ABSTRACT
The FAO has developed a monitoring system in 26 food crisis countries to better understand the impacts of various shocks on agricultural livelihoods, food security and local value chains. The Monitoring System consists of primary data collected from households on a periodic basis (more or less every four months, depending on seasonality). The FAO conducted the fifth round of the Data in Emergencies Monitoring household survey (DIEM-Monitoring) in the Niger between 9 November and 8 December 2022 to assess agricultural livelihoods and food security. Data were collected in a face-to-face survey in all regions of Niger (Agadez, Diffa, Dosso, Maradi, Tahoua, Tillabéry and Zinder), with the exception of the urban region of Niamey. Between 234 and 281 households were selected in each region, for a total sample of 1762 households. Data was collected during the harvest period (December 2022).
