Sampling

Sampling Procedure

MICRODATA SOURCE: National Sample Survey Organization, Government of India

SAMPLE DESIGN: Drawn by the NSSO, details not specified

SAMPLE UNIT: Household

SAMPLE FRACTION: .09%

SAMPLE SIZE (person records): 623,494

Weighting

Calculated by the NSSO based on stratified sample design

Questionnaires

Overview

A single form that consists of 10 sections: 1) identification of sample household, 2) household characteristics, 3) demographic and current activity particulars during the preceding week, 4) demographic characteristics of migrants and their usual activity at the time of migration, 5) current activity of people in the labor force, 6) usual activity, 7) usual subsidiary gainful activity of persons who did not work, but not because of being old or disabled, 8) follow-up questions for persons whose principal activities were working, 9) persons who usually attended domestic duties, and 10) household indebtedness.

Data Collection

Data Collection Dates

Start	End	Cycle
1983-01-01	1983-12-31	N/A

Time Periods

Start	End	Cycle
1983-01-01	1983-12-31	N/A

Data Collection Mode

Face-to-face [f2f]

DATA COLLECTION NOTES

De jure, CENSUS DAY: January to December 1983, FIELD WORK PERIOD: One-year period from January to December, 1983

SUPERVISION

Direct interview

Producer	Minnesota Population Center
Missing Data	

Variables

ID	Name	Label	Type	Format	Question
V1	RECTYPE	Record type	discrete	character	
V2	YEAR	Year	discrete	numeric	
V3	SAMPLE	IPUMS sample identifier	discrete	numeric	
V4	SERIAL	Household serial number	contin	numeric	
V5	PERSONS	Number of person records in the household	contin	numeric	
V6	SUBSAMP	Subsample number	discrete	numeric	
V7	GQ	Group quarters (collective dwelling) status	discrete	numeric	
V8	UNREL	Number of unrelated persons	discrete	numeric	
V9	URBAN	Urban-rural status	discrete	numeric	
V10	REGIONW	Continent and region of country	discrete	numeric	
V11	HHTYPE	Household classification	discrete	numeric	
V12	NFAMS	Number of families in household	discrete	numeric	
V13	HEADLOC	Head's location in household	contin	numeric	
V14	GEOLEV1	1st subnational geographic level, world [consistent boundaries over time]	discrete	numeric	
V15	IN1983A_0001	Dwelling number	contin	numeric	Dwelling number
V16	IN1983A_0006	Number of persons in household	discrete	numeric	Number of persons in household
V17	IN1983A_0019	Urban	discrete	numeric	Area: [] 1 Rural* [] 2 Urban
V18	IN1983A_0020	State	discrete	numeric	[1] Identification of sample household 1. ____ Serial number 2. ____ State-region 3. ____ Stratum 4. ____ Sub-sample 5. ____ Sample village/block no.* 6. ____ Sub-round 7. ____ Sample household no.
V19	IN1983A_0021	Region	discrete	numeric	[1] Identification of sample household 1. ____ Serial number 2. ____ State-region 3. ____ Stratum 4. ____ Sub-sample 5. ____ Sample village/block no.* 6. ____ Sub-round 7. ____ Sample household no.

ID	Name	Label	Type	Format	Question
V20	IN1983A_0022	Stratum	contin	numeric	[1] Identification of sample household 1. ____ Serial number 2. ____ State-region 3. ____ Stratum 4. ____ Sub-sample 5. ____ Sample village/block no.* 6. ____ Sub-round 7. ____ Sample household no.
V21	IN1983A_0023	Sub-sample	discrete	numeric	[1] Identification of sample household 1. ____ Serial number 2. ____ State-region 3. ____ Stratum 4. ____ Sub-sample 5. ____ Sample village/block no.* 6. ____ Sub-round 7. ____ Sample household no.
V22	IN1983A_0024	Sub-round	discrete	numeric	[1] Identification of sample household 1. ____ Serial number 2. ____ State-region 3. ____ Stratum 4. ____ Sub-sample 5. ____ Sample village/block no.* 6. ____ Sub-round 7. ____ Sample household no.
V23	IN1983A_0026	Sample household number	discrete	numeric	[1] Identification of sample household 1. ____ Serial number 2. ____ State-region 3. ____ Stratum 4. ____ Sub-sample 5. ____ Sample village/block no.* 6. ____ Sub-round 7. ____ Sample household no.
V24	IN1983A_0027	Household group	discrete	numeric	5. Household group: [] 1 Scheduled tribe [] 2 Scheduled caste [] 3 Neo-buddhist [] 9 Others
V25	IN1983A_0029	Sample village/block number	discrete	numeric	[1] Identification of sample household 1. ____ Serial number 2. ____ State-region 3. ____ Stratum 4. ____ Sub-sample 5. ____ Sample village/block no.* 6. ____ Sub-round 7. ____ Sample household no.
V26	IN1983A_0030	Informant type	discrete	numeric	18. Informant: [] 1 Head of household [] 2 Other member of household [] 9 Others
V27	IN1983A_0031	Informant cooperation	discrete	numeric	19. Type of informant: [] 1 Co-operative and capable [] 2 Co-operative but not capable [] 3 Busy [] 4 Reluctant [] 9 Others
V28	IN1983A_0032	Survey type	discrete	numeric	20. Survey: [] 1 Original household surveyed [] 2 Substitute household surveyed [] 3 Casualty (nothing surveyed)
V29	IN1983A_0034	Household size	discrete	numeric	1. ____ Household size
V30	IN1983A_0036	Household type	discrete	numeric	3. Household type: (i) For rural areas: [] 1 Household self-employed in non-agricultural occupations [] 2 Agricultural labour households [] 3 Other labour households [] 4 Households self-employed in agricultural occupations [] 9 Other households (ii) For urban areas: [] 1 Self-employed households [] 9 Other households
V31	IN1983A_0037	Household religion	discrete	numeric	4. Household religion: [] 1 Hinduism [] 2 Islam [] 3 Christianity [] 4 Sikhism [] 5 Jainism [] 6 Buddhism [] 7 Zoroastrianism [] 9 Others
V32	IN1983A_0038	Homestead ownership	discrete	numeric	6. Homestead type: [] 1 Owned [] 9 Others
V33	IN1983A_0039	Land owned (acres)	contin	numeric	Household land particulars (0.00 acres) [Questions 7-11] 7. ____ Owned 8. ____ Leased in 9. ____ Neither owned nor leased in 10. ____ Leased out 11. ____ Total possessed (7+8+9-10)
V34	IN1983A_0043	Total land possessed (acres)	contin	numeric	Household land particulars (0.00 acres) [Questions 7-11] 7. ____ Owned 8. ____ Leased in 9. ____ Neither owned nor leased in 10. ____ Leased out 11. ____ Total possessed (7+8+9-10)
V35	IN1983A_0044	Grouped total land possessed	discrete	numeric	Household land particulars (0.00 acres) [Questions 7-11] 7. ____ Owned 8. ____ Leased in 9. ____ Neither owned nor leased in 10. ____ Leased out 11. ____ Total possessed (7+8+9-10)
V36	IN1983A_0050	Land labour code	discrete	numeric	Land labour code
V37	IN1983A_0052	Use of hired labour for crop production	discrete	numeric	17. Use of hired labour for crop production: [] 1 Regularly [] 2 During peak season only [] 3 Casually [] 4 Hires no labour for crop production [] 5 Households with no crop production

ID	Name	Label	Type	Format	Question
V38	IN1983A_0053	Use of hired labor for other productive enterprises	discrete	numeric	18. Use of hired labour for other productive enterprises: [] 1 Regularly [] 2 During peak season only [] 3 Casually [] 4 Hires no labour for other productive enterprises [] 5 Households with no other productive enterprises
V39	IN1983A_0054	Household monthly per capita expenditure	contin	numeric	19. ____ Household monthly per-capita expenditure last month (Rs. 0.00)
V40	IN1983A_0055	Household monthly per capita expenditure grouped	discrete	numeric	Household monthly per capita expenditure grouped
V41	IN1983A_0056	Migration during last 365 days	discrete	numeric	20. Whether the household moved to the village/town of enumeration during the last 365 days: [] 1 Yes [] 2 No [skip to Section 4.1]
V42	IN1983A_0057	Type of last residence if moved in the last 365 days	discrete	numeric	21. If yes in item 20, type of last residence (place): [Question 21 was asked of persons whose household moved to the village or town of enumeration during the last 365 days, per Question 20.] [] 1 Rural areas of the same district [] 2 Urban areas of the same district [] 3 Rural areas of other districts of the same state [] 4 Urban areas of other districts of the same state [] 5 Rural areas of other states [] 6 Urban areas of other states [] 7 Other countries
V43	IN1983A_0058	Temporary or permanent migration	discrete	numeric	22. Whether the movement was temporary or permanent: [Question 22 was asked of persons whose household moved to the village or town of enumeration during the last 365 days, per Question 20.] [] 1 Temporary: seasonal [] 2 Temporary: non-seasonal [] 3 Permanent
V44	IN1983A_0059	Reason for migration	discrete	numeric	23. Reason for the movement: [Question 23 was asked of persons whose household moved to the village or town of enumeration during the last 365 days, per Question 20.] [] 1 In search of work [] 2 On work [] 9 Others
V45	IN1983A_0066	Multiplier-1 (stratum level)	contin	numeric	Multiplier-1 (stratum level)
V46	IN1983A_0067	Multiplier-2 (sub-sample level)	contin	numeric	Multiplier-2 (sub-sample level)
V47	IN1983A_0068	Multiplier-3 (sub-round level)	contin	numeric	Multiplier-3 (sub-round level)
V48	IN1983A_0069	Multiplier-4 (for combined estimates)	contin	numeric	Multiplier-4 (for combined estimates)
V49	HHWT	Household weight	contin	numeric	
V50	GEO1_IN	India, State 1983 - 2004 [Level 1; consistent boundaries, GIS]	discrete	numeric	
V51	GEO1_INX	India, State 1983 - 2004 [Level 1; inconsistent boundaries, harmonized by name]	discrete	numeric	
V52	GEO2_INX	India, Region 1984 - 2004 [Level 2; inconsistent boundaries, harmonized by name]	discrete	numeric	
V53	NCOUPLES	Number of married couples in household	discrete	numeric	
V54	NMOTHERS	Number of mothers in household	discrete	numeric	
V55	NFATHERS	Number of fathers in household	discrete	numeric	
V56	COUNTRY	Country	discrete	numeric	
V57	OWNERSHIP	Ownership of dwelling [general version]	discrete	numeric	

ID	Name	Label	Type	Format	Question
V58	OWNERSHIPD	Ownership of dwelling [detailed version]	discrete	numeric	
V59	STRATA	Strata identifier	contin	numeric

Educational standard: general <input type="checkbox"/> 0 Not literate <input type="checkbox"/> 1 Literate without formal schooling <input type="checkbox"/> 2 Literate but below primary <input type="checkbox"/> 3 Primary <input type="checkbox"/> 4 Middle <input type="checkbox"/> 5 Secondary Graduate and above in: <input type="checkbox"/> 6 Agriculture <input type="checkbox"/> 7 Engineering technology <input type="checkbox"/> 8 Medicine <input type="checkbox"/> 9 Other subjects
V102	IN1983A_0407	Technical education	discrete	numeric	9. Educational standard: technical Additional diploma or certificate in: <input type="checkbox"/> 10 Agriculture <input type="checkbox"/> 11 Engineering/technology <input type="checkbox"/> 12 Medicine <input type="checkbox"/> 13 Crafts <input type="checkbox"/> 14 Other subjects <input type="checkbox"/> 15 No technical education
V103	IN1983A_0408	Number of years of formal education	discrete	numeric	11. Number of years of formal education (in years): ____
V104	IN1983A_0409	Education institution enrollment code	discrete	numeric	12. Current enrollment in educational institution and course of study: <input type="checkbox"/> 1 Currently not enrolled in any educational institution a. Currently enrolled in an educational institution of: <input type="checkbox"/> 2 Pre-primary <input type="checkbox"/> 3 Primary <input type="checkbox"/> 4 Middle <input type="checkbox"/> 5 Secondary b. Undergraduate/Post-graduate courses in: <input type="checkbox"/> 6 Agriculture <input type="checkbox"/> 7 Engineering/technology <input type="checkbox"/> 8 Medicine <input type="checkbox"/> 9 Other subjects c. Diploma or certificate course in: <input type="checkbox"/> 10 Agriculture <input type="checkbox"/> 11 Engineering/technology <input type="checkbox"/> 12 Medicine <input type="checkbox"/> 13 Crafts <input type="checkbox"/> 14 Other subjects
V105	IN1983A_0410	Whether registered with employment exchange	discrete	numeric	13. Whether currently on the live register of the employment exchange: <input type="checkbox"/> 1 Yes <input type="checkbox"/> 2 No
V106	IN1983A_0411	Current weekly activity status code	discrete	numeric	Current weekly activity [Questions 14 to 15] 14. Status: Working with an employer under obligation/ work not specifically compensated by prevalent wage or salary: <input type="checkbox"/> 1 Attached to landlord <input type="checkbox"/> 2 Attached to money-lender <input type="checkbox"/> 3 Attached to landlord-cum-money lender <input type="checkbox"/> 4 Attached to others <input type="checkbox"/> 11 Worked (self-employed) in household enterprise <input type="checkbox"/> 21 Worked as a helper in household enterprise <input type="checkbox"/> 31 Worked as regular salaried/wage employee <input type="checkbox"/> 41 Worked as casual wage labour in public works <input type="checkbox"/> 51 Worked as casual wage labour in other types of work <input type="checkbox"/> 61 Did not work though there was work in household enterprise <input type="checkbox"/> 71 Did not work but had regular salaried/wage employment <input type="checkbox"/> 81 Sought work <input type="checkbox"/> 82 Did not seek but was available for work <input type="checkbox"/> 91 Attended educational institutions <input type="checkbox"/> 92 Attended domestic duties only <input type="checkbox"/> 93 Attended domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed etc.), sewing, tailoring, weaving etc., for household use <input type="checkbox"/> 94 Too young to work/ to attend school/ to seek employment <input type="checkbox"/> 95 Old and disabled <input type="checkbox"/> 96 Rentiers, pensioners, remittance recipients etc. <input type="checkbox"/> 97 Beggars, prostitutes, etc. <input type="checkbox"/> 98 Others <input type="checkbox"/> 99 Did not work due to temporary sickness (for casual workers only)
V107	IN1983A_0412	Current industry division	discrete	numeric	Current weekly activity [Questions 14 to 15] 15. Industry (division code) for codes 01-71 in column 14*: [Question 15 was asked of persons who were worked under obligation/attached, worked, or did not work though there was a household enterprise or did not work but had salaried/wage employment per question 14.] <input type="checkbox"/> 0 Agriculture, hunting, forestry and fishing <input type="checkbox"/> 1 Mining and quarrying <input type="checkbox"/> 2 Manufacturing <input type="checkbox"/> 3 Manufacturing <input type="checkbox"/> 4 Electricity, gas and water <input type="checkbox"/> 5 Construction <input type="checkbox"/> 6 Wholesale and retail trade and restaurants and hotels <input type="checkbox"/> 7 Transport, storage, and communication <input type="checkbox"/> 8 Financing, insurance, real estate and business service <input type="checkbox"/> 9 Community, social and personal services

ID	Name	Label	Type	Format	Question
V108	IN1983A_0414	Current industry	discrete	numeric	For persons having current weekly activity status codes 01-71 in column 14 [Question 16-18 was asked of persons who worked under obligation/attached, worked, or did not work though there was a household enterprise or did not work but had salaried/wage employment per question 14.] Principal industry occupation: [Questions 16 to 18] 16. Description ____ 17. Industry code (NIC 1970) ____ 18. Occupation code (NCO 1968) ____
V109	IN1983A_0415	Current occupation	discrete	numeric	For persons having current weekly activity status codes 01-71 in column 14 [Question 16-18 was asked of persons who worked under obligation/attached, worked, or did not work though there was a household enterprise or did not work but had salaried/wage employment per question 14.] Principal industry occupation: [Questions 16 to 18] 16. Description ____ 17. Industry code (NIC 1970) ____ 18. Occupation code (NCO 1968) ____
V110	IN1983A_0416	Principal usual activity status	discrete	numeric	Principal usual activity: [Questions 2 to 3] 2. Status: Working with an employer under obligation/ work not specifically compensated by prevalent wage or salary: [] 1 Attached to landlord [] 2 Attached to money-lender [] 3 Attached to landlord-cum-money lender [] 4 Attached to others [] 11 Worked (self-employed) in household enterprise [] 21 Worked as a helper in household enterprise [] 31 Worked as regular salaried/wage employee [] 41 Worked as casual wage labour in public works [] 51 Worked as casual wage labour in other types of work [] 81 Sought work [] 91 Attended educational institutions [] 92 Attended domestic duties only [] 93 Attended domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed etc.), sewing, tailoring, weaving, etc. for household use [] 94 Too young to work/ to attend school/ to seek employment [] 95 Old and disabled [] 96 Rentiers, pensioners, remittance recipients, etc. [] 97 Beggars, prostitutes, etc. [] 98 Others
V111	IN1983A_0419	Usual industry	discrete	numeric	For persons with status codes 01-51 in column 2 [Questions 4 to 6 were asked of persons who were worked under obligation/attached or worked, per Question 2 (codes 1-51).] Principal industry occupation: 4. ____ Description 5. ____ Industry code (NIC 1970) 6. ____ Occupation code (NCO 1968)
V112	IN1983A_0420	Usual occupation	discrete	numeric	For persons with status codes 01-51 in column 2 [Questions 4 to 6 were asked of persons who were worked under obligation/attached or worked, per Question 2 (codes 1-51).] Principal industry occupation: 4. ____ Description 5. ____ Industry code (NIC 1970) 6. ____ Occupation code (NCO 1968)
V113	IN1983A_0425	Whether stayed temporarily for work for a continuous period (4 weeks or more) at different places during the last 365 days	discrete	numeric	12. Whether stayed temporarily for work for a continuous period of 4 weeks or more at a different place during the last 365 days: [] 1 Yes [] 2 No
V114	IN1983A_0426	Reason code for temporary work away	discrete	numeric	If yes in column 12 [Answer questions 13-23] 13. Reason: [Question 13 was asked of persons who stayed temporarily for work for a continuous period of 4 weeks or more at a different place during the last 365 days, per Question 12.] [] 1 Non-availability of work at the place of enumeration [] 2 For better employment [] 3 Required by nature of work
V115	IN1983A_0427	Weeks of temporary work away	discrete	numeric	If yes in column 12 [Answer questions 13-23] [Question 14 and 15 were asked of persons who stayed temporarily for work for a continuous period of 4 weeks or more at a different place during the last 365 days, per Question 12.] 14. ____ Total period (in weeks) 15. ____ Number of places stayed at
V116	IN1983A_0434	Whether engaged on a regular basis in any gainful work in subsidiary capacity	discrete	numeric	3. Whether engaged on a regular basis in any gainful work in subsidiary capacity: [] 1 Yes [] 2 No

ID	Name	Label	Type	Format	Question
V117	IN1983A_0436	Full engagement in work during the last 365 days	discrete	numeric	4. For persons with usual activity status codes 01-51 only Were you more or less fully engaged in work during the last 365 days? [] 1 Yes [] 2 No
V118	IN1983A_0437	Job seeking for the first time	discrete	numeric	5. For persons with usual activity status codes 81 only Were you seeking or available for work for the first time? [] 1 Yes [skip to Question 12] [] 2 No [skip to Question 12]
V119	IN1983A_0438	Seeking work/additional work	discrete	numeric	6. Were you seeking or available for work/additional work? (Do not ask this question to persons with usual activity status code 81, for them record code 1) [Question 6 was asked of persons who were not seeking work, per Question 2 of Block 6.] [] 1 Yes [] 2 No [skip to Question 12]
V120	IN1983A_0439	Effort to get work/additional work	discrete	numeric	7. If yes in question 6, what efforts did you make to get work/additional work? [Question 7 was asked of persons who were not seeking work, per Question 2 of Block 6 (codes 1 to 51), but were seeking or available for work/additional work, per Question 6.] [] 1 Currently on the live register of the employment exchange [] 2 Made other efforts [] 3 Made no effort
V121	IN1983A_0440	Duration of job seeking	discrete	numeric	8. How long were you seeking or available for work/additional work? [Question 8 was asked of persons who were not seeking work, per Question 2 of Block 6 (codes 1 to 51), but were seeking or available for work/additional work, per Question 6.] [] 1 Up to 1 month [] 2 1-3 months [] 3 3-6 months [] 4 6-9 months [] 5 9-12 months [] 6 More than 12 months
V122	IN1983A_0441	Type of work/additional work sought	discrete	numeric	9. What type of work/additional work did you seek or were you available for? [Question 9 was asked of persons who were not seeking work, per Question 2 of Block 6 (codes 1 to 51), but were seeking or available for work/additional work, per Question 6.] [] 1 Both farm and non-farm work [] 2 Farm work only [] 3 Public works only [] 4 Non-farm work only
V123	IN1983A_0442	Status of work sought or available for	discrete	numeric	10. Status of work/additional work sought or were available for: [Question 10 was asked of persons who were not seeking work, per Question 2 of Block 6 (codes 1 to 51), but were seeking or available for work/additional work, per Question 6.] [] 1 Wage/salaried employment: full time [] 2 Wage/salaried employment: part time [] 3 Contract/piece rate work: full time [] 4 Contract/piece rate work: part time [] 5 Self-employment: full time [] 6 Self-employment: part time
V124	IN1983A_0443	Location of work desired	discrete	numeric	11. If willing to accept wage/salaried employment, location of work desired: [Question 11 was asked of persons who were not seeking work, per Question 2 of Block 6 (codes 1 to 51), but were seeking or available for work/additional work, per Question 6.] [] 1 Within village/town only [] 2 Outside village/town only [] 3 Within or outside village/town
V125	IN1983A_0449	Required to spend most of your time on domestic duties	discrete	numeric	[9] Follow-up questions for persons having usual activity status codes 92 and 93 [Questions 1-24 were asked of persons who engaged in domestic duties, per Question 2 in Section 6.] 3. Were you required to spend most of your time on domestic duties almost throughout the last 365 days? [] 1 Yes [] 2 No
V126	IN1983A_0450	Reason required to spend most of your time on domestic activities	discrete	numeric	[9] Follow-up questions for persons having usual activity status codes 92 and 93 [Questions 1-24 were asked of persons who engaged in domestic duties, per Question 2 in Section 6.] 4. If 'yes' in question 3, reason thereof: [Question 4 was recorded for persons who attended domestic duties (per Question 2 of Block 6) and were required to spend most of their time on domestic duties almost throughout the last 365 days, per Question 3.] [] 1 No other member to carry out the domestic duties [] 2 Cannot afford hired help [] 3 For social and/or religious constraints [] 9 Others

Record type (RECTYPE)

File: IND1983-H-H

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 0
Invalid: 0

Description

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

Year (YEAR)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 4
Decimals: 0
Range: 1960-2011

Valid cases: 0
Invalid: 0

Description

YEAR gives the year in which the census was taken.

IPUMS sample identifier (SAMPLE)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 9
Decimals: 0
Range: 32197001-894201001

Valid cases: 0
Invalid: 0

Description

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g., 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

Household serial number (SERIAL)

File: IND1983-H-H

Household serial number (SERIAL)

File: IND1983-H-H

Overview

Type: Continuous
Format: numeric
Width: 10
Decimals: 0

Valid cases: 0
Invalid: 0

Description

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002
Colombia 1993, 2005
Costa Rica 1984, 2000
Cuba 2002
Dominican Republic 1981, 2002, 2010
Ecuador 1990, 2001
Germany 1971
Hungary 1980, 1990, 2001
Jamaica 1982, 1991, 2001
Malaysia 1970, 1991, 2000
Mexico 1995, 1990, 2000, 2005
Nigeria 2006
Panama 2000
Peru 1993, 2007
Portugal 1981, 1991, 2001
Spain 1991
Uruguay 2011
Venezuela 1990, 2001
Vietnam 1989

In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

Number of person records in the household (PERSONS)

File: IND1983-H-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0
Invalid: 0

Description

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

Subsample number (SUBSAMP)

File: IND1983-H-H

Subsample number (SUBSAMP)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

Group quarters (collective dwelling) status (GQ)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

Number of unrelated persons (UNREL)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

UNREL indicates the number of persons in the household who are unrelated to the head.

Urban-rural status (URBAN)

File: IND1983-H-H

Overview

Urban-rural status (URBAN)

File: IND1983-H-H

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 0
Invalid: 0

Description

URBAN indicates whether the household was located in a place designated as urban or as rural.

Continent and region of country (REGIONW)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 11-54

Valid cases: 0
Invalid: 0

Description

REGIONW identifies the continent and region of each country.

Household classification (HHTYPE)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

HHTYPE is a constructed variable that describes the composition of households.

HHTYPE is constructed from information in RELATE (relationship to head), from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father), and from information on group quarters status, GQ.

Number of families in household (NFAMS)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

NFAMS is a constructed variable that indicates the number of families within each household. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and her servant contains two families; a household consisting of a large, multiple-generation extended family with no lodgers or servants would count as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

Head's location in household (HEADLOC)

File: IND1983-H-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0
Invalid: 0

Description

HEADLOC gives the person number of the head of household in samples in which persons are organized into households.

1st subnational geographic level, world [consistent boundaries over time] (GEOLEV1)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 6
Decimals: 0
Range: 32002-894010

Valid cases: 0
Invalid: 0

Description

GEOLEV1 indicates the major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. First administrative units in GEOLEV1 have been spatiotemporally harmonized to provide spatially consistent boundaries across samples in each country.

Dwelling number (IN1983A_0001)

File: IND1983-H-H

Overview

Type: Continuous
Format: numeric
Width: 6
Decimals: 0

Valid cases: 0
Invalid: 0

Description

This variable indicates the dwelling number of the household.

All households

Literal question

18. Informant:

- ☐ 1 Head of household
☐ 2 Other member of household
☐ 9 Others

Interviewer instructions

5.1.3 Item 17-19: primary informant

The name of the primary informant i.e., the person from whole bulk of the information will be collected is to be recorded against item 17. Whether the primary informant is the head of the household or any other member of the household will be indicated against item 18 in terms of code '1' and code '2' respectively. If the primary informant is not a member of the household code '9' will be recorded. The type of primary informant i.e., whether he is co-operative, busy etc. will be recorded against item 19 in terms of the specified codes. The codes are:

Co-operative and capable - 1
 Co-operative but not capable - 2
 Busy - 3
 Reluctant - 4
 Others - 9

This information will be recorded on the basis of the investigator's impression after canvassing the entire schedule 10.

All households

Literal question

1. ____ Household size

Interviewer instructions

5.3.1. Item 1: household size:

The size of the sample household i.e. the total number of persons normally residing together (i.e., under the same roof) and taking food in the same kitchen (including temporary stay aways and excluding temporary visitors) will be recorded against this item. This number should tally with the last serial number recorded in column (1) of block 4.1.

Household type (IN1983A_0036)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 0
Invalid: 0

Description

This variable indicates the type of household.

Universe

All households

Literal question

Household type (IN1983A_0036)

File: IND1983-H-H

3. Household type:

(i) For rural areas:

- ☐ 1 Household self-employed in non-agricultural occupations
- ☐ 2 Agricultural labour households
- ☐ 3 Other labour households
- ☐ 4 Households self-employed in agricultural occupations
- ☐ 9 Other households

(ii) For urban areas:

- ☐ 1 Self-employed households
- ☐ 9 Other households

Interviewer instructions

Household type (IN1983A_0036)

File: IND1983-H-H

Item 2: household type:

At the listing stage, for the rural areas, all the households will be categorized under three groups namely (i) households self-employed in non-agriculture, (ii) regular labour households and (iii) other households, depending on their means of livelihood. Codes 1, 2, and 9 are assigned respectively to the different households belonging to these groups and the appropriate codes will be recorded in column (5), block 6 of the schedule 0.1. But at the time of detailed enquiry (i.e. when schedules 10 and 1.0 will be canvassed in the sample household) 'household type' code. Out of the following five different household type codes, the one appropriate for sample household will be chosen:

Households self-employed in non-agricultural occupations - 1

Agricultural labour households - 2

Other labour households - 3

Households self-employed in agricultural occupations - 4

Other households - 9

The households categorized as belonging to the 'means of livelihood' code-1 in the schedule 0.1 will be assigned the household type 'self-employed in non-agricultural occupations' and code 1 will be recorded against item 3. The rural labour households in the schedule 0.1 i.e. those assigned means of livelihood code 2, will be further classified into two groups- 'agricultural labour' households and 'other labour' households for assigning the appropriate household type codes against this item. The households to be categorized as the 'agricultural labour' households will be those which earned 50 p.c. or more of their total income during the last 365 days from wage paid manual labour in agriculture and for such households, type code-2 will be recorded against this item. The remaining households will be categorized as the 'other labour' households and for them code -3 will be recorded. The households assigned the means of livelihood code 9 in the schedule 0.1, will be further regrouped into households 'self-employed in agricultural occupations' will be those which earned 50 p.c. or more of their total income from self-employment in agricultural occupations during the last 365 days preceding the date of survey and for such households code 4 will be recorded against this item.

The remaining households will be categorized as 'other' households and for them code 9 will be recorded. Thus, the selected households will be grouped into five different household types for recording the relevant household type code against item 3 of this block. At the time of detailed enquiry the means of livelihood code assigned at the listing stage will be verified and the code assigned at that time will be corrected, if found wrong. But no substitution of household is to be made in such cases.

Agricultural laborer

5.3.5A person will be treated as wage-paid manual laborer in agriculture or in other words, agricultural laborer if he/she follows one or more of the following agricultural occupations in the capacity of a laborer on hire or on exchange, whether paid wholly in cash or in kind or partly in case of partly in kind.

(a) farming including cultivation and tillage of the soil etc.

(b) dairy farming

(c) production, cultivation, growing and harvesting of any horticultural commodity

(d) raising of live stock, bees or poultry and

(e) any practice performed on a farm as incidental to or in conjunction with farm operations (including any forestry or timbering operations and the preparation for market and delivery to storage or to market or to carriage for transportation to market of farm production).

It may be noted that wage paid manual labour in 'fisheries' are excluded from the purview of the category agricultural labour. Further, carriage for transportation will refer only to the first stage of the transportation from farm to the first place of disposal.

Urban households

5.3.6. As regards the urban households, for recording the appropriate household type codes, the 'self-employment' codes assigned in column (5), block 6 of schedule 0.2 will be copied against item 3 for the respective sample households. The codes to be used are:

Self-employed households - 1

Other households - 9

Household land particulars (0.00 acres)
[Questions 7-11]

7. ____ Owned
8. ____ Leased in
9. ____ Neither owned nor leased in
10. ____ Leased out
11. ____ Total possessed (7+8+9-10)

Interviewer instructions

5.3.10 Item 7-11 : Household land particulars :

The area of land (in 0.00 acres) 'owned', 'leased in' in 'neither owned nor leased in' and 'leased out' by the household as on the date of survey will be ascertained and recorded against the items 7,8,9 and 10 respectively. The total land area possessed by the household will be worked out as items 7+8+9-10 and recorded the against item 11 in 2 places of decimal. A piece of land is considered to be owned by the household if permanent heritable possession with or without the right to transfer the title is vested in a member or the members of the household. Land held in owner like possession say, under perpetual lease, hereditary tenure, long term leases for 30 years or more etc. will also be considered as land owned. For a piece of land under the possession of the household, if the household lacks title of ownership and also it does not have any lease agreement for the use of land transacted either verbally or in writing, such land will be considered as neither owned nor leased in. In collecting information regarding 'land possessed', the actual position as obtained on the date of survey will be considered.

Universe

All households

Literal question

17. Use of hired labour for crop production:

- ☐ 1 Regularly
- ☐ 2 During peak season only
- ☐ 3 Casually
- ☐ 4 Hires no labour for crop production
- ☐ 5 Households with no crop production

Interviewer instructions

Use of hired labour for crop production (IN1983A_0052)

File: IND1983-H-H

5.3.13 Item 17 and 18: use of hired labour:

Against these two items information relating to the use of hired labour by the household in crop production or any other enterprise will be recorded in terms of the specified codes, which are:

For column (17)

Hired labour:

Regularly - 1

During peak seasons only - 2

Casually - 3

Hires no labour for crop production - 4

Households with no crop production - 5

For column (18)

Hired labour:

Regularly - 1

During peak seasons only - 2

Casually - 3

Hires no labour for other productive enterprises - 4

Households with no other productive enterprises - 5

To illustrate, if a household engaged hired labour regularly for crop production, code 1 will be recorded against item 17. If labour is hired only during peak seasons, code 2 will be recorded. On the other hand, if use of hired labour is only casual code 3 and very rare or nil, code 4 will be recorded. If the household is not engaged in crop production activities, code 5 will be recorded against item 17. Similar information relating to use of hired labourer in enterprises other than crop production will be recorded against item 18. The information to be collected against these items will relate to the pattern normally followed by the sample household and not to any specific period or point of time.

☐ 3 Casually

☐ 4 Hires no labour for other productive enterprises

☐ 5 Households with no other productive enterprises

Interviewer instructions

Use of hired labor for other productive enterprises (IN1983A_0053)

File: IND1983-H-H

5.3.13 Item 17 and 18: use of hired labour:

Against these two items information relating to the use of hired labour by the household in crop production or any other enterprise will be recorded in terms of the specified codes, which are:

For column (17)

Hired labour:

Regularly - 1

During peak seasons only- 2

Casually - 3

Hires no labour for crop production - 4

Households with no crop production - 5

For column (18)

Hired labour:

Regularly - 1

During peak seasons only - 2

Casually - 3

Hires no labour for other productive enterprises - 4

Households with no other productive enterprises - 5

To illustrate, if a household engaged hired labour regularly for crop production, code 1 will be recorded against item 17. If labour is hired only during peak reasons, code 2 will be recorded. On the other hand, if use of hired labour is only casual code 3 and very rare or nil, code 4 will be recorded. If the households is not engaged in crop production activities, code 5 will be recorded against item 17. Similar information relating to use of hired labourer in enterprises other than crop production will be recorded against item 18. The information to be collected against these items will relate to the pattern normally followed by the sample household and not to any specific period or point of time.

Household monthly per capita expenditure (IN1983A_0054) File: IND1983-H-H

Overview

Type: Continuous

Format: numeric

Width: 7

Decimals: 2

Valid cases: 0

Invalid: 0

Description

This variable indicates the monthly per capita expenditure of the household in the month preceding the survey (Rs.0.00).

Universe

All households

Literal question

19. ____ Household monthly per-capita expenditure last month (Rs. 0.00)

Interviewer instructions

5.3.14: Item 19: household monthly per capital expenditure- last month: The per capita expenditure (in rupees correct to two places of decimal) of the household incurred during the last 30 days preceding the date of survey, will be recorded against this item. Detailed information on total household consumption expenditure is being collected through the household consumer expenditure schedule 1.0 from all sample households in which schedule 10 are canvassed. The per capita expenditure is calculated and recorded against item 11, block 3.1 of schedule 1.0. This entry will be copied against item 30 of block 3 in schedule 10.

Household monthly per capita expenditure grouped (IN1983A_0055) File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 1-99

Valid cases: 0
Invalid: 0

Description

This variable indicates the grouped per capita expenditure of the household in the month preceding the survey.

Universe

Household monthly per capita expenditure grouped

Migration during last 365 days (IN1983A_0056) File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 0
Invalid: 0

Description

This variable indicates the whether the household moved to the village or town of enumeration during last 365 days.

Universe

All households

Literal question

20. Whether the household moved to the village/town of enumeration during the last 365 days:

[] 1 Yes

[] 2 No [skip to Section 4.1]

Interviewer instructions

5.3.15: Item 20 : whether the household moved or not :

It is to be ascertained from each sample household whether the entire household has moved from a different place during the last 365 days preceding the date of survey, to the sample village/own of enumeration. If the answer is in the affirmative, code 1 will be recorded against this item. If the answer is in the negative, code 2 will be recorded. It may be noted that any movement irrespective of the reason will be considered for making entry against this item. In some cases, one member of the household might have moved first and the other members might have joined/him/her later. Such a movement will also be considered as movement of the household for making entry against this item. It may so happen that in certain cases, some addition to the household by way of births, marriages etc. might have taken place after the movement. Even then the entered household would be considered to have moved to the place of enumeration.

Type of last residence if moved in the last 365 days (IN1983A_0057) File: IND1983-H-H

Overview

Type of last residence if moved in the last 365 days (IN1983A_0057)

File: IND1983-H-H

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 0
Invalid: 0

Description

This variable indicates the type of residence the household lived in previously if the household moved in the last 365 days.

Universe

Households that moved to the enumeration village or town during the last 365 days

Literal question

21. If yes in item 20, type of last residence (place):

[Question 21 was asked of persons whose household moved to the village or town of enumeration during the last 365 days, per Question 20.]

- ☐ 1 Rural areas of the same district
- ☐ 2 Urban areas of the same district
- ☐ 3 Rural areas of other districts of the same state
- ☐ 4 Urban areas of other districts of the same state
- ☐ 5 Rural areas of other states
- ☐ 6 Urban areas of other states
- ☐ 7 Other countries

Interviewer instructions

5.3.16: Item 21 : type of last residence (place) code :

This item and the subsequent items 22 and 23 will be filled in only for those households which are reported to have moved to the village/town of enumeration from some other place during the last 365 days (i.e. for those households with entry 1 against item 20). For such a household the type of last place of residence (i.e.) the type of place of enumeration will be recorded in terms of the specified codes against item 21. The codes are:

rural areas of the same district - 1
urban areas of the same district - 2
rural areas of other districts of the same state - 3
urban areas of other districts of the same state - 4
rural areas of other states - 5
urban areas of other states - 6
other countries - 7

Temporary or permanent migration (IN1983A_0058)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 0
Invalid: 0

Description

This variable indicates the whether the migration of the household in the past 365 days was temporary or permanent.

Universe

Households that moved to the enumeration village or town during the last 365 days

Literal question

Temporary or permanent migration (IN1983A_0058)

File: IND1983-H-H

22. Whether the movement was temporary or permanent:

[Question 22 was asked of persons whose household moved to the village or town of enumeration during the last 365 days, per Question 20.]

- ☐ 1 Temporary: seasonal
- ☐ 2 Temporary: non-seasonal
- ☐ 3 Permanent

Interviewer instructions

5.3.17: Item 22: whether the movement was temporary or permanent: [This item will be filled in only for those households which are reported to have moved to the village/town of enumeration from some other place during the last 365 days (i.e. for those households with entry 1 against item 20).]

The information as to whether the present movement was a temporary one or a permanent one would be recorded against item 22. For this purpose, the movement would be considered permanent if the household either stayed or intended to stay for six months or more at the place of enumeration. For such households, code '3' will be recorded against this item. For the other households (i.e. those reporting the movement as not permanent but temporary), it has to be further ascertained whether the movement was a seasonal one or not. For those households reporting the movement as seasonal, code 1 and for the other code 2 will be entered.

Reason for migration (IN1983A_0059)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 0
Invalid: 0

Description

This variable indicates the reason that the household moved during the last 365 days.

Universe

Households that moved to the enumeration village or town during the last 365 days

Literal question

23. Reason for the movement:

[Question 23 was asked of persons whose household moved to the village or town of enumeration during the last 365 days, per Question 20.]

- ☐ 1 In search of work
- ☐ 2 On work
- ☐ 9 Others

Interviewer instructions

5.3.18: Item 23: reason for the movement :

[This item will be filled in only for those households which are reported to have moved to the village/town of enumeration from some other place during the last 365 days (i.e. for those households with entry 1 against item 20).]

For each household reporting movement, the reason for the movement will be recorded in terms of the specified codes against this item. The reason will relate to the main bread-winner of the household. The relevant codes are:

in search of work - 1
on work - 2
others - 9

If the movement is made to look for work or to take up work or to take up better work-in all these cases, code 1 will be recorded. If the movement is made in connection with the occupation pursued prior to movement, code 2 will be recorded. For all other reasons, code 9 will be entered.

Multiplier-1 (stratum level) (IN1983A_0066)

File: IND1983-H-H

Overview

Type: Continuous
 Format: numeric
 Width: 5
 Decimals: 0

Valid cases: 0

Multiplier-4 (for combined estimates) (IN1983A_0069)

File: IND1983-H-H

Type: Continuous
Format: numeric
Width: 5
Decimals: 0

Valid cases: 0
Invalid: 0

Description

This variable provides the multiplier value for combined estimates using all rounds/subsamples of the dataset. It is used to create the integrated variables WTPER and WTHH.

Universe

All households

Literal question

Multiplier-4 (for combined estimates)

Household weight (HHWT)

File: IND1983-H-H

Overview

Type: Continuous
Format: numeric
Width: 8
Decimals: 2

Valid cases: 0
Invalid: 0

Description

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

India, State 1983 - 2004 [Level 1; consistent boundaries, GIS] (GEO1_IN)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 6
Decimals: 0
Range: 356001-356035

Valid cases: 0
Invalid: 0

Description

GEO1_IN identifies the household's state within India in all sample years. States are the first level administrative units of the country. GEO1_IN is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO1_IN can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for India can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level, refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

At the present moment, IPUMS International is only releasing integrated geography for the first level of geography for India. Year specific geography and maps along with variables that are spatially harmonized at the second level of geography and account for political boundary changes across census years will become available in the near future.

India, State 1983 - 2004 [Level 1; inconsistent boundaries, harmonized by name] (GEO1_INX)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 1-36

Valid cases: 0
Invalid: 0

Description

GEO1_INX identifies the household's state within India in all sample years. States are the first level administrative units of the country. GEO1_INX is harmonized by name and does not account for boundary changes over time.

The full set of geography variables for India can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

At the present moment, IPUMS International is only releasing integrated geography for the first level of geography for India. Year specific geography and maps along with variables that are spatially harmonized at the second level of geography and account for political boundary changes across census years will become available in the near future.

India, Region 1984 - 2004 [Level 2; inconsistent boundaries, harmonized by name] (GEO2_INX)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 11-361

Valid cases: 0
Invalid: 0

Description

GEO2_INX identifies the household's region within India in all sample years. Regions are the second level administrative units of the country, after states. Regions are created by the National Sample Survey (NSS) as a second level of territorial organization.

GEO2_INX is harmonized by name and does not account for boundary changes over time.

The full set of geography variables for India can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

At the present moment, IPUMS International is only releasing integrated geography for the first level of geography for India. Year specific geography and maps along with variables that are spatially harmonized at the second level of geography and account for political boundary changes across census years will become available in the near future.

Number of married couples in household (NCOUPLES)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

Number of married couples in household (NCOUPLES)

File: IND1983-H-H

NCOUPLES is a constructed variable indicating the number of married/in-union couples within a household.

NCOUPLES is constructed using the IPUMS-International pointer variable SPLOC (spouse's location in the household).

Number of mothers in household (NMOTHERS)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

NMOTHERS is a constructed variable indicating the number of mothers -- of persons of any age -- within a household.

NMOTHERS is constructed using the IPUMS-International pointer variable MOMLOC (mother's location in the household).

Number of fathers in household (NFATHERS)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

NFATHERS is a constructed variable indicating the number of fathers -- of persons of any age -- within a household.

NFATHERS is constructed using the IPUMS-International pointer variable POPLOC (father's location in the household).

Country (COUNTRY)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 32-894

Valid cases: 0
Invalid: 0

Description

COUNTRY gives the country from which the sample was drawn. The codes assigned to each country are those used by the UN Statistics Division and the ISO (International Organization for Standardization).

Ownership of dwelling [general version] (OWNERSHIP)

File: IND1983-H-H

Overview

Ownership of dwelling [general version] (OWNERSHIP)

File: IND1983-H-H

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

OWNERSHIP indicates whether a member of the household owned the housing unit. Households that acquired their unit with a mortgage or other lending arrangement were understood to "own" their unit even if they had not yet completed repayment. For those that did not own their housing unit, several options were possible: renting (from various types of owners), subletting, usufruct, and de facto occupation.

Ownership of dwelling [detailed version] (OWNERSHIPD)

File: IND1983-H-H

Overview

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Valid cases: 0
Invalid: 0

Description

OWNERSHIP indicates whether a member of the household owned the housing unit. Households that acquired their unit with a mortgage or other lending arrangement were understood to "own" their unit even if they had not yet completed repayment. For those that did not own their housing unit, several options were possible: renting (from various types of owners), subletting, usufruct, and de facto occupation.

Strata identifier (STRATA)

File: IND1983-H-H

Overview

Type: Continuous
Format: numeric
Width: 12
Decimals: 0

Valid cases: 0
Invalid: 0

Description

This variable is the strata identifier for the sample. The STRATA variable provides information about the sample design that can be used to improve estimation.

Person number (PERNUM)

File: IND1983-P-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0
Invalid: 0

Description

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

Mother's location in household (MOMLOC)

File: IND1983-P-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0
Invalid: 0

Description

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships.

Father's location in household (POPLOC)

File: IND1983-P-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0
Invalid: 0

Description

POPLOC is a constructed variable that indicates whether or not the person's father lived in the same household and, if so, gives the person number of the father (see PERNUM). POPLOC makes it easy for researchers to link the characteristics of children and their (probable) fathers.

The method by which probable child-father links are identified is described in PARRULE.

The general design of POPLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly.

Note: POPLOC identifies social relationships (such as stepfather and adopted father) as well as biological relationships. The variable STEPPOP is designed to identify some of these social relationships.

Spouse's location in household (SPLOC)

File: IND1983-P-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0
Invalid: 0

Description

SPLOC is a constructed variable that indicates whether or not the person's spouse lived in the same household and, if so, gives the person number (PERNUM) of the spouse. SPLOC makes it easy for researchers to link the characteristics of (probable) spouses.

The method by which probable spouse-spouse links are identified is described in SPRULE.

The general design of SPLOC and other constructed variables is modeled on the methods developed for IPUMS-USA "Family Interrelationships", but the details vary significantly.

Rule for linking parent (PARRULE)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-52

Valid cases: 0
Invalid: 0

Description

PARRULE describes the criteria by which the IPUMS-International variables MOMLOC and POPLOC linked the person to a probable mother and/or father.

IPUMS-International establishes child-parent links according to five basic rules, and PARRULE gives the number of the rule that applied to the link in question. A link to any parent automatically generates a second link to that parent's spouse or partner, so only one rule is needed to describe both MOMLOC and POPLOC.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

Rule for linking spouse (SPRULE)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-6

Valid cases: 0
Invalid: 0

Description

SPRULE explains the criteria by which the IPUMS-International variable SPLOC linked the person to his/her probable spouse.

IPUMS-International establishes spouse-spouse links according to five basic rules, and SPRULE gives the number of the rule that applied to the link in question. A sixth rule identifies sample-specific linking procedures only imposed in selected instances.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

Probable stepmother (STEPMOM)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-6

Valid cases: 0
Invalid: 0

Description

STEPMOM indicates whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEPMOM explain why it is probable that the person's mother was a step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household.

The codes for STEPMOM are as follows:

- 0 = Biological mother or no mother of this person present in household.
- 1 = Mother has no children borne or surviving.
- 2 = Child reports mother is deceased.
- 3 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner, stepchild/child-in-law).
- 4 = Mother reports no children in the home.
- 5 = Age difference between mother and child was less than 12 or greater than 54 years.
- 6 = Child exceeds known fertility of mother.

See PARRULE for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEPMOM will always under-represent their actual number in the population.

Probable stepfather (STEPPOP)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-3

Valid cases: 0
Invalid: 0

Description

STEPPOP indicates whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPPOP explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household.

The codes for STEPPPOP are as follows:

- 0 = Biological father or no father of this person present in household.
- 1 = Child reports father is deceased.
- 2 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner; stepchild/child-in-law).
- 3 = Age difference between father and child was less than 12 or greater than 54 years.

See PARRULE for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPPOP will always under-represent their actual number in the population.

Man with more than one wife linked (POLYMAL)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-1

Valid cases: 0
Invalid: 0

Description

POLYMAL indicates if a man had more than one wife linked to him in the constructed IPUMS variable SPLOC -- Spouse's Location in Household.

The point of POLYMAL is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

Woman is second or higher order wife (POLY2ND)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-1

Valid cases: 0
Invalid: 0

Description

POLY2ND indicates if a woman was the second or higher order wife linked to a husband in the constructed IPUMS variable SPLOC -- Spouse's Location in Household. The variable does not suggest the actual marital order of wives, only their relative positions in the person order of the household as it was enumerated.

The point of POLY2ND is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

Family unit membership (FAMUNIT)

File: IND1983-P-H

Overview

Type: Continuous
Format: numeric
Width: 2
Decimals: 0

Valid cases: 0
Invalid: 0

Description

FAMUNIT is a constructed variable indicating to which family within the household a person belongs.

All persons related to the household head receive a 1 (see RELATE). Each secondary family or secondary individual receives a higher code. For purposes of FAMUNIT, secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

Number of own family members in household (FAMSIZE)

File: IND1983-P-H

Overview

Number of own family members in household (FAMSIZE)

File: IND1983-P-H

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 1-99

Valid cases: 0
Invalid: 0

Description

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

Number of own children in household (NCHILD)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

NCHILD provides a count of the person's own children living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

Number of own children under age 5 in household (NCHLT5)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

NCHLT5 provides a count of the person's own children under age five living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

Age of eldest own child in household (ELDCH)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Age of eldest own child in household (ELDCH)

File: IND1983-P-H

Description

ELDCH gives the age of the person's oldest own child living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

ELDCH is top-coded at age 50 or older.

Age of youngest own child in household (YNGCH)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

YNGCH gives the age of the person's youngest own child living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

YNGCH is top-coded at age 50 or older.

Relationship to household head [general version] (RELATE)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 0
Invalid: 0

Description

RELATE describes the relationship of the individual to the head of household (sometimes called the householder or reference person).

Relationship to household head [detailed version] (RELATED)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 4
Decimals: 0
Range: 1000-9999

Valid cases: 0
Invalid: 0

Description

RELATED describes the relationship of the individual to the head of household (sometimes called the householder or reference person).

Age (AGE)

File: IND1983-P-H

Overview

Type: Discrete
 Format: numeric
 Width: 3
 Decimals: 0
 Range: 0-999

Valid cases: 0
 Invalid: 0

Description

AGE gives age in years as of the person's last birthday prior to or on the day of enumeration.

Age, grouped into intervals (AGE2)

File: IND1983-P-H

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 1-98

Valid cases: 0
 Invalid: 0

Description

AGE2 gives computed years of age grouped into intervals.

Sex (SEX)

File: IND1983-P-H

Overview

Type: Discrete
 Format: numeric
 Width: 1
 Decimals: 0
 Range: 1-9

Valid cases: 0
 Invalid: 0

Description

SEX reports the sex (gender) of the respondent.

Marital status [general version] (MARST)

File: IND1983-P-H

Overview

Type: Discrete
 Format: numeric
 Width: 1
 Decimals: 0
 Range: 0-9

Valid cases: 0
 Invalid: 0

Description

[program universe for et,mz samples.

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

Marital status [detailed version] (MARSTD)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Valid cases: 0
Invalid: 0

Description

[program universe for et,mz samples.

MARSTD describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

School attendance (SCHOOL)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

SCHOOL indicates whether or not the person attended school at the time of the census or within some specified period of time prior to the census.

Literacy (LIT)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

LIT indicates whether or not the respondent could read and write in any language. A person is typically considered literate if he or she can both read and write. All other persons are illiterate, including those who can either read or write but cannot do both.

Educational attainment, India (EDUCIN)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 0
Invalid: 0

Educational attainment, India (EDUCIN)

File: IND1983-P-H

Description

EDUCIN indicates the person's educational attainment in terms of the level of schooling completed.

Activity status (employment status) [general version] (EMPSTAT)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

Activity status (employment status) [detailed version] (EMPSTATD)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Valid cases: 0
Invalid: 0

Occupation, ISCO general (OCCISCO)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 1-99

Valid cases: 0
Invalid: 0

Description

Occupation, ISCO general (OCCISCO)

File: IND1983-P-H

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is typically the one in which the person had spent the most time or earned the most money.

Occupation, unrecoded (OCC)

File: IND1983-P-H

Overview

Type: Continuous
Format: numeric
Width: 4
Decimals: 0

Valid cases: 0
Invalid: 0

Description

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

Industry, general recode (INDGEN)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Valid cases: 0
Invalid: 0

Description

INDGEN recodes the industrial classifications of the various samples into twelve groups that can be fairly consistently identified across all available samples. The groupings roughly conform to the International Standard Industrial Classification (ISIC). The third digit of INDGEN retains important detail among the service industries that could not be consistently distinguished in all samples.

"Industry" refers to the activity or product of the establishment or sector in which a person worked.

Industry, unrecoded (IND)

File: IND1983-P-H

Overview

Type: Continuous
Format: numeric
Width: 5
Decimals: 0

Valid cases: 0
Invalid: 0

Description

"Industry" refers to the activity or product of the establishment or sector in which the person worked. IND is classified according to the system used by the respective national census office at the time, and is not recoded by IPUMS-International.

Status in employment (class of worker) [general version] (CLASSWK)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

Status in employment (class of worker) [detailed version] (CLASSWKD)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Valid cases: 0
Invalid: 0

Literal question

1. ____ Serial number

Interviewer instructions

Serial number of person (IN1983A_0400)

File: IND1983-P-H

5.4.1.0 Block 4.1 : demographic and current activity particulars during the week :

This block is meant for recording the demographic and the current activity status particulars of all the normal members of the household. Besides that, the information as to whether the household members are to be considered migrants according to certain laid down criterion will also be collected in this block.

5.4.1.2 Column (1): serial number: All the 'normally resident members' of the sample household will be listed in block 4.1 using a continuous serial number in column (1). While listing, the head of the household will be listed first followed by head's spouse, the first son, first son's wife and children, second son, second son's wife and children etc. After the sons are enumerated, the daughters will be listed followed by other relations, dependents, servants etc. For definitions of 'household' and 'normally resident members' if the household see 2.0.9 and 2.0.10.

5.4.1.3 Column (2): name of member : The names of the normally resident members corresponding to the serial numbers entered in column (1) will be recorded in column (2).

Relationship to head (IN1983A_0401)

General education (IN1983A_0406)

File: IND1983-P-H

5.4.1.0 Block 4.1 : demographic and current activity particulars during the week :

This block is meant for recording the demographic and the current activity status particulars of all the normal members of the household. Besides that, the information as to whether the household members are to be considered migrants according to certain laid down criterion will also be collected in this block.

5.4.1.8 Column (8) and (9): educational standard:

Information regarding the general and technical education attained by the normal members of the household listed in col. (1) will be recorded in columns (8) and (9) respectively in terms of the specified code numbers. For the purpose of making entries in these columns only the course successfully completed will be considered. For instances, for a person who has studied up to say, first year B.A., his educational attainment will be considered only secondary (code number 5). Also, for a person who has studied up to 12th standard but has not sat for the final examination or has failed or ever passed in the examination, his educational attainment will be considered 'secondary' only. The relevant codes to be used for recording entries in these two columns are:

general education[column(8)]

Not literate ... 00
Literate without formal schooling ... 01
Literate but below primary ... 02
Primary ... 03
Middle ... 04
Secondary ... 05

Graduates and above in:

Agriculture ... 06
Engineering/technology ... 07
Medicine ... 08
Other subjects ... 09

technical education[column (9)]

Additional diploma/certificate

Agriculture ... 10
Engineering/technology ... 11
Medicine ... 12
Crafts ... 13
Other subjects ... 14
No technical education ... 15

A person who can both read and write a simple message in at least one language is to be considered literate. Those who are not able to do so are to be considered not literate and will be assigned code 00. Those who are literate but never attended any school, will be assigned code 01. Those who are by definition literate but are yet to pass primary standard examination will get code 02. Similarly codes 03, 04, and 05 will indicate the successive higher standard of examinations passed. Matriculation, School Final, Pre-University, Higher Secondary and Intermediate examination will come under Secondary (code 05). A degree holder will get one of the codes 06 to 09 depending on the subject studied. For code 08, medical graduates belonging to Schools of medicine other than allopathic, e.g., homeopathic, ayurvedic, etc. are also to be taken into consideration. Code 06 will also include graduates in 'forestry', 'fishery science' etc. If more than one of the codes 06 to 09 are relevant for a person the following procedure will be adopted.

- i) When code 09 as well as one of the codes 06 to 08 are relevant code 09 will not be considered.
- ii) When more than one of the codes 06 to 08 are relevant, the code indicating the degree last obtained will be considered.

Persons who have attained proficiency in oriental languages (e.g. Sanskrit, Persian etc.) through formal but not the general type of education will be classified appropriately at the equivalent level of general education standard.

Description

This variable indicates the number of years of formal education that the person had received.

Universe

All persons

Literal question

11. Number of years of formal education (in years): ____

Interviewer instructions

5.4.1.0 Block 4.1 : demographic and current activity particulars during the week :

This block is meant for recording the demographic and the current activity status particulars of all the normal members of the household. Besides that, the information as to whether the household members are to be considered migrants according to certain laid down criterion will also be collected in this block.

5.4.1.10 Column (11): number of years of formal education:

The number of years a person has to attend on educational institution to pass a class, level or grade of education -- both general and technical -- excluding the number of years spent in pre-primary education (below standard one) will be recorded for each member rounded off to the nearest integer. Thus, for a person who is either studying in class XI has failed in class XI and has discontinued the education thereafter, the entry will be '10'. Similarly for a person studying say, in the second year of the degree course, the number of years to be recorded will be '13' (10+2+1) or for a person who has completed 9 months' technical education after passing class XII, the entry will be '13'. For those who pursued the old system of education, the number of years required would have to be worked out in the same manner. It may, however, be noted that the years spent for a person's attending some level or grade of education through correspondence course or through private study and passing out the level or grade as private or external candidate will not be counted for recording the 'number of years of formal education'. For example, if a person has passed class XII through attending an educational institution and then completed his graduation and post-graduation as a private candidate the 'number of years' to be recorded will only be 12.

Education institution enrollment code (IN1983A_0409)

File: IND1983-P-H

Education institution enrollment code (IN1983A_0409)

File: IND1983-P-H

5.4.1.0 Block 4.1 : demographic and current activity particulars during the week :

This block is meant for recording the demographic and the current activity status particulars of all the normal members of the household. Besides that, the information as to whether the household members are to be considered migrants according to certain laid down criterion will also be collected in this block.

5.4.1.11 Column (12): current enrollment in education institutions and course of study:

For all persons listed in column (1), it will be first ascertained whether the person is currently enrolled in any educational institution or not. A person will be considered to be currently enrolled in an educational institution if he or she is in the rolls of an educational institution for any course of study which will lead to the person's obtaining a degree/diploma/certificate on successful completion of the course of study. In many universities like Rajasthan, Delhi, Madurai etc. candidates are enrolled for regular correspondence courses for a stipulated period, at the end of which they will be allowed to appear in the university examinations of the particular course of study, Persons enrolled for such correspondence course will also be considered as 'currently enrolled in an educational institution'. For a person thus considered as currently enrolled in an educational institution, it will be further probed in regard to the course of study for which they are enrolled. For all those who are not enrolled in any educational institution, code 01 will be recorded in this column. For those who are considered enrolled in an educational institution on the basis of the criterion laid down above, the course of study for which they are enrolled will be recorded in terms of specified codes. The relevant codes to be used for filling up of this column are:

currently not enrolled in any educational institution - 01
currently enrolled in any educational institution for:

pre-primary - 02
primary - 03
middle - 04
secondary - 05

graduated and above in:

agriculture - 06
engineering/technology - 07
medicine - 08
other subjects - 09

diploma/certificate in :

agriculture - 10
engineering/technology - 11
medicine - 12
crafts - 13
other subjects - 14

Universe

All persons

Literal question

13. Whether currently on the live register of the employment exchange:

☐ 1 Yes

☐ 2 No

Interviewer instructions

5.4.1.0 Block 4.1 : demographic and current activity particulars during the week :

This block is meant for recording the demographic and the current activity status particulars of all the normal members of the household. Besides that, the information as to whether the household members are to be considered migrants according to certain laid down criterion will also be collected in this block.

5.4.1.12 Column (13): registration with employment exchange:

For all persons listed in column (1), it has to be ascertained whether or not they are currently on the live register of the employment exchange. For a person to be currently on the live register, he should renew his registration before it lapses, i.e., when the renewal becomes due. The period specified for renewal varies from state to state and also perhaps from one employment category to the other. The investigator, therefore, should ascertain from some knowledgeable sources, the period specified for such renewal in the particular region where he has to carry out the field work. With this background information, the investigator should find out when the person has registered in the employment exchange, whether he had renewed since the registration etc. and thus determine whether or not he or she was currently on the live register of the employment exchange. If the name of the person is recorded in the live register of the employment exchange, code 1 and if not, code 2, as the case may be, will be recorded in column (13).

Current weekly activity [Questions 14 to 15]

14. Status:

Working with an employer under obligation/ work not specifically compensated by prevalent wage or salary:

☐ 1 Attached to landlord

☐ 2 Attached to money-lender

☐ 3 Attached to landlord-cum-money lender

☐ 4 Attached to others

☐ 11 Worked (self-employed) in household enterprise

☐ 21 Worked as a helper in household enterprise

☐ 31 Worked as regular salaried/wage employee

☐ 41 Worked as casual wage labour in public works

☐ 51 Worked as casual wage labour in other types of work

☐ 61 Did not work though there was work in household enterprise

☐ 71 Did not work but had regular salaried/wage employment

☐ 81 Sought work

☐ 82 Did not seek but was available for work

☐ 91 Attended educational institutions

☐ 92 Attended domestic duties only

☐ 93 Attended domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed etc.), sewing, tailoring, weaving etc., for household use

☐ 94 Too young to work/ to attend school/ to seek employment

☐ 95 Old and disabled

☐ 96 Rentiers, pensioners, remittance recipients etc.

☐ 97 Beggars, prostitutes, etc.

☐ 98 Others

☐ 99 Did not work due to temporary sickness (for casual workers only)

Interviewer instructions

Current weekly activity status code (IN1983A_0411)

File: IND1983-P-H

5.4.1.0 Block 4.1 : demographic and current activity particulars during the week :

This block is meant for recording the demographic and the current activity status particulars of all the normal members of the household. Besides that, the information as to whether the household members are to be considered migrants according to certain laid down criterion will also be collected in this block.

(a) Activity status : The activity status of an individual is the activity situation obtaining for the person in respect of his/her participation in gainful and also non-gainful activities during a given reference period. Normally, one of the following three major activity situations of a combination of them will obtain to a person:

- (i) of working or being engaged in gainful activities (or work) for pay, profit or family gain,
- (ii) of being not engaged in gainful activities (of work) but either of making tangible efforts to seek work or of being available for work, and
- (iii) of being not available for work because of various reasons.

Identification of each individual according to a unique situation poses a problem when more than one of the three activity situations listed above concurrently obtain to a person. In such an eventuality, the unique identification under any one of the three activity situations is done by adopting either the 'relatively long time' or the 'major time' or the 'priority' criterion. The former is used for classification of persons under 'usual activity status' with reference to a period of 365 days preceding the date of survey and the latter for classification of persons under 'current activity status' with reference to a period of 7 days preceding the date of survey or to each day of the seven days period. The three major activity status referred to above have been further sub-divided into several detailed activity categories. The detailed categories (under each of the three major activity status categories) along with the corresponding coded to be used in the 38th round survey are listed below:

(i) Situation of working or being engaged in gainful activities (employed)

1. worked with an employer under obligation/work not specifically compensated by prevalent wage/salary.

- (a) attached to land lord - 01
- (b) attached to money lender - 02
- (c) attached to land lord-cum-money lender - 03
- (d) attached to others - 04

2. worked (self-employed) in household enterprise - 11

3. worked as helper in household enterprise - 21

4. worked as regular salaried/wage employee - 31

5. worked as casual wage labour in public works - 41

6. worked as casual wage labour in other types of work - 51

7. did not work though there was work in the household enterprise - 61

8. did not work but had regular salaried/wage employment - 71

(ii) situation of being not engaged in work but available for work:

1. sought work - 81

2. did not seek but was available for work - 82

(iii) situation of being not available for work:

- 1. attended education institution - 91
- 2. attended domestic duties only - 92
- 3. attended domestic duties and was also engaged in free collection of good, sewing, tailoring, weaving etc. for household use - 93
- 4. too young to work/attend school/seek employment - 94
- 5. old and disabled - 95
- 6. rentiers, pensioners, remittance recipients etc - 96
- 7. beggars, prostitutes, etc - 97
- 8. others - 98
- 9. did not work due to sickness (for casual workers only) - 99

for usual status classification, codes 61, 71, 82 and 99 are not applicable and code 81 will be used to indicate both the situations-seeking work and being available for work.

5.4.1.13 Column (14): current weekly activity status:

The current weekly activity status of a person will be the activity status obtaining for a person during a reference period of seven days preceding the date of survey. Irrespective of the usual activity pursued by a person, his/her current weekly activity will be determined strictly on the basis of the activities pursued by the person during the reference period of seven days adopting the priority criterion. Even for self-employed persons, one need not prejudice and take for granted that the current activity situation for them will be identical to the usual activity situation. A careful probe on the part of the investigator regarding the various activities pursued by the person during the seven days preceding the date of survey is therefore, necessary for ascertaining his/her current weekly activity status. In defining the activity status (paragraph 5.4.1.1) it has already been mentioned that the activities are grouped broadly into three categories namely: (i) working, (ii) not working but seeking and/or available for work, and (iii) neither working nor available for work.

According to the priority criterion, the status of 'working' gets priority over the status 'not working but seeking and/or available for work' which in turn gets priority over the status of 'neither working nor available for work'.

In the category 'not working but seeking and/or available for work', the status 'seeking' gets priority over the status or 'not seeking but available for work'.

A person would be considered 'working (or employed)' if he or she while pursuing any gainful activity had worked for at least one hour on at least one day during the week preceding the date of survey.

A person would be considered 'seeking and/or available for work (or unemployed)' if during the reference week no gainful work was done by the person but he or she had made efforts to get work or had been available for work during the reference week though not actively seeking work.

A person who had neither worked nor was available for work will be considered to be engaged in 'non-gainful activities (or not in labour force)':

The three broad groups of activities are further classified into 22 detailed 'status' categories, 11 for persons categorized 'working' (codes 01-71), 2 for those categorized 'not working but seeking and/or available for work' (coded 81 and 82) and 9 for those categorized 'neither working nor available for work' (coded 91-99). For a person, the appropriate broad 'status' will be determined first adopting the priority criterion.

If a person categorized 'working' is found to be pursuing more than one gainful activity during the reference week, the gainful activity in which relatively more time has been spent will be the appropriate detailed 'status' that will be assigned to him/her. In case more than one 'non-gainful activity status' (codes 91-99) are assignable to a person in view of the typical activity pattern followed by his/her during the reference week, the activity which appears first in the code list in the ascending order starting from 91 will be assigned. But it may be noted that a person essentially engaged in 'domestic duties' should not be classified as 'student' simply because he/she was attending some training. Similarly, an old or disabled person who was a recipient of regular pension, remittance etc. should be classified as 'renters, pensioners, remittance recipients etc.' and not as 'old or disabled'. After thus determining the current weekly activity status of a household member, the appropriate 2-digit code (see paragraph 5.4.1.1) will be recorded in column (14). The following points may be noted while assigning to the 'activity status' to a person.

(a) A person found to be engaged in domestic duties should not be categorized 'in domestic duties' (code 92) if the person reports that he/she has also been available for work concurrently.

(b) A person engaged in regular wage/salaried employment but currently not at work, will be assigned code 71 irrespective of whether he is engaged in any other 'gainful' or 'non-gainful' activity.

(c) Unpaid apprentices will be treated as 'students'.

(d) Person under 'paid lay off' will be considered employed and those under 'unpaid lay off' unemployed if they are seeking and/or available for work.

(e) 'Free collection for sale' will be treated as self-employment. If the products collected relate to agricultural sector the industry division will be 'O' and for other goods like rag, waste paper, tins etc., the industry division will be '6'.

Principal usual activity status (IN1983A_0416)

File: IND1983-P-H

(a) Activity status : The activity status of an individual is the activity situation obtaining for the person in respect of his/her participation in gainful and also non-gainful activities during a given reference period. Normally, one of the following three major activity situations or a combination of them will obtain to a person:

- (i) of working or being engaged in gainful activities (or work) for pay, profit or family gain,
- (ii) of being not engaged in gainful activities (of work) but either of making tangible efforts to seek work or of being available for work, and
- (iii) of being not available for work because of various reasons.

Identification of each individual according to a unique situation poses a problem when more than one of the three activity situations listed above concurrently obtain to a person. In such an eventuality, the unique identification under any one of the three activity situations is done by adopting either the 'relatively long time' or the 'major time' or the 'priority' criterion. The former is used for classification of persons under 'usual activity status' with reference to a period of 365 days preceding the date of survey and the latter for classification of persons under 'current activity status' with reference to a period of 7 days preceding the date of survey or to each day of the seven days period. The three major activity status referred to above have been further sub-divided into several detailed activity categories. The detailed categories (under each of the three major activity status categories) along with the corresponding coded to be used in the 38th round survey are listed below:

(i) Situation of working or being engaged in gainful activities (employed)

1. worked with an employer under obligation/work not specifically compensated by prevalent wage/salary.

- (a) attached to land lord - 01
- (b) attached to money lender - 02
- (c) attached to land lord-cum-money lender - 03
- (d) attached to others - 04

2. worked (self-employed) in household enterprise - 11

3. worked as helper in household enterprise - 21

4. worked as regular salaried/wage employee - 31

5. worked as casual wage labour in public works - 41

6. worked as casual wage labour in other types of work - 51

7. did not work though there was work in the household enterprise - 61

8. did not work but had regular salaried/wage employment - 71

(ii) situation of being not engaged in work but available for work:

1. sought work - 81

2. did not seek but was available for work - 82

(iii) situation of being not available for work:

- 1. attended education institution - 91
- 2. attended domestic duties only - 92
- 3. attended domestic duties and was also engaged in free collection of good, sewing, tailoring, weaving etc. for household use - 93
- 4. too young to work/attend school/seek employment - 94
- 5. old and disabled - 95
- 6. rentiers, pensioners, remittance recipients etc - 96
- 7. beggars, prostitutes, etc - 97
- 8. others - 98
- 9. did not work due to sickness (for casual workers only) - 99

for usual status classification, codes 61, 71, 82 and 99 are not applicable and code 81 will be used to indicate both the situations-seeking work and being available for work.

5.6.0 Block 6: usual activity particulars :

The usual activity particulars with respect to a reference period of 365 days preceding the date of survey of all the normally resident members of the household and particulars of their seasonal movement if any, in connection with their work, will be collected in Block 6.

5.6.2 Column (2): principal usual activity status:

For determining the principal usual activity status of a person, the reference period to be used will be the 365 days preceding the date of survey. As mentioned earlier, the broad activity status of the person will first be determined adopting the 'relatively long' or 'major time' criterion. Thus, the broad usual activity status of a person will be the one out of the three-broad activity status, such as 'working', 'seeking and/or available for work' and 'neither working nor available for work' on which relatively long period was spent by the person during the 365 days preceding the date of survey. After determining the broad status, the detailed activity status within the broad group will again be determined adopting again the 'relatively long' or 'major time' criterion. The detailed activity status, thus determined, will be the principal usual activity status of the person. The code corresponding to this activity status will be recorded in column (2).

Reason code for temporary work away (IN1983A_0426)

File: IND1983-P-H

Description

This variable indicates the reason that the person temporarily stayed at different places for work during the last 365 days.

Universe

Persons who stayed temporarily in a different place for work for a continuous period of 4 weeks or more during the last 365 days

Literal question

If yes in column 12 [Answer questions 13-23]

13. Reason:

[Question 13 was asked of persons who stayed temporarily for work for a continuous period of 4 weeks or more at a different place during the last 365 days, per Question 12.]

☐ 1 Non-availability of work at the place of enumeration

☐ 2 For better employment

☐ 3 Required by nature of work

Interviewer instructions

5.6.7 Column (13)-(23): particulars relating to the temporary stay in different places other than the place of enumeration: For all those reported to have stayed in places other than the place of enumeration for a continuous period of 4 weeks or more during the 365 days preceding the date of survey in connection with work (i.e. those with code 1 recorded in column (12)), the reason why they had to stay in a different place will be recorded in terms of the specified codes in column (13). The relevant codes are:

Non-availability of work at in place of enumeration - 1

For better employment - 2

Required by the nature of work - 3

It may so happen that a person might have stayed away a number of times interspersed by stay at the place of enumeration and that too in different places during the 365 days preceding the date of survey. In such cases, the reason will relate to the one for which the maximum duration of the total time spent away from the place of enumeration. The total period in completed weeks, thus spent elsewhere in connection with the work, during the 365 days preceding the date of survey, will be recorded in column (14) and the number of places where the person stayed like the manner described above will be recorded in column (15). The description of the industry-occupation combination relating to work, pursued during the major part of the total period of stay away for work, will be ascertained and recorded in column (16). The corresponding 3-digit industry group code and 3-digit occupation family code will be recorded respectively in columns (17) and (18). The type of the place where major part of the total period of stay away for work was spent, in terms of the specified codes (see also paragraphs 5, 3, 16), will be recorded in column (19). The names of the state and the district to which this place belongs will be entered respectively in columns (20) and (22), and the corresponding codes in columns (21) and (23).

Weeks of temporary work away (IN1983A_0427)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Valid cases: 0
Invalid: 0

Description

This variable indicates the total number of weeks that the person stayed temporarily at different places for work during the last 365 days.

Universe

Weeks of temporary work away (IN1983A_0427)

File: IND1983-P-H

Persons who stayed temporarily in a different place for work for a continuous period of 4 weeks or more during the last 365 days

Literal question

If yes in column 12 [Answer questions 13-23]

[Question 14 and 15 were asked of persons who stayed temporarily for work for a continuous period of 4 weeks or more at a different place during the last 365 days, per Question 12.]

14. ____ Total period (in weeks)

15. ____ Number of places stayed at

Interviewer instructions

5.6.7 Column (13)-(23): particulars relating to the temporary stay in different places other than the place of enumeration: For all those reported to have stayed in places other than the place of enumeration for a continuous period of 4 weeks or more during the 365 days preceding the date of survey in connection with work (i.e. those with code 1 recorded in column (12)), the reason why they had to stay in a different place will be recorded in terms of the specified codes in column (13). The relevant codes are:

Non-availability of work at in place of enumeration - 1

For better employment - 2

Required by the nature of work - 3

It may so happen that a person might have stayed away a number of times interspersed by stay at the place of enumeration and that too in different places during the 365 days preceding the date of survey. In such cases, the reason will relate to the one for which the maximum duration of the total time spent away from the place of enumeration. The total period in completed weeks, thus spent elsewhere in connection with the work, during the 365 days preceding the date of survey, will be recorded in column (14) and the number of places where the person stayed like the manner described above will be recorded in column (15). The description of the industry-occupation combination relating to work, pursued during the major part of the total period of stay away for work, will be ascertained and recorded in column (16). The corresponding 3-digit industry group code and 3-digit occupation family code will be recorded respectively in columns (17) and (18). The type of the place where major part of the total period of stay away for work was spent, in terms of the specified codes (see also paragraphs 5, 3, 16), will be recorded in column (19). The names of the state and the district to which this place belongs will be entered respectively in columns (20) and (22), and the corresponding codes in columns (21) and (23).

Whether engaged on a regular basis in any gainful work in subsidiary capacity (IN1983A_0434)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 0
Invalid: 0

Description

This variable indicates whether the person was engaged on a regular basis in any gainful work in a subsidiary capacity.

Universe

Persons who did not work (principal usual activities) due to reasons other than being too young to work

Literal question

3. Whether engaged on a regular basis in any gainful work in subsidiary capacity:

[] 1 Yes

[] 2 No

Whether engaged on a regular basis in any gainful work in subsidiary capacity (IN1983A_0434)

File: IND1983-P-H

Interviewer instructions

5.7.0 Block 7: particulars of usual subsidiary gainful activity: Information relating to the subsidiary gainful activities, if any, pursued during the 365 days preceding the date of survey by the household members categorized 'not working' in block 6 (i.e. those having usual status codes 81-93 and 95-998 in column (2) of block (6) and the corresponding industry will be collected in this block). This information need not be collected for persons categorized too young (code 94).

5.7.3 Column (3):

For recording entries in this column, it will be ascertained whether or not the persons enumerated in column (1) were engaged in any gainful activity in their subsidiary capacity during the 365 days preceding the date of survey, or in other words whether or not they did some gainful work, more or less regularly even though intermittently, for a shorter duration of time during the reference period of 365 days preceding the date of survey. For person who pursued some gainful activities in their subsidiary capacity, code '1' will be recorded in this column. For others who did not have any subsidiary gainful activities during the period, code 2 will be recorded. It may be noted that engagement in gainful activities in the subsidiary capacity may arise out of two situations: (i) a person may be engaged for relatively a long period during the last 365 days in non-gainful activity and for the remaining period engaged in gainful activities, (ii) a person may be pursuing non-gainful activities in the principal capacity throughout the year but only for a relatively shorter time. For the purpose of recording entries in this block, for both the situations illustrated above, the person will be considered to have pursued some subsidiary gainful activity, although according to the relatively long time criterion of determining the principal usual status, he/she has been categorized 'not working' in block 6.

Full engagement in work during the last 365 days (IN1983A_0436)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 0
Invalid: 0

Description

This variable indicates whether the person was fully engaged in work during the last 365 days.

Universe

Persons whose principal usual activities were working

Literal question

4. For persons with usual activity status codes 01-51 only
Were you more or less fully engaged in work during the last 365 days?

☐ 1 Yes

☐ 2 No

Interviewer instructions

Full engagement in work during the last 365 days (IN1983A_0436)

File: IND1983-P-H

5.8.0 Block 8: follow-up questions for the persons with usual activity status codes 01-93 and 96:

These question will be put in all the household members assigned any one of the usual activity status codes 01-51, 81, 91-93 and 96. As there may be more than one member of the household with any of the above usual activity status codes, provision has been made in this block to record the forthcoming answers for 5 such individuals. The follow-up questions listed in this block are in most cases self explanatory and their scope and limitations are also apparent. The probable answers to these questions are pre-coded and printed in parenthesis along with the relevant questions. The investigators will try to find out, through their investigation, what, of the many possible alternative answers, is the answer offered by the informant and record in the box spaces provided for, the appropriate code relevant to that answer. The questions and answers should, in general, refer to the period of 365 days preceding the date of survey.

5.8.1 It may be noted that the population to which the follow-up questions in block 8 are to be put in constituted of three categories which are:

persons classified as usually 'working' (usual status codes 01-51) i.e. those working for a relatively long time during the period of 365 days preceding the date of survey,

person classified as usually 'not working' (usual status codes 81-93 and 96) but categorized 'working' in the subsidiary capacity (i.e. those with code '1' in col. 3 of block 7),

person classified as usually 'not working' (usual status codes 81-93 and 96) and also categorized 'not working' even I the subsidiary capacity (i.e. those with code '2' in column 3 of block 7)

It is obvious that person covered under (i) and (ii) above will be engaged in some work during the 365 days preceding the date of survey and persons under (i) may have some sort of full engagement in gainful activities while the persons under (ii) will have only marginal engagement in gainful activities. Whichever be the case, they are the persons who may like to have some 'additional work' over the above whatever work they have during the reference period. It is of course possible that some of them, in spite of the work they are currently having, will still like to have not additional work but alternate full time work. Persons covered under (iii) who had no work during the reference period are the set of people who, in the natural course, may like to have some substantive work (not additional work). These points must be kept in mind while the relevant question on the availability for work is put to the respondent. Depending on the answer obtained, the subsequent questions should be put to the answer obtained, and the subsequent question should be put to the informant by the investigator in the manner demanded by the situation. For example, if a person under (i) (though expected to have had almost full work) says that he wants full work (not additional work), the subsequent question on the efforts made, type of work desirable etc. should relate to the substantive or full 'work' and not 'additional work'.

5.8.5 Item 4: fully engaged or not, in work:

The question - 'were you more or less fully engaged in work during the last 365 days?' listed in item 4-will be put only to those categorized usually 'working' (i.e. those with status codes 01-51 recorded against item) 2) with a view to finding out whether the person considers himself/herself as having enough work to keep himself/herself busy in that work almost throughout the year. If the answer to the question is in affirmative, code-1 and if in the negative, code-2 will be entered against this item.

Job seeking for the first time (IN1983A_0437)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Description

Job seeking for the first time (IN1983A_0437)

File: IND1983-P-H

This variable indicates whether the person was seeking or available for work for the first time.

Universe

Persons who did not work but were seeking and/or available for work

Literal question

5. For persons with usual activity status codes 81 only

Were you seeking or available for work for the first time?

☐ 1 Yes [skip to Question 12]

☐ 2 No [skip to Question 12]

Interviewer instructions

5.8.0 Block 8: follow-up questions for the persons with usual activity status codes 01-93 and 96:

These question will be put in all the household members assigned any one of the usual activity status codes 01-51, 81, 91-93 and 96. As there may be more than one member of the household with any of the above usual activity status codes, provision has been made in this block to record the forthcoming answers for 5 such individuals. The follow-up questions listed in this block are in most cases self explanatory and their scope and limitations are also apparent. The probable answers to these questions are pre-coded and printed in parenthesis along with the relevant questions. The investigators will try to find out, through their investigation, what, of the many possible alternative answers, is the answer offered by the informant and record in the box spaces provided for, the appropriate code relevant to that answer. The questions and answers should, in general, refer to the period of 365 days preceding the date of survey.

5.8.1 It may be noted that the population to which the follow-up questions in block 8 are to be put in constituted of three categories which are:

persons classified as usually 'working' (usual status codes 01-51) i.e. those working for a relatively long time during the period of 365 days preceding the date of survey,

person classified as usually 'not working' (usual status codes 81-93 and 96) but categorized 'working' in the subsidiary capacity (i.e. those with code '1' in col. 3 of block 7),

person classified as usually 'not working' (usual status codes 81-93 and 96) and also categorized 'not working' even I the subsidiary capacity (i.e. those with code '2' in column 3 of block 7)

It is obvious that person covered under (i) and (ii) above will be engaged in some work during the 365 days preceding the date of survey and persons under (i) may have some sort of full engagement in gainful activities while the persons under (ii) will have only marginal engagement in gainful activities. Whichever be the case, they are the persons who may like to have some 'additional work' over the above whatever work they have during the reference period. It is of course possible that some of them, in spite of the work they are currently having, will still like to have not additional work but alternate full time work. Persons covered under (iii) who had no work during the reference period are the set of people who, in the natural course, may like to have some substantive work (not additional work). These points must be kept in mind while the relevant question on the availability for work is put to the respondent. Depending on the answer obtained, the subsequent questions should be put to the answer obtained, and the subsequent question should be put to the informant by the investigator in the manner demanded by the situation. For example, if a person under (i) (though expected to have had almost full work) says that he wants full work (not additional work), the subsequent question on the efforts made, type of work desirable etc. should relate to the substantive or full 'work' and not 'additional work'.

5.8.6 Item 5: The question- 'were you seeking or available for work for the first time?' listed against item 5- will be put to only those who have been classified as 'seeking and/or available for work' according to usual status (i.e. those with usual activity status code 81). The answer obtained will be recorded in code numbers (yes-1, no-2) against this item in the relevant box space.

Seeking work/additional work (IN1983A_0438)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric

Description

This variable indicates whether the person was seeking or available for work or additional work.

Universe

All persons except for beggars, prostitutes, the disabled, or people who were too young or too old to work

Literal question

6. Were you seeking or available for work/additional work? (Do not ask this question to persons with usual activity status code 81, for them record code 1)

[Question 6 was asked of persons who were not seeking work, per Question 2 of Block 6.]

☐ 1 Yes

☐ 2 No [skip to Question 12]

Interviewer instructions

Seeking work/additional work (IN1983A_0438)

File: IND1983-P-H

5.8.0 Block 8: follow-up questions for the persons with usual activity status codes 01-93 and 96:

These question will be put in all the household members assigned any one of the usual activity status codes 01-51, 81, 91-93 and 96. As there may be more than one member of the household with any of the above usual activity status codes, provision has been made in this block to record the forthcoming answers for 5 such individuals. The follow-up questions listed in this block are in most cases self explanatory and their scope and limitations are also apparent. The probable answers to these questions are pre-coded and printed in parenthesis along with the relevant questions. The investigators will try to find out, through their investigation, what, of the many possible alternative answers, is the answer offered by the informant and record in the box spaces provided for, the appropriate code relevant to that answer. The questions and answers should, in general, refer to the period of 365 days preceding the date of survey.

5.8.1 It may be noted that the population to which the follow-up questions in block 8 are to be put in constituted of three categories which are:

persons classified as usually 'working' (usual status codes 01-51) i.e. those working for a relatively long time during the period of 365 days preceding the date of survey,

person classified as usually 'not working' (usual status codes 81-93 and 96) but categorized 'working' in the subsidiary capacity (i.e. those with code '1' in col. 3 of block 7),

person classified as usually 'not working' (usual status codes 81-93 and 96) and also categorized 'not working' even I the subsidiary capacity (i.e. those with code '2' in column 3 of block 7)

It is obvious that person covered under (i) and (ii) above will be engaged in some work during the 365 days preceding the date of survey and persons under (i) may have some sort of full engagement in gainful activities while the persons under (ii) will have only marginal engagement in gainful activities. Whichever be the case, they are the persons who may like to have some 'additional work' over the above whatever work they have during the reference period. It is of course possible that some of them, in spite of the work they are currently having, will still like to have not additional work but alternate full time work. Persons covered under (iii) who had no work during the reference period are the set of people who, in the natural course, may like to have some substantive work (not additional work). These points must be kept in mind while the relevant question on the availability for work is put to the respondent. Depending on the answer obtained, the subsequent questions should be put to the answer obtained, and the subsequent question should be put to the informant by the investigator in the manner demanded by the situation. For example, if a person under (i) (though expected to have had almost full work) says that he wants full work (not additional work), the subsequent question on the efforts made, type of work desirable etc. should relate to the substantive or full 'work' and not 'additional work'.

5.8.7 Item 6: The question listed against this item is -- 'were you seeking or available for work/additional work?' It may be noted that the persons for whom this set of follow-up questions are meant can broadly be divided into two groups - (i) those who had some work during the reference year (i.e. persons with usual status codes 01-51 and 81-93 and 96 with some usual subsidiary gainful activity) and (ii) those who had no work during the reference year (i.e. persons with usual activity status codes 81-93 and 96 with no usual subsidiary gainful activity). It is expected that the first group, if at all willing, will normally opt for 'additional work' and to this group, therefore, the question to be put will be 'were your seeking of available for addition work?' To the second group, naturally, the question 'whether they were seeking of available for work' will be asked. Demanding on the answer obtained, the entry will be made against this item in terms of the code number '1' for 'yes' and '2' for 'no'. For persons categorized 'seeking and/or available for work' according to usual status (i.e. persons with status code 81, the question need not be asked again). For them code = 1 will simply be recorded.

7. If yes in question 6, what efforts did you make to get work/additional work?

[Question 7 was asked of persons who were not seeking work, per Question 2 of Block 6 (codes 1 to 51), but were seeking or available for work/additional work, per Question 6.]

- ☐ 1 Currently on the live register of the employment exchange
- ☐ 2 Made other efforts
- ☐ 3 Made no effort

Interviewer instructions

Effort to get work/additional work (IN1983A_0439)

File: IND1983-P-H

5.8.0 Block 8: follow-up questions for the persons with usual activity status codes 01-93 and 96:

These question will be put in all the household members assigned any one of the usual activity status codes 01-51, 81, 91-93 and 96. As there may be more than one member of the household with any of the above usual activity status codes, provision has been made in this block to record the forthcoming answers for 5 such individuals. The follow-up questions listed in this block are in most cases self explanatory and their scope and limitations are also apparent. The probable answers to these questions are pre-coded and printed in parenthesis along with the relevant questions. The investigators will try to find out, through their investigation, what, of the many possible alternative answers, is the answer offered by the informant and record in the box spaces provided for, the appropriate code relevant to that answer. The questions and answers should, in general, refer to the period of 365 days preceding the date of survey.

5.8.1 It may be noted that the population to which the follow-up questions in block 8 are to be put in constituted of three categories which are:

persons classified as usually 'working' (usual status codes 01-51) i.e. those working for a relatively long time during the period of 365 days preceding the date of survey,

person classified as usually 'not working' (usual status codes 81-93 and 96) but categorized 'working' in the subsidiary capacity (i.e. those with code '1' in col. 3 of block 7),

person classified as usually 'not working' (usual status codes 81-93 and 96) and also categorized 'not working' even I the subsidiary capacity (i.e. those with code '2' in column 3 of block 7)

It is obvious that person covered under (i) and (ii) above will be engaged in some work during the 365 days preceding the date of survey and persons under (i) may have some sort of full engagement in gainful activities while the persons under (ii) will have only marginal engagement in gainful activities. Whichever be the case, they are the persons who may like to have some 'additional work' over the above whatever work they have during the reference period. It is of course possible that some of them, in spite of the work they are currently having, will still like to have not additional work but alternate full time work. Persons covered under (iii) who had no work during the reference period are the set of people who, in the natural course, may like to have some substantive work (not additional work). These points must be kept in mind while the relevant question on the availability for work is put to the respondent. Depending on the answer obtained, the subsequent questions should be put to the answer obtained, and the subsequent question should be put to the informant by the investigator in the manner demanded by the situation. For example, if a person under (i) (though expected to have had almost full work) says that he wants full work (not additional work), the subsequent question on the efforts made, type of work desirable etc. should relate to the substantive or full 'work' and not 'additional work'.

5.8.8 Item 7 - 11: The questions listed against these items will be asked only to these persons who answer in the affirmative to the question listed against item 6. As mentioned earlier, these questions are to be suitably put depending on the answer obtained for the question against item6 i.e. depending on whether the person wanted 'additional work' or 'work'.

5.8.9 Item 7: For persons reporting as 'seeking or available for work /additional work', it will be ascertained what efforts they have made to get the work. If a person is found to have been on the live register of the employment exchange, code 1 will be recorded for the person against this item. Concurrently, if he or she has made some other efforts to get work, like contacting prospective employers, responding to advertisement etc., priority will be given to 'registration with employment exchange' and in such cases also, code 1 will be recorded. For a person who is currently not in the live register of the employment exchange but has made other efforts to get work, code 2 will be assigned. If no effort has been made, code 3 will be recorded.

Interviewer instructions

Duration of job seeking (IN1983A_0440)

File: IND1983-P-H

5.8.0 Block 8: follow-up questions for the persons with usual activity status codes 01-93 and 96:

These question will be put in all the household members assigned any one of the usual activity status codes 01-51, 81, 91-93 and 96. As there may be more than one member of the household with any of the above usual activity status codes, provision has been made in this block to record the forthcoming answers for 5 such individuals. The follow-up questions listed in this block are in most cases self explanatory and their scope and limitations are also apparent. The probable answers to these questions are pre-coded and printed in parenthesis along with the relevant questions. The investigators will try to find out, through their investigation, what, of the many possible alternative answers, is the answer offered by the informant and record in the box spaces provided for, the appropriate code relevant to that answer. The questions and answers should, in general, refer to the period of 365 days preceding the date of survey.

5.8.1 It may be noted that the population to which the follow-up questions in block 8 are to be put in constituted of three categories which are:

persons classified as usually 'working' (usual status codes 01-51) i.e. those working for a relatively long time during the period of 365 days preceding the date of survey,

person classified as usually 'not working' (usual status codes 81-93 and 96) but categorized 'working' in the subsidiary capacity (i.e. those with code '1' in col. 3 of block 7),

person classified as usually 'not working' (usual status codes 81-93 and 96) and also categorized 'not working' even in the subsidiary capacity (i.e. those with code '2' in column 3 of block 7)

It is obvious that person covered under (i) and (ii) above will be engaged in some work during the 365 days preceding the date of survey and persons under (i) may have some sort of full engagement in gainful activities while the persons under (ii) will have only marginal engagement in gainful activities. Whichever be the case, they are the persons who may like to have some 'additional work' over the above whatever work they have during the reference period. It is of course possible that some of them, in spite of the work they are currently having, will still like to have not additional work but alternate full time work. Persons covered under (iii) who had no work during the reference period are the set of people who, in the natural course, may like to have some substantive work (not additional work). These points must be kept in mind while the relevant question on the availability for work is put to the respondent. Depending on the answer obtained, the subsequent questions should be put to the answer obtained, and the subsequent question should be put to the informant by the investigator in the manner demanded by the situation. For example, if a person under (i) (though expected to have had almost full work) says that he wants full work (not additional work), the subsequent question on the efforts made, type of work desirable etc. should relate to the substantive or full 'work' and not 'additional work'.

5.8.8 Item 7 - 11: The questions listed against these items will be asked only to these persons who answer in the affirmative to the question listed against item 6. As mentioned earlier, these questions are to be suitably put depending on the answer obtained for the question against item 6 i.e. depending on whether the person wanted 'additional work' or 'work'.

5.8.10 Item 8 and 9: For persons who have answered in the affirmative to the question listed against item 6, the information on the period for which they are seeking or available for work/additional work will be ascertained and recorded against item 8 in terms of appropriate code numbers which are:

Up to 1 month - 1
1-3 months - 2
3-6 months - 3
6-9 months - 4
9-12 months - 5
More than 12 months - 6

If a person is reported to be seeking or available for work/additional work for the entire 365 days preceding the date of survey or for a period of 9 months or more up to the entire 12 months, the appropriate code to be recorded will be 5. On the other hand, if it is reported that the person has been seeking or available for work/additional work since a date prior to the period of 365 days preceding the date of survey and that effort of seeking or availability for work continued for the entire reference period, code 6 will be recorded. The information on the type of work they have been seeking or been available for will be recorded against item 9 in code numbers. Four different types of work classified below will be considered for recording entries against this item: (i) both farm work (code-1), (ii) farm work only (code-2), (iii) public works only (code-3), and (iv) non-farm work only (code-4). Any work relating to the agricultural sector (i.e. industry divisions C of NIC 1970) will be treated as farm work. Work relating to any of the non-agricultural sectors (i.e. industry divisions 1-9 and X and Y of NIC 1970) will be treated as non-farm work.

Any work relating to government projects like construction of dams, roads, buildings etc. including test relief works will be treated as a 'public work'. It may be noted that 'public works' will be considered non-farm work. Hence 'both farm and non-farm work' will mean any work relating to the industry division 0-9, X and Y including 'public works' and 'non-farm work only' means the work relating to the industry division 1-9 and X and Y including 'public works' and 'non-farm work only' means the work defined as public works above.

Persons who were seeking or available for work or additional work

Literal question

9. What type of work/additional work did you seek or were you available for?

[Question 9 was asked of persons who were not seeking work, per Question 2 of Block 6 (codes 1 to 51), but were seeking or available for work/additional work, per Question 6.]

- ☐ 1 Both farm and non-farm work
- ☐ 2 Farm work only
- ☐ 3 Public works only
- ☐ 4 Non-farm work only

Interviewer instructions

Type of work/additional work sought (IN1983A_0441)

File: IND1983-P-H

5.8.0 Block 8: follow-up questions for the persons with usual activity status codes 01-93 and 96:

These question will be put in all the household members assigned any one of the usual activity status codes 01-51, 81, 91-93 and 96. As there may be more than one member of the household with any of the above usual activity status codes, provision has been made in this block to record the forthcoming answers for 5 such individuals. The follow-up questions listed in this block are in most cases self explanatory and their scope and limitations are also apparent. The probable answers to these questions are pre-coded and printed in parenthesis along with the relevant questions. The investigators will try to find out, through their investigation, what, of the many possible alternative answers, is the answer offered by the informant and record in the box spaces provided for, the appropriate code relevant to that answer. The questions and answers should, in general, refer to the period of 365 days preceding the date of survey.

5.8.1 It may be noted that the population to which the follow-up questions in block 8 are to be put in constituted of three categories which are:

persons classified as usually 'working' (usual status codes 01-51) i.e. those working for a relatively long time during the period of 365 days preceding the date of survey,

person classified as usually 'not working' (usual status codes 81-93 and 96) but categorized 'working' in the subsidiary capacity (i.e. those with code '1' in col. 3 of block 7),

person classified as usually 'not working' (usual status codes 81-93 and 96) and also categorized 'not working' even in the subsidiary capacity (i.e. those with code '2' in column 3 of block 7)

It is obvious that person covered under (i) and (ii) above will be engaged in some work during the 365 days preceding the date of survey and persons under (i) may have some sort of full engagement in gainful activities while the persons under (ii) will have only marginal engagement in gainful activities. Whichever be the case, they are the persons who may like to have some 'additional work' over the above whatever work they have during the reference period. It is of course possible that some of them, in spite of the work they are currently having, will still like to have not additional work but alternate full time work. Persons covered under (iii) who had no work during the reference period are the set of people who, in the natural course, may like to have some substantive work (not additional work). These points must be kept in mind while the relevant question on the availability for work is put to the respondent. Depending on the answer obtained, the subsequent questions should be put to the answer obtained, and the subsequent question should be put to the informant by the investigator in the manner demanded by the situation. For example, if a person under (i) (though expected to have had almost full work) says that he wants full work (not additional work), the subsequent question on the efforts made, type of work desirable etc. should relate to the substantive or full 'work' and not 'additional work'.

5.8.8 Item 7 - 11: The questions listed against these items will be asked only to these persons who answer in the affirmative to the question listed against item 6. As mentioned earlier, these questions are to be suitably put depending on the answer obtained for the question against item 6 i.e. depending on whether the person wanted 'additional work' or 'work'.

5.8.10 Item 8 and 9: For persons who have answered in the affirmative to the question listed against item 6, the information on the period for which they are seeking or available for work/additional work will be ascertained and recorded against item 8 in terms of appropriate code numbers which are:

Up to 1 month - 1
1-3 months - 2
3-6 months - 3
6-9 months - 4
9-12 months - 5
More than 12 months - 6

If a person is reported to be seeking or available for work/additional work for the entire 365 days preceding the date of survey or for a period of 9 months or more up to the entire 12 months, the appropriate code to be recorded will be 5. On the other hand, if it is reported that the person has been seeking or available for work/additional work since a date prior to the period of 365 days preceding the date of survey and that effort of seeking or availability for work continued for the entire reference period, code 6 will be recorded. The information on the type of work they have been seeking or been available for will be recorded against item 9 in code numbers. Four different types of work classified below will be considered for recording entries against this item: (i) both farm work (code-1), (ii) farm work only (code-2), (iii) public works only (code-3), and (iv) non-farm work only (code-4). Any work relating to the agricultural sector (i.e. industry divisions C of NIC 1970) will be treated as farm work. Work relating to any of the non-agricultural sectors (i.e. industry divisions 1-9 and X and Y of NIC 1970) will be treated as non-farm work.

Any work relating to government projects like construction of dams, roads, buildings etc. including test relief works will be treated as a 'public work'. It may be noted that 'public works' will be considered non-farm work. Hence 'both farm and non-farm work' will mean any work relating to the industry division 0-9, X and Y including 'public works' and 'non-farm work only' means the work relating to the industry division 1-9 and X and Y including 'public works' and 'non-farm work only' means the work defined as public works above.

Status of work sought or available for (IN1983A_0442)

File: IND1983-P-H

5.8.0 Block 8: follow-up questions for the persons with usual activity status codes 01-93 and 96:

These question will be put in all the household members assigned any one of the usual activity status codes 01-51, 81, 91-93 and 96. As there may be more than one member of the household with any of the above usual activity status codes, provision has been made in this block to record the forthcoming answers for 5 such individuals. The follow-up questions listed in this block are in most cases self explanatory and their scope and limitations are also apparent. The probable answers to these questions are pre-coded and printed in parenthesis along with the relevant questions. The investigators will try to find out, through their investigation, what, of the many possible alternative answers, is the answer offered by the informant and record in the box spaces provided for, the appropriate code relevant to that answer. The questions and answers should, in general, refer to the period of 365 days preceding the date of survey.

5.8.1 It may be noted that the population to which the follow-up questions in block 8 are to be put in constituted of three categories which are:

persons classified as usually 'working' (usual status codes 01-51) i.e. those working for a relatively long time during the period of 365 days preceding the date of survey,

person classified as usually 'not working' (usual status codes 81-93 and 96) but categorized 'working' in the subsidiary capacity (i.e. those with code '1' in col. 3 of block 7),

person classified as usually 'not working' (usual status codes 81-93 and 96) and also categorized 'not working' even I the subsidiary capacity (i.e. those with code '2' in column 3 of block 7)

It is obvious that person covered under (i) and (ii) above will be engaged in some work during the 365 days preceding the date of survey and persons under (i) may have some sort of full engagement in gainful activities while the persons under (ii) will have only marginal engagement in gainful activities. Whichever be the case, they are the persons who may like to have some 'additional work' over the above whatever work they have during the reference period. It is of course possible that some of them, in spite of the work they are currently having, will still like to have not additional work but alternate full time work. Persons covered under (iii) who had no work during the reference period are the set of people who, in the natural course, may like to have some substantive work (not additional work). These points must be kept in mind while the relevant question on the availability for work is put to the respondent. Depending on the answer obtained, the subsequent questions should be put to the answer obtained, and the subsequent question should be put to the informant by the investigator in the manner demanded by the situation. For example, if a person under (i) (though expected to have had almost full work) says that he wants full work (not additional work), the subsequent question on the efforts made, type of work desirable etc. should relate to the substantive or full 'work' and not 'additional work'.

5.8.5 Item 4: fully engaged or not, in work:

The question - 'were you more or less fully engaged in work during the last 365 days?' listed in item 4-will be put only to those categorized usually 'working' (i.e. those with status codes 01-51 recorded against item) 2) with a view to finding out whether the person considers himself/herself as having enough work to keep himself/herself busy in that work almost throughout the year. If the answer to the question is in affirmative, code-1 and if in the negative, code-2 will be entered against this item.

5.8.11 Item 10: The information in regard to the status of work sought (or available for) for those persons who are seeking or available for work/additional work, will be ascertained and recorded against item 10 in terms of appropriate code numbers. The codes are:

Wage/salaried employment:

Full time - 1
Part time - 2

Contract/piece rate work:

Full time - 3
Part time - 4

Self employment:

Full time - 5
Part time - 6

While recording the relevant information against this item, subject to priority being always given for full-time work over part-time work, if more than one code is found to be applicable for a periods, the code which appears first in the has sought (or was available for) part-time wage/salaried employment (code - 2), full-time contract/place-rate work (code - 3) as well as full time self employment (code-5), only code 5 will be assigned to him.

Location of work desired (IN1983A_0443)

Persons who usually attended domestic duties

Literal question

[9] Follow-up questions for persons having usual activity status codes 92 and 93

[Questions 1-24 were asked of persons who engaged in domestic duties, per Question 2 in Section 6.]

3. Were you required to spend most of your time on domestic duties almost throughout the last 365 days?

- ☐ 1 Yes
- ☐ 2 No

Interviewer instructions

5.9.0 Block 9: Follow-up questions for persons classified as usually engaged in domestic chores:

[All questions in this section (5.9) were asked of household members classified as engaged in domestic duties according to usual status (i.e. those with usual states codes 92 and 93), and the relevant answers will be recorded in terms of the specified codes. Status codes 92 and 93 refer to usual principal activity status from block 6, column 2.]

5.9.3 Item 3-5 : It will be ascertained whether the relevant persons are required to spend most of their time during the 365 days preceding the date of survey on domestic duties. If the answer is in the affirmative, code 1 and if the answer is in the negative, code 2 will be recorded against item 3 of each entry against item 3 is code 1 for a person, the reason for his/her participation in the household duties will be ascertained and recorded in terms of the specified code numbers against item 4.

The relevant codes to be used are:

- No other member to carry out the domestic duties - 1
- Cannot afford hired help - 2
- For social and/or religious constraints - 3
- Others - 4

For such a person, item 5 will be left blank. On the other hand, if the entry against item 3 is code '2' for a person, (i.e. such participation was not required but still the person participated in the household chores) the reason for his/her voluntary participation in household chores will be ascertained and the code relevant to the answer obtained will be recorded against item 5. In such a case, item 4 will be left blank. The codes to be used for making entries against item 5 are:

- Non-availability of work - 1
- By preference - 2
- Others - 3

5.9.0 Block 9: Follow-up questions for persons classified as usually engaged in domestic chores:

[All questions in this section (5.9) were asked of household members classified as engaged in domestic duties according to usual status (i.e. those with usual states codes 92 and 93), and the relevant answers will be recorded in terms of the specified codes. Status codes 92 and 93 refer to usual principal activity status from block 6, column 2.]

5.9.4 Item 6-10: These 13 questions relate to relevant members' participating in 13 specified activities which are self-explanatory. It will be ascertained whether the member along with his/her normal domestic duties also participates more or less regularly in the specified activities listed. If the answer is 'yes', code '1' and if the answer is 'not', code '2' will be recorded against the relevant item 6.18 for the particular person. It may be noted that item 18 will be filled in for rural areas only.

Free collection of firewood, cow dung, cattle feed (IN1983A_0503)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 0

[Normally occupied in domestic duties, but willing to accept work.]

24. What assistance do you require to undertake that work?

[Question 24 was recorded for persons who attended domestic duties, per Question 2 of Block 6, and were willing to accept work if made available at their households per Question 20.]

- ☐ 1 No assistance
- ☐ 2 Initial finance on easy terms
- ☐ 3 Working finance facilities
- ☐ 4 Easy availability of raw materials
- ☐ 5 Assured market
- ☐ 6 Training
- ☐ 7 Accommodation
- ☐ 9 Others

Interviewer instructions

5.9.0 Block 9: Follow-up questions for persons classified as usually engaged in domestic chores:

[All questions in this section (5.9) were asked of household members classified as engaged in domestic duties according to usual status (i.e. those with usual states codes 92 and 93), and the relevant answers will be recorded in terms of the specified codes. Status codes 92 and 93 refer to usual principal activity status from block 6, column 2.]

5.9.7 Item 21-24 : The questions listed against these items will be put only to those who have answered in affirmative for the question listed against item 20 [if usually engaged in domestic duties, would accept work if made available], (i.e. persons with entry 1 against item 20). The codes appropriate for the answers will be recorded against the relevant items. For the items 21, 22 and 24, if more than one code is found to be applicable, the code which appears first only will be recorded. The relevant codes to be used for filling in the items 21, 22 and 24 are as under:

(iii) Item 24: assistance required:

- No assistance - 1
- Initial financial on easy terms - 2
- Working finance facilities - 3
- Easy availability of raw materials - 4
- Assured market - 5
- Training - 6
- Accommodation - 7
- Others - 9

Literal question

Wage and salary earnings (received or receivable) for the work done during the week (Rs. 0.00) [For questions 14-16]

14. ____ Cash
 15. ____ Kind
 16. ____ Total

Interviewer instructions

5.5.9 Columns (14)-(16): wage and salary earning :

The wage and salary income (not total earnings) receivable for the wage/salaried work done during the reference week, separately for each of the relevant activities and the total for each person will be recorded in these columns. The relevant status codes for which wage and salary earnings are to be recorded are 31, 41, 51 and 71. The wages and salaries for the work done during the reference week may be already received or may be receivable in cash or in kind or partly in cash and partly in kind. The total wage or salary received or receivable for the week in cash will be recorded in column (14) and the value (evaluated at the current retail price) of salary or wages in kind received or receivable will be recorded in column (15). The total of columns (14) and (15) will be entered in column (16). The entries for all these columns will be made in 2 places of decimal. For recording the wages or salaries amount receivable as 'over time' for the additional work done beyond normal working time will be ignored. Bonus (expected or paid) and perquisites evaluated at retail prices duly apportioned for the reference week will be considered as wages and included for making entries in these columns. For the activity status '71', the amount receivable for the week will be worked out on the basis of the number of days reported under that activity during the week.

Migration from last usual residence (IN1983A_0477)

This variable indicates whether the person's place of enumeration was different from his or her last usual residence.

Universe

All persons

Literal question

19. Whether place of enumeration different from last usual residence:

[] 1 Yes

[] 2 No [skip to Section 5]

Interviewer instructions

5.4.1.0 Block 4.1 : demographic and current activity particulars during the week :

This block is meant for recording the demographic and the current activity status particulars of all the normal members of the household. Besides that, the information as to whether the household members are to be considered migrants according to certain laid down criterion will also be collected in this block.

5.4.1.16 Column (19): whether place of enumeration different from last usual residence:

"For obtaining the appropriate response to this question for each member of the household listed in this block, it has to be ascertained from them whether his/her place of enumeration is different from his last (previous) usual residence, if any, the usual residence for the purpose of this survey being defined as a place (village or town) where the person has stayed continuously for a period of six months or more. If the answer is in affirmative, code 1 and if it is in the negative, code 2 will be recorded in column (19). The place of enumeration will obviously be his/her current place of stay (destination) and the place (village or town) where the persons stayed continuously for a period of six months or more prior to moving into the current place of stay (i.e. place of enumeration will be considered the 'place of last usual residence' (origin). However, daughter-in-law, staying for a period (which sometimes may extend to more than six months) in their parents' house for child birth or for any other reason will not be considered a migratory movement and therefore, will not be considered for recording entries in the column. But movement for undergoing studies or under transfer will be considered as migratory movements. The following points may be noted in this context:

i) For persons who have only moved from one locality to another within the same town/village, in their life time up to the time of enumeration, the place of enumeration and place of last usual residence will be the same.

ii) Stay in a different town or village for less than six months will be ignored. In this context the following examples may be considered. Suppose a person was born in the village A and stayed there for 15 yrs. On getting married the person had accompanied her spouse to village B stayed there for 8 months and then moved to village C, staying there only for 5 months. From village C they moved to village D where they had been enumerated. For this person the last usual residence would be village B.

Duration of stay at enumeration place (IN1983A_0478)

Duration of stay at enumeration place (IN1983A_0478)

File: IND1983-P-H

20. Duration of stay at the place of enumeration:

[Asked of persons whose place of enumeration was different from their last usual residence per question 19 above.]

- ☐ 1 Less than 1 year
- ☐ 2 1-5 years
- ☐ 3 Above 5 years

Interviewer instructions

5.4.1.0 Block 4.1 : demographic and current activity particulars during the week :

This block is meant for recording the demographic and the current activity status particulars of all the normal members of the household. Besides that, the information as to whether the household members are to be considered migrants according to certain laid down criterion will also be collected in this block.

5.4.1.17 Column (20): duration of stay at the place of enumeration:

The period of stay at the place of enumeration (the village or town in which the person has been enumerated), i.e. the period elapsed since the person has moved into the place of enumeration will be recorded in column (20) in terms of specified codes. While residing in the present place, if a person has stayed elsewhere for a period less than six months this period will be included in working out the period of stay at the place of enumeration. In case the person has stayed for more than six months in a different place say, A, while usually living at the place of enumeration say, B, then A becomes his last usual residence and the 'duration of stay at the place of enumeration' will refer only to the period since the person's return from place A to B. The relevant codes to be used for making entries in this column are:

Less than 1 year - 1
1-5 years - 2
Above 5 years - 3

It may be noted that this column will be filled in only for those for whom entry 1 is recorded in column (19).

Duration of stay since leaving the last usual residence

(IN1983A_0479)

2. ____ Period since leaving the last usual residence (in years)

Interviewer instructions

Duration of stay since leaving the last usual residence (IN1983A_0479)

File: IND1983-P-H

5.4.2.0 Block 4.2: Migration particulars:

This block will be filled in for all the household members reported to have the place of enumeration (i.e. the sample village/town where the survey is carried out) different from the last usual residence in block 4.1 (i.e., those with 'code-1' as the entries in column (19) of block 4.1). For all such household members, information pertaining to their last usual residence, reasons for the movement, demographic and activity particulars prior to movement etc. will be ascertained and recorded in this block.

5.4.2.2 Column (1): period since leaving the last usual residence:

The period elapsed since leaving the last usual residence will be recorded in years rounded off to the nearest integer in this column. For working out this, the period of temporary stay (less than six months) in other places after leaving the last usual residence and ultimately moving into the place of enumeration will also be included.

Description

This variable indicates the person's reason for leaving his or her last usual residence.

Universe

Persons whose place of enumeration was different from their place of birth

Literal question

[4.2] Migration particulars of persons with code 1 in column 19 of block 4.1

[Questions 1-15 were recorded for persons whose last usual residences were different from the enumeration place, per Question 19, Block 4.1.]

15. Reason for leaving the last usual residence:

- ☐ 1 In search of employment
- ☐ 2 In search of better employment (for persons who were employed at the place of origin prior to migration)
- ☐ 3 Under transfer on service/business contract
- ☐ 4 For pursuing studies
- ☐ 5 On marriage
- ☐ 6 Due to migration of parent(s)/earning member(s) of the family
- ☐ 7 For political change/lack of security or social adjustments
- ☐ 8 Due to natural calamity
- ☐ 9 Due to other reasons

Interviewer instructions

5.4.2.0 Block 4.2: Migration particulars:

This block will be filled in for all the household members reported to have the place of enumeration (i.e. the sample village/town where the survey is carried out) different from the last usual residence in block 4.1 (i.e., those with 'code-1' as the entries in column (19) of block 4.1). For all such household members, information pertaining to their last usual residence, reasons for the movement, demographic and activity particulars prior to movement etc. will be ascertained and recorded in this block.

5.4.2.9 Column (15): reasons for leaving the last usual residence:

The reason for moving out of the last usual residence will be ascertained for each member listed in this block and entered in terms of the specified codes in this column. It may so happen that a person had moved out of his last usual residence for a particular reason, stayed in a different village/town for a short period (less than 6 months; if this period is 6 months or more that place will become his last usual residence) and then moved to the place of enumeration (a village or town other than the previous one) for a different reason. In such a case only the reason which motivated his/her first movement will be recorded. The codes to be used for making entries in this column are:

- In search of employment - 1
- In search of better employment (for persons who were employed at the place of origin prior to migration) - 2
- Under transfer on service/business contract - 3
- For pursuing studies - 4
- On marriage - 5
- Due to migration of parent(s) earning - 6
- Member(s) for political change/lack of security or social adjustment - 7
- Due to natural calamity - 8
- Due to other reasons - 9

Whether stayed temporarily for work at different places (IN1983A_0497) File: IND1983-P-H

Overview

Type: Discrete
Format: numeric

Range: 1-9

Valid cases: 0
Invalid: 0

Description

This variable indicates the reason that the person stayed temporarily away from home for work.

Universe

Persons who stayed temporarily for work

Literal question

If yes in column 12 [Answer questions 13-23]

13. Reason:

[Question 13 was asked of persons who stayed temporarily for work for a continuous period of 4 weeks or more at a different place during the last 365 days, per Question 12.]

- ☐ 1 Non-availability of work at the place of enumeration
- ☐ 2 For better employment
- ☐ 3 Required by nature of work

Interviewer instructions

Reason for temporary work away from home (IN1983A_0498)

File: IND1983-P-H

5.6.7 Column (13)-(23): particulars relating to the temporary stay in different places other than the place of enumeration: For all those reported to have stayed in places other than the place of enumeration for a continuous period of 4 weeks or more during the 365 days preceding the date of survey in connection with work (i.e. those with code 1 recorded in column (12)), the reason why they had to stay in a different place will be recorded in terms of the specified codes in column (13). The relevant codes are:

Non-availability of work at in place of enumeration - 1

For better employment - 2

Required by the nature of work - 3

It may so happen that a person might have stayed away a number of times interspersed by stay at the place of enumeration and that too in different places during the 365 days preceding the date of survey. In such cases, the reason will relate to the one for which the maximum duration of the total time spent away from the place of enumeration. The total period in completed weeks, thus spent elsewhere in connection with the work, during the 365 days preceding the date of survey, will be recorded in column (14) and the number of places where the person stayed like the manner described above will be recorded in column (15). The description of the industry-occupation combination relating to work, pursued during the major part of the total period of stay away for work, will be ascertained and recorded in column (16). The corresponding 3-digit industry group code and 3-digit occupation family code will be recorded respectively in columns (17) and (18). The type of the place where major part of the total period of stay away for work was spent, in terms of the specified codes (see also paragraphs 5, 3, 16), will be recorded in column (19). The names of the state and the district to which this place belongs will be entered respectively in columns (20) and (22), and the corresponding codes in columns (21) and (23).

The names of the state and the district to which this place belongs will be entered respectively in columns (20) and (22), and the corresponding codes in columns (21) and (23).

Person weight (PERWT)

File: IND1983-P-H

Overview

Type: Continuous

Format: numeric

Width: 8

Decimals: 2

Valid cases: 0

Invalid: 0

Description

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

Years residing in current locality (MIGYRS1)

File: IND1983-P-H

Overview

Type: Discrete

Format: numeric

Width: 2

Decimals: 0

Range: 0-99

Valid cases: 0

Invalid: 0

Description

MIGYRS1 indicates how many years the person has resided in their current locality of residence.

Years of schooling (YRSCHOOL)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0

Description

YRSCHOOL indicates the highest grade/level of schooling the person had completed, in years. Only formal schooling is counted. YRSCHOOL accounts for the number of years of study, regardless of the track or kind of study. Information on degree and/or technical track is available in EDATTAIN. Years of schooling for Israel, categorized into intervals, are given in YRSCHOOL2.

Users should pay close attention to the top-codes in each sample, as discussed in the comparability section.

Reason for migration (MIGCAUSE)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

MIGCAUSE indicates the reason why the person moved from their previous place of residence.

Migration status, previous residence (MIGRATEP)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

MIGRATEP indicates whether the person's most recent move (if any) was between minor administrative units, major units, or countries.

Educational attainment, international recode [general version] (EDATTAIN)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

Educational attainment, international recode [general version] (EDATTAIN)

File: IND1983-P-H

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.

Educational attainment, international recode [detailed version] (EDATTAIND)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Valid cases: 0

Religion [general version] (RELIGION)

File: IND1983-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

RELIGION indicates the person's religion, including "none."

Religion [detailed version] (RELIGIOND)

File: IND1983-P-H

Overview

Type: Discrete
 Format: numeric
 Width: 4
 Decimals: 0
 Range: 0-9999

Valid cases: 0
 Invalid: 0

Description

RELIGION indicates the person's religion, including "none."

Year [person version] (YEARP)

File: IND1983-P-H

Overview

Type: Continuous
 Format: numeric
 Width: 4
 Decimals: 0

Valid cases: 0
 Invalid: 0

Description

[This file is just a placeholder. See the household version of the variable.]

IPUMS sample identifier [person version] (SAMPLEP)

File: IND1983-P-H

Overview

Type: Continuous
 Format: numeric
 Width: 9
 Decimals: 0

Valid cases: 0
 Invalid: 0

Description

[This file is just a placeholder. See the household version of the variable.]

Household serial number [person version] (SERIAL)

File: IND1983-P-H

Overview

Type: Continuous
 Format: numeric
 Width: 10
 Decimals: 0

Valid cases: 0
 Invalid: 0

Description

[This file is just a placeholder. See the household version of the variable.]

Country [person version] (COUNTRYP)

File: IND1983-P-H

Overview

Country [person version] (COUNTRYP)

File: IND1983-P-H

Type: Continuous

Format: numeric

Width: 3

Decimals: 0

Valid cases: 0

Invalid: 0

Description

[This file is just a placeholder. See the household version of the variable.]

Record type [person version] (RECTYPEP)

File: IND1983-P-H

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 0

Invalid: 0

Description

[This file is just a placeholder. See the household version of the variable.]
