## Identification

### SURVEY ID NUMBER

DJI\_2015-2016\_SSNNWIE-EL\_v01\_M

### TITLE

Social Safety Net Interlinking Nutrition and Workfare Impact Evaluation 2015-2016, Endline Survey

### COUNTRY/ECONOMY

Name	Country code
Djibouti	DJI

### ABSTRACT

The Government of Djibouti is piloting an innovative integrated public works and nutrition intervention that The intervention (i) actively involves the main caregiver in a number of ways (nutrition, workfare) to strengthen her role in the household and (ii) makes access to income (workfare) conditional on the caregiver attending regular nutrition promotion activities. The impact evaluation is a randomized control trial that allocates the offer of public works program to households who are beneficiaries of the nutrition activities in one neighborhood of urban Djibouti ville (Hayableh). The first objective of this evaluation is to test the value added of combining a public works program targeted to women over and above the provision of information and promotion of behavioral change in nutrition practices. The second objective is to test whether these effects are only short term, or whether they extend beyond the fifty days of participation in the public works program. Endline surveys were collected on average 9 months after the end of the public works programs.

## Data Collection

### DATES OF DATA COLLECTION

Start	End	Cycle
2015-02-15	2015-04-03	1st wave A1
2015-05-23	2015-06-06	2nd wave A2

2015-10-12	2015-11-05	3rd wave B1
2016-01-24	2016-03-11	4th wave B2

## DATA COLLECTION MODE

Computer Assisted Personal Interview [capi]

## DATA COLLECTION NOTES

Data was collected using the World Bank Survey Solutions CAPI ([solutions.worldbank.org](https://solutions.worldbank.org))

The data collection was staggered in waves, in line with the staggered rollout of the public works. For more information on data collection, see 'Guide to dataset: Djibouti social safety net endline survey data' provided for download.

## Questionnaires

## QUESTIONNAIRES

The following instruments were used for data collection:

**Household questionnaire:** A comprehensive household survey similar to the one at the baseline survey was administered to beneficiary women, and to the husbands of these women. The woman beneficiary survey covered the following topics: household socio-economic characteristics, health and nutrition practices, food security, durable assets, housing characteristics, household expenses, non-labor income, transfers, intra-household decision making, personality traits, well-being and time use. The man survey covered: labor supply of household members and income from labor, household expenses on items usually bought by male members (khat, cigarettes, transport, etc.), intra-household decision making, personality traits, well-being and time use.

**Employment Diaries:** In order to measure labor force participation with the same precision as at midline, employment diaries were administered to both the beneficiary woman and her husband during three consecutive weeks while the public works were taking place. The diaries also included modules on labor force participation of other household members, labor and non-labor income, and transfers. A module that measured intra-household cash transfers between the respondent and the rest of household members was also administered weekly as part of the diaries to capture contemporaneous income transfers cross household members.

Questionnaires are structured as follows:

Household questionnaire

Household questionnaire: Woman

Identification

Socio-economic characteristics

Savings and credit

Expenditures

Assets

Food diversity and security

Intra-HH decision making

Time use

Child care

School participation

Program knowledge

Self-esteem and mental health

Pregnancy/birth and access to nutrition/health services

Anthropometrics

Labor market activation

Household questionnaire: Man

Identification

Expenditures

Time use

Self-esteem and mental health

Labor market activation

Employment Diaries: Woman

Identification

Labor supply of woman  
 Labor supply of other HH members  
 Labor-income  
 Non-labor income  
 Transfers  
 Intra HH-transfers

Employment Diaries: Man  
 Identification  
 Labor supply of husband  
 Labor-income  
 Intra HH-transfers

## Access policy
