Sampling

Sampling Procedure

SAMPLE DESIGN: A sample of approximately 10% of the rural Enumeration areas where a long questionnaire was administered to the households (excluding INSTITUTIONS) these areas (LONG_RURAL), while ALL urban areas (11.3% of the population) were enumerated with a long questionnaire (URBAN). Thus the data set consists of these two sets (LONG RURAL and URBAN). The data also includes a variable called weight which is record-specific. This is the weight which you should use, and the information you will get will be representative of the Household Population ONLY (= 98%).

SAMPLE UNIT: Enumeration Area

SAMPLE FRACTION: 10%

SAMPLE SIZE (person records): 1,548,460

Weighting

Weights computed by national statistical office taking into consideration five key variables. Urban areas are sampled at 10 times the rate of rural areas.
