TITLE

Migration and Remittances Household Survey 2009

TRANSLATED TITLE

Enquête Migration et Transferts de Fonds 2009

COUNTRY/ECONOMY

Name	Country code
Senegal	SEN

STUDY TYPE

Other Household Survey [hh/oth]

SERIES INFORMATION

The EMTFS is part of a regional project of the World Bank in 6 countries in Sub-Saharan Africa. It collects national representative information in different countries on three types of households: households without migrants, households with households with internal migrants and international migrants. The main objective of this survey is to help improve knowledge about the flow of internal and international migration, and the impact of migration and remittances on economic and social situation of households.

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

- Household
- Individual

Scope

NOTES

The information collected through various modules of the survey provide information on:

- the characteristics and living conditions of households of migrants;
- the characteristics, motives, purpose and status of migrants;
- regularity, terms and volume of remittants;
- recipients and uses of transfers;
- the new life of return migrants.

The following topics are covered:

- Household Roster
- Housing Conditions
- Household Assets and Expenditure
- Household Use of Financial Services
- Internal and International Migration and Remittances from Former Household Members
- Internal and International Migration and Remittances from Non-Household Members
- Return Migrants
- Living Conditions of Return Migrants

Sampling

SAMPLING PROCEDURE

Random two stage sampling frame on 2100 households. First step : a selection of 100 districts with six sub strata : Dakar city high migration, Dakar city low migration , others urban high migration, other urban cities low migration, rural areas high migration and rural areas low migration. Second step : in each sub sector by distinction, selection of 21 households by group of household : 7 in the households without migrant, 7 in the household with internal migrant and 7 in the household with international migrant.

L'enquête migration sera réalisée sur un total de 2100 ménages, choisis parmi 100 districts de recensement (DR), dont 700 ménages sans migrants, 700 ménages avec migrants internes et 700 ménages avec migrants internationaux, se situant au niveau urbain et rural. La taille de l'échantillon dans chacun des 100 DR sera donc de 21 ménages composés de 7 ménages sans migrants, 7 ménages avec migrants internes et 7 ménages avec migrants internationaux.

NB : Pour l'enquête principale, si le recensement trouve dans un DR, moins de sept (7) ménages dans une catégorie quelconque, l'ensemble des ménages de cette catégorie devront être enquêtés.

La sélection des ménages à enquêter sera faite suivant un échantillonnage aléatoire à deux degrés, où en premier lieu on fera une sélection de 100 DR à l'intérieur desquels on choisira, de manière aléatoire, 21 ménages selon la méthodologie suivante :

- Dans la première étape, on classera les districts de recensement en tenant compte du pourcentage de ménages avec des migrants internationaux en deux groupes : ceux avec forte migration (25% ou plus de ménages avec migrants) et ceux à faible migration (moins de 25% de ménages avec migrants). A cet effet, on utilisera l'information provenant du Recensement Général de la population de 2002.
- Dans la deuxième étape, on choisit la liste des 100 DR où seront tirés les ménages à enquêter en sélectionnant 70% des DR à forte migration et 30% des DR à faible migration à l'intérieur de trois strates, à savoir : Dakar Urbain, Autre Urbain et Rural.
- Dans la troisième étape, un recensement rapide des ménages dans chaque DR sera effectué pour classer les ménages en trois groupes : les ménages sans migrants, les ménages avec migrants internes et les ménages avec migrants

internationaux.

- Enfin, les ménages seront choisis au hasard à l'intérieur des strates mentionnées. Dans chaque unité de recensement, le superviseur sélectionnera 21 ménages répartis en trois catégories: sans migrant (7), avec migrants internes (7), avec migrants internationaux (7) ou mixtes (migrant interne et internationaux).

Le processus de sélection des ménages pour les interviews sera le suivant :

- Dans chaque unité de recensement, le superviseur énumérera séquentiellement les ménages dans chacune des trois catégories. Il déterminera ensuite les ménages à sélectionner dans chaque unité de recensement en divisant le nombre total de ménages dans chaque catégorie de l'unité de recensement par le nombre de ménages à interviewer dans chacune de ces catégories. Pour chaque catégorie de ménages, le superviseur déterminera le premier ménage à sélectionner pour l'enquête en choisissant au hasard un nombre compris entre 1 et le pas de sélection (7).
- Pendant l'interview, chaque enquêteur aura un formulaire d'inscription lui permettant d'identifier concrètement les ménages à enquêter dans cette unité de recensement. L'enquêteur va localiser ces ménages au sein de l'unité de recensement et commencer les entretiens dès que possible.
- S'il n'est pas possible pour l'enquêteur d'interviewer un des ménages sélectionnés, il doit en discuter avec le superviseur qui va, si nécessaire, donner à l'enquêteur des instructions pour le remplacement du ménage.

Data Collection

DATES OF DATA COLLECTION

Start	End
2009-10	2009-11

DATA COLLECTION MODE

Face-to-face [f2f]

SUPERVISION

One controller per team and 4 global supervisors. Supervisors are from the team staff. Supervisors visit some times the teams and keep regular contact with them.

DATA COLLECTION NOTES

One (1) general supervisor who provides the technical coordination of the investigation and ensures the quality of the collection. Three (4) supervisors, 20 interviewers and 4 controllers.

Difficulties : absence of household responder, some missing data, difficulties in good valuation.

Main off the difficulties was solved. Our solution was to contact again household, by phone and visit again to complete the questionnaire. But some household did not give information on the expenditures.

Questionnaires

QUESTIONNAIRES

The original version of the question was designed in English by the World Bank Migration and Remittance Team. The survey implementation team staff has translated it in french, adapted some questions to the Senegal realities and add new questions in the original section and a all specific section on the new life of the return migrant. After a pilote test some changes was done.

Data Processing

DATA EDITING

Data have been cleaned and edited using STATA software. All the codes and frequencies of the variables are available.

Access policy

CITATION REQUIREMENTS

Use of the dataset must be acknowledged using a citation which would include:

- the Identification of the Primary Investigator

- the title of the survey (including country, acronym and year of implementation)
- the survey reference number
- the source and date of download

Migration and Remittances Household Surveys in Sub-Saharan Africa: Methodological Aspects and Main Findings

Title Migration and Remittances Household Surveys in Sub-Saharan Africa: Methodological Aspects and Main Findings
 Author(s) Sonia Plaza Mario Navarrete Dilip Ratha
 Date 2011-03-31
 Description This background paper-a product of the joint Migration and Remittances Unit of the Development Economics Vice Presidency (DEC), and Poverty Reduction and Economic Management Network (PREM)-was prepared as part of the Africa Migration Project. The findings from the surveys are background material for a joint regional report of the African Development Bank and World Bank titled "Leveraging Migration in Africa: Remittances, Skills, and Investments Migration, Remittances and Development in Africa" (released in March 2011).
