ABSTRACT

The Food and Agriculture Organization of the United Nations has developed a monitoring system in 26 food crisis countries to better understand the impacts of various shocks on agricultural livelihoods, food security and local value chains. The Monitoring System consists of primary data collected from households on a periodic basis (more or less every four months, depending on seasonality). The FAO in partnership with the World Food Programme (WFP), launched a household survey in Myanmar in March 2022. This third-round survey utilized a random sample of 3 518 rural households. It was conducted through computer-assisted telephone interviews (CATI) between 17 March and 5 May 2022 in 14 states and regions: Ayeyarwady, Bago, Chin, Kachin, Kayah, Kayin, Magway, Mandalay, Mon, Rakhine, Sagaing, Shan, Tanintharyi and Yangon. Sampling

SAMPLING PROCEDURE

This third-round survey followed the second-round survey conducted from 9 August to 9 September 2021. This third round utilized a random sample of 3 518 rural households. It was conducted through computer-assisted telephone interviews (CATI) between 17 March and 5 May 2022 in 14 states and regions: Ayeyarwady, Bago, Chin, Kachin, Kayah, Kayin, Magway, Mandalay, Mon, Rakhine, Sagaing, Shan, Tanintharyi and Yangon. Note that due to connectivity and responsiveness issues, samples sizes were small in Chin, Kayah and Tanintharyi and caution should be used when interpreting data from these states. The survey was interrupted for two weeks to observe the Thingyan holidays from 9 to 24 April.

WEIGHTING

The data were weighted by population, location (rural/urban) and education of the head of household.
