ABSTRACT

The Maratane refugee camp was the only official settlement for asylum seekers and refugee in Mozambique since 2003, hosting 6,559 refugees (2,133 households). The majority of refugees were from the Great Lakes Region, namely Democratic Republic of the Congo, Rwanda and Burundi. The previous nutrition survey conducted in October 2010 found a stable level of acute malnutrition, but a high level of both chronic malnutrition amongst children, and anaemia amongst both children and adult women. UNHCR, in partnership with the Ministry of Health and WFP, conducted a nutrition survey in Maratane refugee camp between 22 and 30 September 2012.
