has recorded in this column for the first person in the household the word head of a household, he has to record the relationship of each person of the household persons to the head of the household and that is from person No.(2) in it:

(Husband or wife, son, daughter, father, mother, grandson, granddaughter, brother, sister, son in law, daughter in law, other relationships, no relationship, porter)

If the person is present temporarily within the household members either relative or not the word (visitor) is recorded for him near the relationship to the head of the household if there is any.

Example: brother (visitor) daughter (visitor) no relationship (visitor)

The children of the head of the household who are not from his wife but, they are present within the members of the household are distinguished by writing (son and daughter from another wife)

The wife's children who are present with the household but, they are from a husband who is not its head, they are distinguished by writing (the wife's son or daughter)

The household that its members increases than (7) persons, the data of its persons is completed in the next questionnaire with modifying the printed serial numbers in front of the person's data in the next questionnaire beginning from (8) instead of (1) and so on till the last person in the questionnaire.

The printed word head of the household is omitted from the first column which is specified for person's data column (8) and recorded instead of it the relation to the head of the household.

Notice: begin filling all data for each person vertically after column No.(2)

Range: 2-99

Valid cases: 0
Invalid: 0

Description

This variable indicates the person's employment status.

Universe

Persons age 6+

Literal question

Persons six years and over
[Questions 8-11 were asked of persons 6 years and over.]

8. Employment status

- ☐ 1 Under age
- ☐ 2 Employer
- ☐ 3 Self-employed
- ☐ 4 Employee
- ☐ 5 Unpaid worker
- ☐ 6 Seeking work (old)
- ☐ 7 Seeking work (new)
- ☐ 8 Student
- ☐ 9 Housewife
- ☐ 10 Not willing to work
- ☐ 11 Retired
- ☐ 12 Aged not working
- ☐ 13 Unable to work

Interviewer instructions

The employment status column No.(8)
For the person less than (6) years fill in ink the circle in front of No.(1)
For the person six years and over fill in ink the circle:

In front of No.(2) for the employer
In front of No.(3) for the person who is working for his own account (self employed)
In front of No.(4) is for the paid worker who is working to other or to his relatives (employee)
In front of No.(5) for unpaid worker
In front of No.(6) the person who is seeking work but he was previously working
In front of No.(7) is for the person who is seeking for work but, he has no previous work
In front of No.(8) is for student
In front of No.(9) is for the housewife
In front of No.(10) is for the person who is able to work but, he is unwilling
In front of No.(11) is for the retired person because of age (60 years but he does not reach 65) and he is not working now, he is either willing or unwilling.
If the retired person after the legal age is working, the proper employment status is given to him, and not No.(11) as retired is given to him, if he is able to work, it is given to him the proper employment status that he is practicing after finishing his first job
In front of No.(12) for the person whose age is 65 and over and he is not working
In front of No.(13) for the person (6) years and more and less than 65 years and he is not working because he is unable to work

Description

This variable indicates the place of this person's work. It indicates whether the person works inside or outside the establishment.

Universe

Persons age 6+ who are economically active

Literal question

Persons six years and over
 [Questions 8-11 were asked of persons 6 years and over.]

9. Name of establishment the person is working in ____

Interviewer instructions

Place of work (EG1996A_0412)

File: EGY1996-P-H

17. Establishment:

It is a fixed place where an economical activity is practiced and it is owned by a person either natural or artificial. The following bases should be available in this definition:

The establishment must be in a fixed place; therefore, the moveable things in which work is done are not considered establishments only if it loses the specialty of movement and it is fixed on earth or on water.

The establishment practices an economical activity such as to present goods or service to others.

It is owned by one person either a person or a company between persons or an artificial personality.

Generally the following must be regarded on applying this definition:

if there are many buildings surrounded by a fence, they are considered one establishment on condition that the activity done in this establishment must be one activity and owned by one person but, if among these buildings inside the fence free-standing buildings for workers' services, for example a mosque, hospital, club, or cinema, each one is considered an independent establishment in addition to the main establishment.

If there is more than one place within the building (more than a shop or more than an apartment or a shop and an apartment or more) occupied by an establishment for one owner and practices one economical activity, all these places are considered one establishment.

If there is more than an activity run in one place (inside a shop or inside an apartment for example) each activity is run by one independent owner is considered an independent establishment.

If there is more than economical activity run in one place (inside a shop or inside an apartment) and these activities are held by one owner; therefore, each activity is considered an independent establishment on condition of the availability of records which enable to separate these activities and if the process of separation is impossible it is all considered one establishment.

Some explanation on establishment definition:

The railway station with all its components is considered one establishment and also last vehicles station

The banks, post offices, telephone and telegraph offices that available inside the railway stations or some governmental offices or some public work sector companies are considered independent establishments as it offers services to others and also the buffets and the various stalls available in these places and they are used by others are considered independent establishments from the main establishments.

The buffets that are found in governmental offices and the like and run by the same people are not considered independent establishments.

If the place is occupied by two schools in two different periods and in different names, they are considered two independent establishments.

Notice: the following places are not considered establishments; they are not numbered and not included within establishments.

Listing:

Tombs without mosques, railway stalls, watching stalls, oratory with no ceiling, host houses, water taps, bridges, private garages, guards stalls in front of some buildings, telephone box, traffic police parks.

Work buildings:

The buildings which are basically constructed for work and an economical activity is practiced in it such as ministries, governmental offices, hospital, schools, petrol stations, hotels, theaters, asylums, prisons, stores, garages...etc.

Plan metric area:

It is either Shyaka, city or village or any part from any one of them and it contains a number of housing units in the limit of 1000 housing unit and surrounded with roads from all sides or in the case of villages are separated by natural landmarks such as a small river or a main road look at shape (1) and shape (2)

The name of the establishment that the person is working in column No(9)

Fill the circle in front of No.(1) for the person less than 6 years as underage for the person (6) years and over, follow the following:

The person who is working in an establishment, fill in the name of the establishment that he is working in such as (ministryschool... company... factory...etc.) and the circle No.(2) is filled in ink.

For those who are working outside the establishments such as hawker, farmer, daily building worker, taxi driver and all the persons that have no fixed working place. The circle in front of No.(3) is filled which is outside the establishments

It is recorded the name of the last establishment that the person working in and his employment status is seeking for work

The circle in front of No.(4) is filled unemployed for those whose employment status is one of the following: (newly unemployed, student, housewife, not willing to work, retired, unwilling to work, unable to work)

Work sector (EG1996A_0413)
