TITLE
Results Monitoring Survey 2022

COUNTRY/ECONOMY

Name	Country code
Kazakhstan	KAZ

STUDY TYPE
Socio-Economic/Monitoring Survey [hh/sems]

ABSTRACT
The UNHCR Results Monitoring Survey (RMS) is a household-level survey for person for and with whom UNHCR works, including refugees and asylum seekers, internally displaced persons, returnees, stateless and others of concern. The objective of the survey is to monitor impact and outcome level indicators on education, healthcare, livelihoods, protection concerns, shelter, and water and sanitation. The results contribute to an evidence base for reporting against UNHCR's multi-year strategies to key stakeholders.

The RMS can be implemented in any operational context. A standard structured questionnaire has been developed for the RMS, which can be conducted as a stand-alone survey or flexibly integrated with other data collection exercises. The questionnaire was adapted to the Kazakhstan context and programme objectives and focused on health, education and employment. The data includes indicators collected at both the household and individual (household-member) level. The survey covered 89 household containing 363 individuals.

KIND OF DATA
Sample survey data [ssd]

UNIT OF ANALYSIS
Household and individual

Version

VERSION DESCRIPTION
Version 2.1: Edited, cleaned and anonymised data.

VERSION DATE
2023-06-15

Scope

NOTES
The RMS questionnaire covers:
1. Household composition and documentation
2. Mobility
3. Access to and utilization of healthcare
4. Education
5. Employment and income generation

TOPICS

Topic
Health and Nutrition

Health
Education
Income Generation
Livelihood and Social cohesion
