ABSTRACT

The Country Opinion Survey in Kosovo assists the World Bank Group (WBG) in gaining a better understanding of how stakeholders in Kosovo perceive the WBG. It provides the WBG with systematic feedback from national and local governments, multilateral/bilateral agencies, media, academia, the private sector, and civil society in Kosovo on 1) their views regarding the general environment in Kosovo; 2) their overall attitudes toward the WBG in Kosovo; 3) overall impressions of the WBG's effectiveness and results, knowledge work and activities, and communication and information sharing in Kosovo; and 4) their perceptions of the WBG's future role in Kosovo.

Sampling

SAMPLING PROCEDURE

From July to August 2022, 297 stakeholders of the WBG in Kosovo were invited to provide their opinions on the WBG's work in the country by participating in a Country Opinion Survey. Participants were drawn from the Office of the President, Prime Minister; office of a minister; office of a member of parliament/legislative body; ministries, ministerial departments, and implementation agencies; project management units (PMUs) overseeing implementation of WBG projects; consultants and contractors working on WBG-supported projects and programs; local governments; independent government institutions; the judicial system; state-owned enterprises; bilateral and multilateral agencies; private sector organizations; the financial sector and private banks; private foundations; NGOs and community based organizations; professional and trade associations; faith-based groups; youth groups; from the academia, research institutes, and think tanks; from the media and other organizations.

RESPONSE RATE

The response rate was 42%

WEIGHTING

Comparing responses across Country Surveys reflect changes in attitudes over time, but also changes in respondent samples and changes to the survey instrument itself. To reduce the influence of the latter factor, only those questions with similar response scales/options were analyzed.

The distribution of respondent samples from the FY'16 and FY'22 Country Surveys used in the year comparisons analyses are listed in the table on page 43. This year's survey saw an increased outreach to and response from local governments and bilateral/multilateral agencies, but a decrease in responding from high-level government offices. These differences in stakeholder composition among survey respondents need to be taken into account when interpreting the results of the past-year comparison analyses.
