Other Household Survey [hh/oth]

ABSTRACT

The UNHCR Standardized Expanded Nutrition Surveys (SENS) provide regular nutrition data that plays a key role in delivering effective and timely interventions to ensure good nutritional outcomes among populations affected by forced displacement.

The refugee complex of Dadaab is home to an estimate of 208,000 registered refugees of which the vast majority are Somalis who fled conflict and drought in their home country several decades ago. The Dadaab refugee complex is situated in northeastern Kenya, near the border with Somalia. Dadaab was established in the year 1991 following the beginning of the civil war in Somalia. Somalis were forced to flee as the war worsened, leaving to neighbouring countries including Kenya, Ethiopia and Sudan. Today, Dadaab is home to refugees from many countries in eastern and central Africa, including South Sudan, Burundi, Congo, Ethiopia, Eritrea and Somalia. Somali refugees make up more than 90% of the population. Until early 2017, it consisted of five refugee camps. However, one of the camps, Kambioos, which was also the newest, was closed in March 2017 as refugees began returning to Somalia and the few remaining moved into the other camps. Ifo 2 camp was closed in May 2018 in line with the camp consolidation approach, with refugees either moving to the other camps or being repatriated voluntarily. Refugees live in mud-walled houses with iron sheeting roofs, while some, especially new arrivals, live in tents.

The Standardised Expanded Nutrition Survey (SENS) was conducted in the 4 Dadaab refugee camps (Dagahaley, Ifo, Ifo 2 and Hagadera) between 28 August and 23 September 2017 by nutrition partners (MSF-Switzerland, Islamic Relief Kenya, International Rescue Committee and Kenya Red Cross) with overall coordination by UNHCR supported by WFP.

After the increase in the prevalence of GAM observed in 2016 (10.2% weighted prevalence of GAM in all camps from 8.1% in 2015), the 2017 SENS indicated weighted prevalence of GAM 9.7% which is close to what it was in 2016. The difference between the weighted prevalence of GAM in all the camps in 2016 and 2017 is not statistically significant. However, it is to be mentioned that the prevalence of GAM in Dagahaley, Hagadera, and Ifo 2 camp is 8.3%, 8.6%, and 9.4% which is classified as POOR nutrition situation, while in Ifo camp it is 12.7% classified as SERIOUS nutrition situation as per the WHO classification of the public health significance. Overall, weighted anaemia prevalence showed a sharp increase among children aged 6-59 months to 60.7%, up from 49.7% in 2016. This is well above the 40% of public health significance (critical threshold) and requires attention. In all camps, anaemia was well above the 40% of public health significance (critical threshold). The children 6-23 age group had the highest prevalence of anaemia; however, the prevalence in the children 24-35 age group was also very concerning as it was above the critical threshold in all camps.

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

Children 0-23 months

Children 6-59 months

Women 15-49 years

VERSION DESCRIPTION

Version 2.1: Edited, anonymous dataset for licensed distribution.

VERSION DATE

2018-01

Scope

NOTES

The scope of the survey includes:

- Children 0-23 months: feeding practices
- Children 6-59 months: prevalence of acute malnutrition, underweight, stunting and anaemia, coverage of vit A supplementation, and prevalence of diarrhoea
- Women 15-49 years: prevalence of anaemia
- Households: food security; WASH knowledge, attitudes and practices. WASH module is not available for Hagadera camp.

Sampling

SAMPLING PROCEDURE

A two-stage cluster survey with probability proportion to size sampling was employed in this survey. Standardized Monitoring and Assessment of Relief and Transitions (SMART) methodology to collect and analyse data on child anthropometry and UNHCR's Standardised Expanded Nutrition Survey (SENS) Guidelines for Refugee Populations was used to guide data collection for other indicators.

The same households sampled by SMART were used in all indicators. Anaemia sample was drawn from the SMART sample size, as recommended by the UNHCR Standardised Expanded Nutrition Survey (SENS) Guidelines. For each of the indicators used, households and individuals were sampled as follows:

Household-level indicators:

- WASH: every household
- Food Security: every other household
- Mosquito net: every other household

Individual-level indicators:

- Children 0-59 months: all eligible children in all households were assessed (based on the above calculations)
- Women 15-49: all eligible women in every other household were assessed.

The 2-stage cluster sampling method was used to select 30 clusters from each of the 3 camps. At the first stage, a list of blocks was made before the required number were selected using sampling with probability proportional to size (PPS) using ENA software. In nearly all cases, a cluster was the equivalent of a block. However, there were exceptions where, for some larger blocks, more than 1 cluster was selected. In this case, the blocks were split further to cater for more than one cluster. In the event that a selected block had more than 250 households, according to SMART guidance, segmentation was done, after which one of the segments was randomly selected to be the cluster.

All households in the selected clusters were labelled before data collection. At the second stage, the required number of households were selected using systematic random sampling from a list of households. A random number was selected between 1 and the sampling interval, which was calculated by dividing the total number of households in the cluster with the required number of households. The selected number became the first household to be surveyed. Subsequent households were selected by adding the sampling interval until the required number of households were completed. All eligible children below 5 years of age from all selected households were surveyed for the Child Anthropometry and Health, and Infant and Young Child Feeding (IYCF), and WASH. Half of the selected households were selected for the Food Security and Women questionnaire. The survey respondents were the primary caretakers of children below 5 years. Abandoned households were not included in the sampling frame. Absent households or households where children were absent were re-visited before the end of the day. If they were found to be empty, they were recorded as missing and were not replaced. Children who were in health centres at the time of the survey were recorded as absent.

Start	End
2017-08-28	2017-09-23

DATA COLLECTION MODE

Face-to-face [f2f]

DATA COLLECTION NOTES

A household was defined as: a group of people who live together and routinely eat out of the same pot. Where two families share the same pot, they were assessed as one household even if they lived in the same compound.

QUESTIONNAIRES

- 1) Children 6-59 months (SENS Modules 1-2): Anthropometric status, oedema, enrolment in selective feeding programmes and blanket feeding programmes (CSB++), immunisation (measles), vitamin A supplementation in last six months, deworming, morbidity from diarrhoea in past two weeks, haemoglobin assessment.
- 2) Children 0-23 months (SENS Module 3): Questions on infant and young children feeding practices.
- 3) Women 15-49 years (SENS Module 2): Pregnancy status, coverage of iron-folic acid pills and post-natal vitamin A supplementation, MUAC measurements for pregnant and lactating women (PLW), and haemoglobin assessment for non-pregnant women.
- 4) Food Security (SENS Module 4): Access and use of the general food ration (GFR), coping mechanisms when the GFR ran out ahead of time and household food dietary diversity using the food consumption score.
- 5) WASH (SENS Module 5): Water, sanitation and hygiene- Questions on quality and quantity of drinking water, satisfaction with the drinking water supply, and sanitation facilities

3	Water point is far
4	6

TOILET: What kind of toilet does this hh use?**Data file: HH WASH Dadaab 2017**

Overview

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: 1 - 3 Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
1	Simple latrine
2	Latrine without floor
3	No facility

TOILSHR: How many households share this toilet?

Data file: HH WASH Dadaab 2017

Overview

Valid: 0 Invalid: 0
 Type: Continuous Decimal: 0 Range: - Format: Numeric

TOILSHR_C: Number of households sharing the toilet

Data file: HH WASH Dadaab 2017

Overview

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: 1 - 5 Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
1	Not shared
2	Shared family (2HH)
3	Communal toilet
4	Public toilet
5	8

CHILD: Children less than 3 years old in the HH

Data file: HH WASH Dadaab 2017

Overview

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: 1 - 2 Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
1	Yes
2	No

STOOL: Where are child's stool disposed?

Data file: HH WASH Dadaab 2017

Overview

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: 1 - 5 Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
1	Child used latrine
2	Rinsed into latrine
3	Buried
4	Thrown into garbage
5	Left in the open

CONTAINER: # of containers to collect water

Data file: HH WASH Dadaab 2017

Overview

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: - Format: Numeric

X_TOT_LIT_DAY: Number of litres of water per day

Data file: HH WASH Dadaab 2017

Overview

Valid: 0 Invalid: 0
 Type: Continuous Decimal: 0 Range: - Format: Numeric

LPPPD: Liters per person per day**Data file: HH WASH Dadaab 2017****Overview**

Valid: 0 Invalid: 0

Type: Continuous Decimal: 0 Range: - Format: Numeric

STORE: Are the drinking containers covered or narrow necked?**Data file: HH WASH Dadaab 2017****Overview**

Valid: 0 Invalid: 0

Type: Discrete Decimal: 0 Range: 1 - 3 Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
1	All drinking containers covered/narrow necked
2	Some drinking containers covered/narrow necked
3	No drinking container covered/narrow necked

SURV_WEIGHT: Survey Weight**Data file: HH WASH Dadaab 2017****Overview**

Type: Discrete Decimal: 0 Range: - Format: Numeric

MEASLES: Has child been vaccinated agasint measles?**Data file: Infants Dadaab 2017**

Overview

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: - Format: Numeric

VITA: Has child received Vit. A capsule in last 6 months?

Data file: Infants Dadaab 2017

Overview

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: - Format: Numeric

DEWORM: Has child received deworming supplement in last 6 months?

Data file: Infants Dadaab 2017

Overview

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: - Format: Numeric

DIAR: Has child suffered from diarrhoea in last 2 weeks?

Data file: Infants Dadaab 2017

Overview

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: - Format: Numeric

CHHB: Child's haemoglobin (Hb) in g/dL ($\hat{A}\pm 0.1$ g/dL) or in g/L ($\hat{A}\pm 1$ g/L)

Data file: Infants Dadaab 2017

Overview

Valid: 0 Invalid: 0
 Type: Continuous Decimal: 0 Range: - Format: Numeric

REFER: If haemoglobin is <6, child is referred to clinic

Data file: Infants Dadaab 2017

Overview

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: - Format: Numeric

EVERBF: Has CHILD ever been breastfed?**Data file: Infants Dadaab 2017****Overview**

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: - Format: Numeric

INITBF: How long after birth did you put CHILD to breast?**Data file: Infants Dadaab 2017****Overview**

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: - Format: Numeric

YESTBF: Was CHILD breastfed yesterday?**Data file: Infants Dadaab 2017****Overview**

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: - Format: Numeric

WATER: Yesterday, was CHILD given WATER?**Data file: Infants Dadaab 2017****Overview**

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: - Format: Numeric

INFORM: Yesterday, was CHILD given INFANT FORMULA?**Data file: Infants Dadaab 2017****Overview**

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: - Format: Numeric

MILK: Yesterday, was CHILD given MILK/POWDERED MILK?**Data file: Infants Dadaab 2017****Overview**

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: - Format: Numeric

JUICE: Yesterday, was CHILD given JUICE?**Data file: Infants Dadaab 2017****Overview**

Valid: 0 Invalid: 0
Type: Discrete Decimal: 0 Range: - Format: Numeric

BROTH: Yesterday, was CHILD given BROTH?**Data file: Infants Dadaab 2017****Overview**

Valid: 0 Invalid: 0
Type: Discrete Decimal: 0 Range: - Format: Numeric

YOGURT: Yesterday, was CHILD given YOGURT?**Data file: Infants Dadaab 2017****Overview**

Valid: 0 Invalid: 0
Type: Discrete Decimal: 0 Range: - Format: Numeric

THINPOR: Yesterday, was CHILD given THIN PORRIDGE?**Data file: Infants Dadaab 2017****Overview**

Valid: 0 Invalid: 0
Type: Discrete Decimal: 0 Range: - Format: Numeric

WHTEACOF: Yesterday, was CHILD given TEA/COFFEE?**Data file: Infants Dadaab 2017****Overview**

Valid: 0 Invalid: 0
Type: Discrete Decimal: 0 Range: - Format: Numeric

WATLQD: Yesterday, was CHILD given ANY OTHER LIQUID?**Data file: Infants Dadaab 2017**

Overview

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: - Format: Numeric

FOOD: Yesterday, was CHILD given SOLID FOOD?

Data file: Infants Dadaab 2017

Overview

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: - Format: Numeric

FBF: Yesterday, was CHILD given CSB (fortified blended foods)?

Data file: Infants Dadaab 2017

Overview

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: - Format: Numeric

FBFSUPER: Yesterday, was CHILD given CSB+ (new FBF)?

Data file: Infants Dadaab 2017

Overview

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: - Format: Numeric

RUTF: Yesterday ate ready-to-use therapeutic food (RUTF)

Data file: Infants Dadaab 2017

Overview

Valid: 0 Invalid: 0
 Type: Discrete Decimal: 0 Range: - Format: Numeric
