### ABSTRACT

The Country Opinion Survey in Tajikistan assists the World Bank Group (WBG) in gaining a better understanding of how stakeholders in Tajikistan perceive the WBG. It provides the WBG with systematic feedback from national and local governments, multilateral/bilateral agencies, media, academia, the private sector, and civil society in Tajikistan on 1) their views regarding the general environment in Tajikistan; 2) their overall attitudes toward the WBG in Tajikistan; 3) overall impressions of the WBG's effectiveness and results, knowledge work and activities, and communication and information sharing in Tajikistan; and 4) their perceptions of the WBG's future role in Tajikistan.

## Sampling

### SAMPLING PROCEDURE

From April to May 2022, 786 stakeholders of the WBG in Tajikistan were invited to provide their opinions on the WBG's work in the country by participating in a Country Opinion Survey. Participants were drawn from the offices of the President and Prime Minister, offices of Ministers; offices of Parliamentarians; employees of ministries/ministerial departments/implementation agencies; Project Management Units (PMUs) overseeing implementation of WBG projects; consultants/contractors working on WBG-supported projects/programs; local governments; independent government institutions; state-owned enterprises; bilateral and multilateral agencies; private sector organizations; the financial sector and private banks; local and international civil society organizations; academia/research institutes/think tanks; and the media.

### RESPONSE RATE

The response rate was 59%

### WEIGHTING

The results of this year's Country Survey were compared to those in the Country Survey conducted in FY '17 (response rate was 68%, N=362). Comparing responses across Country Surveys reflect changes in attitudes over time, but also changes in respondent samples and changes to the survey instrument itself. To reduce the influence of the latter factor, only those questions with similar response scales/options were analyzed. To reduce the influence of the former, the samples from FY '17 and FY '22 were weighted to have equivalent stakeholder groupings, allowing for more statistically reliable comparisons. Due to this weighting, mean ratings and percentages of respondents in both years are slightly different from those of the original data reported in the FY'17 COS report and the non-weighted data presented in the survey report.
