## Identification

### SURVEY ID NUMBER

COD\_2021-2022\_HRBFIE-HFFU\_v01\_M

### TITLE

Health Results Based Financing Impact Evaluation 2021 -2022, Health Facility Follow-Up Survey

### COUNTRY/ECONOMY

Name	Country code
Congo, Dem. Rep.	COD

### ABSTRACT

The Health Systems Strengthening for Better Maternal and Child Health Project was launched in 2016 in 11 provinces in the Democratic Republic of Congo. The project was financially supported by the World Bank and the Health Results Innovation Trust Fund as well as other development partners. The main goal of the project was to improve coverage and quality of maternal and child health services in targeted areas through Performance-Based Financing (PBF). To achieve this, contracted health facilities receive performance payments according to defined quantity and quality indicators. The project is accompanied by a prospective, rigorous impact evaluation to assess the effect of PBF on health service utilization, quality of care and health outcomes. Prior to the launch of the PBF implementation, a baseline survey was conducted in 2015/16, covering both households and health facilities. A shorter midline survey was conducted in a subset of the 3 provinces of Kwango, Kwilu and Mai-Ndombe during the third quarter of 2018. A follow-up survey (Endline) was conducted in 6 provinces in 2021/22.

### UNIT OF ANALYSIS

F1- health facility assessment: health center

F2- health provider interview: health provider

F3 - direct observation of antenatal care consultation: consultation

F4 - direct observation of curative care for children under-5: consultation

F5 - exit interview for antenatal care: pregnant woman

F6 - exit interview for child curative care: parent or guardian of caregiver of sick child

F7 -exit interview for family planning consultation: user

F8-direct observation of family planning consultation: consultation

F9- direct observation of curative care for children under-5: consultation

## Version

### VERSION DESCRIPTION

Edited, anonymized dataset for public distribution.

## Coverage

### GEOGRAPHIC COVERAGE

The survey covered 58 health zones in 6 provinces: Kwango, Kwilu, Mai-Ndombe, Lulaba, Haut Katanga, Haut Lomami

## Producers and sponsors

### PRIMARY INVESTIGATORS

Name	Affiliation
Gil Shapira	World Bank, HHNGE
Günther Fink	Swiss Tropical and Public Health Institute and The University of Basel

## PRODUCERS

Name	Role
Medecins d'Afrique	Survey implementer

## FUNDING AGENCY/SPONSOR

Name	Abbreviation
Health Results Innovation Trust Fund	HRITF
Global Financing Facility for Women, Children, and Adolescents	GFF

## Sampling

## SAMPLING PROCEDURE

This is a repeated survey of facilities that were visited during the baseline survey of the impact evaluation. More information on the baseline survey can be found on the link: <http://microdata.worldbank.org/index.php/catalog/2825>. Out of the eleven provinces covered by the baseline, only 6 provinces were covered in the follow-up survey.

The health centers covered were the same health centers covered in the baseline survey. In each health zone, five health centers were randomly selected from a list provided by the local health teams.

## Data Collection

## DATES OF DATA COLLECTION

Start	End
2021-07-31	2022-05-15

## DATA COLLECTION MODE

Computer Assisted Personal Interview [capi]

## SUPERVISION

All aspects of data collection were managed by the NGO Medecins d'Afrique, that were selected through an international competitive process.

## Access policy

## CONFIDENTIALITY

## CITATION REQUIREMENTS

Use of the dataset must be acknowledged using a citation which would include:

- the Identification of the Primary Investigator
- the title of the survey (including country, acronym and year of implementation)
- the survey reference number
- the source and date of download
