

Labour force survey (LFS11) 2005

March

This document sets out the information that is needed to access labour force survey (LFS11) data.

The files essential for accessing the data are provided in text format. This format was chosen to make the data usable with as many software packages as possible, and thus accessible to a wide range of people. Other files with relevant information are provided in Word 2000 format. If you do not have software appropriate for this format, please contact Stats SA and hard copies will be forwarded to you.

Other important information can be found in the:

Questionnaire
Additional code lists (occupation, industry and district council)
Relevant statistical release
Record layouts
Stats SA's website: www.statssa.gov.za

The data files

The files and the corresponding sections of the questionnaire are as follows:

Person: Data from flap and Section 1
Worker: Data from sections 2, 3, 4, 5 and 6
House: Data from section 7

The information in each file contains the following:

Description of variables

Variables comprise:

Descriptive name: This is a short description of the variable with the variable name in brackets.

Position of the variable: The position of a variable within a record is recorded in the format (@xxx y.). "@xxx" indicates that the variable starts at position (i.e. column) xxx, and "y" indicates the length of the field. All variables are numeric and right justified except for District Councils (DC) which is character and thus left justified.

Final code list: The range of valid values for variables. For continuous variables it only reflects the upper and lower limits.

Not applicable: The code for not applicable is provided for each variable.

Missing value: The code for "missing"/"unspecified" values is given for each variable.

Note to users: Additional information for further clarity on questions.

Merging files

Each record contains a unique number (UqNr), which is a household identifier. The household identifier is the first field in each record. The unique number can be used to merge household records from the HOUSEHOLD, PERSON and WORKER files. For the individuals in a household, a further two digits that constitute the person number (PersonNr) exists which can be used together with the unique household identifier (Uqnr) to merge the PERSON and the WORKER files.

METHODOLOGY

1. Official and expanded unemployment rates

Statistics South Africa (Stats SA) uses the following definition of unemployment as its *official* definition. The *unemployed* are those people within the *economically active population* who: (a) did not work during the seven days prior to the interview, (b) want to work and are available to start work within two weeks 1 of the interview, and (c) have taken active steps to look for work or to start some form of self-employment in the four weeks prior to the interview. The *expanded definition of unemployment* excludes criterion (c).

The expanded definition therefore includes persons who said they were unemployed but had not taken active steps to find work in the four weeks prior to the interview (i.e. discouraged work-seekers).

2. Sample design

Enumeration Areas (EAs) that had a household count of less than twenty-five were omitted from the census frame that was used to draw the sample of Primary Sample Units (PSUs) for the Master Sample. Other omissions from the Master Sample frame included all institution EAs except workers' hostels, convents and monasteries. EAs in the census database that were found to have less than sixty dwelling units during listing were pooled.

The Master Sample is a multi-stage stratified sample. The overall sample size of PSUs was 3000. The explicit strata were the 53 (DCs). The 3000 PSUs were allocated to these using the power allocation method. The PSUs were then sampled using probability proportional to size principles. The measure of size used was the number of households in a PSU as calculated in the census.

The sampled PSUs were listed with the dwelling unit as the listing unit. From these listings systematic samples of dwelling units per PSU were drawn. These samples of dwelling units form clusters. The size of the clusters differs depending on the specific survey requirements. The LFS uses one of the clusters that contain ten dwelling units.

3. Rotating panel methodology

Statistics South Africa uses a rotating panel methodology for the labour force survey, to ultimately obtain a better picture of movements into and out of the labour market over time. The rotating panel methodology involves visiting the same dwelling units on a number of occasions (in this instance, five at most). After the panel is established, a proportion of the dwelling units is replaced each round (in this instance, 20%). New dwelling units are added to the sample to replace those that are taken out. The advantage of this type of design is that it provides the basis for monitoring changes in the work situation of members of the same households over time, while retaining the larger picture of the overall employment situation in the country. It also allows for both longitudinal and cross-sectional analysis.

4. Coverage

The target population is all households, as well as residents in workers' hostels and convents/monasteries. The survey does not cover institutions such as old age homes, hospitals, prisons and military barracks.

5. Weighting the LFS of March 2005

A two-stage weighting procedure was applied to the LFS

The PSU inclusion probability is given by

$$P_{PSU} = \frac{n_{PSU}}{N_{PSU}} \cdot n_s$$

where n_{PSU} is the number of households constituting the selected PSU during census fieldwork, n_s is the number of PSUs per stratum, in this case the District Council (DC) and N_{PSU} is the number of households constituting the selected stratum during census fieldwork.

The household inclusion probability per PSU is given by

$$P_{HH} = \frac{n_{HH}}{H_{HH}}$$

where n_{HH} is the number of selected dwelling units per PSU, H_{HH} is the number of dwelling units in the PSU in question at a particular time different from the census time.

The non-response adjustment factor is given by $\frac{1}{r_{HH}}$, where r_{HH} is the response rate and is given by $r_{HH} = \frac{n_{RESP}}{n_T}$ where n_{RESP} is the number of responding households and n_T is the total number of visited households (in the sampled dwelling units) per PSU. The design weights adjusted for non-response are now given by

$$W_{HH} = \frac{1}{P_{PSU} \cdot P_{HH} \cdot r_{HH}}$$

A SAS macro called CALMAR was used to benchmark W_{HH} to the population estimates. The mid-year population estimates were adjusted to give population estimates for March 2005 (when survey fieldwork took place).

6. Symbols used in the tables that follow

When a dash (-) is shown there were no respondents in the category.

When a single asterisk (*) is shown in the table, the sample size was too small to give reliable estimates.

7. Estimation and use of standard error

The published results of the labour force survey are based on representative probability samples drawn from the South African population, as discussed in the section on sample design. Consequently, all estimates are subject to sampling variability. This means that the sample estimates may differ from the figures that would have been produced if the entire South African population had been included in the survey. The measure usually used to indicate the probable difference between a sample estimate and the corresponding population figure is the *standard error (SE)*, which measures the extent to which an estimate might have varied by chance because only a sample of the population was included.

There are two major factors, which influence the value of a standard error. The first factor is the sample size. Generally speaking, the larger the sample size, the more precise the estimate and the smaller the standard error. Consequently, in a national household survey such as the LFS, one expects more precise estimates at the national level than at the provincial level due to the larger sample size involved. The second factor is the variability among households in terms of the specific characteristics of the population being estimated, for example, the number of unemployed persons in the household.

8. Questionnaire

Details about the questions included in the LFS questionnaire administered by field-staff are presented below. As indicated in Table A, the LFS questionnaire has seven sections, each of which focuses on a particular area of relevance to labour market issues and associated concerns. In total, the questionnaire contains 103 questions.

Table A: Contents of the LFS 11 questionnaire

Section	Details of each section
Cover page	Household information, response details and field staff information
Flap	Particulars of each person in the household (name, age, sex, population group, etc.)
Section 1	Information on marital status, language, migration, education, training, literacy, etc. of each person in the household
Section 2	Activities in the last seven days of all household members aged 15 and above
Section 3	Unemployment and non-economic activities
Section 4	Main work activities in the last seven days
Section 5	Job creation and expanded public works programme in the last six months
Section 6	Agricultural and uncompensated activities in the past seven days
Section 7	Information regarding the household

DATA FILE: PERSON

Unique number (UqNr) (@ 1 14.)
Unique Household Identifier

Note: This is the unique household identifier, which can be used to link data from this file with data for the same household from other files.

Person number (PersonNR) (@15 2.)
Person (respondent) number within Household
Valid range: 1 – 29

Note: The two fields above (unique number and personnr number) create a 16-digit unique person identifier, which can be used to link data from this file with data for the same individuals from other files.

Primary sampling unit (PSU) (@17 8.)
Valid range: 10100002 - 98601041

Province (Prov) (@25 1.)
South African provinces
Derived variable: Derived from the first digit of the Unique Number.

Final code list

- 1 = Western Cape
- 2 = Eastern Cape
- 3 = Northern Cape
- 4 = Free State
- 5 = KwaZulu-Natal
- 6 = North West
- 7 = Gauteng
- 8 = Mpumalanga
- 9 = Limpopo

District council/metro (DC) (@26 14.)

In South Africa there are 53 district councils (DCs) which consist of forty-seven (47) non-metropolitan areas and six (6) metropolitan areas. Of the forty-seven (47) non-metropolitan areas, forty-two (42) of the DCs are confined to a single province (DC 11 and DC41 do not exist). In addition, there are five DCs, which are cross provincial boundaries (CBDC) and are coded CBDC1, CBDC2, CBDC3, CBDC4 and CBDC8. Although DC9 is not classified as CBDC it also crosses provincial boundaries.

Cross-boundary DCs and provinces affected:

Code	DC	Province
CBDC1	Kgalagadi	Northern Cape and North West
CBDC2	Metsweding	Gauteng and Mpumalanga
CBDC3	Sekhukhune cross-boundary	Limpopo and Mpumalanga
CBDC4	Eastern cross-boundary	Limpopo and Mpumalanga
CBDC8	West Rand cross-boundary	Gauteng and North West
DC9	Francis Baard	Northern Cape and North West

Metropolitan Areas (Metro):

Metropolitan areas are conurbations featuring high population density; intense movement of people, goods and services; extensive development; and multiple business districts and industrial areas. There are six metros, as follows:

Cape Town - City of Cape Town

Durban – Ethekewini municipality
 East Rand – Ekurhuleni Metropolitan municipality
 Johannesburg - City of Johannesburg Metropolitan municipality
 Port Elizabeth - Nelson Mandela
 Pretoria – City of Tshwane Metropolitan municipality

Cross-boundary Metro and provinces affected:

Code	DC	Province
Pretoria	City of Tshwane Metropolitan Municipality	Gauteng and North West

Spatial data for these district councils/metro boundaries are available on request.

FLAP

Stayed nights (B_4Night)

(@40 1.)

B.1	<p>Has stayed here for at least four nights on average per week during the last four weeks?</p> <p>1 = Yes 2 = No → End of questions for this person</p>
------------	---

Note to users

This question is asked for each person found in the selected dwelling. Those who are not household members (those who haven't spent at least four nights per week) would be eliminated on the second category (2 = No). The instruction in this question is to end the interview for those who have answered "No" to this question. It is through this question where household members are identified within the selected dwelling.

Universe

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

Final code list

1 = Yes

Stayed in September (B_Sep04)

(@41 1.)

B.2	<p>Was ... part of this household in September 2004?</p> <p>1 = Yes 2 = No</p>
------------	--

Note to users

This question is asked for each person found in the selected dwelling. It seeks to find out if the household members who are present in the household during the survey were also present during the survey conducted in September 2004. It is through this question that permanent household members are identified within the selected dwelling.

Universe

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

Final code list

1 = Yes

2 = No

9 = Unspecified

Gender (Gender)

(@ 42 1.)

C	Is a male or a female? 1 = Male 2 = Female
----------	---

Note to users

This question is asked for all household members, to determine their gender. The enumerators are instructed not to assume the gender of the members of the households by just looking at people’s names or physical appearances. In this instance they have to ask the respondent the gender of each member of the household without any assumptions.

Universe

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

Final code list

- 1 = Male
- 2 = Female
- 9 = Unspecified

Age (Age)

(@43 3.)

D	How old is? (In completed years - In figures only) Less than 1 year = 00.
----------	---

Note to users

This question is asked to find out the age of the household members. This is asked for each member of the household. The instruction is to write the age in completed years to the nearest whole numbers and not in words. Thus if a person is two years and six months, the instruction is to write the two completed years. For children aged less than a year, the instruction is to write 00.

Universe

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

Final code list

- Less than 1 year = 0
- Valid range: 000 – 106
- Unspecified: 999

Age group (Agegrp)

Derived from Age

Final code list

- 01 = 00 - 04 years
- 02 = 05 - 09 years
- 03 = 10 - 14 years
- 04 = 15 - 19 years
- 05 = 20 - 24 years
- 06 = 25 - 29 years
- 07 = 30 - 34 years
- 08 = 35 - 39 years
- 09 = 40 - 44 years
- 10 = 45 - 49 years
- 11 = 50 - 54 years
- 12 = 55 - 59 years
- 13 = 60 - 64 years
- 14 = 65 - 69 years

- 15 = 70 - 74 years
- 16 = 75 - 79 years
- 17 = 80 - 84 years
- 18 = 85 +
- 99 = Unspecified

Population group (Popgrp)

(@48 1.)

E	What population group does belong to?
	1 = African/Black
	2 = Coloured
	3 = Indian/Asian
	4 = White
	5 = Other

Note to users

This question is asked to determine the population group of persons from the selected dwelling. The respondent must answer for each member and the enumerator shouldn't make any assumptions. The enumerator is also instructed not to make any conclusions, which may be influenced by his observation or using people's names during the interview. This question may seem very sensitive to some respondents especially in this post apartheid era, but it is important to find out the composition of the South African population.

Universe

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

Final code list

- 1 = African/Black
- 2 = Coloured
- 3 = Indian/Asian
- 4 = White
- 9 = Other and unspecified

SECTION 1

Marital status (Q11aMari)

(@49 1.)

1.1.a	What is’s present marital status?
	1 = Married
	2 = Living together like husband and wife
	3 = Widow/Widower
	4 = Divorced or Separated
	5 = Never married
	} → <i>Go to Q 1.2</i>

Note to users

This question is about the marital status of the members of the household. There are different kinds of marriages in South Africa, even if a couple is living together as husband and wife they are regarded to be married. Both modern and traditional marriages are considered in this question.

If the response is widow/widower, divorced or separated and never married the enumerator is instructed to go to Q 1.2, which is on language most often spoken at home.

Universe

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

Final code list

- 1 = Married
- 2 = Living together like husband and wife
- 3 = Widow/Widower
- 4 = Divorce or Separated
- 5 = Never married
- 9 = Unspecified

Spouse/partner (Q11bSpou)

(@50 1.)

1.1.b	Does’s spouse/partner live in this household? 1 = Yes 2 = No → <i>Go to Q 1.2</i>
--------------	---

Note to users

This question is only applicable for those people who said “Yes” in (Q 1.1.a), thus “Married or living together as husband and wife”. It is through this question that it will be seen on average, in how many households partners live together.

Universe

Only those people who are married or living together as husband and wife.

Final code list

- 1 = Yes
- 2 = No
- 8 = Not applicable
- 9 = Unspecified

Spouse number (Q11cPsnN)

(@51 2.)

1.1.c	If 1.1.b = 1 Which person is the spouse/partner of? Give person number
--------------	---

Note to users

This question is only applicable for those people who said “Yes” in (Q 1.1.a), thus “Married or living together as husband and wife”. It confirms the information on the previous question, which seeks to determine whether couples within the visited household live together or not.

Universe

Only applicable to those living in partners within the selected dwelling unit.

Final code list

- Valid range: 1 – 22
- Not applicable: 88
- Unspecified: 99

Language (Q12HLang)

(@53 2.)

------------	--

12 = Other, specify

Note to users

This question seeks to determine which language members of the household speak most often at home. South Africa has eleven official languages.

Universe

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

Final code list

- 01 = Afrikaans
- 02 = English
- 03 = Isindebele / South Ndebele / North Ndebele
- 04 = Isixhosa / Xhosa
- 05 = Isizulu / Zulu

--------------	--

Note to users

This question is applicable to all household members. The enumerators are instructed that it is only those qualifications already obtained which must be entered. That means the current level, that a person is still busy with is not applicable. It is very important to complete each record even if the person has not attended school. The enumerators are instructed to record diploma and certificates that are of at least six months duration.

--------------	---

Note for users

This question applies to the people who have diploma, certificate, degree or postgraduate qualifications (Codes 17 – 20 in Q1.3.a). The interest in this question is in establishing the field of study in which the qualifications have been obtained.

Universe

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview with diploma, certificate, degree or post-graduate degree/diploma to the interview.

Final code list

- 01 = Communication studies and language
- 02 = Education, training and development

------------	--

→ *Go to Q 1.7.a*

Note for users

This question seeks to establish how many people have vocational training because of the increased recognition of the importance of this sort of training. Vocational training can help people earn a living either by getting a (better) paying job or by starting their own businesses. The instruction to the interviewer is to go to Q1.7.a if the answer to this question is NO or DON'T KNOW.

Universe

Every person who has stayed in the households in selected dwelling units at least four nights a week in the four weeks prior to the interview.

Final code list

- 1 = Yes
- 2 = No
- 3 = Don't know
- 9 = Unspecified

Length of training (Q15LngTrr)

(@60 2.)

1.5	<p>The last time received this type of training, how long did it last?</p> <p>1 = Less than a week 2 = 1 week 3 = More than 1 week - less than 2 weeks 4 = 2 weeks - less than a month 5 = 1 month - less than 2 months 6 = 2 months - less than 6 months 7 = 6 months or more 8 = Don't know</p>
------------	--

Note for users

The aim of the question is to establish the length of training because some courses provide more skills than others and are of different durations. The length of training is used as a proxy (or indicator) of the value of the course. This question only applies to people who answered, "YES" in Q1.4.

Universe

All household members in selected dwelling units who received skills training.

Final code list

- 1 = Less than a week
- 2 = 1 week
- 3 = More than 1 week – less than 2 weeks
- 4 = 2 weeks – less than a month
- 5 = 1 month – less than 2 months

District council/metro (DC)

(@26 14.)

In South Africa there are 53 district councils (DCs) which consist of forty-seven (47) non-metropolitan areas and six (6) metropolitan areas. Of the forty-seven (47) non-metropolitan areas, forty-two (42) of the DCs are confined to a single province (DC 11 and DC41 do not exist). In addition, there are five DCs, which are cross provincial boundaries (CBDC) and are coded CBDC1, CBDC2, CBDC3, CBDC4 and CBDC8. Although DC9 is not classified as CBDC it also crosses provincial boundaries.

Cross-boundary DCs and provinces affected:

Code	DC	Province
CBDC1	Kgalagadi	Northern Cape and North West
CBDC2	Metsweding	Gauteng and Mpumalanga
CBDC3	Sekhukhune cross-boundary	Limpopo and Mpumalanga
CBDC4	Eastern cross-boundary	Limpopo and Mpumalanga
CBDC8	West Rand cross-boundary	Gauteng and North West
DC9	Francis Baard	Northern Cape and North West

Metropolitan Areas (Metro):

Metropolitan areas are conurbations featuring high population density; intense movement of people, goods and services; extensive development; and multiple business districts and industrial areas. There are six metros, as follows:

- Cape Town - City of Cape Town
- Durban – Ethekewini municipality
- East Rand – Ekurhuleni Metropolitan municipality
- Johannesburg - City of Johannesburg Metropolitan municipality
- Port Elizabeth - Nelson Mandela
- Pretoria – City of Tshwane Metropolitan municipality

Note to users

This question is applicable to all household members aged 15 years and above, regarding their involvement in the economic activities in the seven days prior to the interview. This is part of the questionnaire where there would be a differentiation between economically active population and those who are not economically active. The instruction to the enumerators is that they should consider those activities that lasted for an hour within the seven days. In order to be certain that the categories have been answered there should either be "Yes" or "No" in all of them. Most importantly, is that if there is "Yes" to any part of this question there should be skip to Section 4. If all the categories are "No" there should be a continuation to the next question.

------------	--

Note to users

This is applicable to all household members aged 15 years and above who did not work and did not have a job to return to in the seven days prior to the interview (those with “No” in Q 2.2). The intention of this question is to find out the reasons people were not working in the seven days prior to the interview. For any other reason that is not specified in the given categories there is provision to specify it. However, if the person has found a job and is supposed to start at a definite date in the future, there should be a skip to Q 3.11.

What were its main functions? <i>Examples: Repairing cars, Selling commercial real estate, Sell food wholesale to restaurants, Retail clothing shop, Manufacture electrical appliances, Bar/ restaurant, Primary Education, Delivering newspapers to homes, Transporting goods by rail.</i></p>

Note to users

This question is applicable to household members who have been performing certain economic activities in the seven days prior the interview. It is important that the service or main goods are in English as the industry codes are only in this language. Although a person may have certain roles and responsibilities within the company she/he is working for, the enumerator is instructed to record the main goods or services produced by the company.

Questions 3.14.a and 3.14.b were written-in. The responses were used to determine the industry. The industry was coded to three digits on the basis of the International Standard Industrial Classification of all Economic Activities (ISIC) 1993 (see elsewhere in documentation for codes).

Written contract (Q48WrtnC)

(@115 1.)

4.8	Does have a written contract with the employer? 1 = Yes 2 = No 3 = Don't know
------------	---

Note for users

The question is intended to find out if people involved in economic activities have written contracts with their employers. Most domestic workers have written contracts but they may not know it. The interviewers are instructed to probe and make the respondents understand that even a one-page written agreement regarding their work between themselves and the employers qualifies.

(@117 1.)

4.10	Who pays ? 1 = The establishment/enterprise/individual for which he/she works 2 = A labour broker 3 = A contractor or agency 4 = Other 5 = Don't know
-------------	---

Note for users

This question is intended to test the extent at which workers are being employed indirectly and what type of worker is affected. There are indications that more and more workers are not being employed directly by the main employer at the place where they work. Contract workers are covered by the Basic Conditions of Employment Act (BCEA), but may have different conditions and benefits than directly employed workers.

District council/metro (DC) (@24 14.)

In South Africa there are 53 district councils (DCs) which consist of forty-seven (47) non-metropolitan areas and six (6) metropolitan areas. Of the forty-seven (47) non-metropolitan areas, forty-two (42) of the DCs are confined to a single province (DC 11 and DC41 do not exist). In addition, there are five DCs, which are cross provincial boundaries (CBDC)

and are coded CBDC1, CBDC2, CBDC3, CBDC4 and CBDC8. Although DC9 is not classified as CBDC it also crosses provincial boundaries.

Cross-boundary DCs and provinces affected:

Code	DC	Province
CBDC1	Kgalagadi	Northern Cape and North West
CBDC2	Metsweding	Gauteng and Mpumalanga
CBDC3	Sekhukhune cross-boundary	Limpopo and Mpumalanga
CBDC4	Eastern cross-boundary	Limpopo and Mpumalanga
CBDC8	West Rand cross-boundary	Gauteng and North West
DC9	Francis Baard	Northern Cape and North West

Metropolitan Areas (Metro):

Metropolitan areas are conurbations featuring high population density; intense movement of people, goods and services; extensive development; and multiple business districts and industrial areas. There are six metros, as follows:

- Cape Town - City of Cape Town
- Durban – Ethekewini municipality
- East Rand – Ekurhuleni Metropolitan municipality
- Johannesburg - City of Johannesburg Metropolitan municipality
- Port Elizabeth - Nelson Mandela
- Pretoria – City of Tshwane Metropolitan municipality

Cross-boundary Metro and provinces affected:

Code	DC	Province
Pretoria	City of Tshwane Metropolitan Municipality	Gauteng and North West

Spatial data for these district councils/metro boundaries are available on request.

Note to users

This question is about the dwelling the household occupies. The interest is on the main house and also considers the other dwelling if there is more than one structure that belongs to the household. The instruction to the enumerator is to make sure the respondent understands the kind of information requested. For example the other dwelling cannot exist without the main dwelling while the latter can without the former. For any other material used that is not specified in the given categories, there is a provision for them on code 11, to complete the required information. There should be only one mark for each category.
