II. Methodology

From March to April 2022, 352 stakeholders of the WBG in Niger were invited to provide their opinions on the WBG's work in the country by participating in a Country Opinion Survey. Participants were drawn from the Office of the President or Prime Minister; office of a Minister; office of a member of the National Assembly; employees of ministries/ministerial departments/implementation agencies; Project Management Units (PMUs) overseeing implementation of WBG projects; consultants/contractors working on WBG-supported projects/programs; local governments; independent government institutions; the judicial system; state-owned enterprises; bilateral and multilateral agencies; private sector organizations; the financial sector/private banks; private foundations; NGOs and community-based organizations; trade unions; faith-based groups; youth groups; academia/research institutes/think tanks; and the media.

A total of 256 stakeholders participated in the survey (73% response rate). Respondents received the questionnaire via post or courier and returned it accordingly or respondents received an email with a link to complete the survey online via the Qualtrics platform.

Every country that engages in the Country Opinion Survey (COS) must include specific indicator questions that will be aggregated for the World Bank Group's annual Corporate Scorecard. These questions are identified throughout the survey report.

Note that the body of the report presents data on selected questions of the survey questionnaire. Please refer to Appendix A for data on all survey questions. Appendices B and C present data on selected questions. Additional data breakdowns are available upon request.

II. Methodology (continued)

The results in this year's Country Survey were compared to those in the Country Survey conducted in FY'19 (response rate was 75%, N=259). Comparing responses across Country Surveys reflect changes in attitudes over time, but also changes in respondent samples and changes to the survey instrument itself. To reduce the influence of the latter factor, only those questions with similar response scales/options were analyzed. In FY'22, the increased outreach and subsequent numbers of survey respondents from the office of the National Assembly and local government is to be commended but should be kept in mind when interpreting the results of the past year comparison analyses – some differences in the past year comparisons analyses may be a result of differences in stakeholder compositions, not just changes over time. The distribution of respondent samples from the FY'19 and FY'22 Country Surveys are listed in the table below.

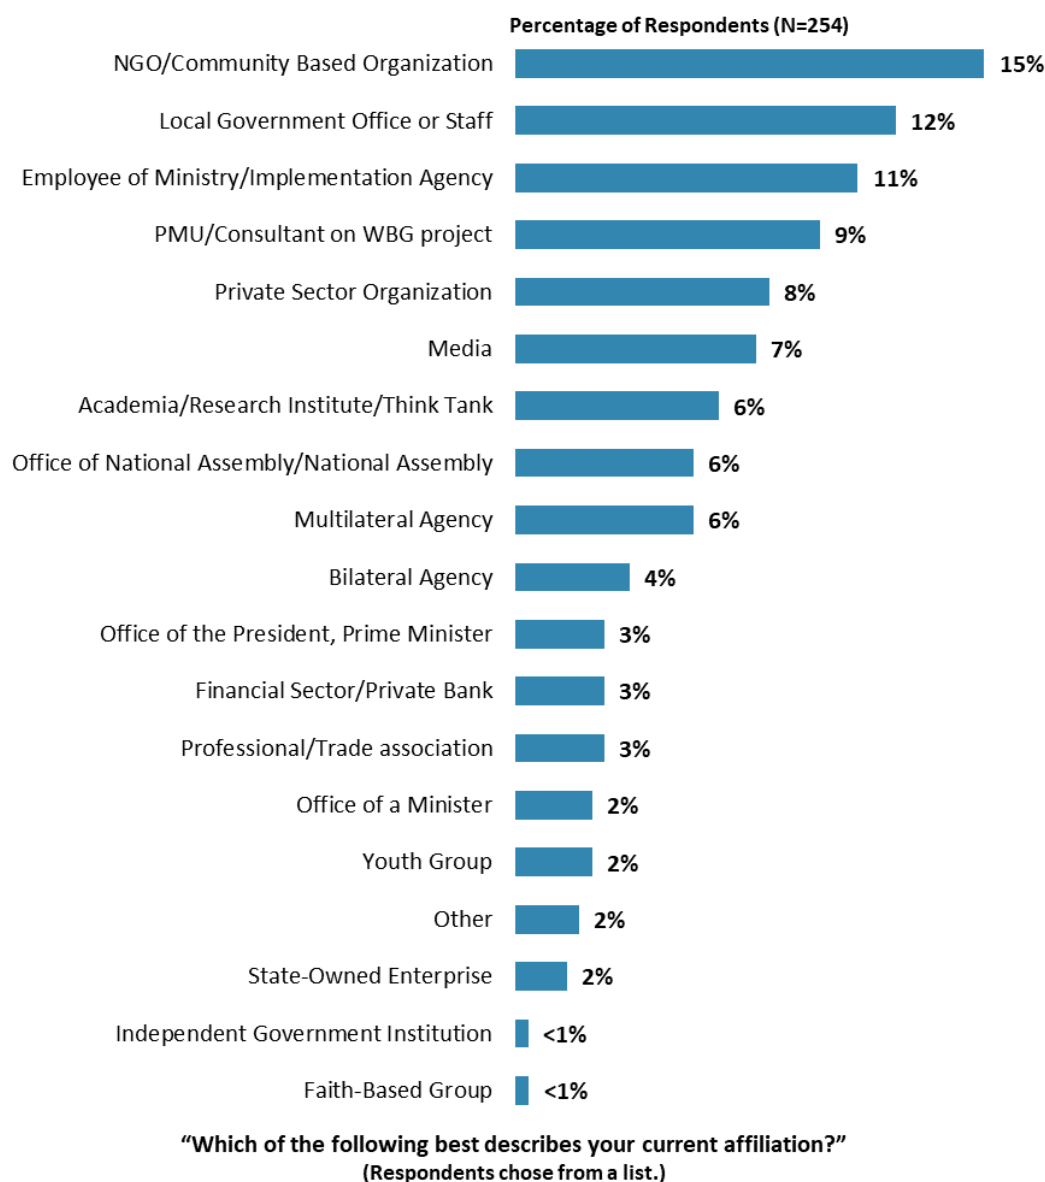

Percentage of Respondents	Distribution	
	FY 2019	FY 2022
Office of the President; Prime Minister; Office of Minister	7%	5%
Office of National Assembly	2%	6%
Government Institutions (includes employees of ministries, PMUs/Consultants on WBG-supported projects, independent government institutions, and embassy/diplomatic office)	26%	22%
Local Government Office or Staff	7%	12%
Bilateral/Multilateral Agency	8%	9%
Civil Society (includes NGOs/CBOs, youth groups, trade unions, and faith-based groups)	25%	20%
Private Sector (includes private sector organization and financial sector/private banks)	9%	11%
Academia/Research Institute/Think Tank	6%	6%
Media	8%	7%
Other	1%	2%
Total Number of Respondents	259	254
