**INTRODUCTION TO THE HOUSEHOLD TO BE INTERVIEWED**

Dear Respondent,

Good day! We thank you for your kind accommodation of our request to conduct this interview. You have been randomly selected as one of the respondents for a survey being conducted by the SEAMEO-SEARCA research institute, in collaboration with the Department of Agriculture and IFAD. The survey will help those involved to learn about the current social and economic status of farm households in the Philippines, and will provide valuable insights that will help to design future support services. So that the insights produced by the survey are the most useful for these purposes, we ask that you answer these questions truly and to the best of your knowledge. We emphasize that the aim of this research is to LEARN, and so please do not feel you must provide only positive responses, or feel that you must adjust your answers away from the truth in any way. However, please also do not also feel obliged to answer any question for which you do not feel comfortable. And please rest assured that all the information you provide shall be used solely for this purpose and shall be handled with strictest confidentiality. Summarized below are the different subject areas that will be covered in the interview.

Very truly yours,

The SEAMEO-SEARCA Project Team

Section 2a: Land ownership and use- Map of land area

In the space below, sketch out all of the land parcels that you had access to over the past 12 months, regardless of whether you are the owner, and regardless of whether you cultivated the land during this period, illustrating their relative size, and where they are relative to your home. Note that a PARCEL is a contiguous piece of land and should not be split by a path of more than one metre in width

Throughout this section, many of the questions will refer to the first and second cropping seasons separately. It is therefore important that these two seasons are clearly defined with the respondent beforehand. So in the cropping calendar below, please insert the months that the activities for each season, for the year 2016, began and when harvesting was conducted. If the season began in 2015, just insert when it ended. The definitions should then be referred to for the cropping season-specific questions, and if they have a local name for these seasons, this should be used when referencing.

2016	January	February	March	April	May	June	July	August	September	October	November	December
First cropping season												
Second cropping season												

Section 2a: Land ownership and use –Parcel details

The sketch shows that this household had access to\_\_ fields in the past 12 months. Please tell us about each of those fields including fields rented, borrowed or cultivated on behalf of absentee owners.

THIS SHOULD BE FILLED EVEN IF ACCESS WAS NOT FOR THE WHOLE 12 MONTHS.
