Good morning Ntate/Mdame,

my name is \_\_\_\_\_ and I work for Spatial Intelligence (SiQ)

This is a study run by an international team of researchers on behalf of the Ministry of Social Development of the Lesotho Government. The purpose of the study is to understand living conditions of the population of Lesotho. We will be asking you to provide some information about your household, such as who usually lives here, whether your children are currently attending school, what sort of work the members of your household are involved in, and other such questions.

Before we begin the interview, we want to make sure you understand the following information about the study:

- Your participation is entirely voluntary. You may refuse to take part in the interview, and you may stop at any time if you do not want to continue. You also have the right to skip any particular question or questions if you do not wish to answer them.
- The time it takes to complete the interview will vary depending on how many people live in your household and whether all the sections of the questionnaire are relevant to your household, but it should take no more than one hour and half.
- You have the right to ask questions at any point before the interview, during the interview, or after the interview is completed.
- All information collected for this study will be kept strictly confidential. While the data collected will be used for research purposes, information that could identify you or your household will never be publicly released in any research report or publication and will not be shared with the Ministry of Social Development, or any other government or international institution.

Shall I go ahead with the interview?

## HH1 Household Roster & demographic Information

We are now going to be asking some questions about your whole household, including some information on members who only live with you occasionally. We would like to talk to the head of the household or an adult who knows about the household. We would like to know about each person who belongs to this household and does not have another family, even if they may be away for long periods of time to work, receive education or visit relatives. Household membership criteria is:

- a) member does not have another family AND
- b) member does not live elsewhere AND
- c) member shares food from a common source with other household members when present
- d) member normally lives under the same "roof" or within the same compound/homestead/stand

[illegible]

### HH13 Women dietary diversity

## HH13Q1

We are now going to be asking some questions on food consumed yesterday by two women that are members of the household older than 18 years, starting with the first food or drink of the morning. Please include all food eaten during the day and night by the individual of interest, consumed inside or outside the home, irrespective of where they were prepared. Interviewer: please interview, in order of preference (availability at home): 1) one pregnant/lactating woman; 2) the oldest woman in reproductive age (15-49 years); 3) the oldest woman in the household.

Select the two woman that will answer the following questions in this section

Write down all foods and drinks mentioned. When composite dishes are mentioned, ask for the list of ingredients. When the respondent has finished, probe for meals and snacks not mentioned. The question should sound like “I didn’t hear you mention any [FOOD CATEGORY]. Did you eat any [list kinds of foods in that category]”

Interviewer, please mark each of the food categories (HH13Q3-HH13Q18) according to the food list reported for each adult
