# Sampling

## Sampling Procedure

---

The household impact of HIV/AIDS was assessed by means of a cohort study of households affected by the disease. The survey was conducted in two local communities in the Free State province, one urban (Welkom) and one rural (Qwaqwa), in which the HIV/AIDS epidemic is particularly rife. Welkom and Qwaqwa are situated in the Lejweleputswa and Thabo Mofutsanyane districts of the Free State province.

Affected households were sampled purposively via NGOs and other organizations involved in AIDS counselling and care and at baseline included at least one person known to be HIV-positive or known to have died from AIDS in the past six months. Informed consent was obtained from the infected individual(s) or their caregivers (in the case of minors). In order to explore the socio-economic impact on affected households of repeated occurrences of HIV/AIDS-related morbidity or mortality, a distinction is made between affected households in general and affected households that have experienced morbidity or mortality more frequently. Non-affected households represent households living in close proximity to affected households. These households at baseline did not include persons suffering from tuberculosis or pneumonia. The incidence of morbidity and mortality is considerably higher in affected households.

Affected households were sampled purposively via NGOs and other organizations involved in AIDS counselling and care and at baseline included at least one person known to be HIV-positive or known to have died from AIDS in the past six months. Informed consent was obtained from the infected individual(s) or their caregivers (in the case of minors). In order to explore the socio-economic impact on affected households of repeated occurrences of HIV/AIDS-related morbidity or mortality, a distinction is made between affected households in general and affected households that have experienced morbidity or mortality more frequently. Non-affected households represent households living in close proximity to affected households. These households at baseline did not include persons suffering from tuberculosis or pneumonia. The incidence of morbidity and mortality is considerably higher in affected households.

## Response Rate

---

During the first wave of interviews a total of 404 interviews were conducted. During the second wave of data collection, interviews were conducted with 385 households, which translates into an attrition rate of 4.7% (19 households). During wave III, a total of 354 households were interviewed, with 31 households not being reinterviewed (7.7% of the original sample). In wave IV, 55 new households wererecruited into the study, with particular emphasis on an effort to recruit child-headed households into the survey insofar as the sample to date did not include any such households. During waves IV, V and VI a total of 3, 13 and 9 households respectively could not be re-interviewed.

The payment of a minimal participation fee (R150 per household per survey visit) to those households interviewed in each wave, following the interview and distributed in the form of food parcels, contributed to ensuring sustainability of the sample over the three-year period. The dataset includes data for 331 households interviewed in each of the six rounds of interviews. In almost 90 percent of cases the reasons for attrition are related to migration, given that this study did not intend to follow those households that move outside of the two immediate study areas, i.e. Welkom and Qwaqwa. In the majority of cases, attrition can be ascribed to the failure to establish the current whereabouts of the particular household during follow-up, while in a third of cases it could be established that the household had moved to another country, another province, or another town in the Free State province. Less than ten percent of households had refused to participate in subsequent waves. The reasons for attrition in the original sample illustrate the manner in which migration and the disintegration of households, which are important effects of the epidemic, can act to erode the sample population.

wave (v2)

File: Impact of HIV-AIDS 2001-4 Outmigration

#### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 2-6

Valid cases: 0  
Invalid: 0

deflator (2000=100) (deflator)

File: Impact of HIV-AIDS 2001-4 Outmigration

#### Overview

Type: Continuous  
Format: numeric  
Width: 17  
Decimals: 0  
Range: 0.79744815826416-0.930232584476471

Valid cases: 0  
Invalid: 0

study site (v3)

File: Impact of HIV-AIDS 2001-4 Outmigration

#### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 1-37

Valid cases: 0  
Invalid: 0

affected status (qs24)

File: Impact of HIV-AIDS 2001-4 Outmigration

#### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 1-2

Valid cases: 0  
Invalid: 0

revised affected status (affected)

File: Impact of HIV-AIDS 2001-4 Outmigration

#### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 1-3

Valid cases: 0  
Invalid: 0

## relationship to the head of the household (v601)

## File: Impact of HIV-AIDS 2001-4 Outmigration

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 1-99

Valid cases: 0  
 Invalid: 0

## gender (v602)

## File: Impact of HIV-AIDS 2001-4 Outmigration

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 1-9

Valid cases: 0  
 Invalid: 0

## how old is (name)? (v603)

## File: Impact of HIV-AIDS 2001-4 Outmigration

**Overview**

Type: Continuous  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: -1-83

Valid cases: 0  
 Invalid: 0

## marital status (v604)

## File: Impact of HIV-AIDS 2001-4 Outmigration

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 1-8

Valid cases: 0  
 Invalid: 0

## where did (name) go? (v605)

## File: Impact of HIV-AIDS 2001-4 Outmigration

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 1-11

Valid cases: 0  
 Invalid: 0

what was (name's) main reason for leaving? (v606)

File: Impact of HIV-AIDS 2001-4 Outmigration

#### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 1-47

Valid cases: 0  
Invalid: 0

did (name) contribute to the household income, before leaving the household? (v607)

File: Impact of HIV-AIDS 2001-4 Outmigration

#### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: -1-1

Valid cases: 0  
Invalid: 0

if yes, in what way did (name) contribute? (monetary) (v608)

File: Impact of HIV-AIDS 2001-4 Outmigration

#### Overview

Type: Continuous  
Format: numeric  
Width: 4  
Decimals: 0  
Range: -1-4000

Valid cases: 0  
Invalid: 0

if yes, in what way did (name) contribute? (non-monetary) (v609)

File: Impact of HIV-AIDS 2001-4 Outmigration

#### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: -1-3

Valid cases: 0  
Invalid: 0
