TITLE
Mobile Needs Assessment for non-Syrian Refugees 2021

COUNTRY/ECONOMY

Name	Country code
Jordan	JOR

STUDY TYPE
Other Household Survey [hh/oth]

ABSTRACT
The main objective of the Mobile Needs Assessment is to update the knowledge base on the humanitarian needs and livelihoods situation at the household level for non-Syrian refugees in Jordan, inform the development of a vulnerability-based targeting strategy and strengthen the current food assistance framework, with the goal of providing longer-term assistance based on needs and improve food security in a sustainable manner.

Specific objectives of the Mobile Needs Assessment include:
- Collecting first-hand up-to-date data on an extended sample of non-Syrian refugees;
- Exploring and understanding refugees' basic needs, vulnerability, and livelihood opportunities also in the context of the COVID-19 onset;
- Describing the socio-economic profile of and identify the most vulnerable non-Syrian refugee households;
- Informing the programmatic decisions and targeting approach development for WFP in Q2-Q3 2021 and contributing to the existing evidence on targeting for UNHCR.

KIND OF DATA
Sample survey data [ssd]

UNIT OF ANALYSIS
Household

Version

VERSION DESCRIPTION
Version 2.1: Edited, cleaned and anonymised data.

Scope

NOTES
The scope includes:
- household demographics
- food consumption
- coping strategies
- expenditure
- protection risks
- livelihoods
- access to health and water

TOPICS

Topic
Food security

Livelihood and Social cohesion
Income Generation
Basic Needs

Producers and sponsors

Name	Affiliation
UN Refugee Agency (UNHCR)	UN
World Food Programme	WFP

Sampling

SAMPLING PROCEDURE
In total, there are 89,818 non-Syrian individuals living in 44,570 households in Jordan. To generate representative findings for three different strata (Geography – Amman vs. Other areas; nationality –Iraqis vs. Non-Iraqis; assistance status – Beneficiaries vs. Non-beneficiaries of any UNHCR/WFP assistance), a total of complete 1548 household surveys are needed to achieve 95% confidence level and around 4% margin error for each strata.
