Additional information

2.1 Variable mismatches

- Variable *reason* does not appear in the questionnaire. The variable appears to identify the reason why the interview could not be completed with a specific individual, most likely the manager / supervisor. As it is not empty, it was left untouched in the data set.

3.3 Outliers rejected

- Variable WORKFAC exhibited an unrealistically high response (97) for ID 1120103. Given the answer to PRIMARYHEA, the correct response could be assumed to be 17; however, there is no sufficient information to justify such a change.
