ABSTRACT

The FAO has developed a monitoring system in 26 food crisis countries to better understand the impacts of various shocks on agricultural livelihoods, food security and local value chains. The Monitoring System consists of primary data collected from households on a periodic basis (more or less every four months, depending on seasonality). The FAO launched a Round 2 computer-assisted telephone survey between 12 April and 16 May 2022 in Cameroon in seven of the country's ten regions (Adamaoua, East, Far-North, North, North-West, West, South-West). Between 111 and 244 households were sampled in each region, with a total of 1300 households interviewed. For more information, please go to <https://data-in-emergencies.fao.org/pages/monitoring>

Sampling

SAMPLING PROCEDURE

Data were collected between 12 April and 16 May through computer-assisted telephone interviews in seven of the country's ten regions (Adamaoua, East, Far-North, North, North-West, West, South-West). Between 111 and 244 households were sampled in each region, with a total of 1300 households surveyed. According to the agricultural calendar, data collection took place during the sowing and crop maintenance phases in the East, West, North-West and South-West regions, and during the soil preparation and sowing phases in the Far-North, North and Adamaoua regions.

WEIGHTING

Data were weighted at the adm1 level using the population counts, agricultural households quotas and a wealth indicator (access to electricity as a proxy).
