### ABSTRACT

Since 2017, the United Nations High Commissioner for Refugees (UNHCR) has been supporting durable solutions aimed at returns and reintegration through its Community based Protection and Solutions Programme Response (Co-PROSPER) in Priority Areas of Return and Reintegration (PARR).

Initially supporting 1,347,207 individuals in 20 PARR locations in 11 provinces, in 2021, the programme was then further expanded in December 2021 to an additional 1,423,775 individuals in another 20 PARR locations in 19 provinces. In order to establish a baseline for the population prior to intervention, IMPACT conducted a Socio-Economic Vulnerability Assessment (SEVA) of the 20 locations.

Between 22 November and 5 December 2021, IMPACT interviewed 2,031 households in each of the 20 new PARR locations on household vulnerabilities, community leadership inclusivity, service quality and access, livelihoods and economic outlook, and community relations and stability.

Key Informant (KIs) interviews were conducted to assess community leadership in each of the 20 new PARR locations to provide indicative information on infrastructure, service presence, stakeholder presence, and conditions faced by specific displacement groups in each site. The KI survey also aimed to provide additional information on each site and location to complement HH survey findings. Nine KIs were interviewed in each location (except for two locations where certain population groups were absent).

## Sampling

#### SAMPLING PROCEDURE

Key Informants (KIs) were interviewed to provide key demographic, sectoral, and accessibility information at the site level. In each location (except two where the population groups were absent) nine KIs were interviewed to provide in-depth insight. KI interview results are indicative, providing an indication of conditions faced by particular groups in each location, but did not provide a representative sample of the population. The key informants who took part in the KI interviews were selected due to their in-depth understanding of the PARR areas. These were local leaders who may have been selected either formally or informally, and represented either refugee-returnees, IDPs, host communities, or a combination of these three groups. As such it was aimed to have 3 KIs per population group, for approximately 9 interviews for each of the 20 PARR locations.
