The variables “psuid” and “hhuid” are the variables that need to be used to merge together the TLSS07 and TLSS09 data. Variable “hhid” in the TLSS07 data is unique to the TLSS07 data and can be used to merge together the data files from the TLSS07 survey. Variable „HHID” in the TLSS09 data is unique to the TLSS09 data and can be used to merge together the data files from the TLSS09 data.
